Table of Contents
This document provides a list of known problems, useful topics, and links for when you install IBM® Cognos® Analysis for Microsoft Excel®.

To view the latest updates to these Release notes, see the Information Center for this product at http://publib.boulder.ibm.com/infocenter/cfpm/v10r1m0/.

System requirements
To review an up-to-date list of environments supported by the product, such as operating systems, patches, browsers, web servers, directory servers, database servers, and application servers, see www.ibm.com/support/docview.wss?uid=swg27019228.

Installing the product
For instructions on how to install the product, see the IBM® Cognos® Analysis for Microsoft Excel® Installation Guide on the web at http://publib.boulder.ibm.com/infocenter/cfpm/v10r1m0/.

Fix list
The fix list compiles the known issues that were addressed in this release. The fix list for your product name and version is available from the following website:
www.ibm.com/support/docview.wss?uid=swg27019189

Open APARs
You can track problems that are discovered and reported to IBM as a result of a product defect. These APARs (Authorized Program Analysis Reports) remain open until a fix is available.
A list of all open APARs is available from the following website:
www.ibm.com/support/search.wss?apar=only&tc=SS9RTN&sort=desc&word=aw&wfield=open

Known problems
At the time of publication, the following problems and limitations were known.

Installation and configuration issues
No known installation and configuration issues for this release.
General known issues

This section lists the known issues for this release.

Cannot insert a calculated measure in the Measure drop zone in the exploration

A calculated measure that has child measures in the metadata source tree cannot be dragged to the Measure drop zone in the exploration when the Insert Member with Children button is set.

To drag the calculated measure to the Measure drop zone, on the Exploration toolbar, click the Insert Single Member button.

The Exploration toolbar is missing

The Exploration toolbar does not appear when you return to an exploration from another workbook.

To show the Exploration toolbar again, on the IBM Cognos toolbar, click the IBM Cognos button. Clicking this button might hide the IBM Cognos Analysis pane. To show the pane, click the IBM Cognos button again.

General documentation issues

This section contains general documentation issues.

Documentation in PDF format may produce a runtime error when launched

When launching the PDF version of IBM® Cognos® documentation from the HTML help, a runtime error may occur.

To resolve this issue, if you are using the Microsoft® Internet Explorer 6 Web browser, either upgrade your browser to Internet Explorer 7 or Internet Explorer 8 and relaunch the PDF, or open the documentation in HTML format instead.

If you are using Internet Explorer 7 or Internet Explorer 8, relaunch the PDF.

Issues with printing PDFs

If you are unable to print a PDF or some pages are not printing, upgrade your copy of Adobe® Reader to version 9 or later.

Adobe Reader displays corrupted characters in the Bookmarks pane

When viewing documentation with Adobe® Reader version 7, some extended characters (notably the é character) display as dots (.), and the font is different from that used for the rest of the bookmarks.

To resolve this issue, upgrade your copy of Adobe Reader to the latest version.
Chapter 2: Deprecation notices

This section contains information about IBM® Cognos® Analysis for Microsoft® Excel® deprecation notices.

No deprecation notices for this release.
