Release notes updates by date

This section contains cross references to known problems that were added on or after October 19, 2010.

Updated: October 19, 2010

The following release notes update was made on Oct. 19, 2010.

- "SAX parsing error occurs when running migratefroms7 or deployfroms7 command" (p. 7)
IBM Cognos Migration Assistant - Release notes

This document provides a list of known problems, useful topics, and links for working with IBM® Cognos® Business Intelligence products.

For the latest version of this document, see the Information Center for this product at http://publib.boulder.ibm.com/infocenter/cogic/v1r0m0/index.jsp.

System requirements

To review an up-to-date list of environments supported by the product, such as operating systems, patches, browsers, web servers, directory servers, database servers, and application servers, see www.ibm.com/support/docview.wss?uid=swg27019126.

Installing the product

For instructions on how to install the product, see the installation and configuration guides at http://publib.boulder.ibm.com/infocenter/cogic/v1r0m0/index.jsp.

Fix list

The fix list compiles the known issues that were addressed in this release. The fix list for your product name and version is available from the following website:

www.ibm.com/support/docview.wss?uid=swg27019175

Open APARs

You can track problems that are discovered and reported to IBM as a result of a product defect. These APARs (Authorized Program Analysis Reports) remain open until a fix is available.

A list of all open APARs is available from the following website:

www.ibm.com/support/search.wss?apar=only&tc=SS9RTN&sort=desc&word=aw&wfield=open

Known problems

At the time of publication, the following problems and limitations were known.

SAX parsing error occurs when running migratefroms7 or deployfroms7 command

When running the migratefroms7 or deployfroms7 command, the migration session terminates prematurely and a series of exception errors referring to a SAX parsing error are reported.

This problem occurs when the target directory that you specified contains non-English characters.
To work around the problem, use only English characters, digits, and a path separator character for the target directory.
