

Applix TM1 Technical Bulletin

Installing the TM1 Interface for SAP BW

Date: July 7, 2006

Relevant TM1 Versions: 9.0 SP1, SP2

This technical bulletin describes how to install the TM1 interface for SAP BW. The interface is required for accessing SAP BW through TurboIntegrator using remote function calls (RFC).

Installing the Interface

To install the TM1 interface:

1. Obtain the following interface files from Applix.
 - SBT0020216079_0000007.PAT
 - K900014.SBT
 - R900014.SBT

When you purchase a TurboIntegrator license that includes the SAP BW option, you will receive the files on a CD.

2. Copy the above listed files to the \EPS\in directory on the computer that is running SAP BW.

For example, C:\usr\sap\trans\EPS\in.

-
- 
3. Log into the SAP BW server as client 000 with a user having privileges to use the SAINT administration transaction.
 4. Run the SAINT transaction.
 5. Follow the procedures described in the article titled “Installing and Upgrading Add-Ons” in the SAP Knowledge Warehouse.
