

TM1 Technical Bulletin

Using TM1 Web with Browser Navigation Buttons

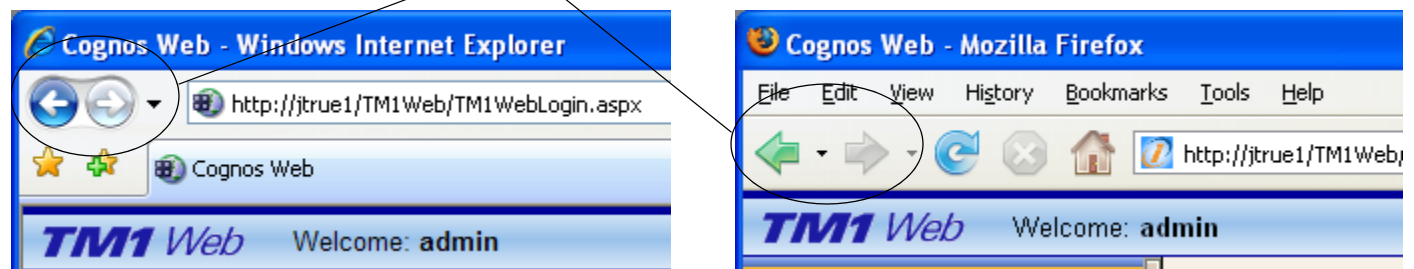

Date: January 7, 2008

Relevant TM1 Versions: All TM1 9 versions, including TM1 9.1 SP3

TM1 Web does not support the use of the Back and Forward buttons in a web browser for navigation. Using these buttons can cause the data in your TM1 Web session to become out of sync with the TM1 server. This behavior is similar to other web-based applications, such as online banking, which post and retrieve data transactions with a remote server.

This applies for all of the web browsers supported by TM1 Web; Internet Explorer 6.x, Internet Explorer 7 and Firefox 2.0.

Navigation buttons in Internet Explorer and Firefox

To avoid data inconsistencies, do *not* use the Back and Forward buttons in your web browser when working in TM1 Web. Instead, use the controls provided in TM1 Web for navigation, such as the Navigation tree, Close buttons and tabs.
