## IBM Systems Director Navigator for i5/OS

IBM® Systems Director Navigator for i5/OS® is a Web console interface for System i® administration where you can work with the Web-enabled tasks of System i Navigator. IBM Systems Director Navigator for i5/OS includes a number of welcome pages that allow you to quickly find the task that you want to perform.

The IBM Systems Director Navigator for i5/OS interface is not just a set of URL addressable tasks, but is a robust Web console from which you can manage your System i model. However, the System i Navigator Tasks on the Web, which are a set of URL-addressable tasks can be accessed by using the URL or from within the IBM Systems Director Navigator for i5/OS interface.

The IBM Systems Director Navigator for i5/OS console contains the following task categories for i5/OS management. These categories are similar to those that you see within the System i Navigator client application.

- **System** (System status, System operator messages, History log, Disk status, Change password, and more.)
- **Basic operations** (Messages, Printers, Printer output, and more.)
- **Work management** (Active jobs, Server jobs, Output queues, Active subsystems, and more.)
- **Configuration and service** (System values, Time management, Disk units, Disk pools, and more.)
- **Network** (TCP/IP servers, Lines, DNS servers, and more.)
- **Integrated server administration** (All virtual disks, Remote systems, Domains, and more.)
- **Security** (Authorization lists, Cryptographic services key management, Intrusion detection, and more.)
- **Users and groups** (Users, Create users, Groups, and more.)
- **Databases** (Performance monitors, Health center, Databases, and more.)
- **Journal management** (Journals, Create a journal, and more.)
- **Performance** (Investigate data and collections, and more.)
- **File systems** (Integrated file system, File shares, Create file share, and more.)
- **Internet configurations** (Digital certificate manager, System i Navigator Tasks on the Web, and more.)
- **Cluster resource services** (Display the list of nodes, Delete the cluster, and more.)

This information is intended to help you start using the Web-based console, IBM Systems Director Navigator for i5/OS, by providing you with tips on how to work with the interface.

### What's new for V6R1

Read about new information for the IBM Systems Director Navigator for i5/OS topic collection.

The IBM Systems Director Navigator for i5/OS is a new topic collection for V6R1.

The IBM Systems Director Navigator for i5/OS is a new Web console interface for System i administration where you can work with the Web-enabled tasks of System i Navigator. However, you can also access the URL-addressable tasks by using the URL or from within the IBM Systems Director Navigator for i5/OS interface.

## Working with IBM Systems Director Navigator for i5/OS

Working with IBM Systems Director Navigator for i5/OS

Learn more about how to use the IBM Systems Director Navigator for i5/OS Web-based console.

### How to see what's new or changed

To help you see where technical changes have been made, the information center uses:

- The  image to mark where new or changed information begins.
- The  image to mark where new or changed information ends.

In PDF files, you might see revision bars (|) in the left margin of new and changed information.

To find other information about what's new or changed this release, see the Memo to users.

## Working with IBM Systems Director Navigator for i5/OS

Working with IBM Systems Director Navigator for i5/OS helps you work with the Web-enabled System i Navigator tasks, which are no longer just a set of URL-addressable tasks. However, URL-addressable access is still available on the System i Navigator tasks on the Web interface.

To work with IBM Systems Director Navigator for i5/OS, follow these steps:

1. Access the following URL from a Web browser where *hostA* is your System i name:  
**http://hostA:2001**
  2. To display a list of i5/OS tasks from the IBM Systems Director Navigator for i5/OS console, expand **i5/OS Management**. Each of the task categories has a Welcome page that has links to the most common tasks.
- 2 System i: Connecting to System i IBM Systems Director Navigator for i5/OS

3. Click **Show All Tasks** at the bottom of the Welcome page to see a list of all the available tasks within that category.
4. Click the task you want to perform, and a new tab opens within the console.
5. Use the tabs to navigate between open pages or to close a specific page. If you open more than five pages, you can scroll to access other tabs.

The **Select Action** menu provides the following actions that you can perform:

#### **Close Page**

You can close the current page.

#### **Add to My Startup Pages**

You can add the current page to the list of pages that are automatically displayed when you log into the console.

#### **Manage Open Pages**

You can close one or more open pages and can navigate to a page.

You can manage a large number of open pages where you can close some open pages and work with the other remaining open pages.

You can use **My Startup Pages** to add or remove pages from the list of pages that are displayed every time you log into the console. You can select which page is opened as the default page. To open one of your startup pages, click the link for that page in the Page name column.

**Note:** If you want to use the URL Wizard to create custom links to System i Navigator tasks, you can access the System i Navigator tasks on the Web home page that was available in previous releases. You can click **i5/OS Tasks** from the IBM Systems Director Navigator for i5/OS console Welcome page and select **System i Navigator tasks on the Web**.
