Chapter 1: Introduction

This document describes the installation procedure for the SmarTeam BPA Advanced Product Quality Planning (AQ9).

This document is divided into the following sections:

- Installing SmarTeam AQ9
- Uninstalling SmarTeam AQ9
- Licensing

Target audience for this document is experienced SmarTeam Administrators, consultants, and/or implementers.

Chapter 2: Prerequisites for Installation

1. Hardware

Based on SMARTEAM WEB Editor. No additional HW requisite added to the ST Product ones

2. Software

- ENOVIA SMARTEAM Editor and WEB Editor R19SP4 (Must)
- ENOVIA SmartTeam Foundation R19SP4
- Microsoft Excel (for reporting)
- PLM DB (if running with Demo database)
- SmartProject BPA (SP9 V5R19SP4)
- ENOVIA SmarTeam Workflow - optional

3. Operating system

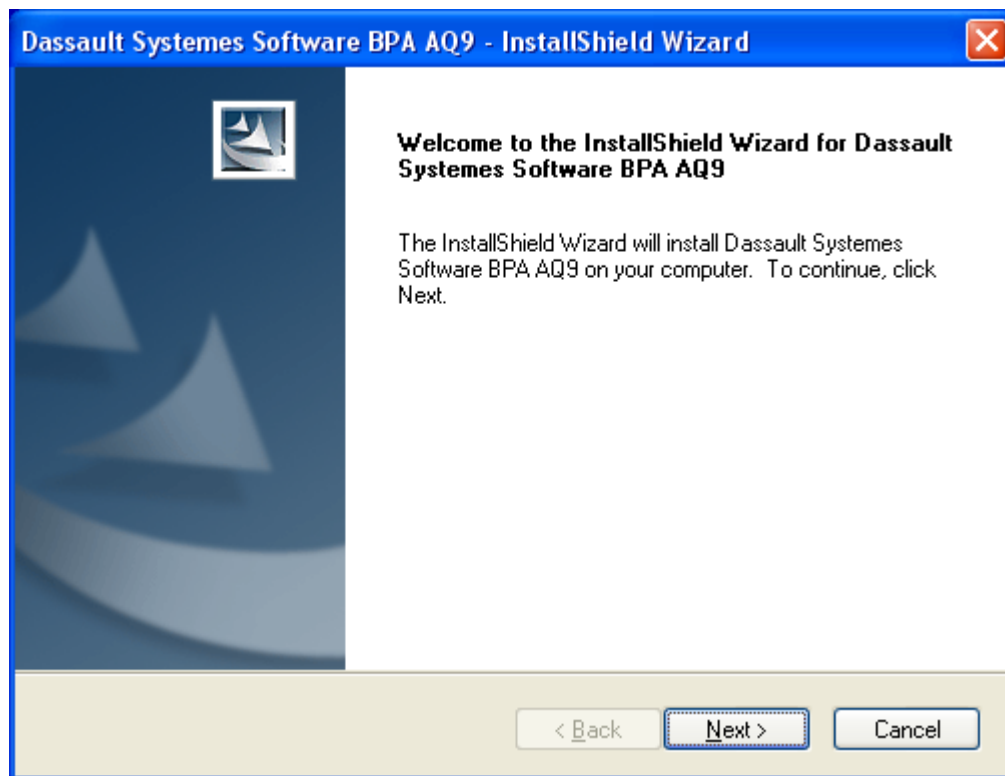

Microsoft Windows Server 2003 SP2

Chapter 3: Installation of AQ9

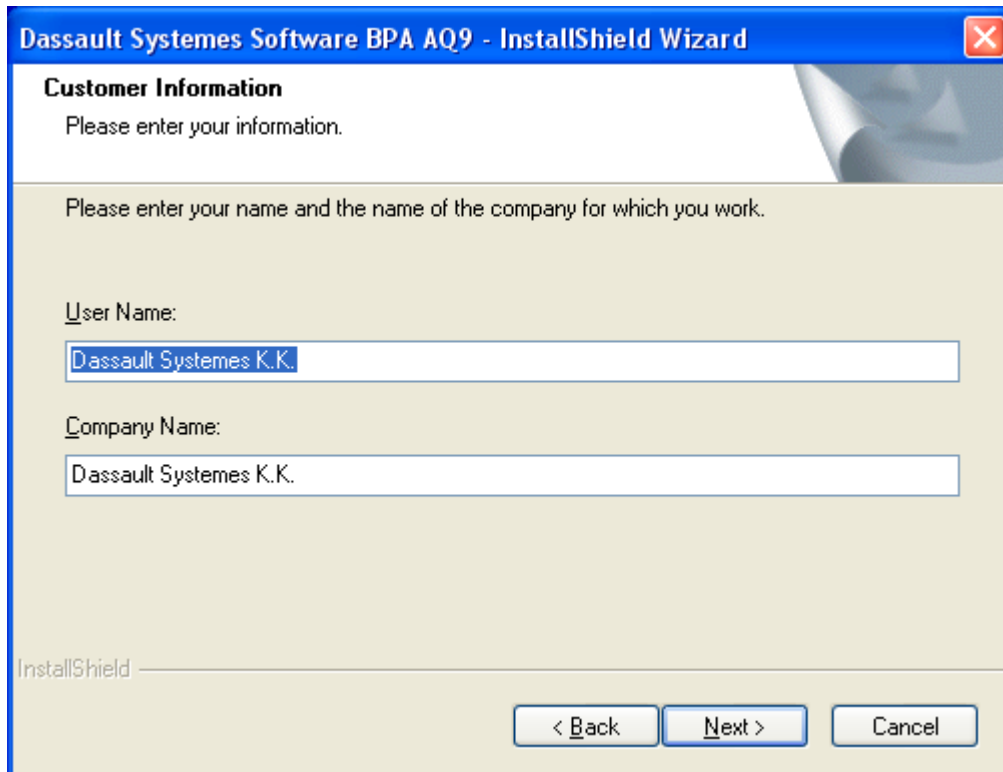

Launch the setup.exe file contained in the zip file

The following window will appear and disappear once the preparing step is done.

At the end, the following window appears, if AQ9 is not installed on the computer yet

Click on Next button

Dassault Systemes Software BPA AQ9 - InstallShield Wizard

InstallShield

< Back Next > Cancel

Enter your user name and company name. Click on Next Button

Dassault Systemes Software BPA AQ9 - InstallShield Wizard

Setup Type
Select the setup type to install.

Please select a setup type.

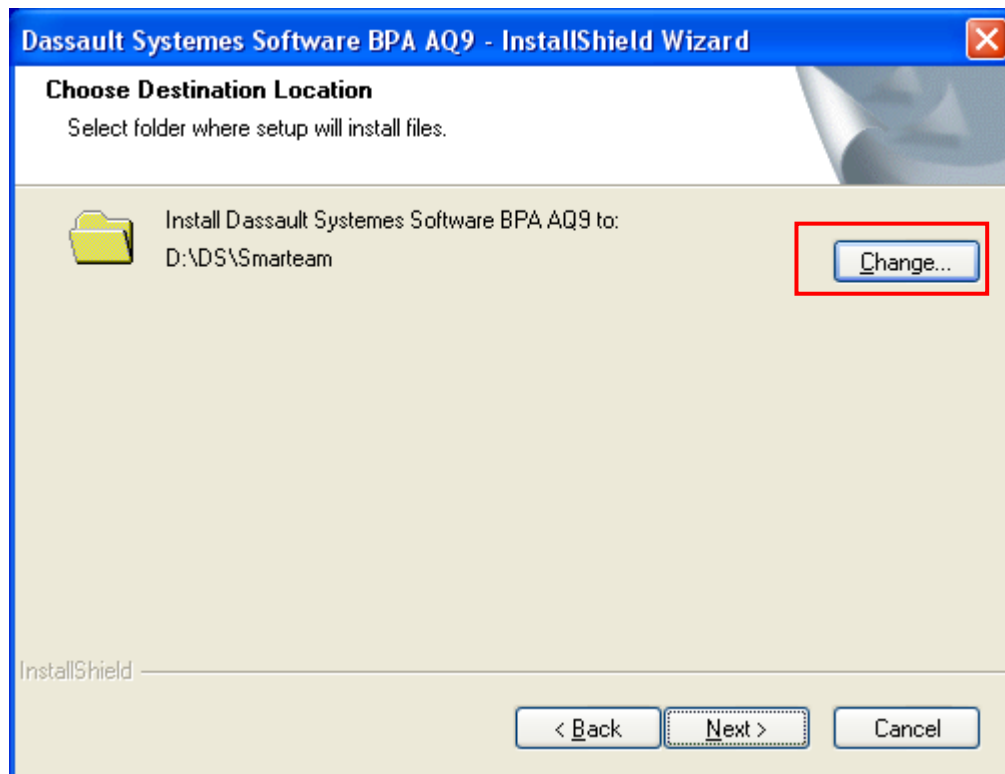

☐ Complete
All program features will be installed. (Requires the most disk space.)

☒ Custom
Select which program features you want installed. Recommended for advanced users.

InstallShield

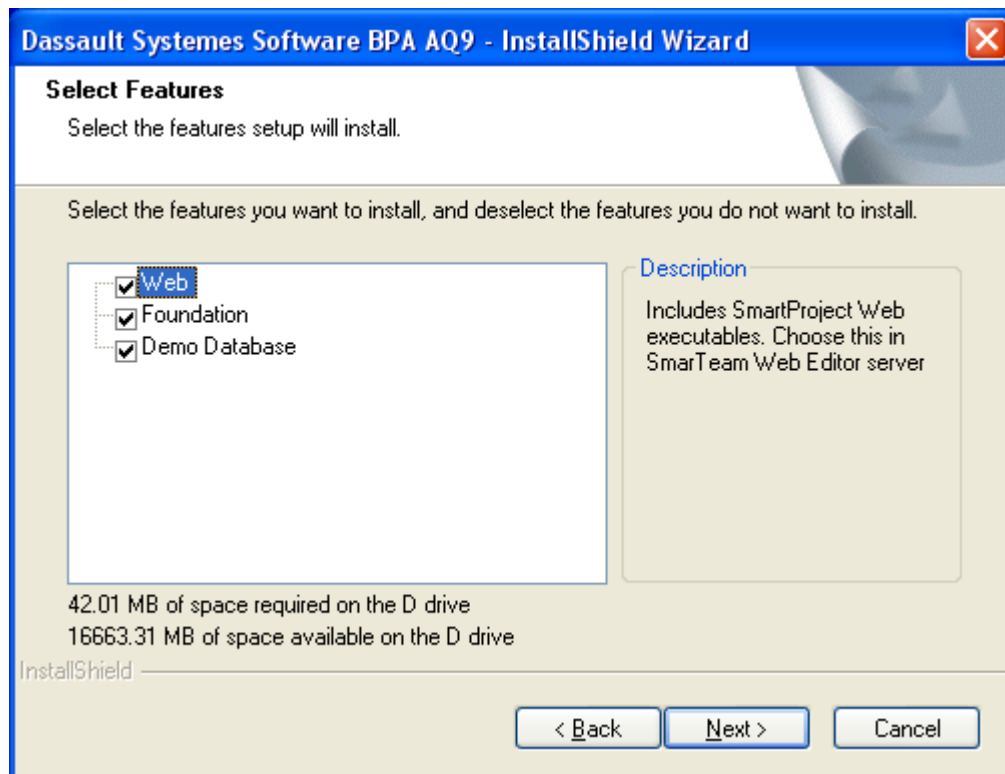

< Back Next > Cancel

If you select “complete”, it will install the full solution in the SMARTEAM installation directory. We recommend selecting “Custom”. Click on Next

Enter SmarTeam directory to install, select OK and Next

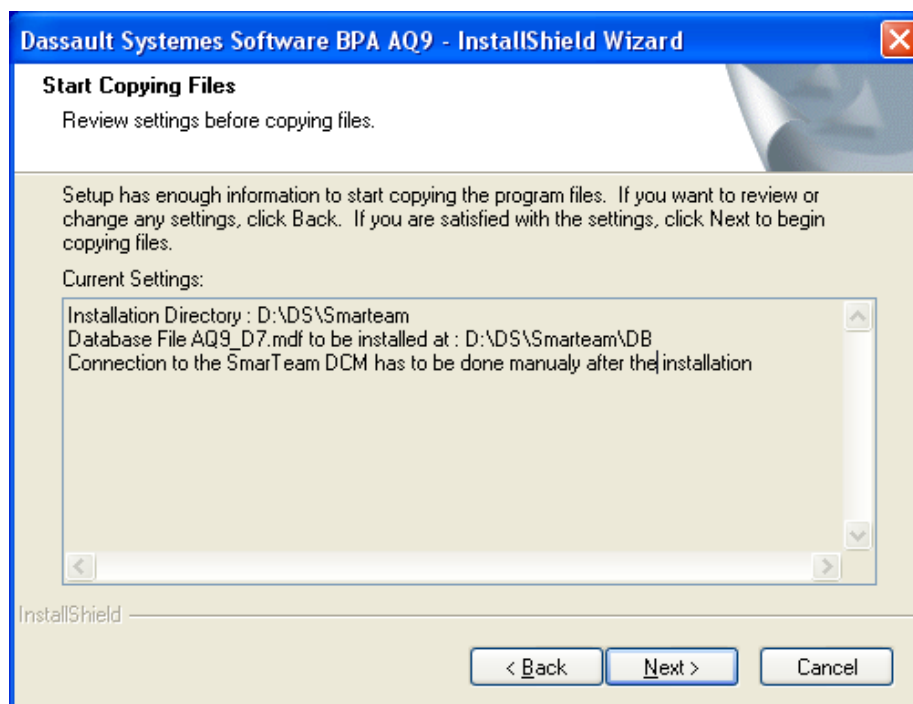

Meaning of the bullets:

Web Application: AQ9 Executables

Foundation: Configuration of XML and NLS files.

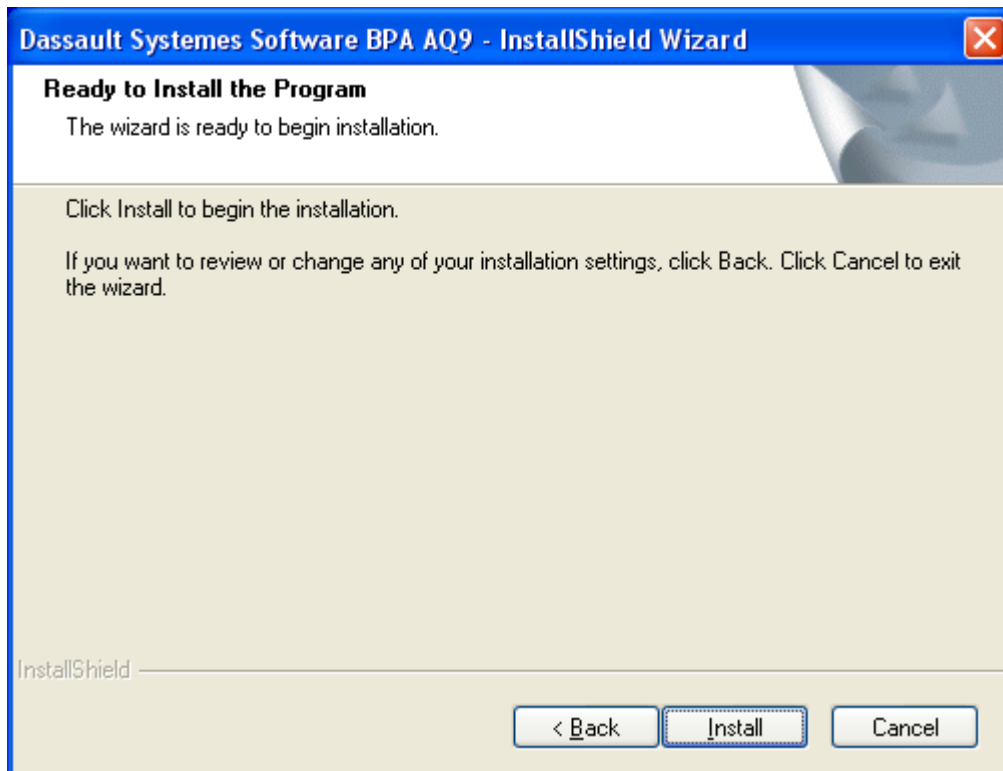

Demo Database: Install the empty demo database, already configured to run AQ9

Select what you want to install and click on Next.

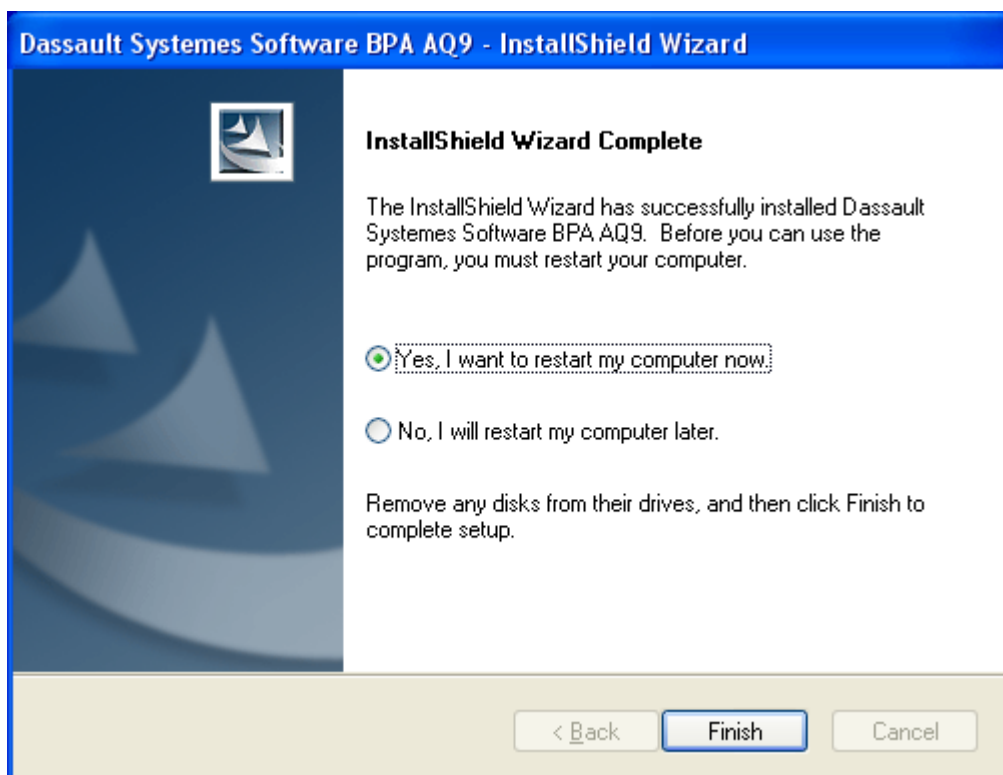

Click on Yes.

Click on Install

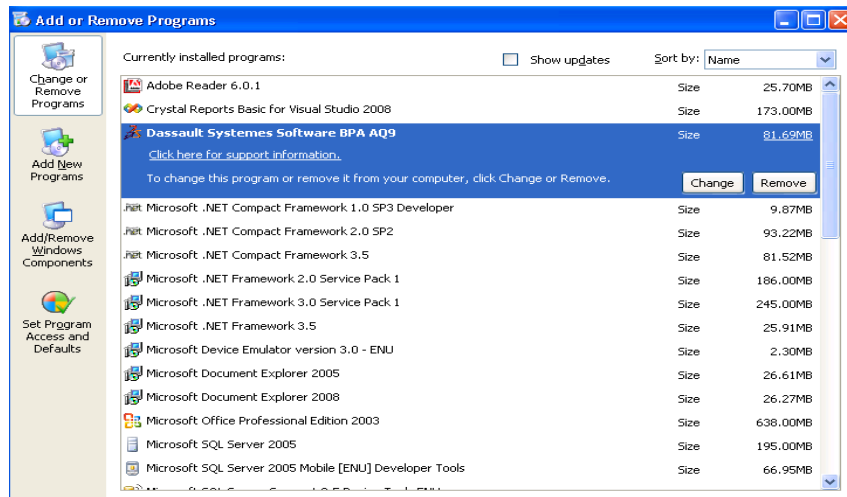

Once the installation is done, the following window appears:

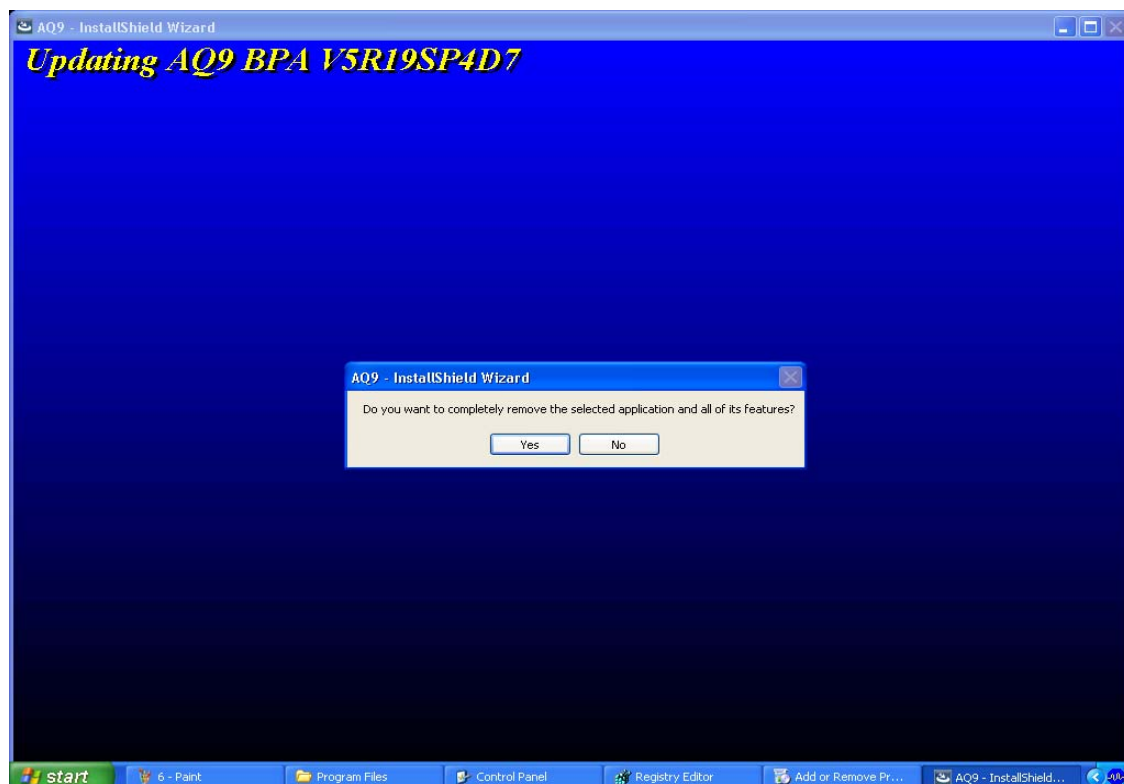

Click on Finish to complete the setup.

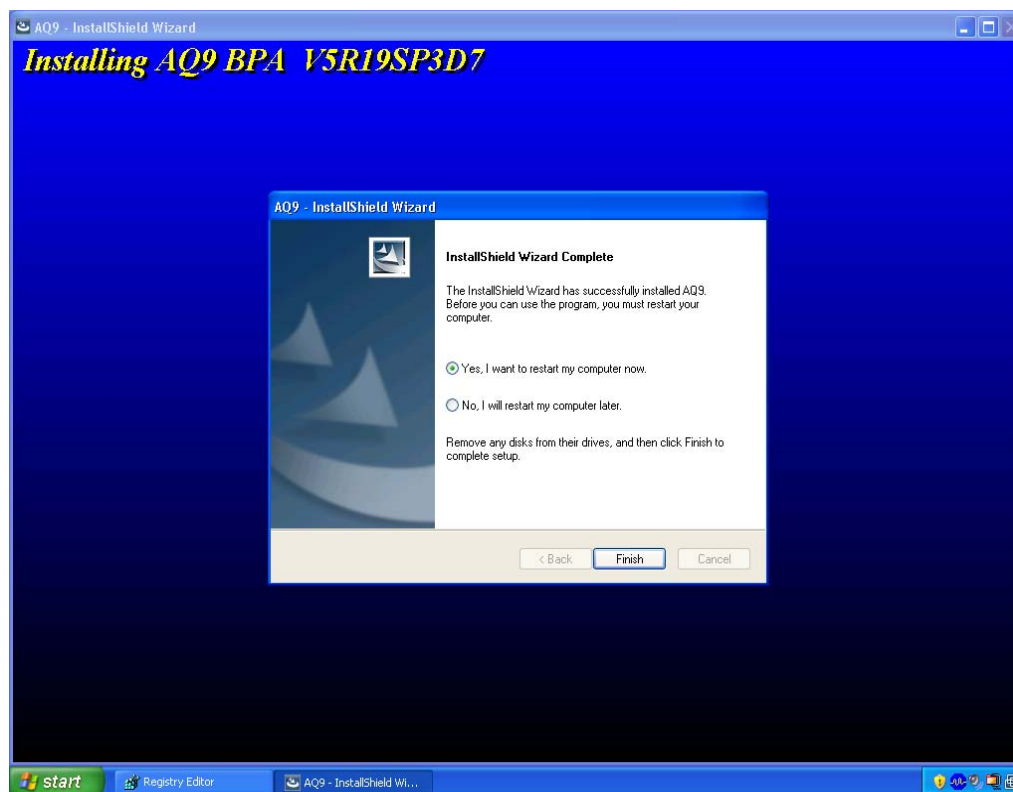

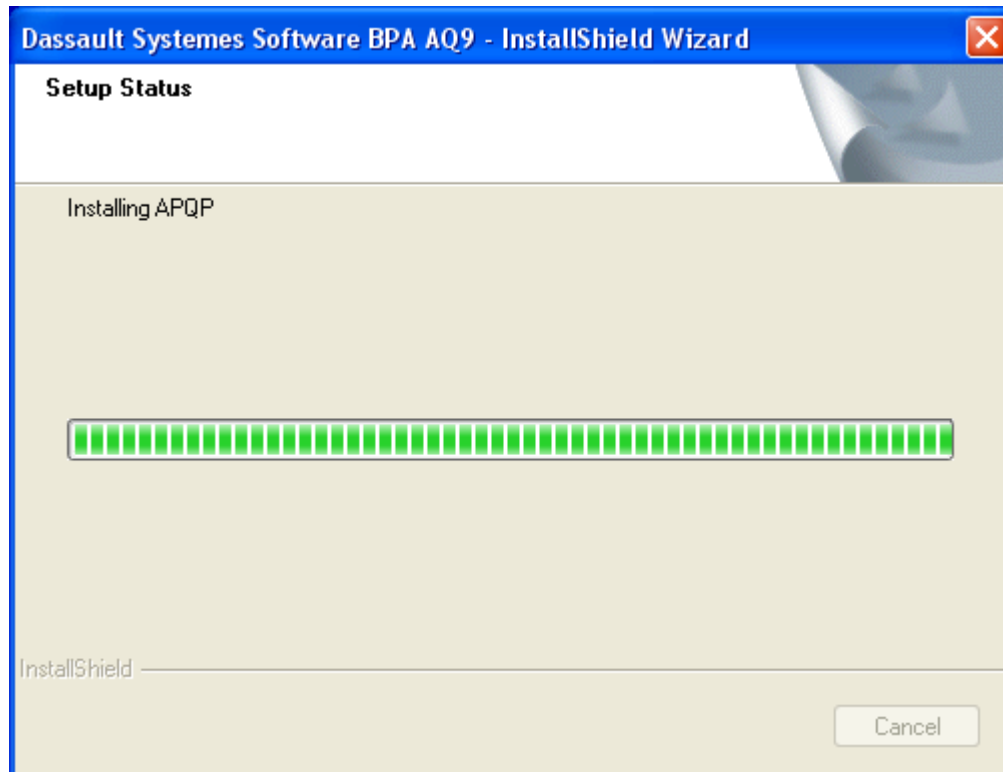

Chapter 4: Uninstall of AQ9

To uninstall the application, launch “control Panel” / “add or remove programs” command:

Select Remove: the following screen appears and then quickly disappears automatically.

Click on Finish.

Reminder: this doesn't detach or delete any database.

Licensing Mechanism

Ask for a license and copy or enroll licenses as per following.

Software Requirements:

- The license server should have LUM 4.6.8.3 or above installed.

To ask a license, the following information must be provided:

- Product Name: This is the BPA trigram.
- License Type: nodelock or concurrent.
- Number of License: 1 for nodelock , >0 for Concurrent
- LUM targetID: Provide the target id (run i4target in a DOS window)
 - On Client side for Nodelock
 - On Server side for Concurrent

On receiving the license:

- For Nodelock type of license
 - Modify/ Create Nodelock file by inserting necessary information (VendorID, ProductPassword) - See Appendix A
- For Concurrent type of license
 - Enroll the license on the LUM server - See Appendix B

Appendix A : Creating a Nodelock file

Nodelock file : how to proceed

You should input yourself the parameters of your License into the nodelock file (create it if **doesn't exist**)

- This file is located in C:\Documents and Settings\All Users\Application Data\IBM\LUM\nodelock
- You should extract from the .lic file the following informations :
 - VendorID (looks like an UUID)
 - ProductPassword (a crypted key)
 - ProductAnnotation (should be unset)
 - ProductVersion (should be set to 1)
- And insert them in nodelock file by respecting the order
 - *# comment : put your BPA trigram and its range date*
 - *vendorID ProductPassword ProductAnnotation ProductVersion*

Appendix B : Enrolling a Concurrent license on the Network license server

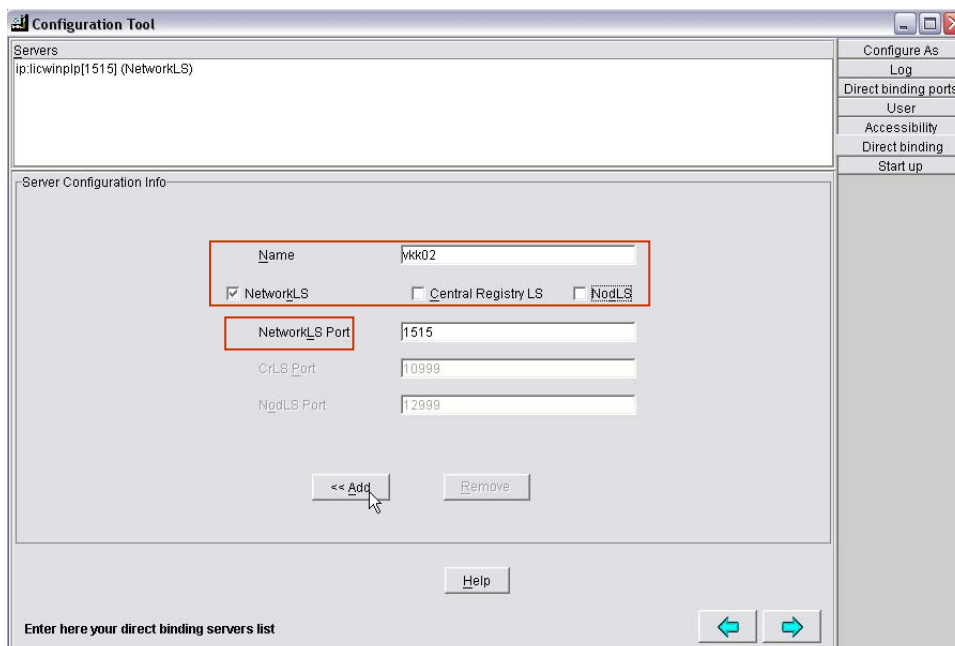

Setting up the Network License server:

Start > Programs> License Use Runtime > Configuration tool

- Stop the service if needed using the Service Manager Tool.
- Ensure that the option for Network License Server is selected

- Switch to the Direct Binding tab.
- In the Name field enter the machine name
- Check the box for NetworkLS and click on Add button

- Close the Configuration Tool window and validate accepting the changes

- Pass the message to restart the service (if previously it was stopped)

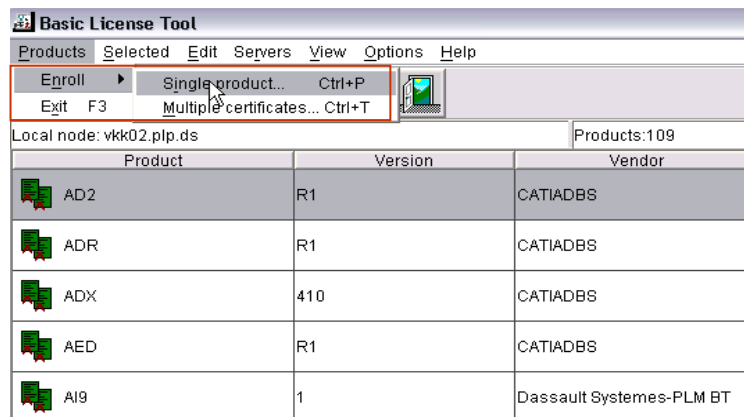

Service Manager Tool			
Service	Selected	Options	Help
Name	Status	Description	
i4LLMD.EXE	Started	Nodelock License Server	
i4LMD.EXE	Started	Network License Server	

Enrolling the Concurrent License

Start > Programs> License Use Runtime > Basic License Tool

- Select Product / Enroll/
 - Choose sub menu depending on whether you want to enroll a single or multiple licenses at a time.

- Click on Import button
