D7 SP9

What's new

It is now possible to add extra attribute for **node parts**. For that one combo is provided. Attribute selected in that **must be** mapped to C_MATURITY (for instance) in CATIA V5 mapping settings.

Closed issues

The Service Pack 9 fixes the following bug:

Ref	Abstract
PMR 64565660706	Enhancement to display an additional attribute (Maturity)

Known limitations

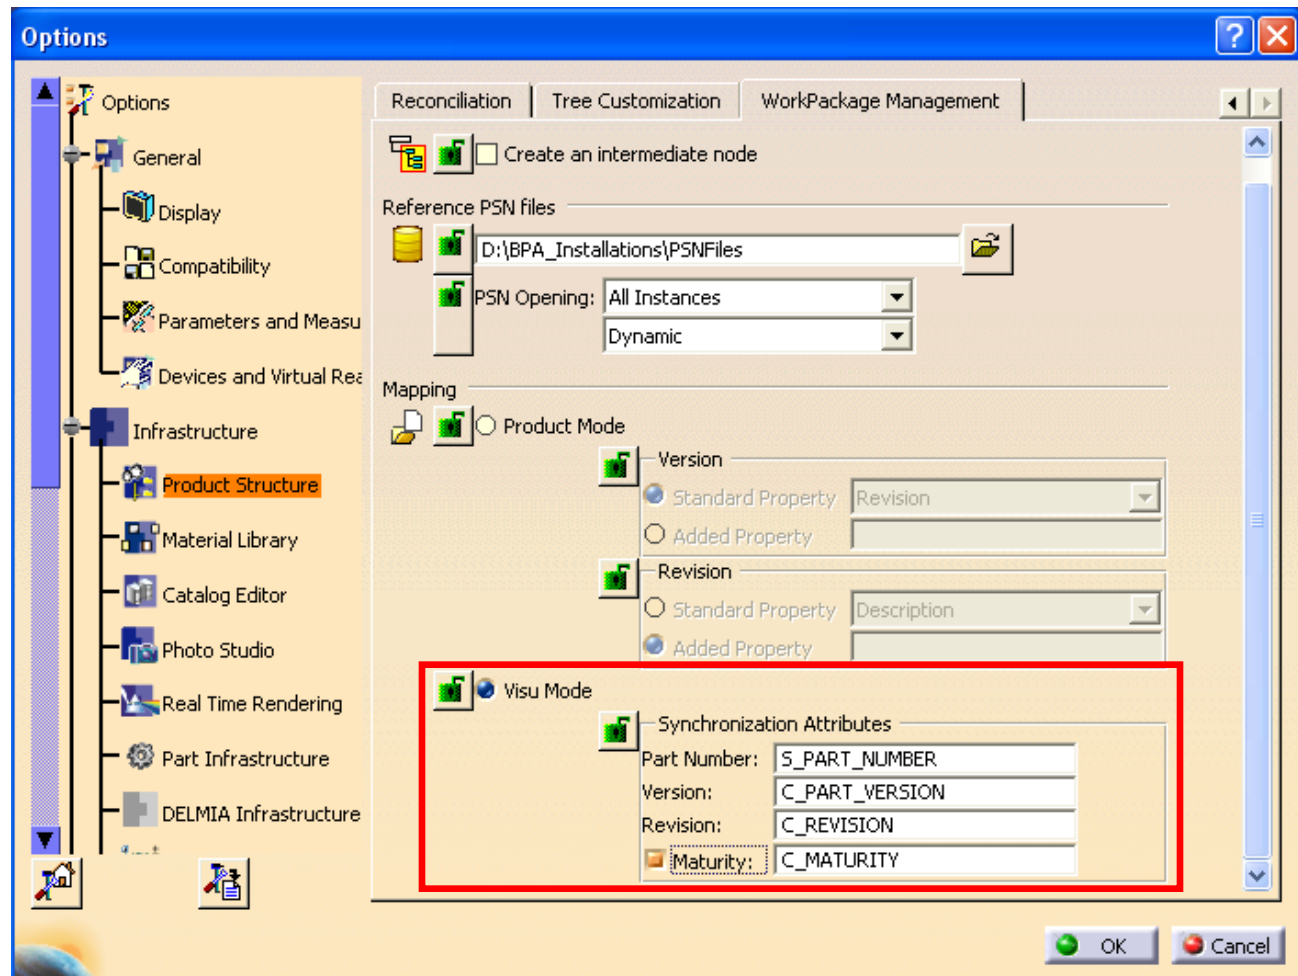

The command "Highlight in PSN" does not work in 3DCOM, because of a limitation in CATIA V5. This functionality is available from R20GA but a HotFix can be asked on a lower level.

D7 SP8

What's new

It is now possible to bypass the switch in Product Mode by defining the attributes used in VPM, through the Settings panel. This can greatly increase the performances of the synchronization.

And it is also possible to add additional information to be displayed in the synchronization panel, like the maturity for instance:

Closed issues

The Service Pack 8 fixes the following bug:

Ref	Abstract
PMR 64659660706	Performance issue in Product Mode

Known limitations

The command "Highlight in PSN" does not work in 3DCOM, because of a limitation in CATIA V5. This functionality is available from R20GA but a HotFix can be asked on a lower level.

D7 SP7

What's new

Closed issues

The Service Pack 7 fixes the following bug:

Ref	Abstract
PMR 26487646706	Switch to PRODUCT mode is done on all components of the workpackage

Known limitations

The command "Highlight in PSN" does not work in 3DCOM, because of a limitation in CATIA V5. This functionality is available from R20GA but a HotFix can be asked on a lower level.
