# ***Introduction***

---

This document describes the installation procedure for the BPA DS9 at Supplier Site.

Pre-requisites:

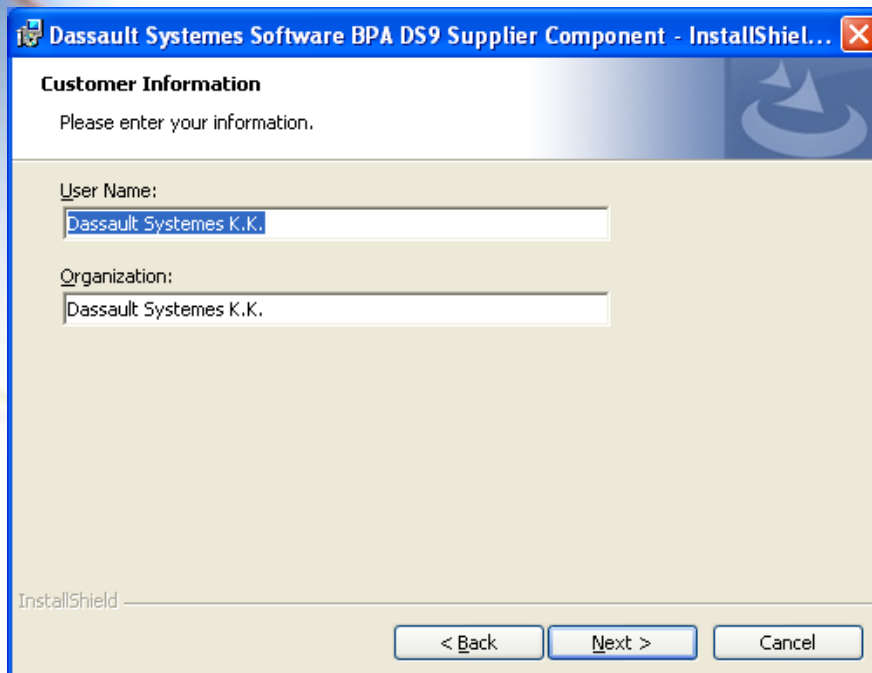

- ✓ Microsoft® Windows XP Professional 32/64 bit – Service Pack 3.
- ✓ CATIA or DELMIA V5R20SP1

# DS9 Supplier Installation

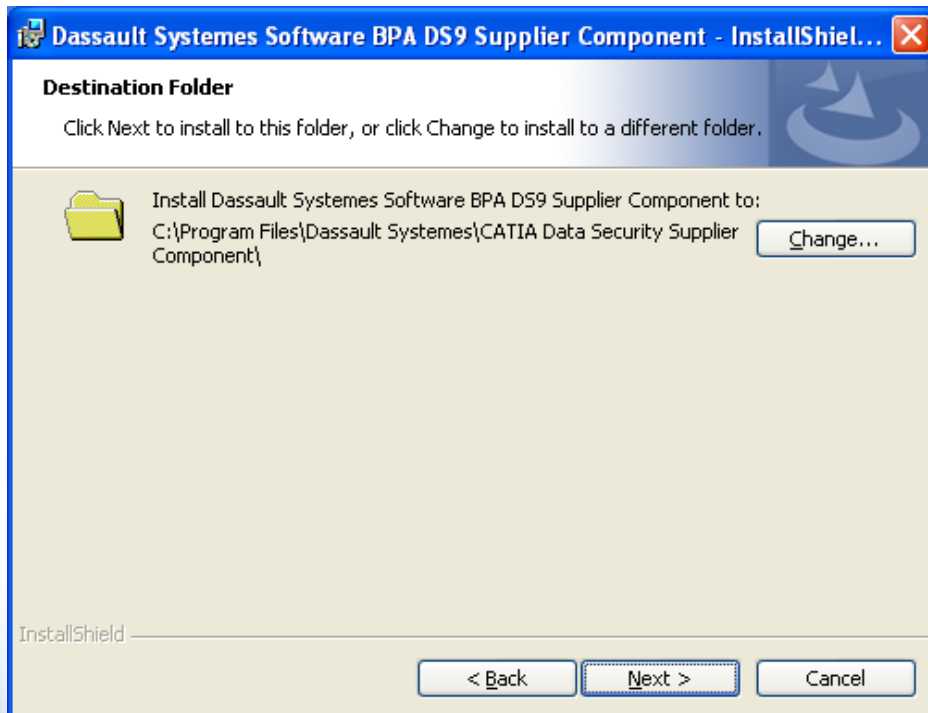

1. Launch setup.exe

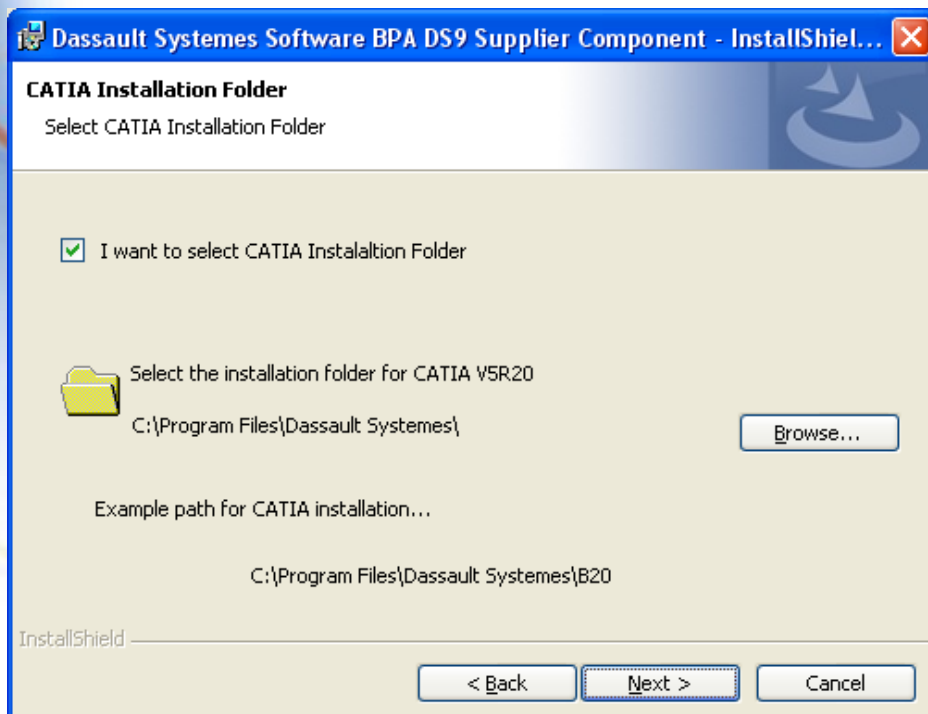

2. Click "Next"

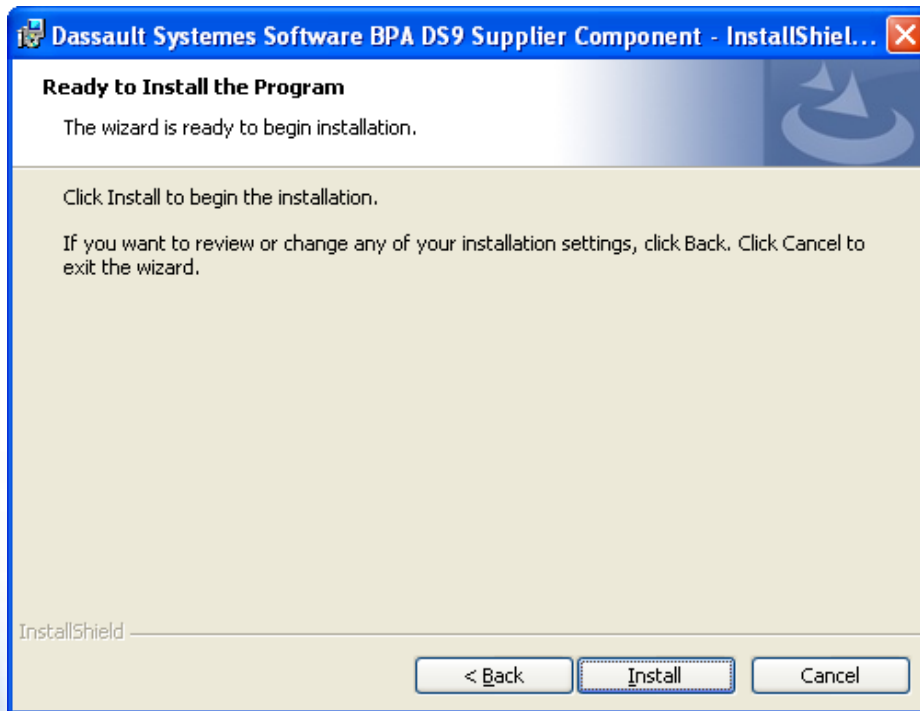

3. Enter you User Name and Organization, then click "Next"

4. A default installation folder is proposed. Click “Change” to install at another location. Then click “Next”

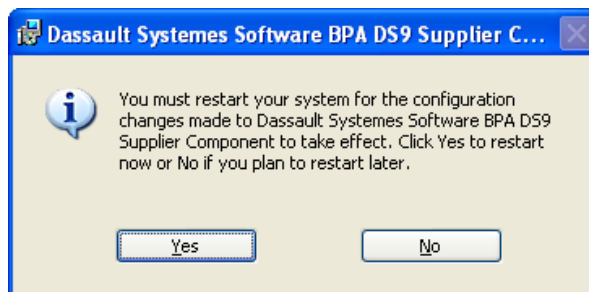

5. Indicate the installation path of CATIA (or DELMIA). The Installer proposes a path, click “Next” if it is correct, or “Browse” to select another path. Then click “Next”.  
If CATIA or DELMIA is not installed on the machine, uncheck “I want to select CATIA Installation Folder”.

6. Click "Install"

7. Click "Finish"

8. Click "Yes" to restart now or "No" to restart later

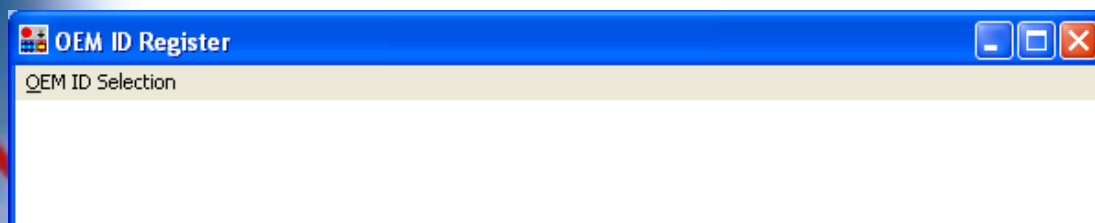

### New environment

The installer will create a new environment "DS9 SUPP" and a shortcut "DS9 Crypter" on the desktop. If CATIA or DELMIA directory has not been selected, only the shortcut "DS9 Crypter" will be created.

### Additional operation to perform:

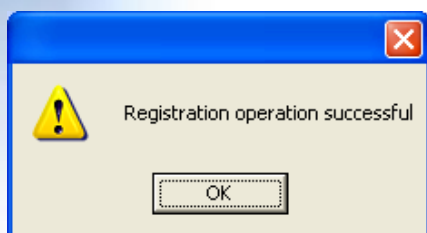

In order to decrypt data from a specific OEM, you need to register the ID Key you received from this OEM. To do so, please launch the application ISPDS9IDRegister.exe which is located in the DS9 Supplier installation folder.

This operation can be performed multiple times, to allow a supplier to work with different OEMs (in separate sessions, of course).

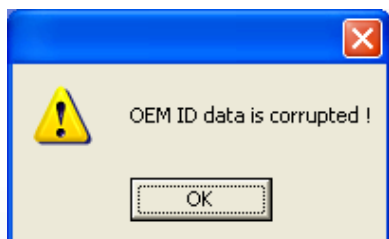

- ✓ Select OEM ID selection / open
- ✓ Select the text file containing the ID Key and click OK.

When the key is correctly registered, the following message appears:

The message below indicates that the ID Key could not be successfully registered. If it appears, please contact your reseller for support.

# Un-installing the DS9 Supplier application

Un-installation must be run from the Control Panel -> Add or Remove Programs  
Select the *Dassault Systemes Software BPA DS9 Supplier Component* application, and click on "Remove"
