Introduction

This document describes the installation procedure for the BPA DS9 at OEM Site.

Pre-requisites:

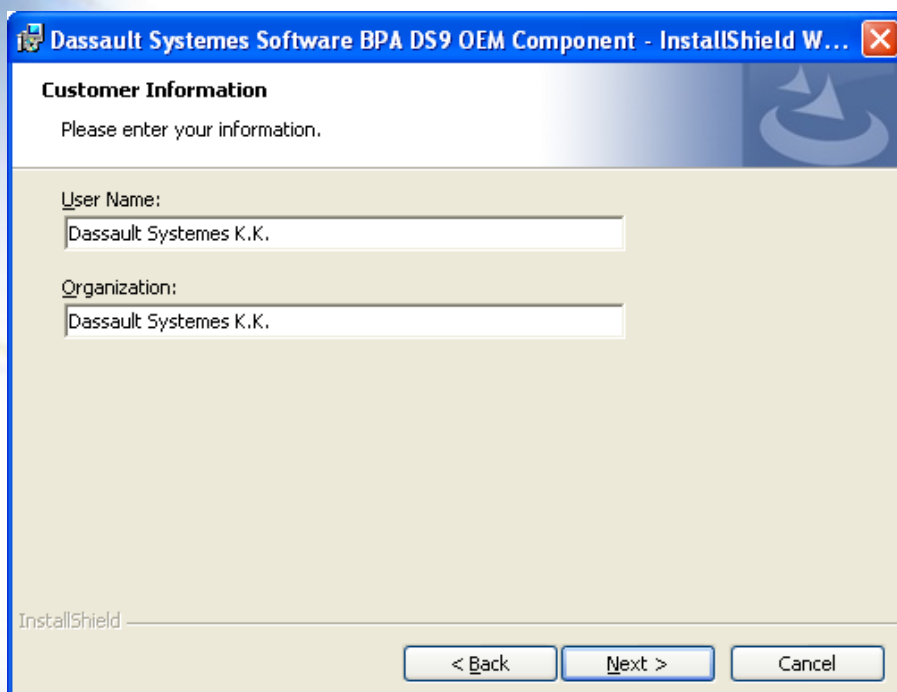

- ✓ Microsoft® Windows XP Professional 32/64 bit – Service Pack 3
- ✓ CATIA or DELMIA V5R20SP1

DS9 OEM Installation

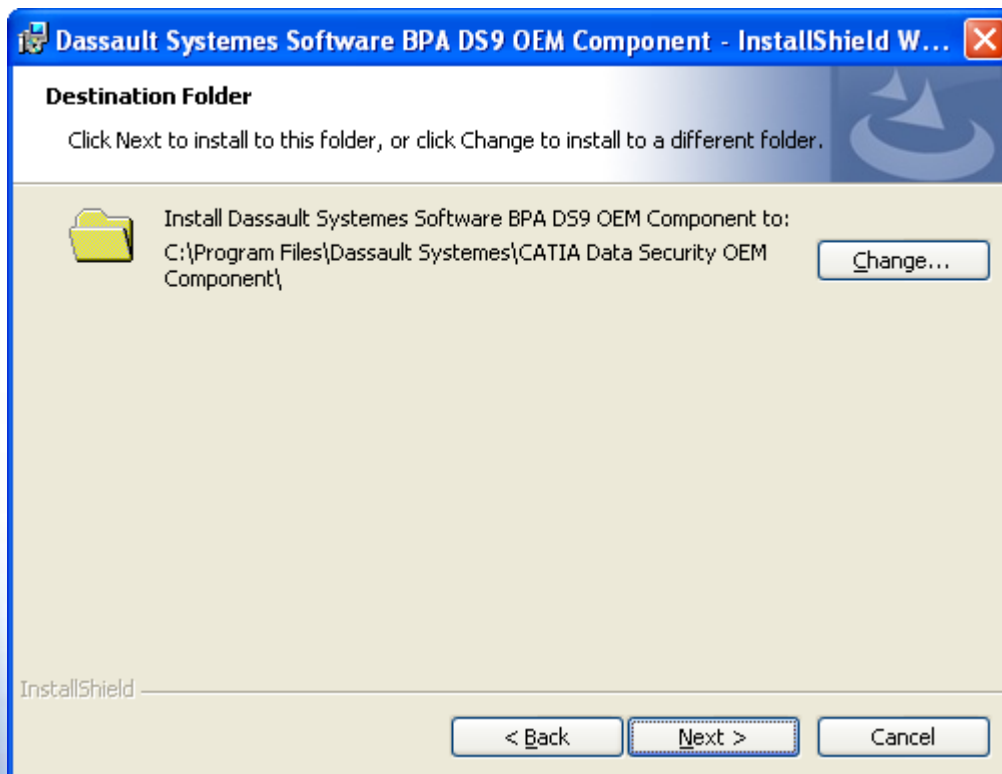

1. Launch setup.exe

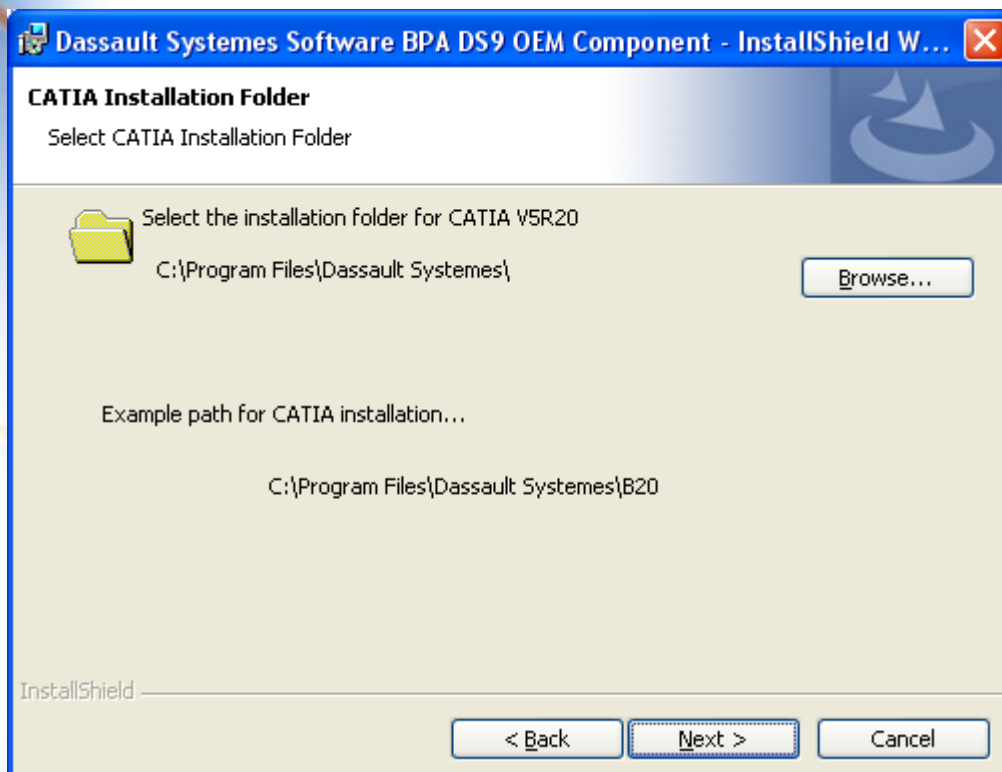

2. Click "Next"

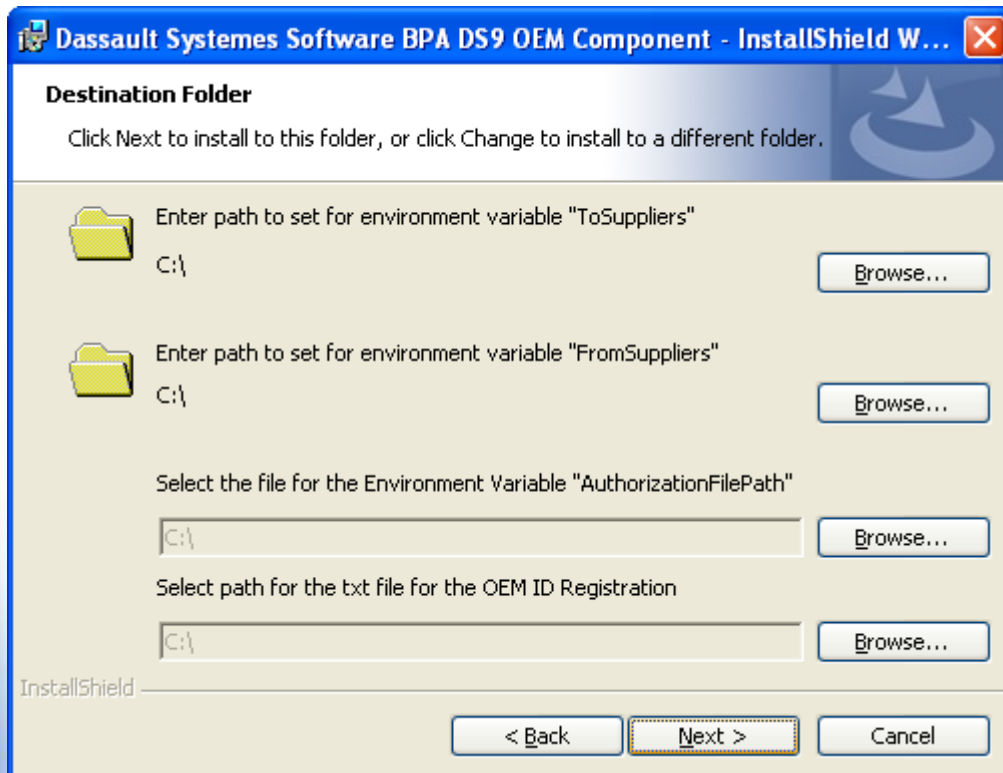

3. Enter your User Name and Organization, then click "Next"

4. A default installation folder is proposed. Click "Change" to install at another location. Then click "Next"

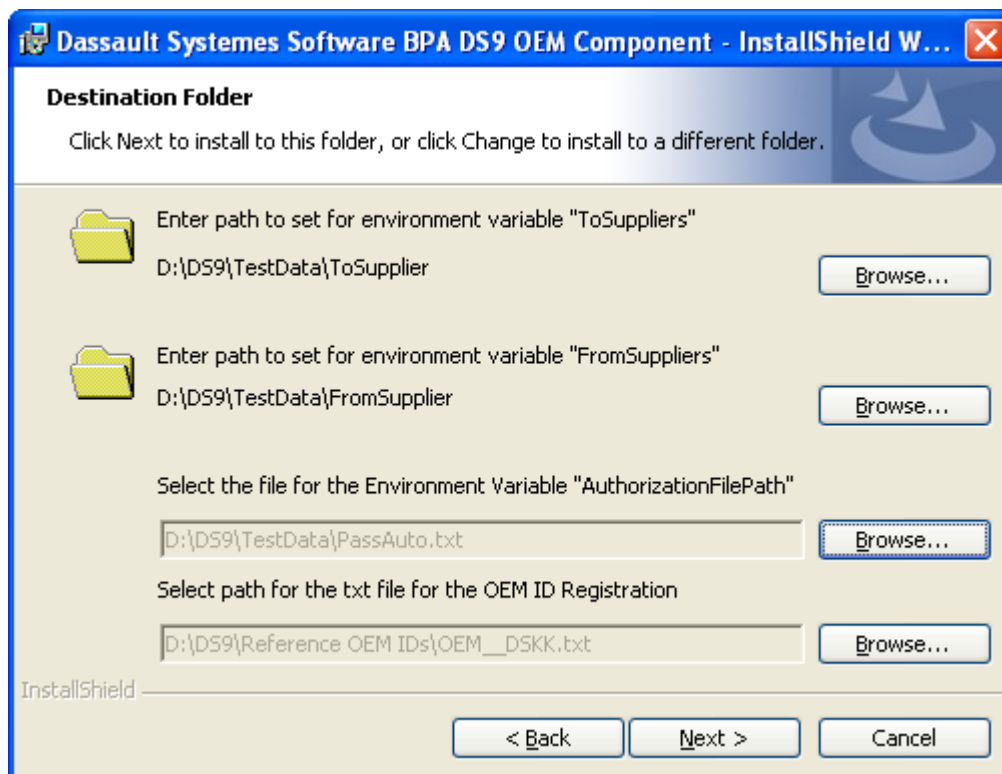

5. Indicate the installation path of CATIA (or DELMIA). The Installer proposes a path, click "Next" if it is correct, or "Browse" to select another path. Then click "Next".

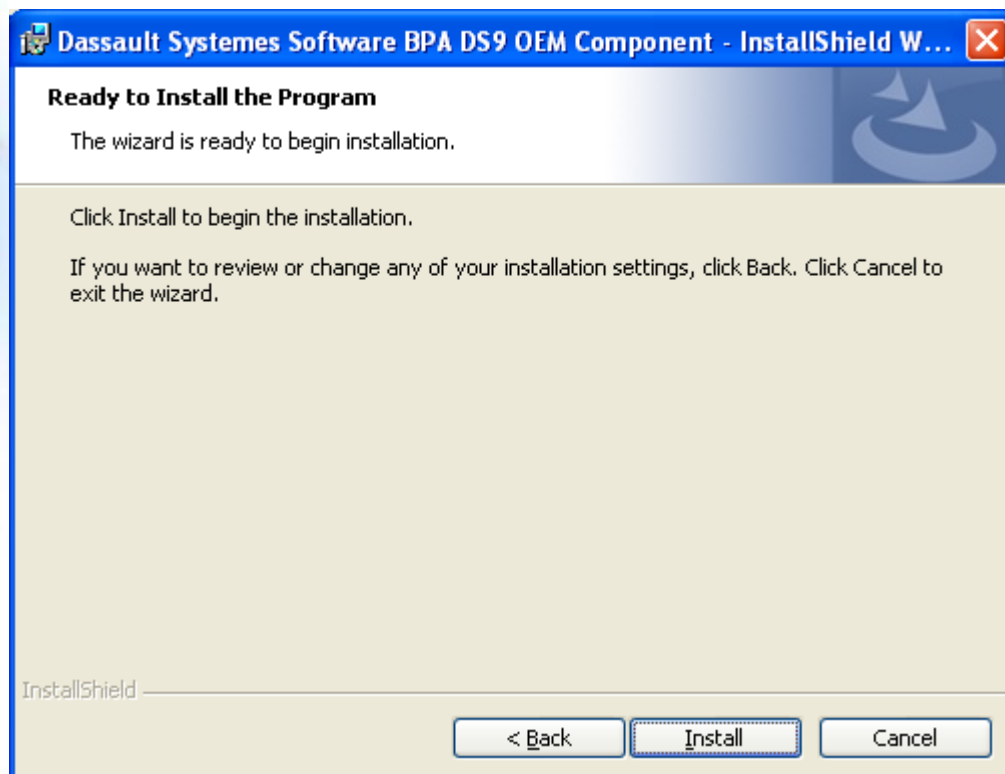

Setting the Environment Variables – DS9 stores common information between sessions in Environment Variables. This step of the installation allows easy setting.

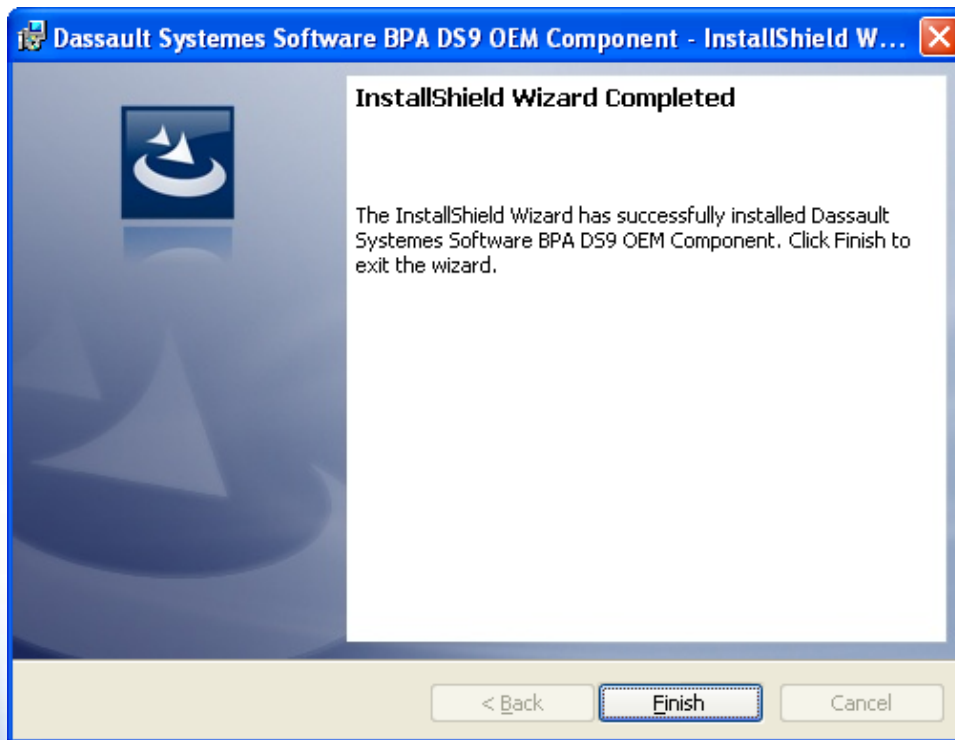

6. "ToSuppliers" indicates the Target Directory (under which encrypted files will be stored) at Export time. Click "Browse" to select it.
7. "FromSuppliers" indicates the Source Directory (under which encrypted files will be read) at Import time. Click "Browse" to select it.
8. "AuthorizationFilePath" points to a text file in which the login/password information (used in the Export command panel) is stored. Click "Browse" and select the file. It can be an empty, new file.
9. The last item is to register the OEM key. Click Browse and select the OEM Key file you received from Dassault Systems

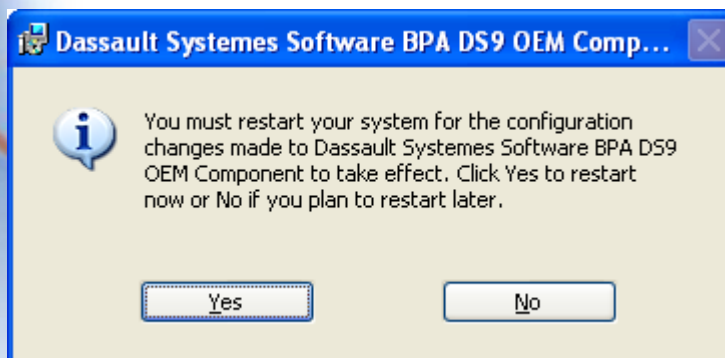

10. When the 4 fields have been correctly input, click “Next”

11. Click “Install”

12. Click "Finish"

13. Click "Yes" to restart now or "No" to restart later.

New environment

The installer will create a new environment, DS9_OEM, on the desktop. It will create as well 3 variables in the file DS9_OEM.txt:

- **"ToSuppliers"**: Set the value of the path to a folder where all data for suppliers will be stored automatically after export.
- **"FromSuppliers"**: Set the value of the path to a folder where all data from supplier should be manually stored before importing them.
- **"AuthorizationFilePath"**: Set the value of the full path to a text file storing the login and encrypted password

These variables can be modified manually by administrator if needed.

Un-installing the DS9 OEM application

Un-installation must be run from the Control Panel -> Add or Remove Programs
Select the *Dassault Systemes Software BPA DS9 OEM Component* application, and click on "Remove"
