

Manufacturing Change Management (MCM)

Installation and Preparation

The availability of Manufacturing Change Management (MCM) is controlled by a separate license. You must have this license installed to open a project which is Change Management (CMC) controlled.

The installation procedure for Manufacturing Change Management consists of 3 parts :

1. preparation of ENOVIA for Common Change Management
2. installation and preparation of IPD Web Services for communication between ENOVIA and IPD
3. customize Manufacturing Hub

Parts 1 and 2 are only necessary if MCM should work integrated with ENOVIA Change Management.

Preparation of ENOVIA

See the following ENOVIA manual:

LCA Administration Guide: Common Change management set up

Installation and preparation of IPD Web Services

Customize Manufacturing Hub
