# *Introduction*

---

This document describes the installation procedure for the BPA DS9 at OEM Site.

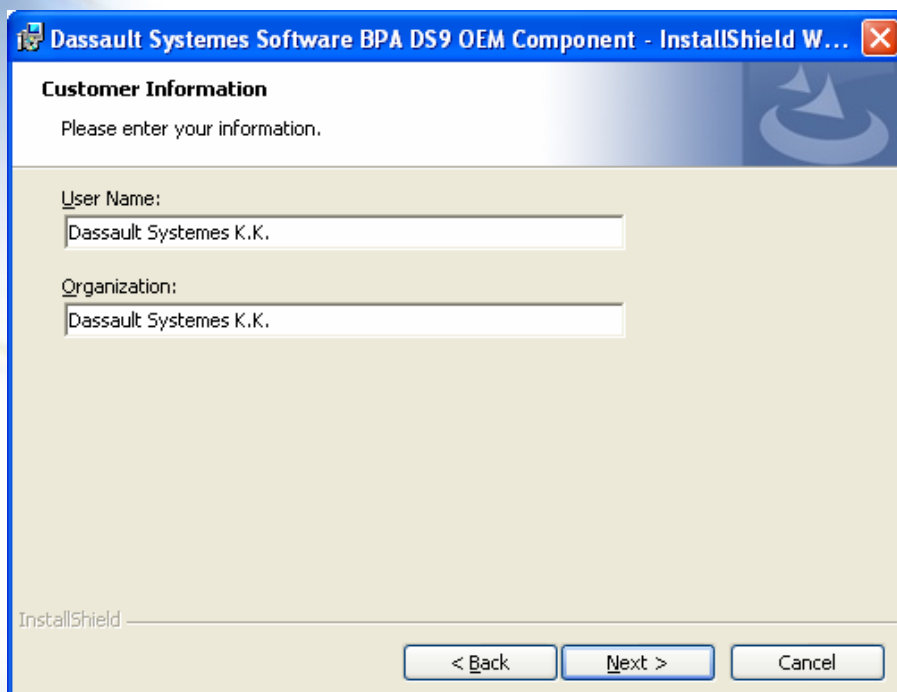

Note: this BPA works on Microsoft® Windows XP Professional 32/64 bit – Service Pack 2.

# DS9 OEM Installation

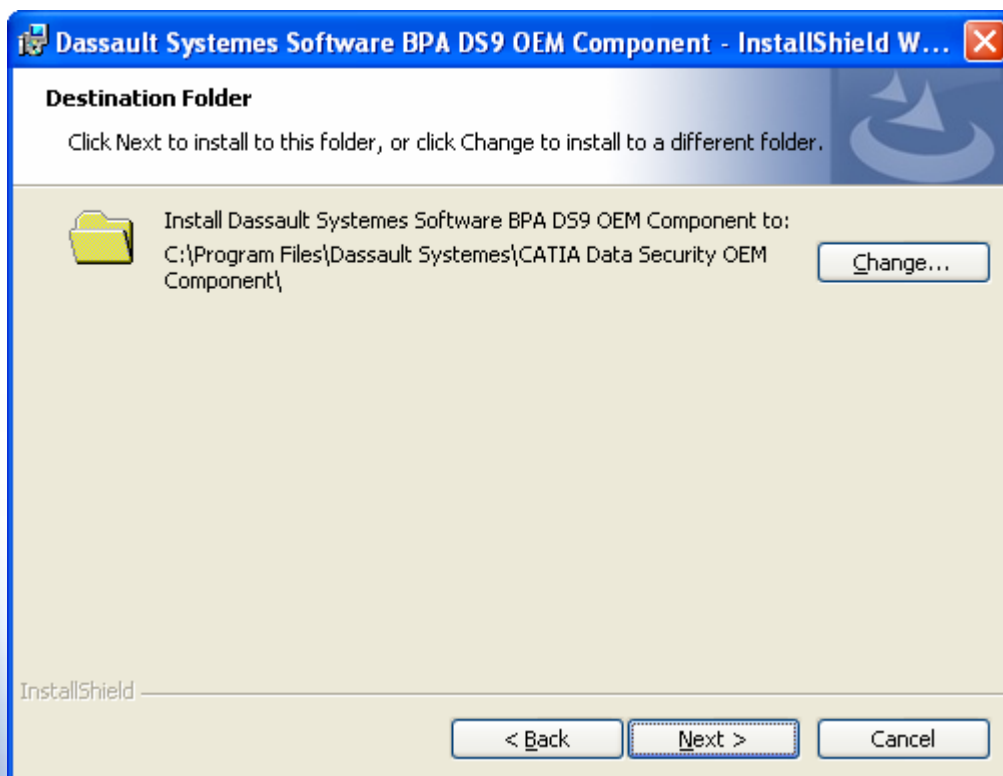

1. Launch setup.exe

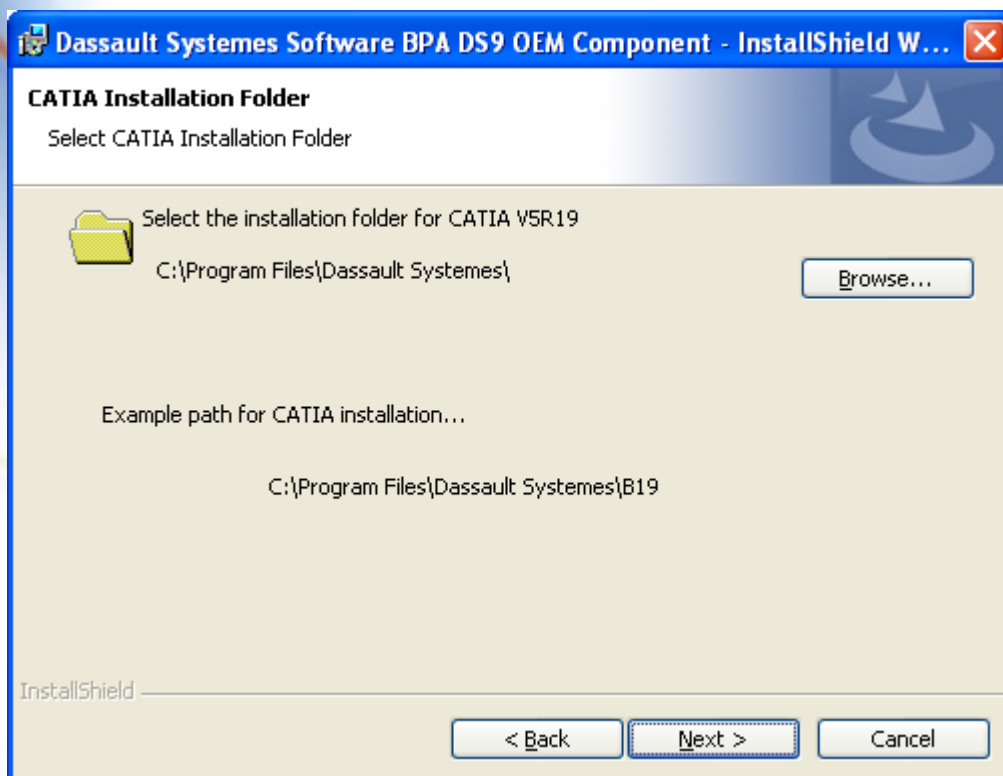

2. Click "Next"

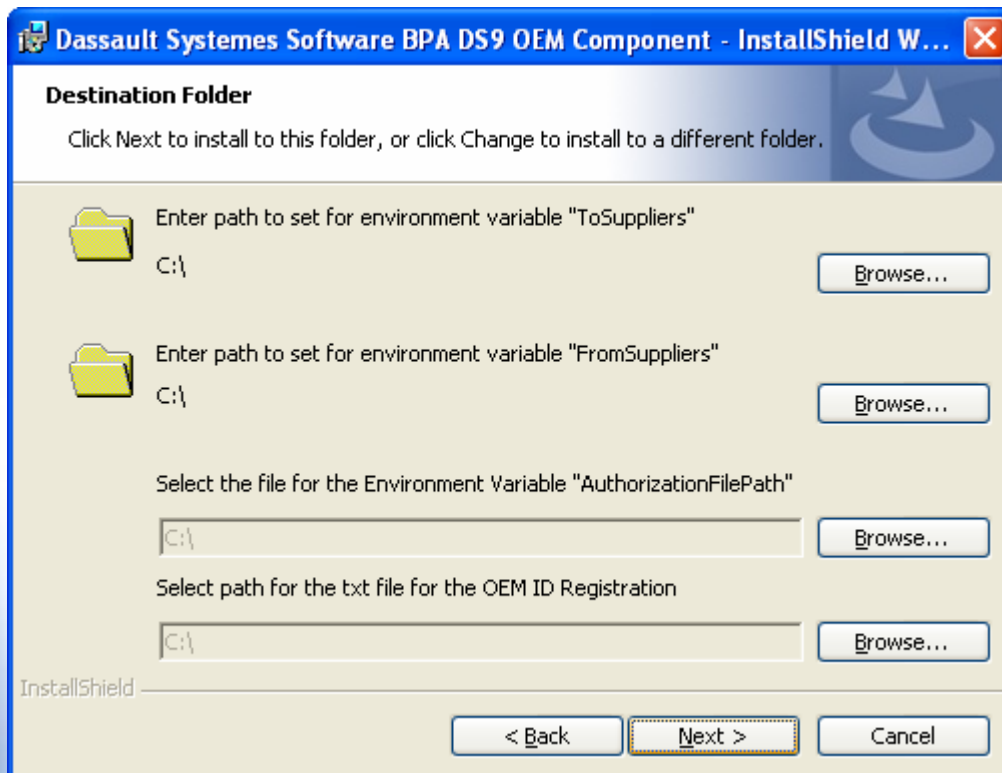

3. Click "Next"

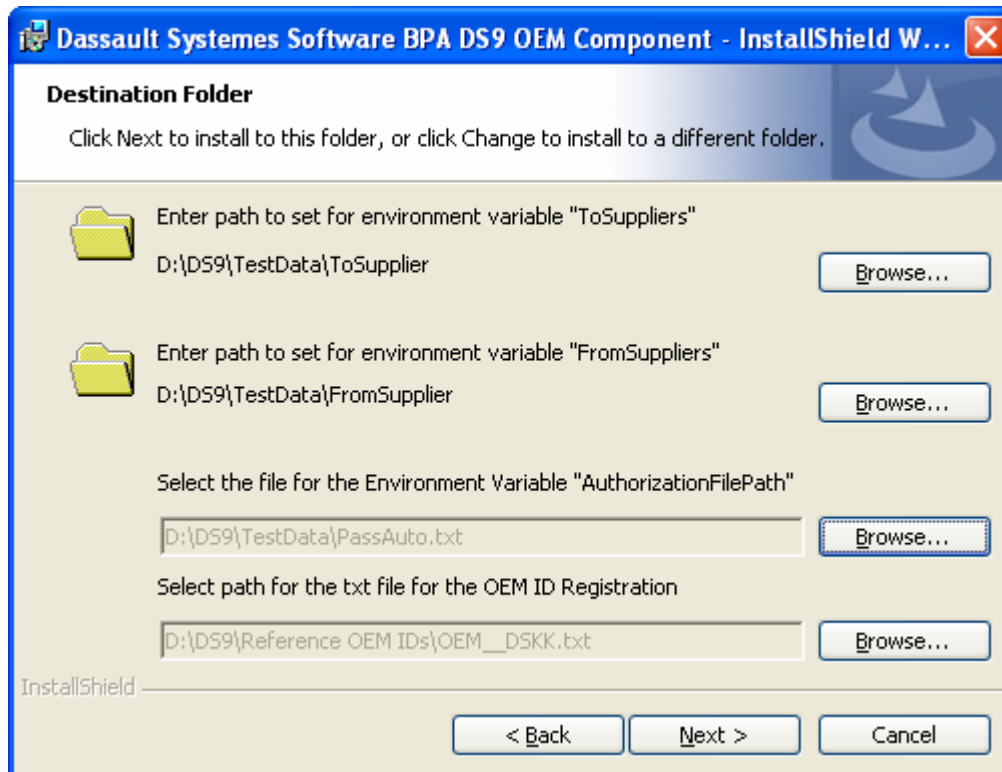

4. Click "Change" if needed and then "Next"

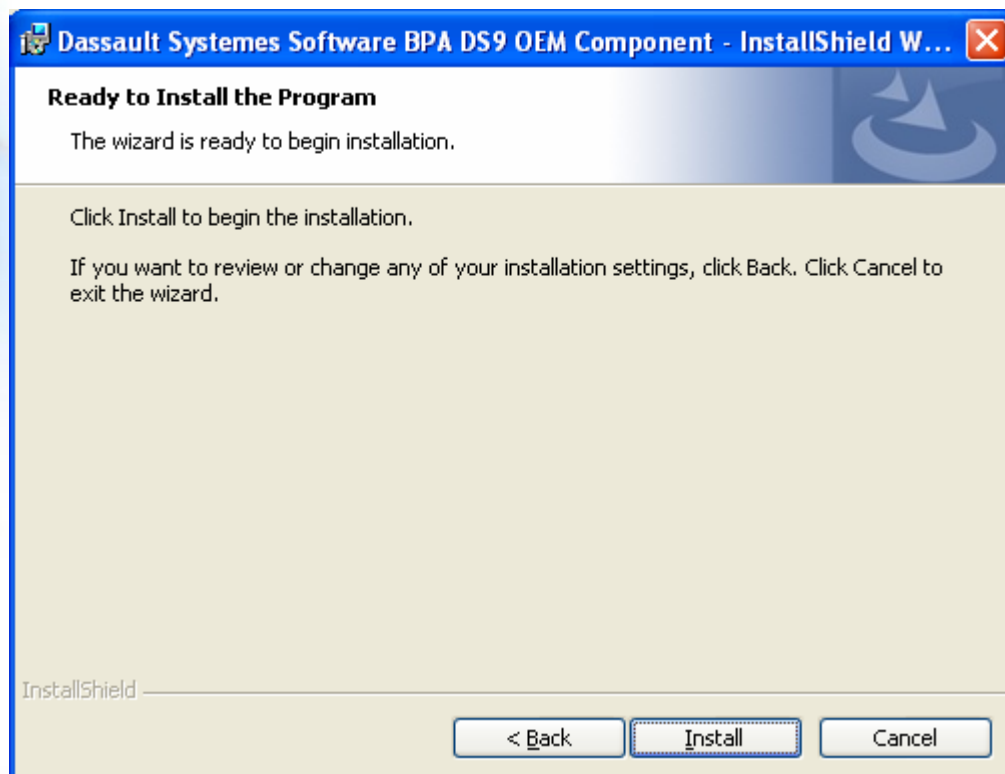

5. Click "Browse" if needed then "Next"

6. Click "Browse" and select the path of the directory where the encrypted files should be stored before sending to suppliers ("ToSuppliers")
7. Click "Browse" and select the path of the directory where the encrypted files should be stored before importing from suppliers ("FromSuppliers")
8. Click "Browse" and select the file where the application should store the login / password of the suppliers ("AuthorizationFilePath")
9. Click "Browse" and select the file where the application should grab the key received by Dassault Systemes

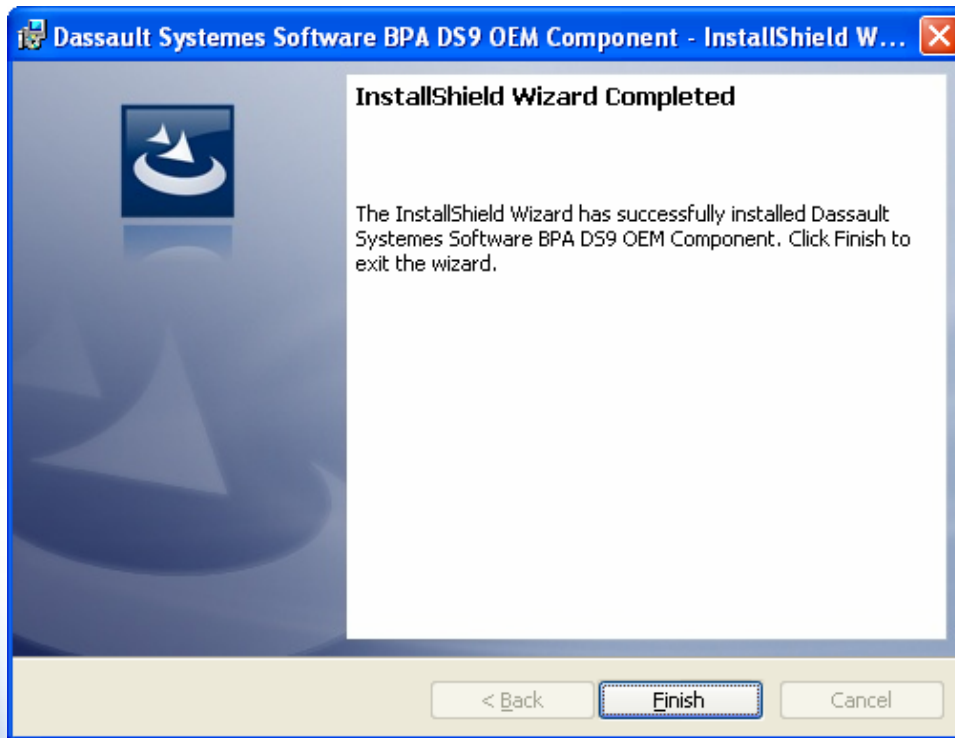

10. Click "Next"

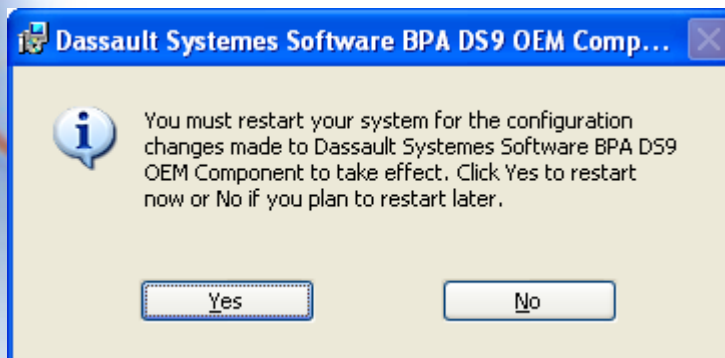

11. Click "Install"

12. Click "Finish"

13. Click "Yes" to restart now or "No" to restart later.

### New environment

The installer will create a new environment, DS9\_OEM, on the desktop. It will create as well 3 variables in the file DS9\_OEM.txt:

- **"ToSuppliers"**: Set the value of the path to a folder where all data for suppliers will be stored automatically after export.
- **"FromSuppliers"**: Set the value of the path to a folder where all data from supplier should be manually stored before importing them.
- **"AuthorizationFilePath"**: Set the value of the full path to a text file storing the login and encrypted password

These variables can be modified manually by administrator if needed.

# Un-installing the DS9 OEM application

Un-installation must be run from the Control Panel -> Add or Remove Programs  
Select the *Dassault Systemes Software BPA DS9 OEM Component* application, and click on "Remove"
