IBM WebSphere Development Tools for iSeries™ Skills Transfer and Proof of Concept

The IBM WebSphere Development Tools for iSeries Services provide you with skills transfer, training and mentoring services for building an e-business application using WebSphere Development Tools for iSeries. The IBM WebSphere Development Tools for iSeries Skills Transfer and Proof of Concept is the first step towards web-enabling a 5250 application with the WebSphere Development Tools for iSeries.

Your Business Challenge

- You would like to build up an e-business structure on your iSeries platform

- You are an iSeries customer who would like to convert your traditional 5250 applications into web applications using WebSphere Application Server and the WebFacing Tool
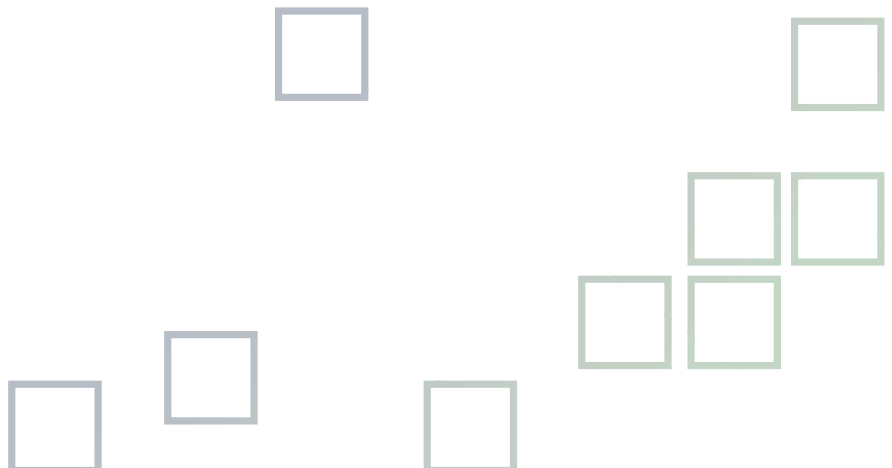

Services Solution

Convert your 5250 interfaces to web interfaces with minimal changes to your iSeries host application. During the WebSphere Development Tools for iSeries Skills Transfer and Proof of Concept, you will learn about the WebFacing tool and how you can use it to build an e-business application. By the end of this session, you will be ready to convert your existing 5250 interfaces to Web interfaces.

Benefits

During the IBM WebSphere Development Tools for iSeries Skills Transfer and Proof of Concept, you will:

- Gain greater assurance that your conversion to an e-business has a successful outcome, resulting in the minimization of risk, higher productivity, and lower costs

- Receive mentoring and skills transfer services for the WebFacing Tool

IBM Software Services for WebSphere

Statement of Work

During the 2-day skills transfer workshop, our Software Services consultants will:

- Train and skill transfer your staff on using the WebFacing Tool to Web-enable a 5250 application

- Conduct a deployment setup of Websphere Application Server and IBM HTTP Server and configuration for JSP and Java Beans deployment

During the 3-day proof of concept, our Software Services consultants will:

- Demonstrate the capabilities of the WebFacing Tool by coverting the initial screens of an application selected by you

- Demonstrate how to use the analyze report for DDS keywords conversion assessment

- Demonstrate how to convert your existing 5250 interfaces to Web interfaces with small changes to the host application

- Provide tips and hints

Your responsibilities

- Provide classroom facilities

- Provide appropriate hardware and software

Duration

The IBM WebSphere Development Tools for iSeries Skills Transfer and Proof of Concept is 5 days long. All work will be completed using a time and materials contract.
