

IBM WebSphere Development Tools for iSeries™ Application Conversion Workshop

The IBM WebSphere Development Tools for iSeries Services provide you with skills transfer, training and mentoring services for building an e-business application using WebSphere Development Tools for iSeries. The WebSphere Development Tools for iSeries Application Conversion Workshop mentors your staff on how to successfully web-enable your 5250 application to web interfaces using the WebFacing Tool.

Your Business Challenge

- You would like to build an e-business structure on your iSeries platform
- You would like to convert your traditional 5250 applications into web applications using the WebFacing Tool

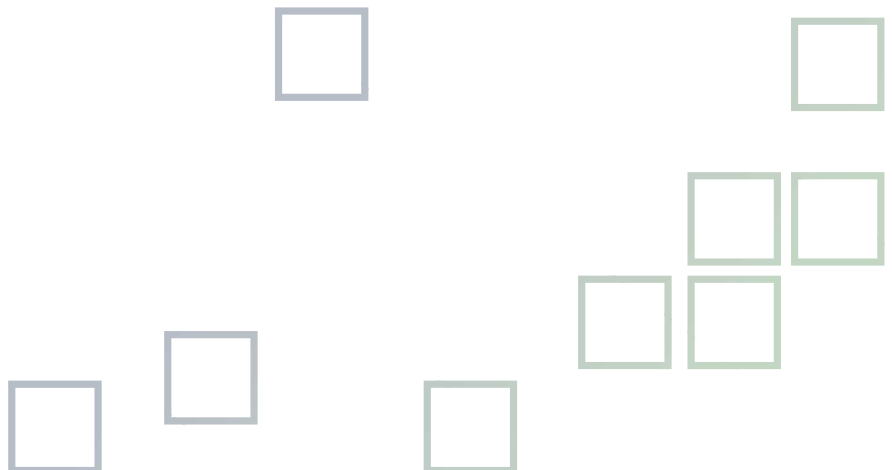

Services Solution

The WebSphere Development Tools for iSeries Application Conversion Workshop builds on the knowledge gained during the Proof of Concept. During this session, you will learn how the WebFacing tool can convert your 5250 application into an e-business application with minimal changes made to the host application. By the end of this session, you will receive a web-enabled, e-business application built on your iSeries environment.

Benefits

During this workshop, you will:

- Learn how to build an e-business application using the WebFacing tool
- Gain greater assurance that your conversion to an e-business has a successful outcome, resulting in the minimization of risk, higher productivity, and lower costs

IBM Software Services for WebSphere

Statement of Work

This workshop provides on-site consultation during the application conversion, including:

- DDS Screen redesign
- Post-conversion customization
- Troubleshooting during all stages of the conversion
- Tackling through spots during the conversion on DDS keyword and text

Your responsibilities

- Provide a 5250 application to be converted
- Provide someone with business domain knowledge

Duration

The length of the IBM WebSphere Development Tools for iSeries Application Conversion Workshop will be determined based on your requirements. All work will be completed using a time and materials contract.
