Part 5.

Run 5250 in a browser

© 2007 IBM Corporation

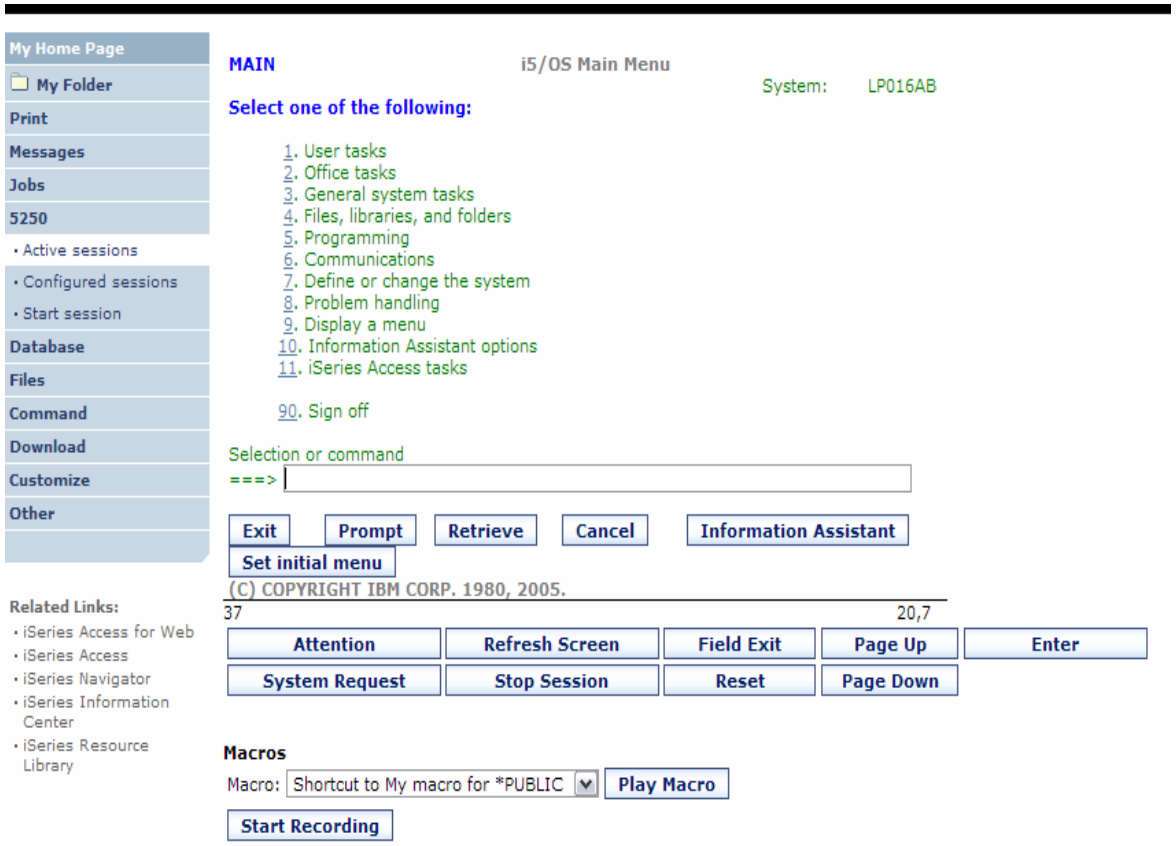
System i Access for Web 5250 Interface

Runs as an interactive job

- **Only function in System i Access for Web that is interactive**

TN5250 port

- **Only function in System i Access for Web that uses TN5250 port**



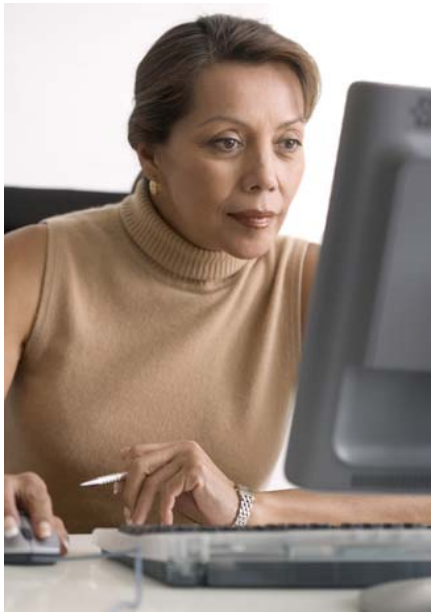
© 2007 IBM Corporation

Things to know

Because 5250 session implemented using HTML, considerations to be aware of

- **Not intended to replace full function emulators like PC5250, Host On Demand, etc. for purposes of "heads-down" data entry type of operations**
  - **Does not include graphics, EHLAPPI, DDE functionality**
  - **Does not provide keyboard mapping**
  - **Does not support certain keys the way PC5250 does (ie, Field Exit)**
- **Does not include Printer Emulation (push to printer)**
- **No direction interaction with server, so unsolicated server messages can't be received.**
  - **Need to request refresh to see break messages**
- **Does not include file transfer from session**

© 2007 IBM Corporation



This is only 5250 function you will likely extend to your users

Preconfigured Sessions

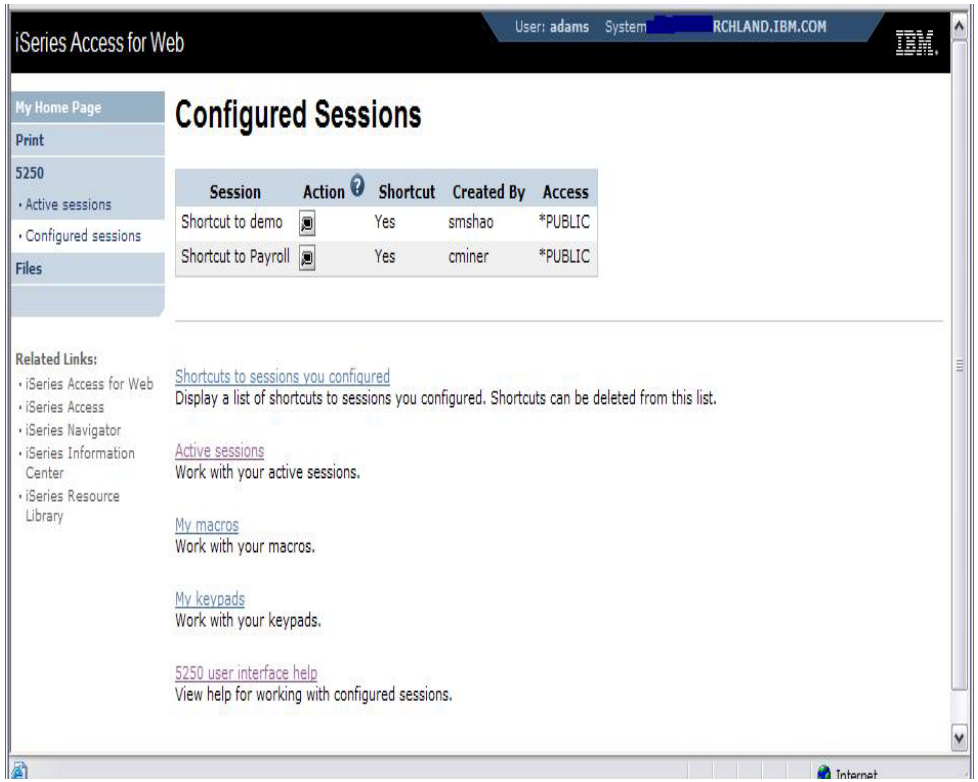
© 2007 IBM Corporation

Run Pre-Configured 5250 Sessions

You can limit users to connecting to only specific systems or running only specific applications.

- **Create preconfigured 5250 sessions**
- **Then set policies to restrict users to only preconfigured sessions**
- **User selects 'Configured Sessions'**
  - **Only link provided**
  - **User has only one action → to start a session**

http://<systemi>:<port>/webaccess/iWAMain



© 2007 IBM Corporation

Run Pre-Configured 5250 Sessions

If you do not want users using anything in System i Access for Web except 5250, you could:

- **Simply give them the 5250 url address (ie, http://systemi/webaccess/iWA5250)**
- **Set policies so users end up where you want them to be**
  - **Could include a macro so user bypasses i5/OS sign-on screen**
- **Predefined what screens will look like:**
  - **Colors**
  - **No Navigation pane**

http://<systemi>:<port>/webaccess/iWA5250

Web look

Traditional 'green screen' look

© 2007 IBM Corporation

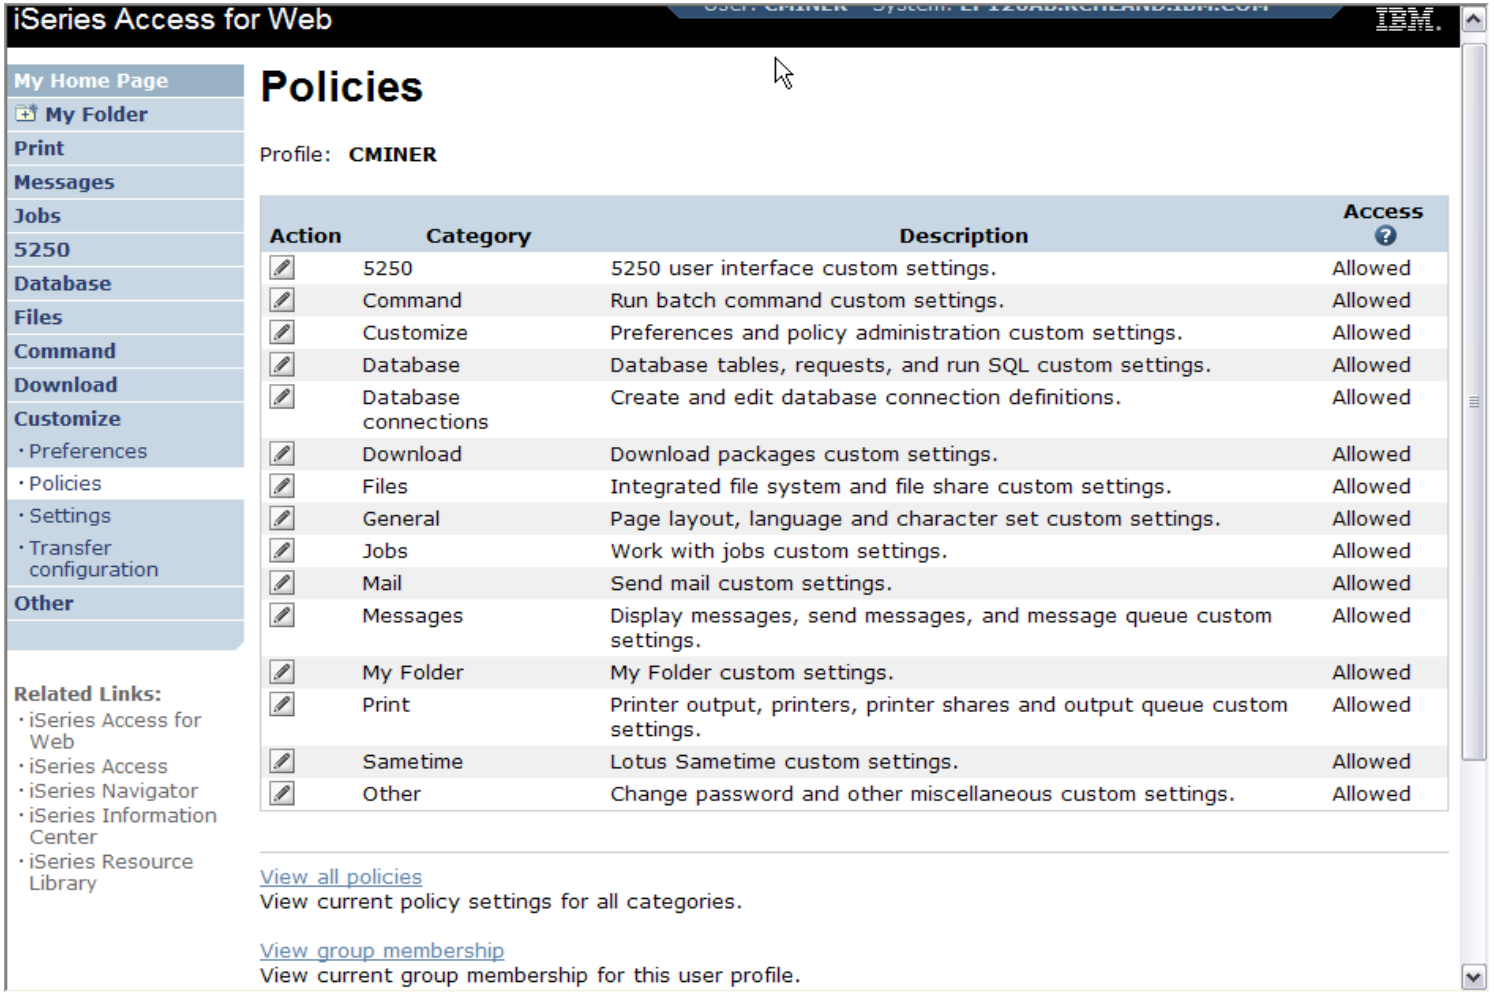
Policies

Policies are used by administrators to control the System i Access for Web functions and behavior

© 2007 IBM Corporation

Policies

Only i5/OS user profiles with *SECADM authority can access "Customize → Policies"



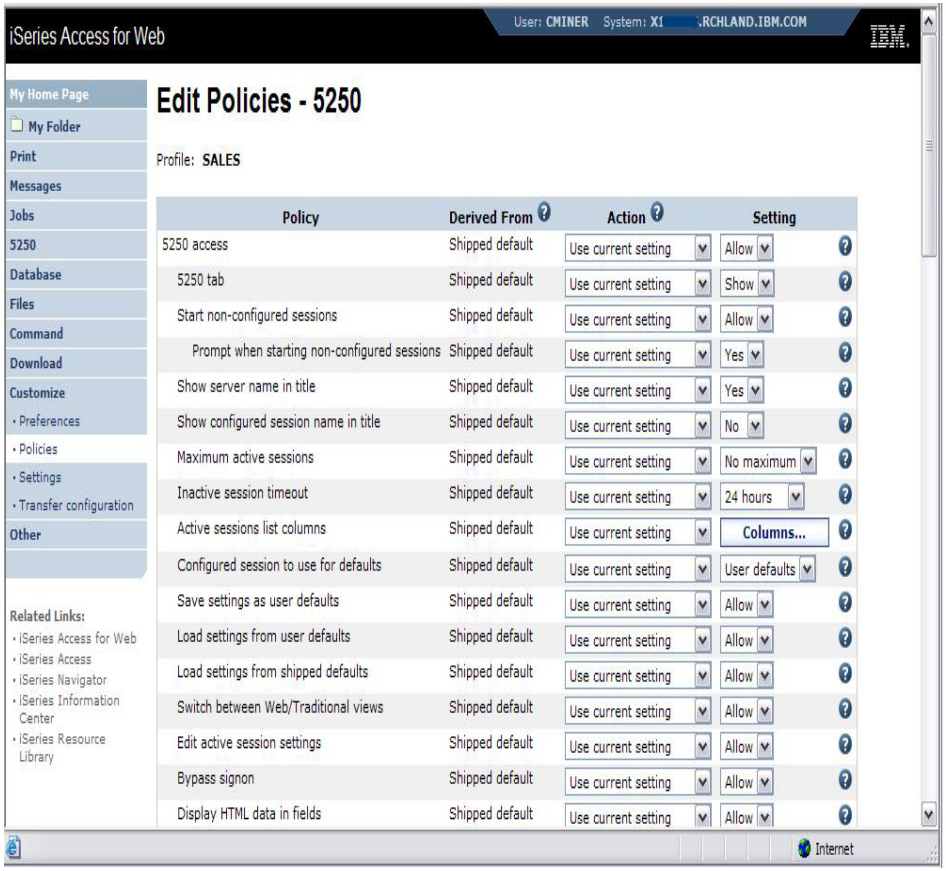
© 2007 IBM Corporation

Setting Policies for 5250

When any user attempts to start a 5250 session to System i using System i Access for Web, a check is made to see what policies have been set for this i5/OS user profile prior to displaying any information.

The following sequence of checks are made to authenticate user access:

- **User profile**
- **Group profile**
- ***PUBLIC profile**
  (*every System i Access for Web user is a member of *PUBLIC user group)



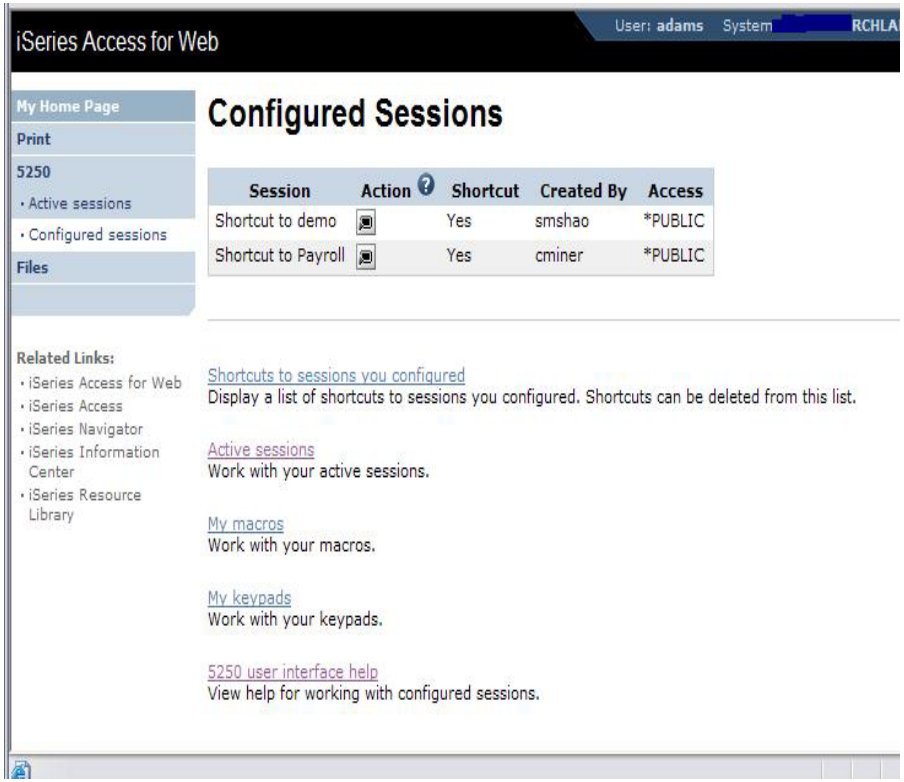
© 2007 IBM Corporation

Policy settings to run only Preconfigured sessions

Set all the below policies to "deny" to restrict user to running only preconfigured 5250 sessions.

- Start non-configured sessions
- Create configured session
- Copy configured session
- Delete configured session
- Rename configured session
- Edit configured session
- Create configured session shortcut
- Copy configured session shortcut
- Delete configured session shortcut
- Rename configured session shortcut

http://<systemi>:<port>/webaccess/iWAMain



In this example, other policies were also set to remove other functions from the Navigation pane

© 2007 IBM Corporation

Policy settings to run only 5250 (no navigation pane)

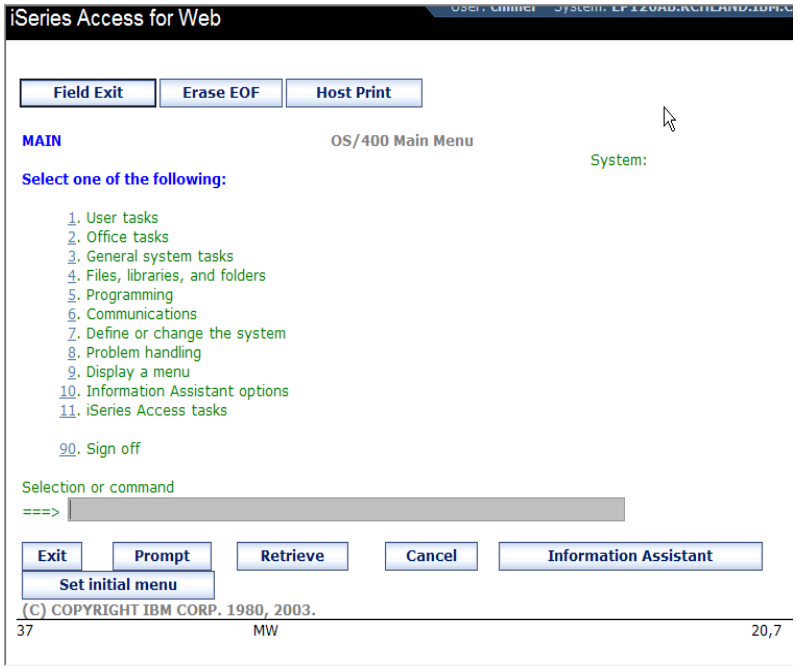
Here are some policies you could set to enable a user to go directly to a 5250 session and not see anything else in System i Access for Web

- **Leave "Start non-configured sessions" on Allow**
- **Set "Prompt when starting non-configured sessions" to No**
- **In "Configured session to use for defaults“, add a previously created Configured session that you have given this user/group profile a shortcut to**

To entirely remove the Navigation pane, go to category “General”

- **Navigation = Deny**

http://<systemi>:<port>/webaccess/iWA5250



© 2007 IBM Corporation

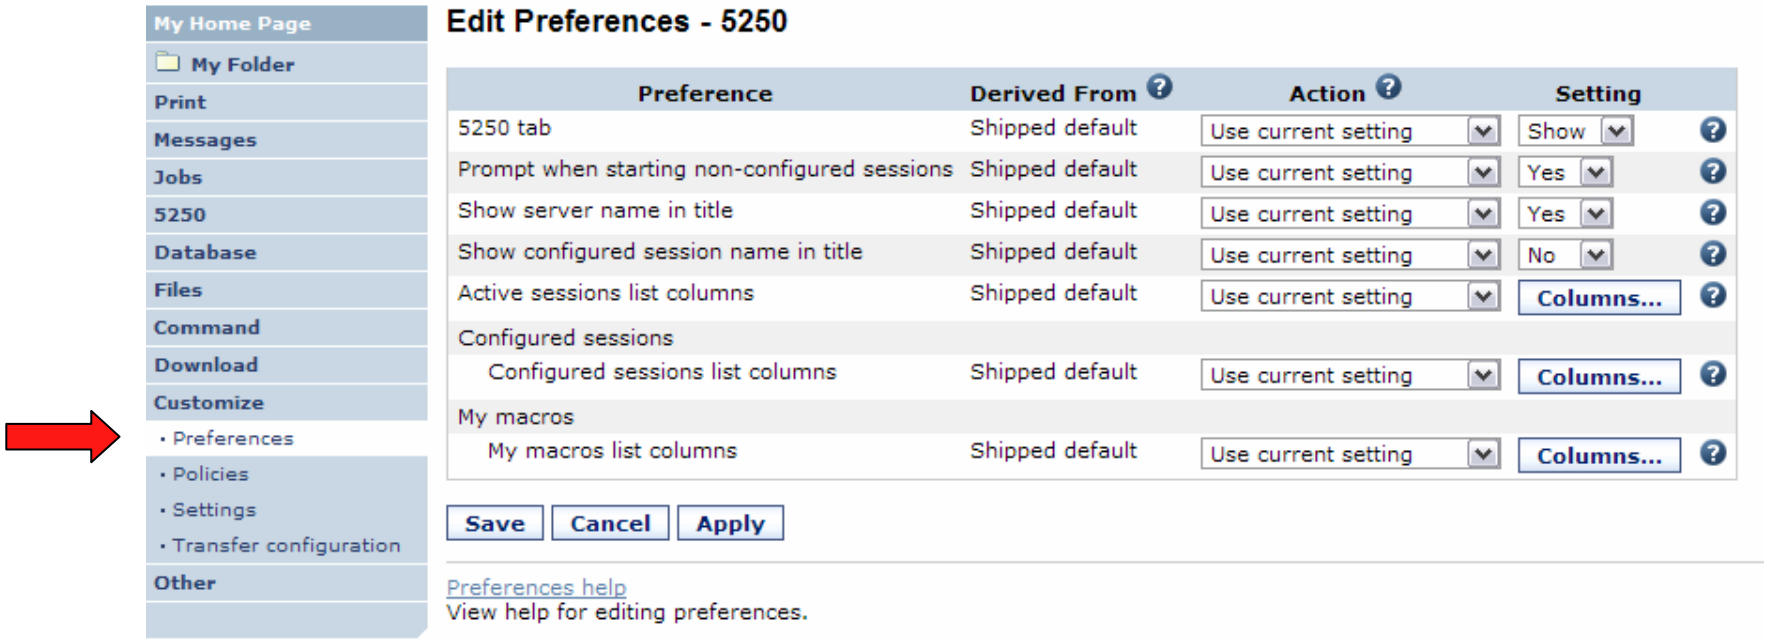
Setting Default Session

Select the shortcut to the session to use as the default and apply the policy

© 2007 IBM Corporation

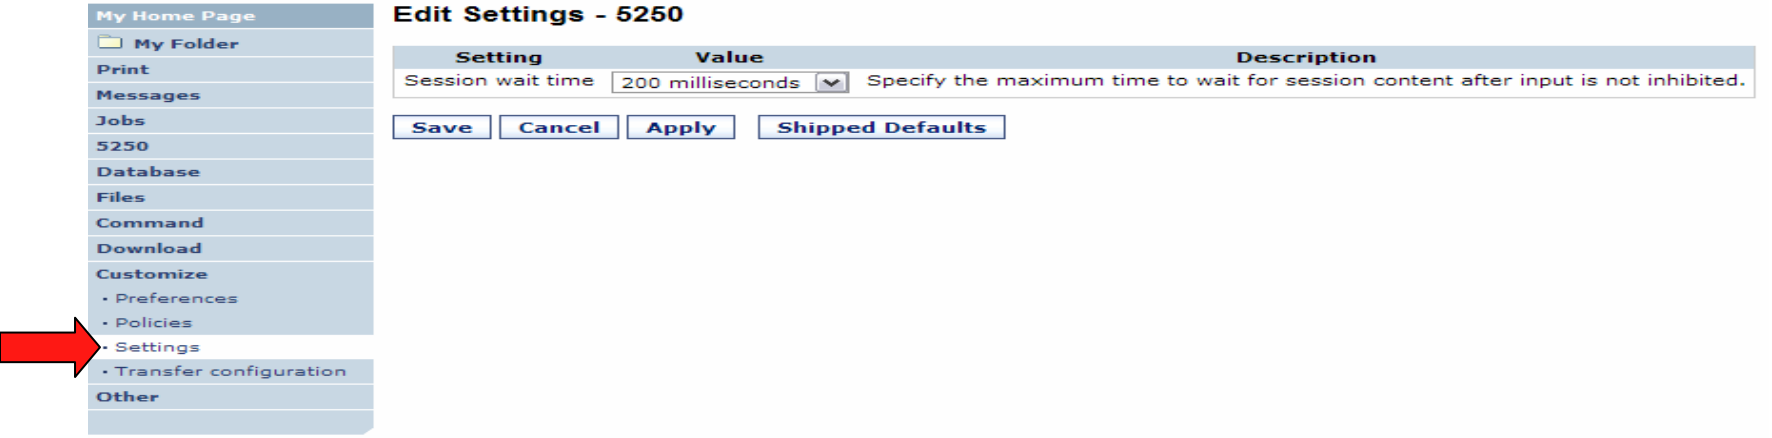
5250 Preferences

Preferences are settings that the user can modify



© 2007 IBM Corporation

5250 Settings



- **Settings are global – applies for all users and groups.**
- **Session wait time is the amount of time iWA5250 will wait after input inhibit is off before rendering the screen content.**
- **Bump this value up if the application or system is slow in responding.**

© 2007 IBM Corporation

Starting a 5250 session

© 2007 IBM Corporation

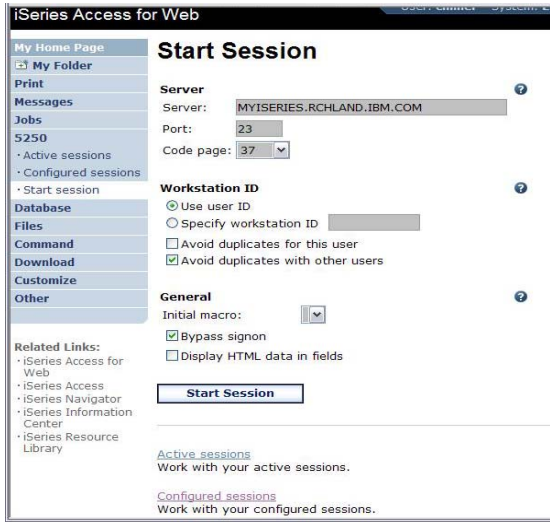
How to Start a 5250 Session

Two options:

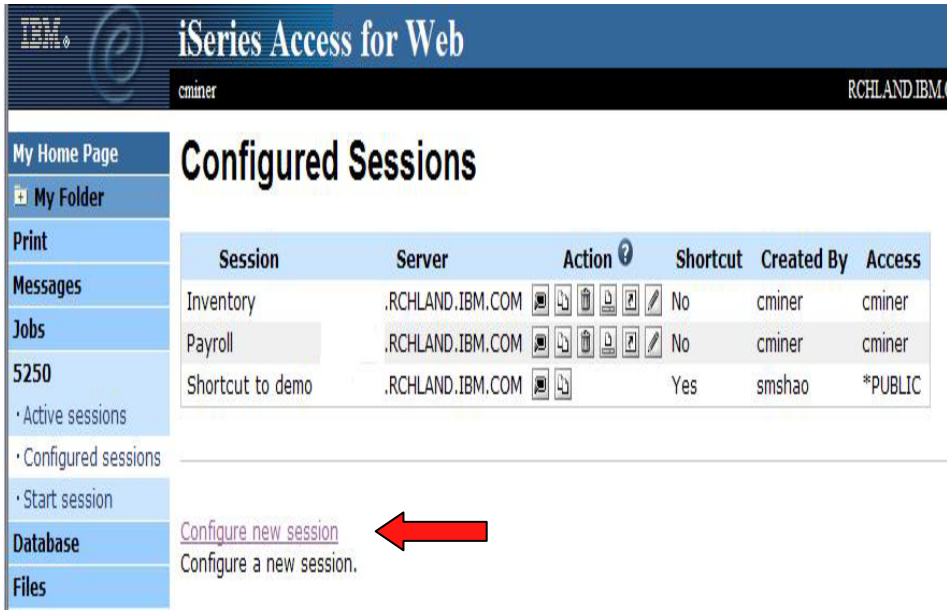
1. **Select 'Start Session'**
   - Fill in information on Start Session and connect
   - To save the session, select 'Active Session Settings' link at bottom of screen, modify any information you wish, then click on 'Save'

2. **Select 'Configured Sessions'**
   - Select 'Configure New Session' link on lower screen
   - Set up as you wish, then click on 'Save'

1



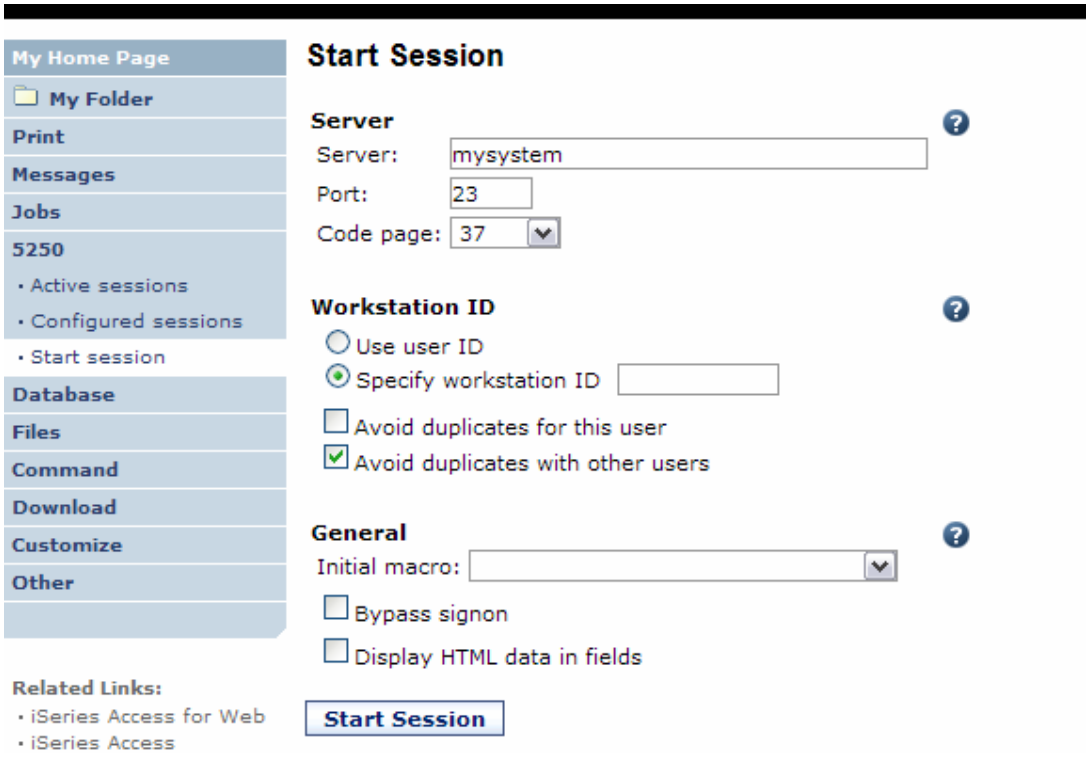
2



© 2007 IBM Corporation

Use “Start Session” Dynamically

- Specify the system to connect
- Select the session attributes
  - Port, code page, workstation ID, etc.
- Start session



© 2007 IBM Corporation

Fonts

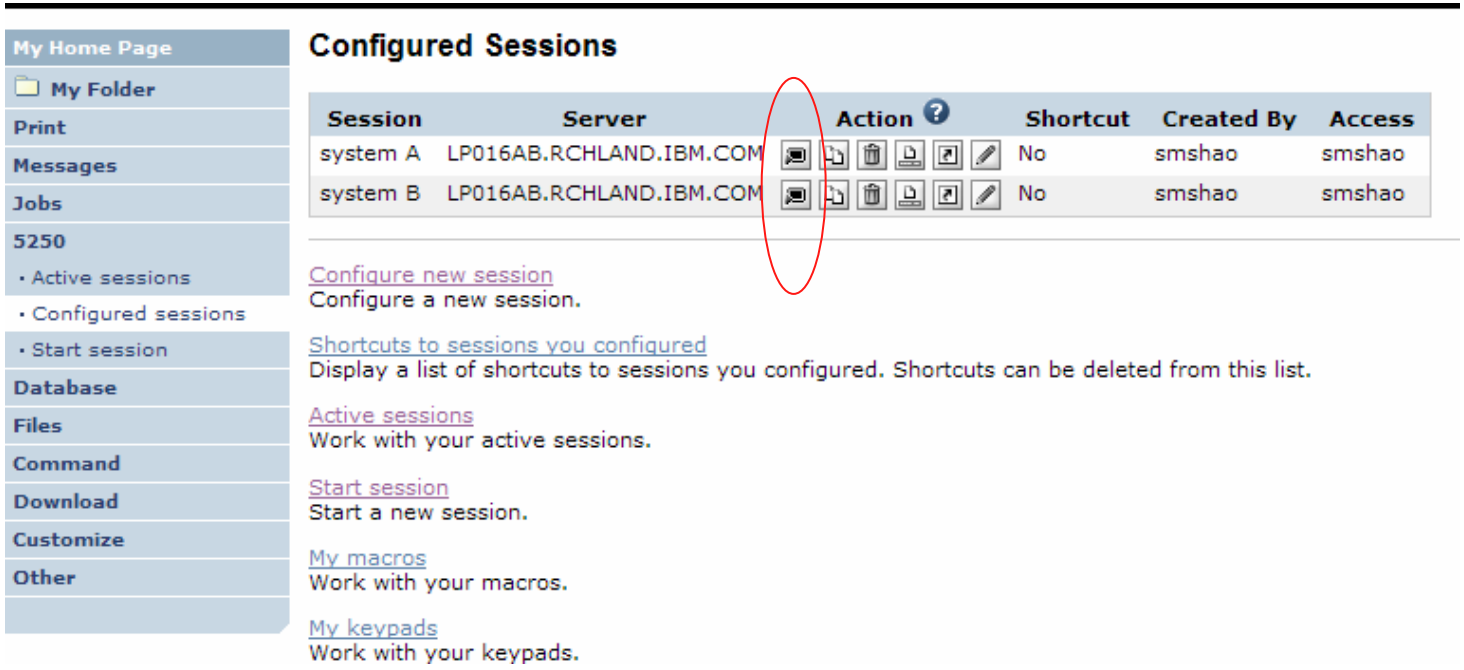
System i Access for Web 5250 is rendered with HTML

- **Fonts are controlled by the browser**
- **Use browser options to change the font style and font size**

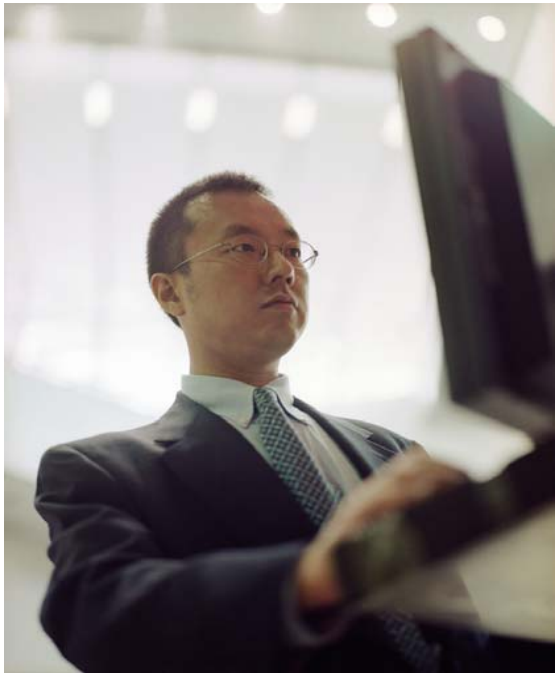
© 2007 IBM Corporation

Start a Configured Session

- Configured sessions list shows the list of sessions for the logged in user
- Select the “Start” icon for the session to start



© 2007 IBM Corporation

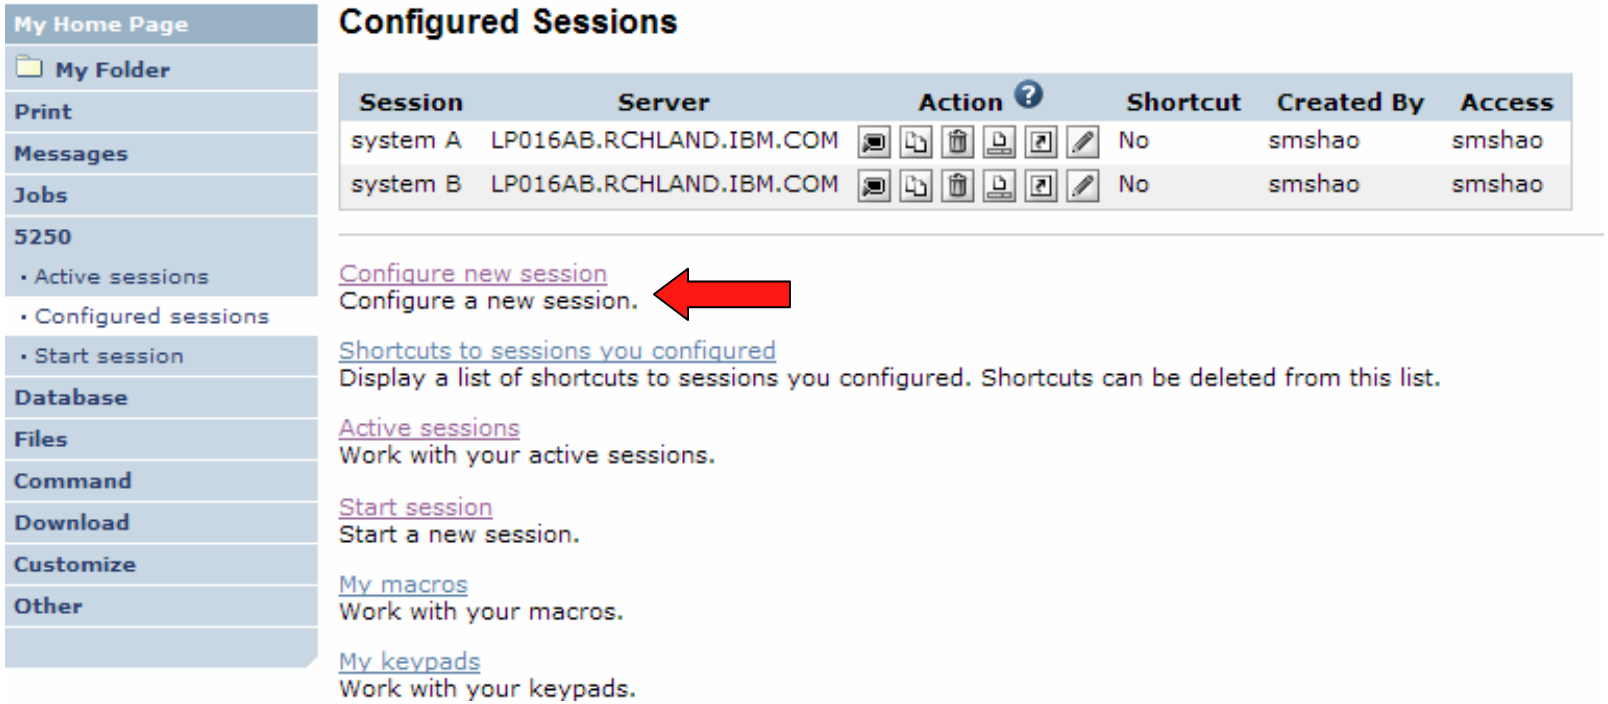


Configuration options for 5250 sessions

© 2007 IBM Corporation

Configure a New Session

Select the “Configure new session” link



© 2007 IBM Corporation

Setting up a 5250 Session

Select Session Name

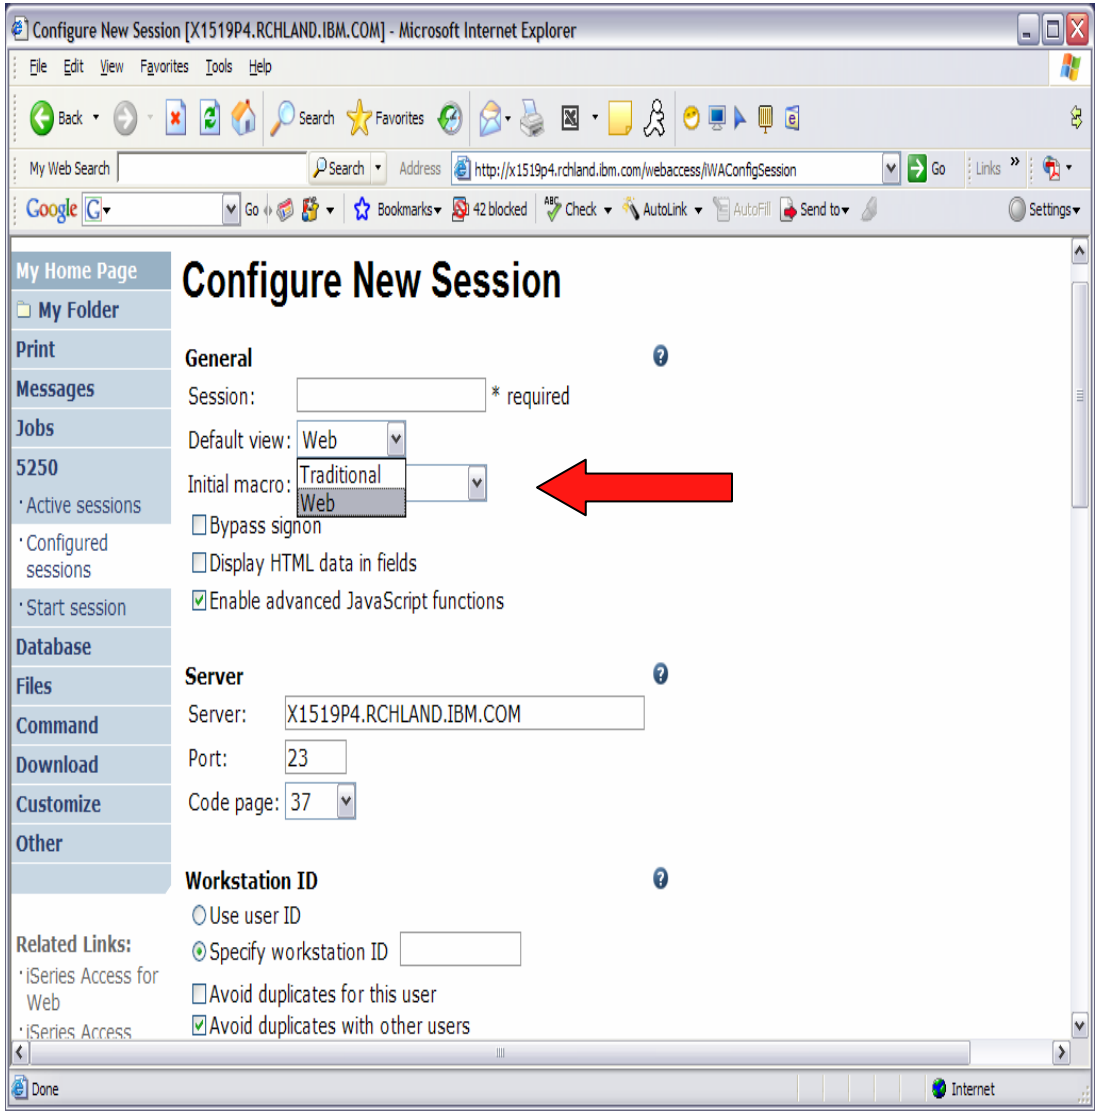
- Name of this 'Configured' session

Determine screen look

- Web View is default
- Traditional View can be selected

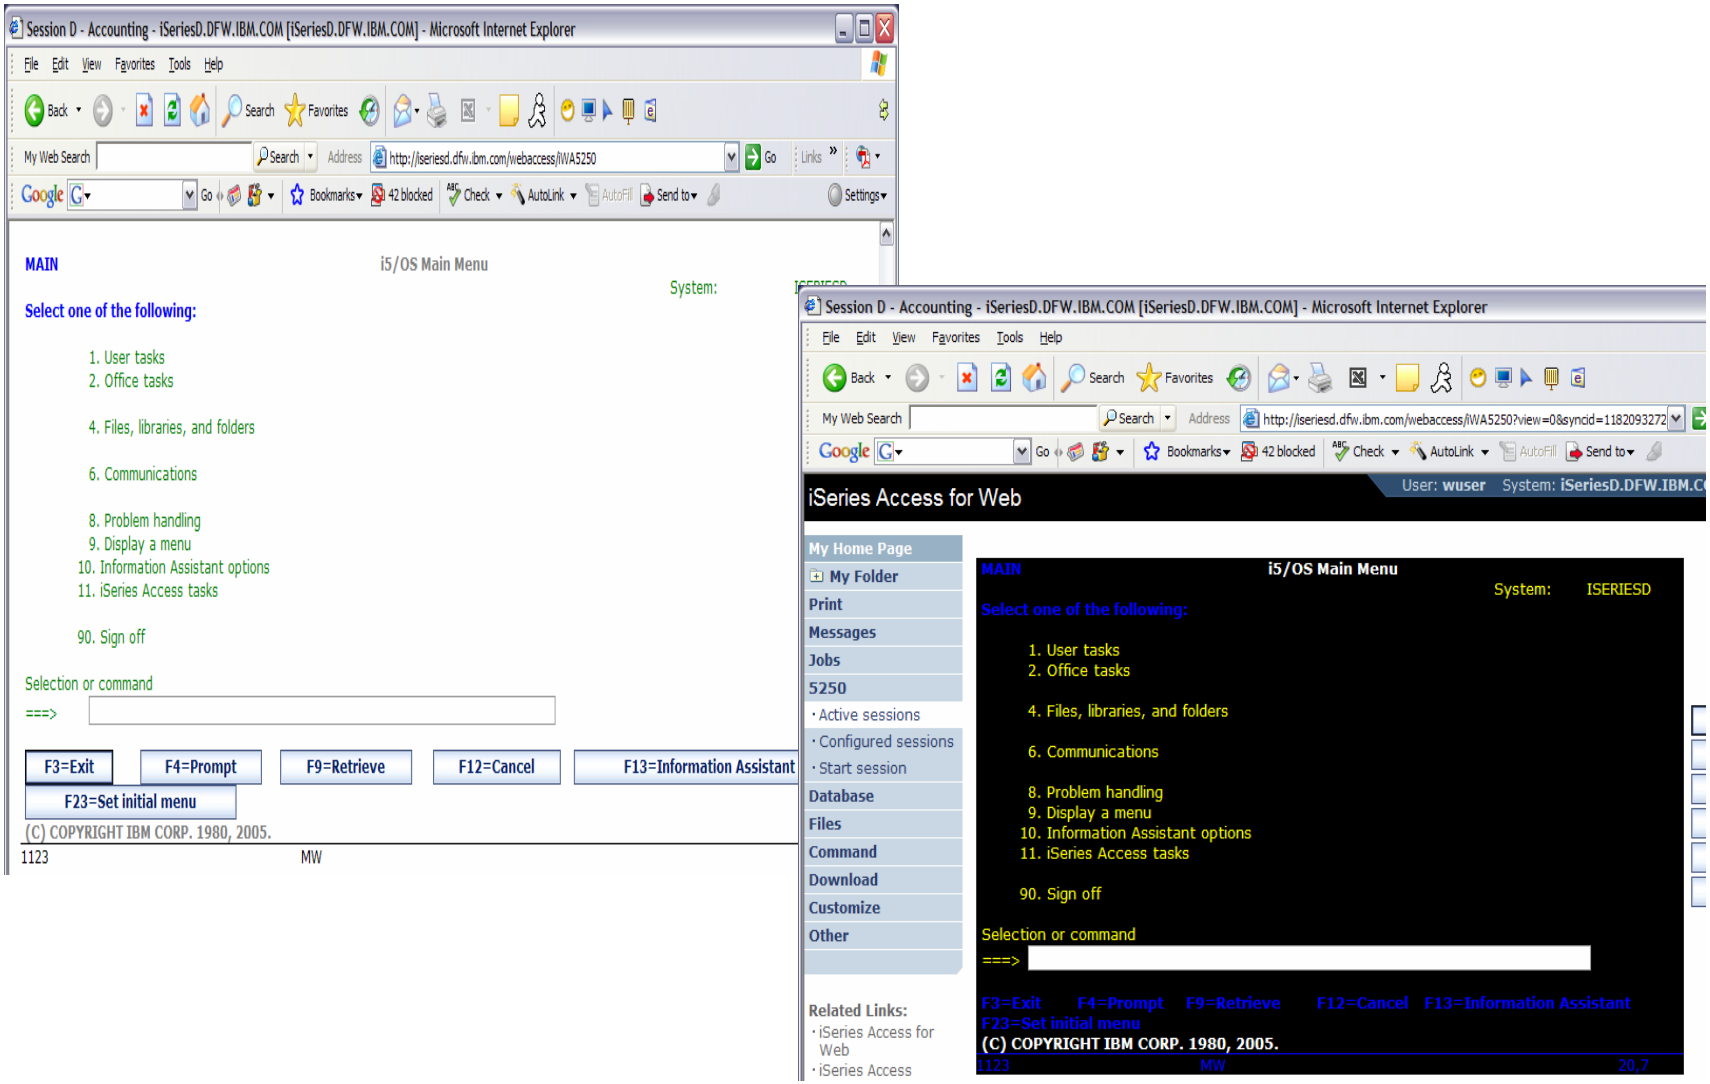
Select System i to connect to

- Enter System Name or TCP/IP address
- Port Address



© 2007 IBM Corporation

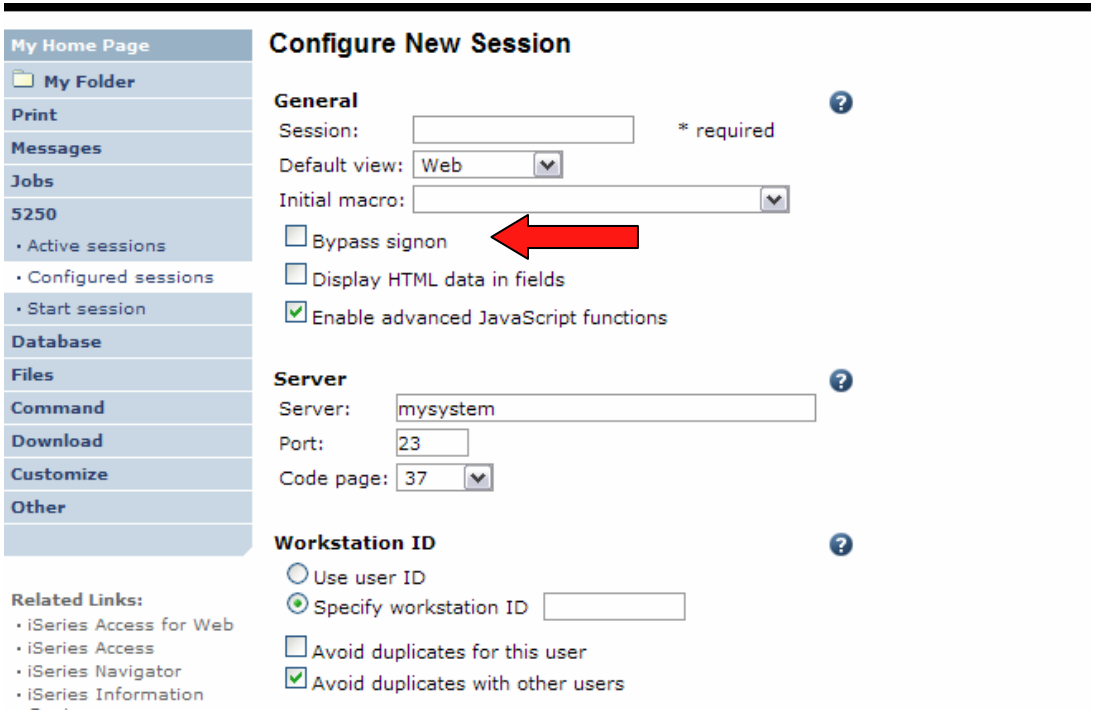
Web View Vs Traditional View



© 2007 IBM Corporation

Bypass Signon – new in V5R4

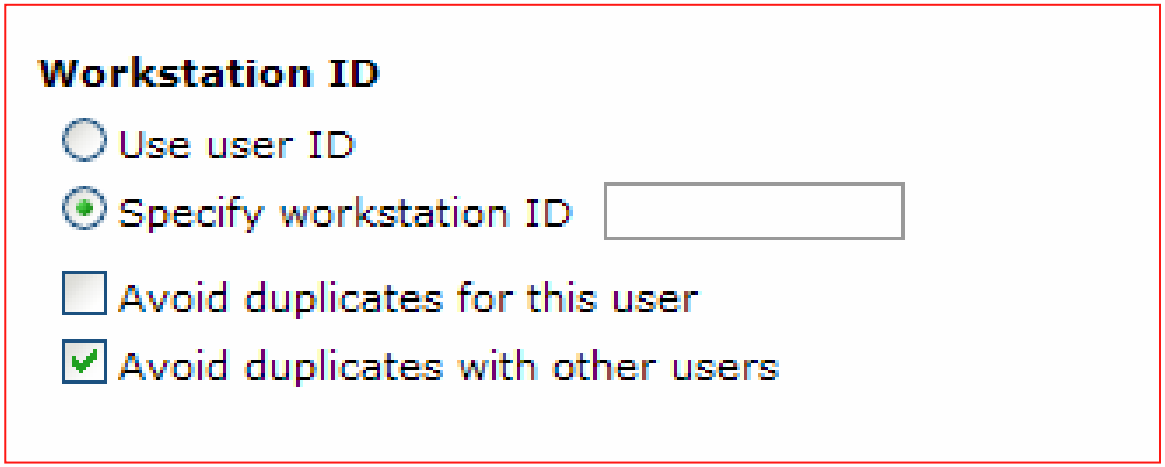
- **Uses the credential the user used to login to System i Access for Web**
- **Option available for configured and dynamically started session**



QRMTSIGN system value must be set to *VERIFY to allowe the 'Bypass Signon' feature to be accepted by i5/OS.

© 2007 IBM Corporation

Configuring a New Session – Workstation ID



.

Use user ID	System i Access for Web authenticated user ID is used for the workstation ID, up to ten characters.
Specify workstation ID	Enter a workstation ID of your choice, up to ten characters. If you select the radio button and leave the text field blank, a value is generated by i5/OS. The default device name starts with *QPADEV*.
Avoid duplicates for this user:	When this option is enabled, a wild card character is added to the device name to make it unique for the current user.
Avoid duplicates with other users:	When this option is enabled, the server adds a wild card character to the device name to make it unique for all users on the server.

© 2007 IBM Corporation

Workstation ID

You can enter keyword and special characters, like you do for PC5250. Here is how they are handled.

Computer name or User name (&COMPN, &USERN): These keywords are accepted.

- However, they will not resolve to the PC name and the Windows login user ID like they do in PC5250
- Computer name: resolved to the System i name
- User name: resolved to the user profile name of the web application server job.
- Also note that using the &COMPN and &USERN keywords could result in workstation IDs that are longer than ten characters which would then be truncated.

Session Type ID (%):

- This will add an “S” to workstation ID, indicating that this is a display session.
- With PC5250, a “P” would replace the “%” if a printer session was started. However, System i Access for Web only has display sessions.

© 2007 IBM Corporation

Workstation ID (continued)

Keyword and special characters, continued…

Short session ID (*): Adding this character will make the ID unique for this user.

- The System i Access for Web option ***Avoid duplicates for this user*** causes the "*" character to be added at the end of the ID.
- Therefore, if you use both the "*" and Avoid duplicates for this user, then two special characters will be added to the workstation ID.

Collision Avoidance ID (=): Adding this character will make the session ID unique.

- The System i Access for Web option ***Avoid duplicates with other users*** causes the "=" character to be added at the end of the string.
- Therefore, if you use both the "=" and Avoid duplicates with other users, then two "=" will be added to the string..

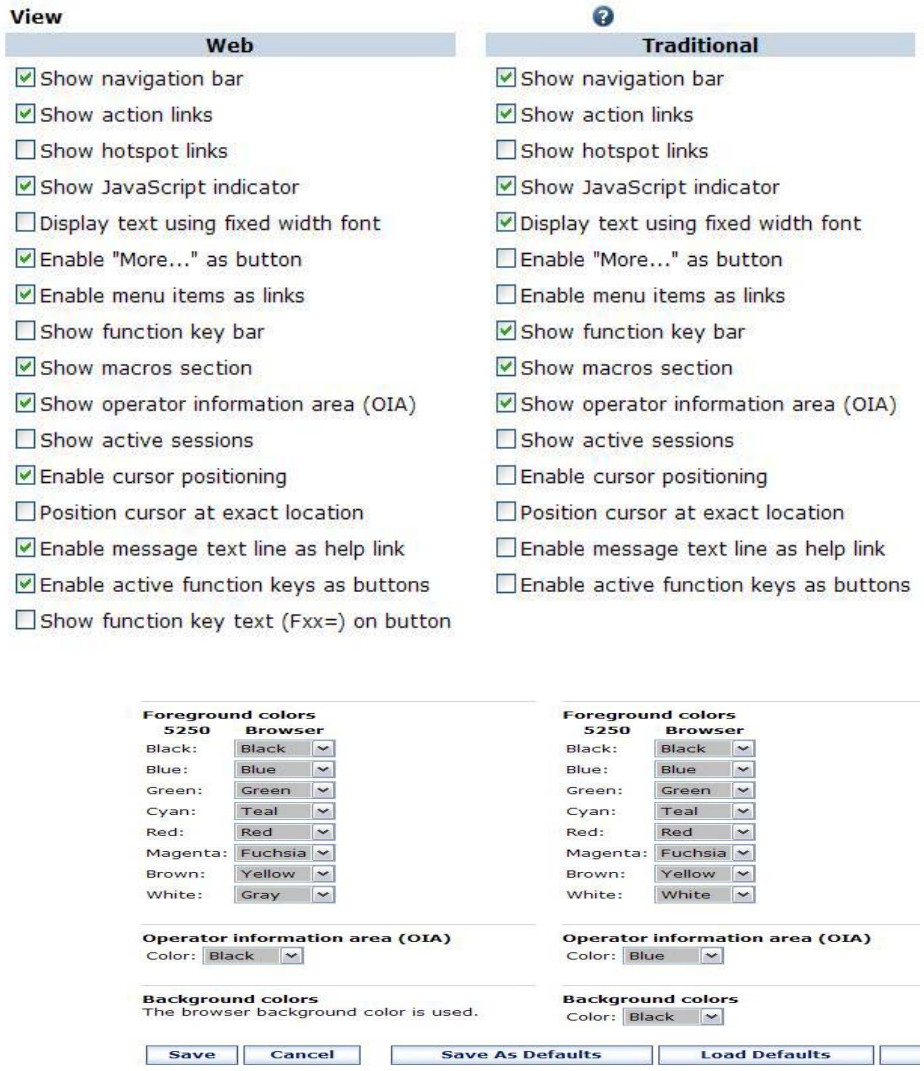
© 2007 IBM Corporation

Configuring a New Session (continued)

Web View and Traditional View settings

- Many keyboard and screen settings can be set to improve end user productivity and satisfaction
- Can also set up different text colors

Create a consistent 'look' for all your users…



© 2007 IBM Corporation

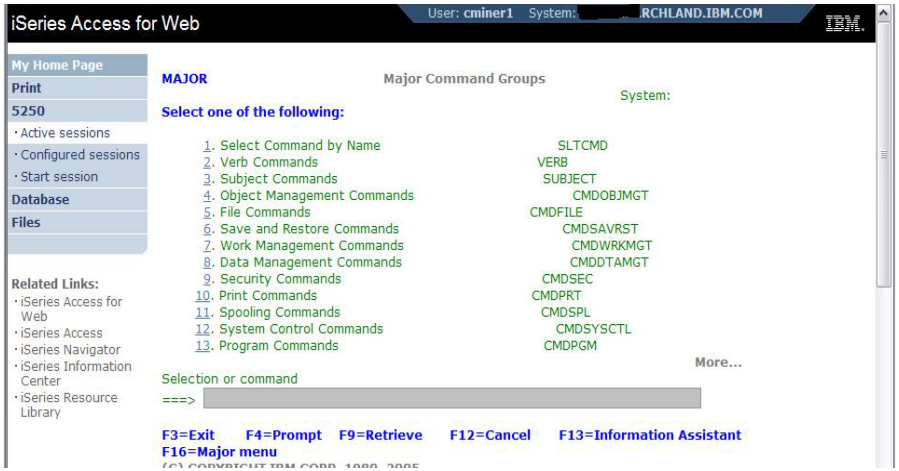
Example: 5250 - Proportional Width Vs Fixed Width

Default for 'Web View' is to display output using Proportional width fonts

To change to Fixed width fonts, check the box that says:

- **Display text using fixed width fonts**

Users can also do this on-the-fly by clicking on the "Active session settings" link and change the setting for this connection, or by switching to Traditional view.



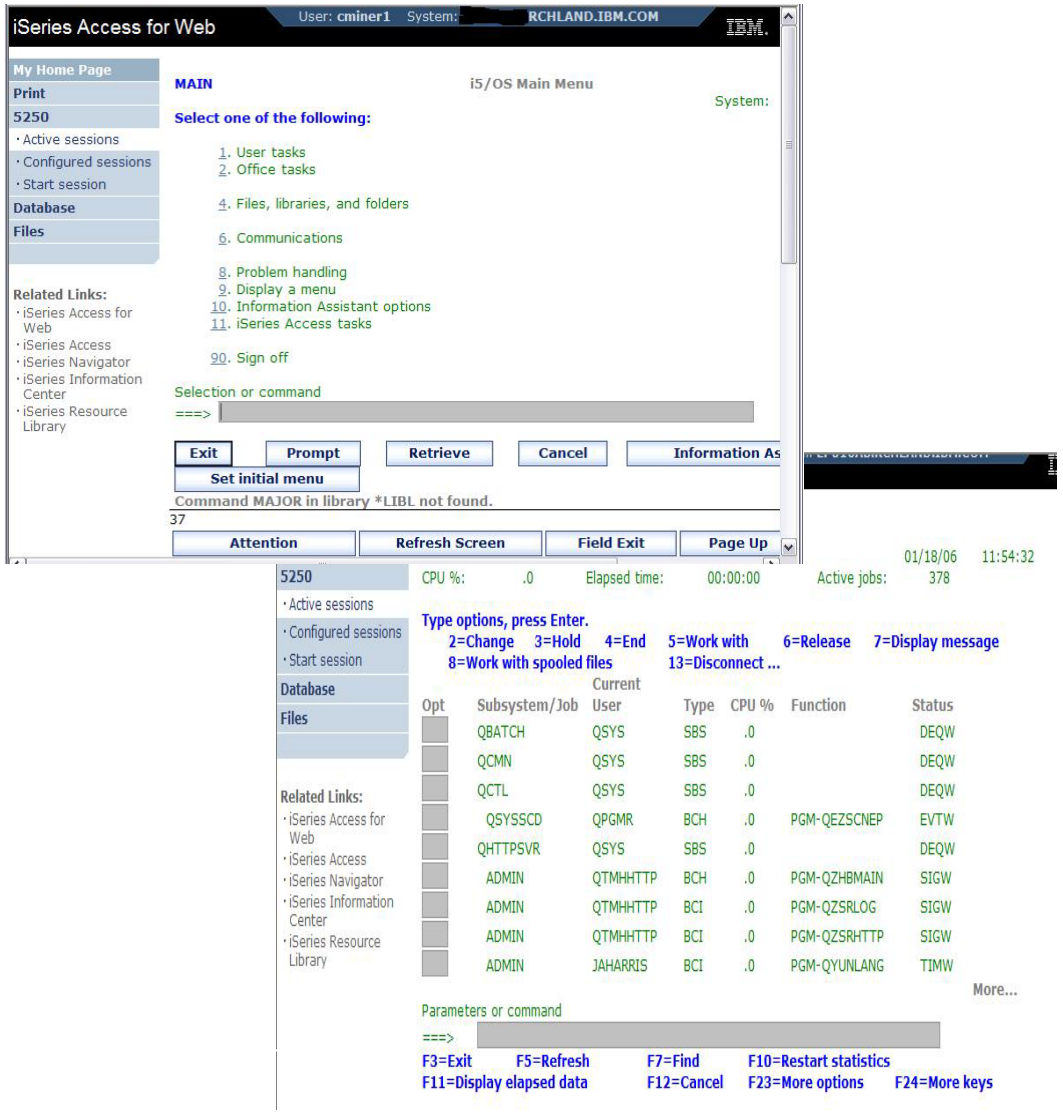
© 2007 IBM Corporation

Enable Active Function Keys As Buttons

Defaults:

- **Display Active Function Keys as Buttons**
- **Show More… as a button**

Can uncheck these boxes to deliver a more traditional view

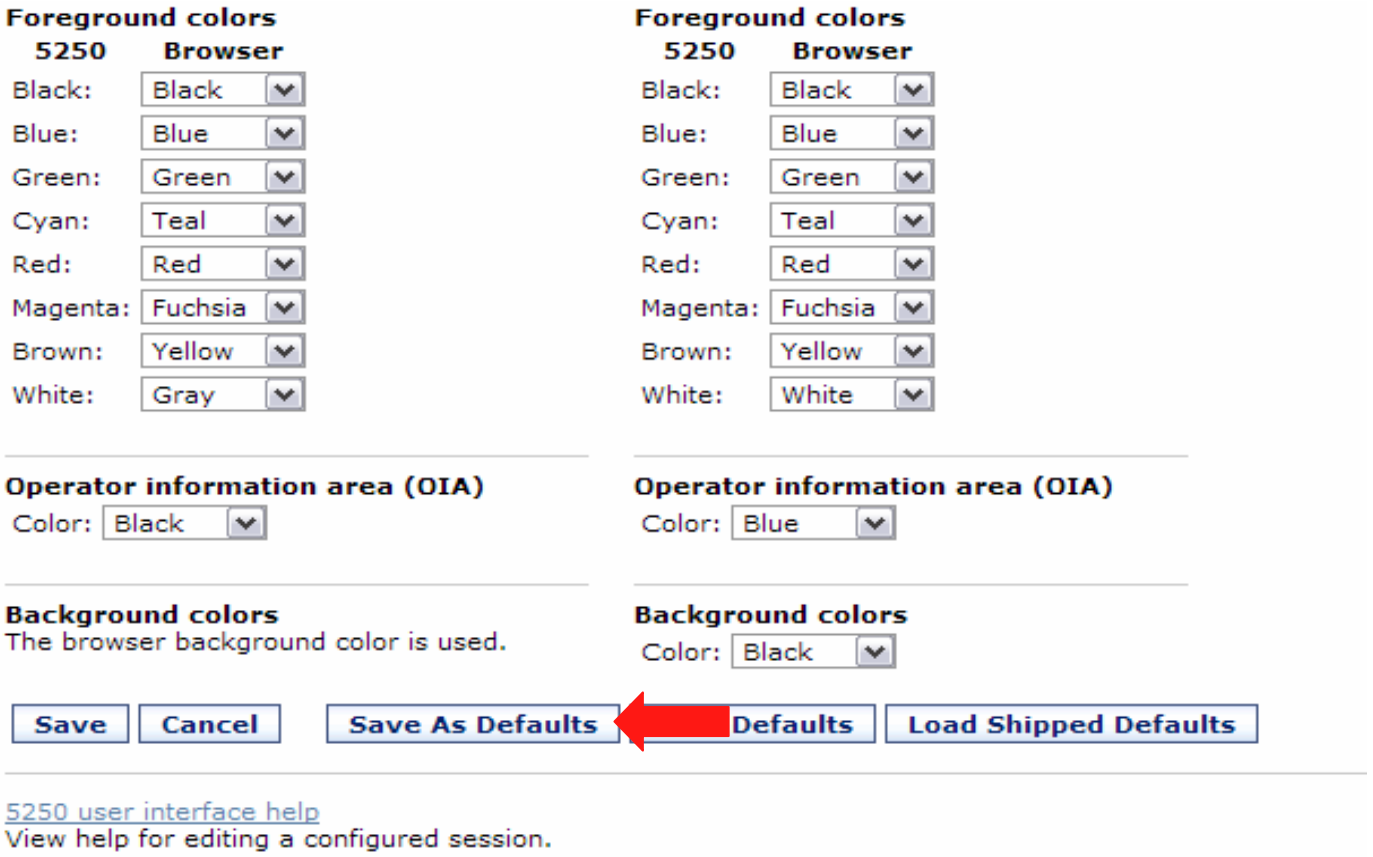


© 2007 IBM Corporation

Setting User Defaults

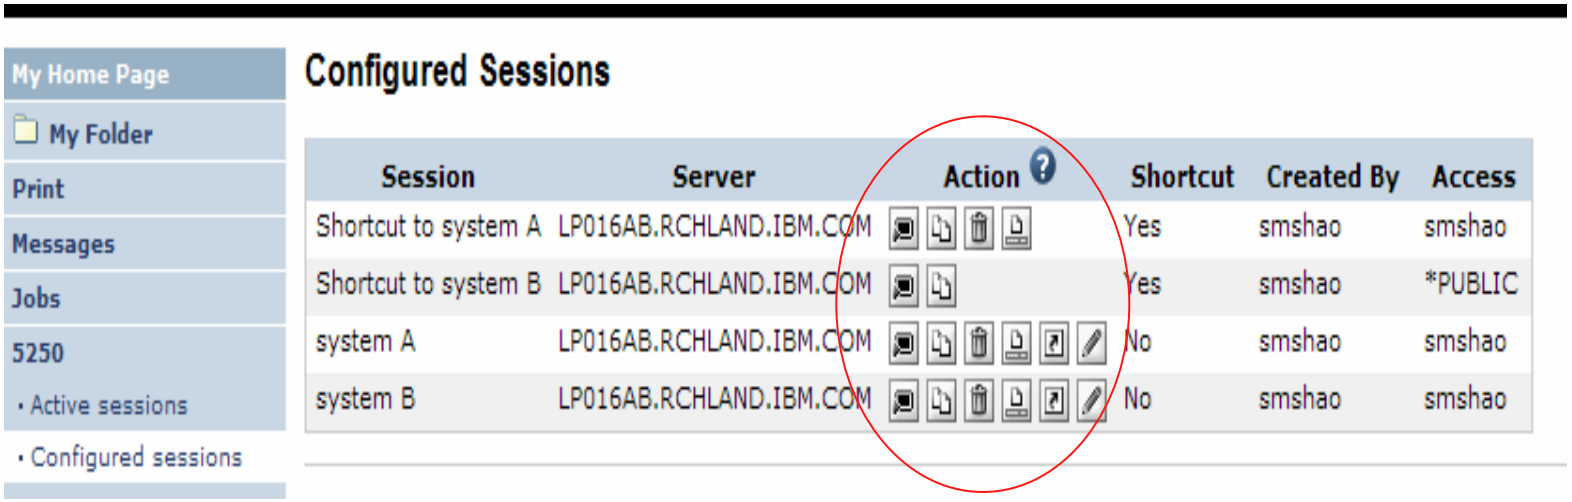
"Save As Default" saves this session configuration as the default for the current user.

Can be performed from active session settings or configured session settings.



© 2007 IBM Corporation

Configured Session Actions



Start	**Start the configured session**
Copy	**Make a copy of the configured session for yourself**
Delete	**Delete the configured session**
Rename	**Rename the configured session**
Create Shortcut	**Share the configured session with another user or group of users**
Edit	**Change the configured session settings**

© 2007 IBM Corporation

Creating Shortcuts to your configured sessions

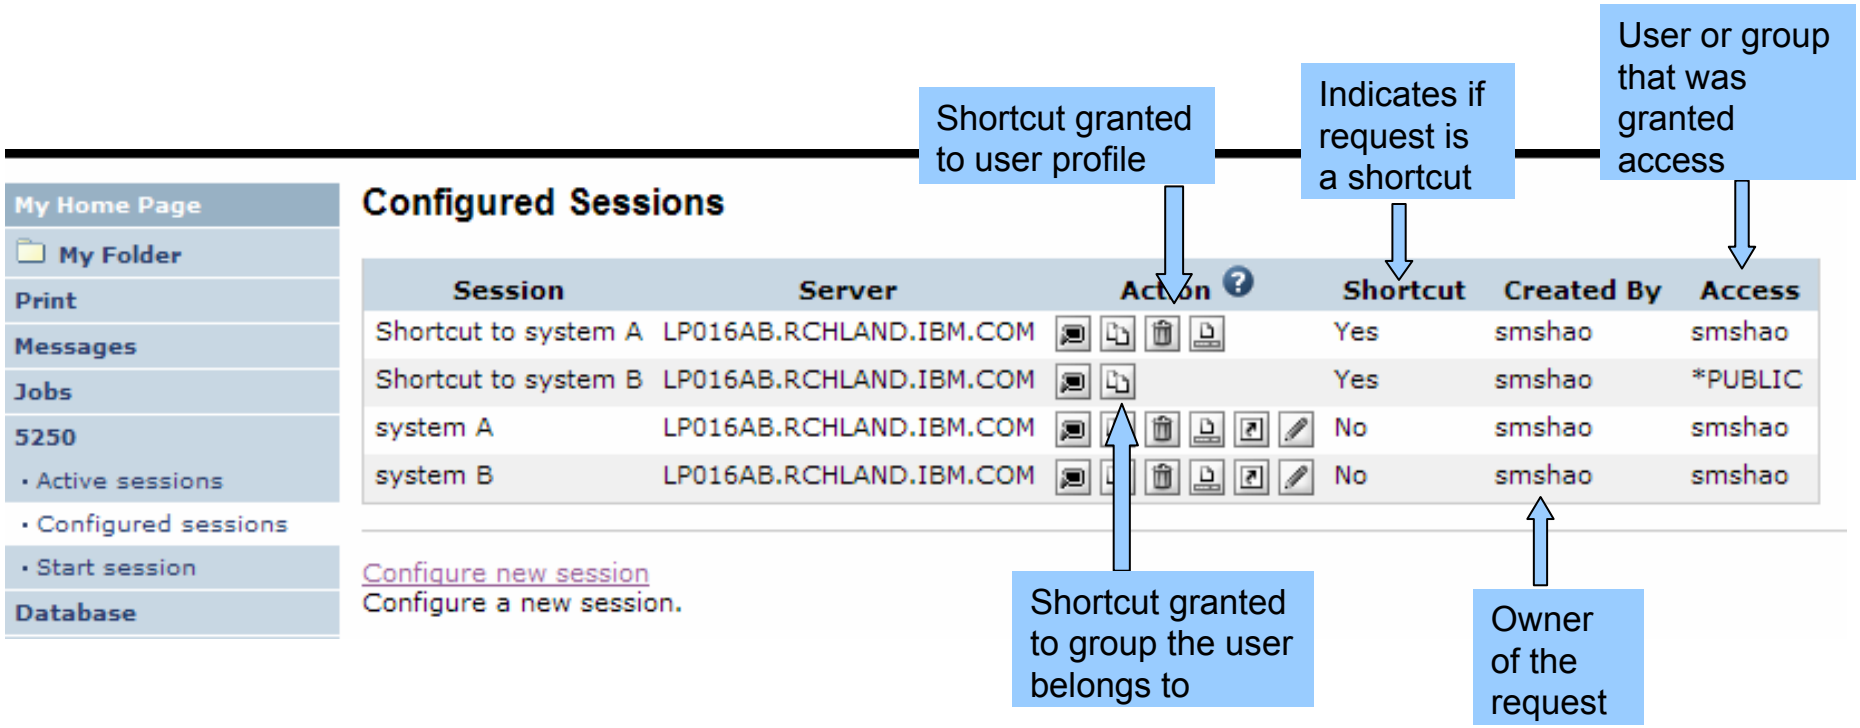
© 2007 IBM Corporation

Shortcuts

- Shortcut is a pointer to a System i Access for Web object
  - Configured 5250 session
  - Database request
  - Shortcuts to an object are deleted when the object is deleted
- The objects is only accessible to the user that created it
- Can share the object with other users
  - Create shortcut for user or group to share with user or group
- User of the shortcut has read only access to the object
  - Cannot modify or delete the object

© 2007 IBM Corporation

Shortcut Example



© 2007 IBM Corporation

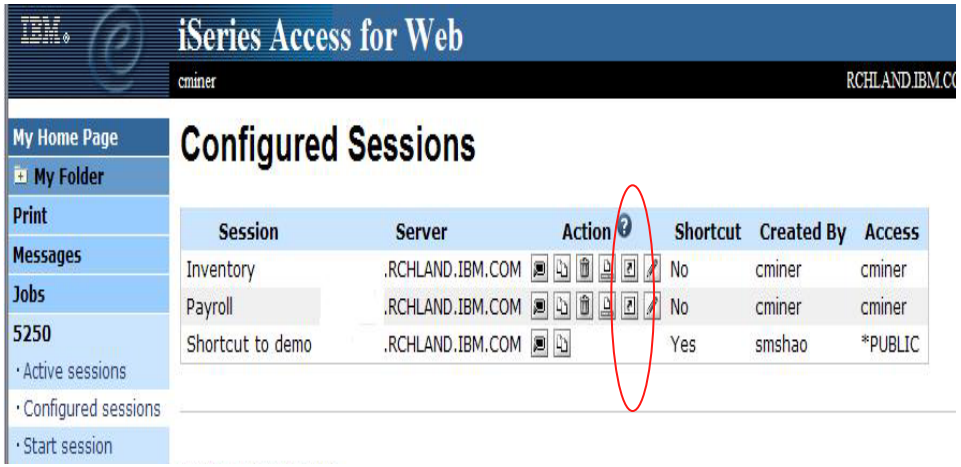
Create ‘Shortcuts’ to Configured Sessions

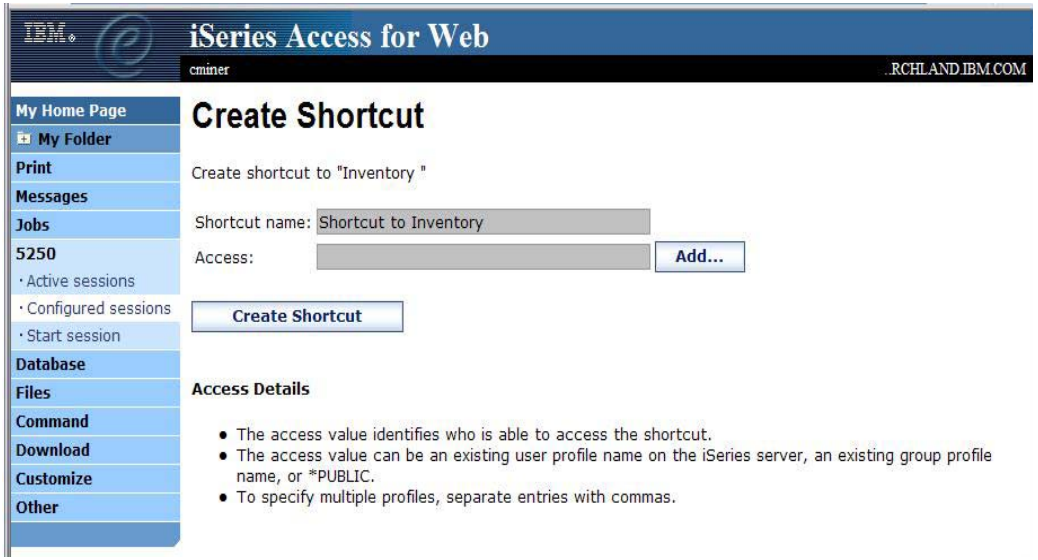
Your Configured Session

- Create ‘Shortcuts’ for other users

Can set Policies

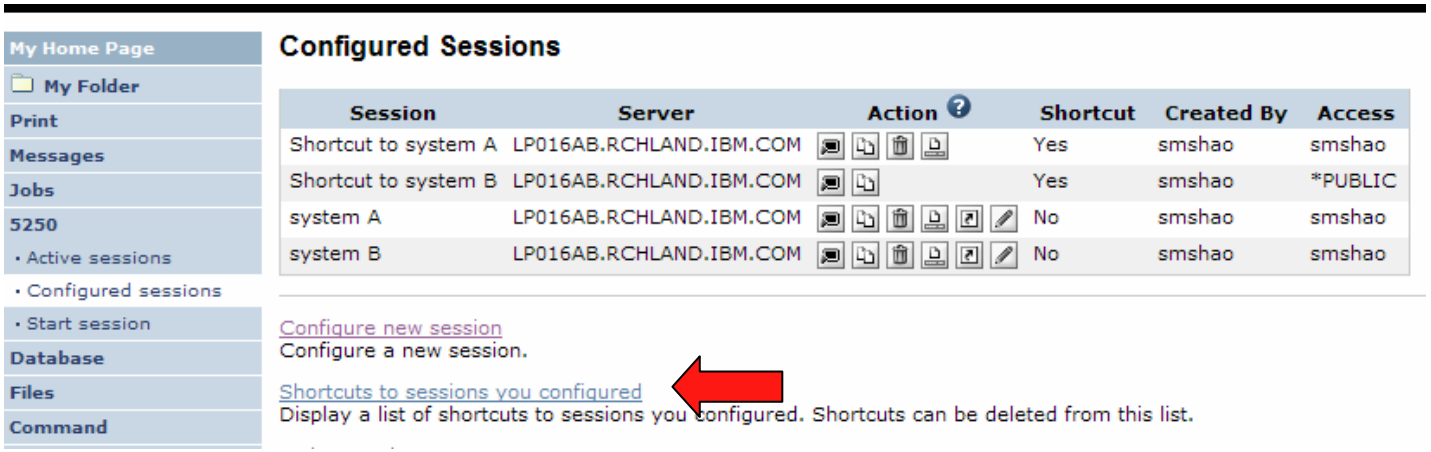
- To restrict what users can do with your shortcut.
- Do not allow users to:
  - Copy your shortcut
  - Delete your shortcut
  - Rename your shortcut
  - Edit your shortcut
  - Create another Shortcut





© 2007 IBM Corporation

Finding Shortcuts You Created



Click the “Shortcuts to sessions you configured” link

Creating Macros

Shortcuts to Macros

Adding Macros to Preconfigured sessions

© 2007 IBM Corporation

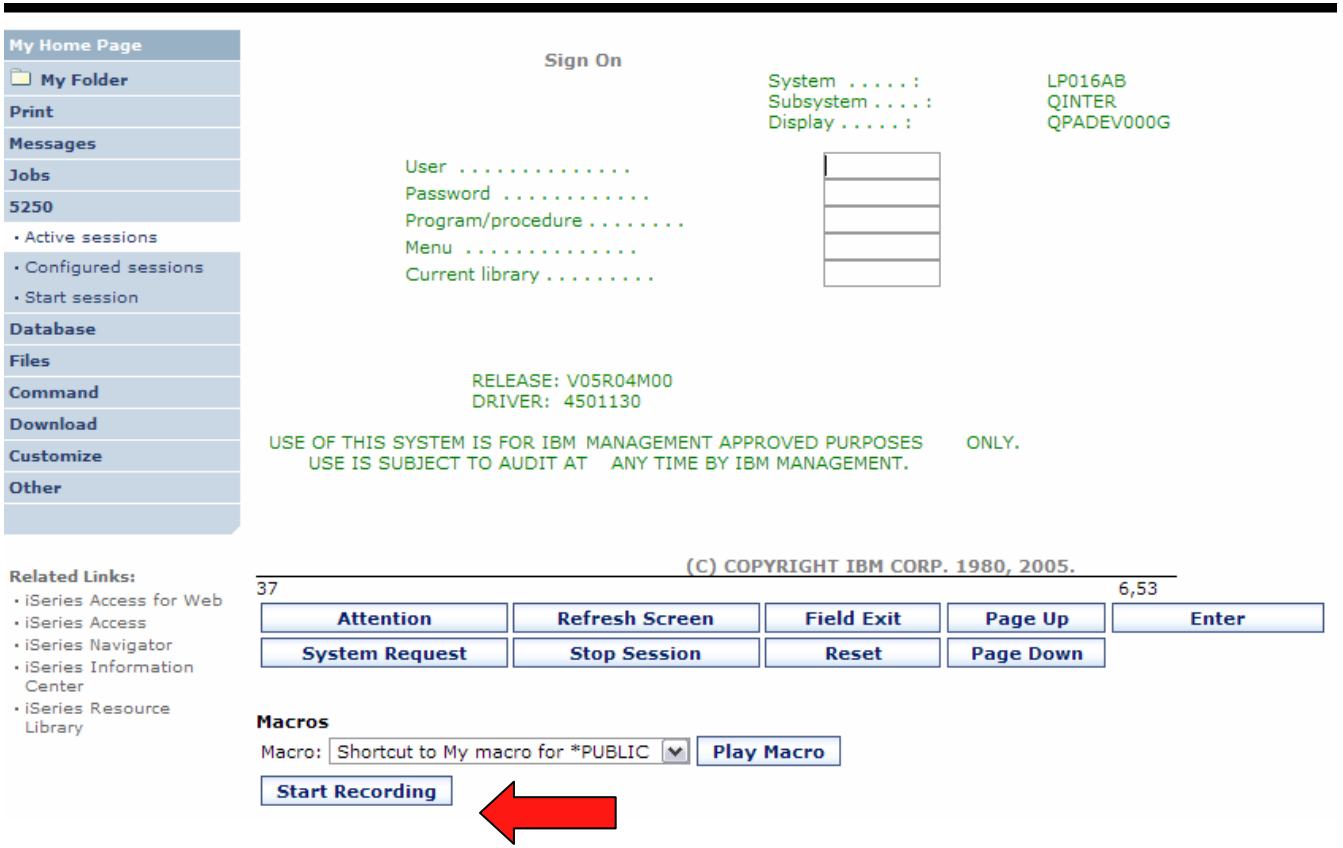
Macros

Behave differently than PC5250

- Keys processed on a screen by screen basis
  - PC5250 – every key is recorded and played back
  - System i Access for Web – cursor positioned in field and keys entered into field
- On a given screen, keys may not be processed in the same order as they are entered
- Functionally equivalent, but behaves differently

© 2007 IBM Corporation

Recording Macros



© 2007 IBM Corporation

Stop Recording

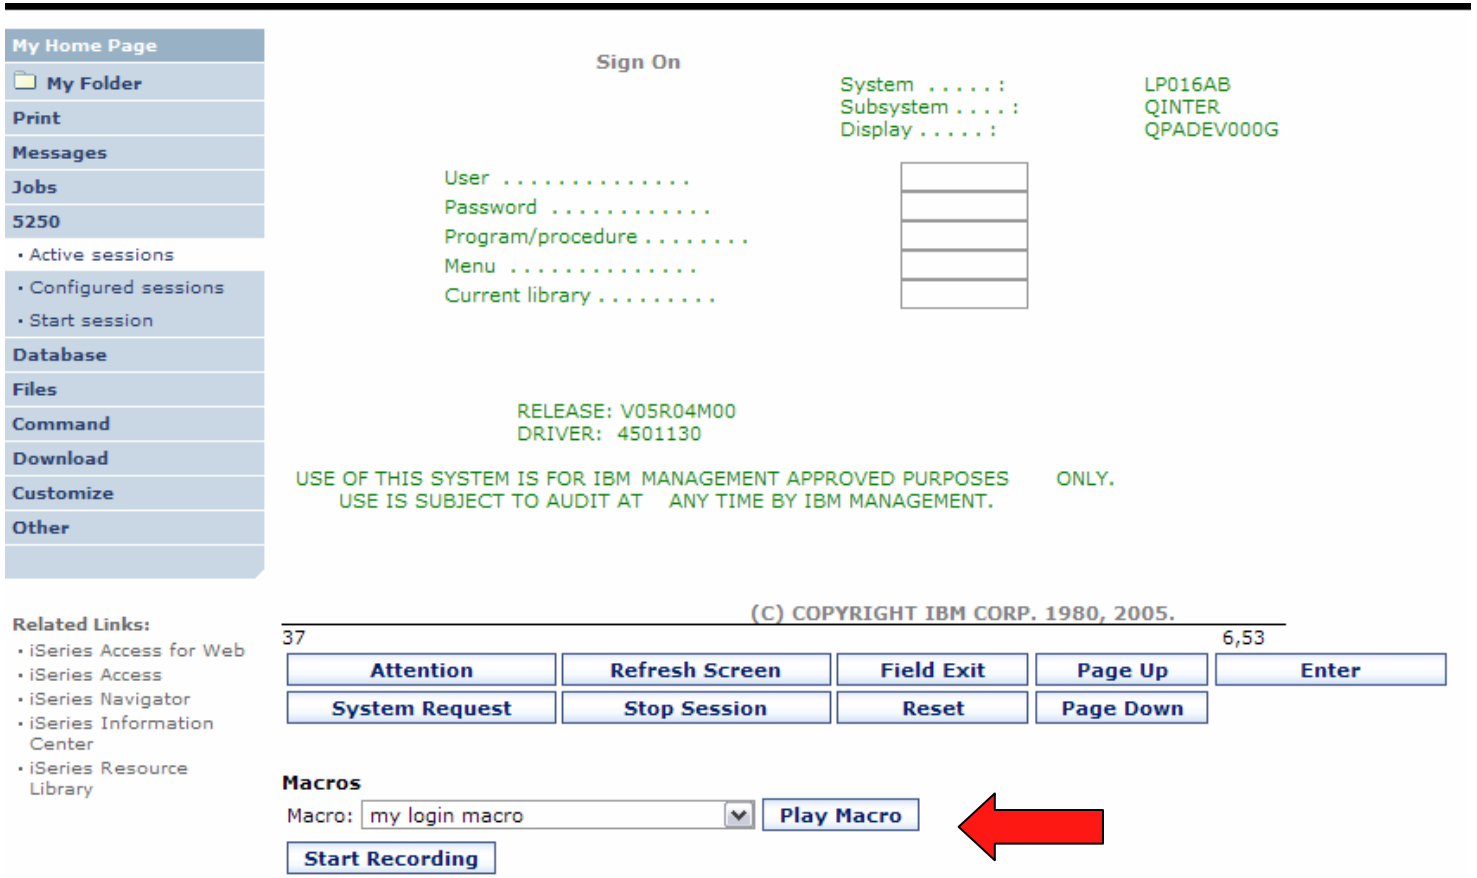
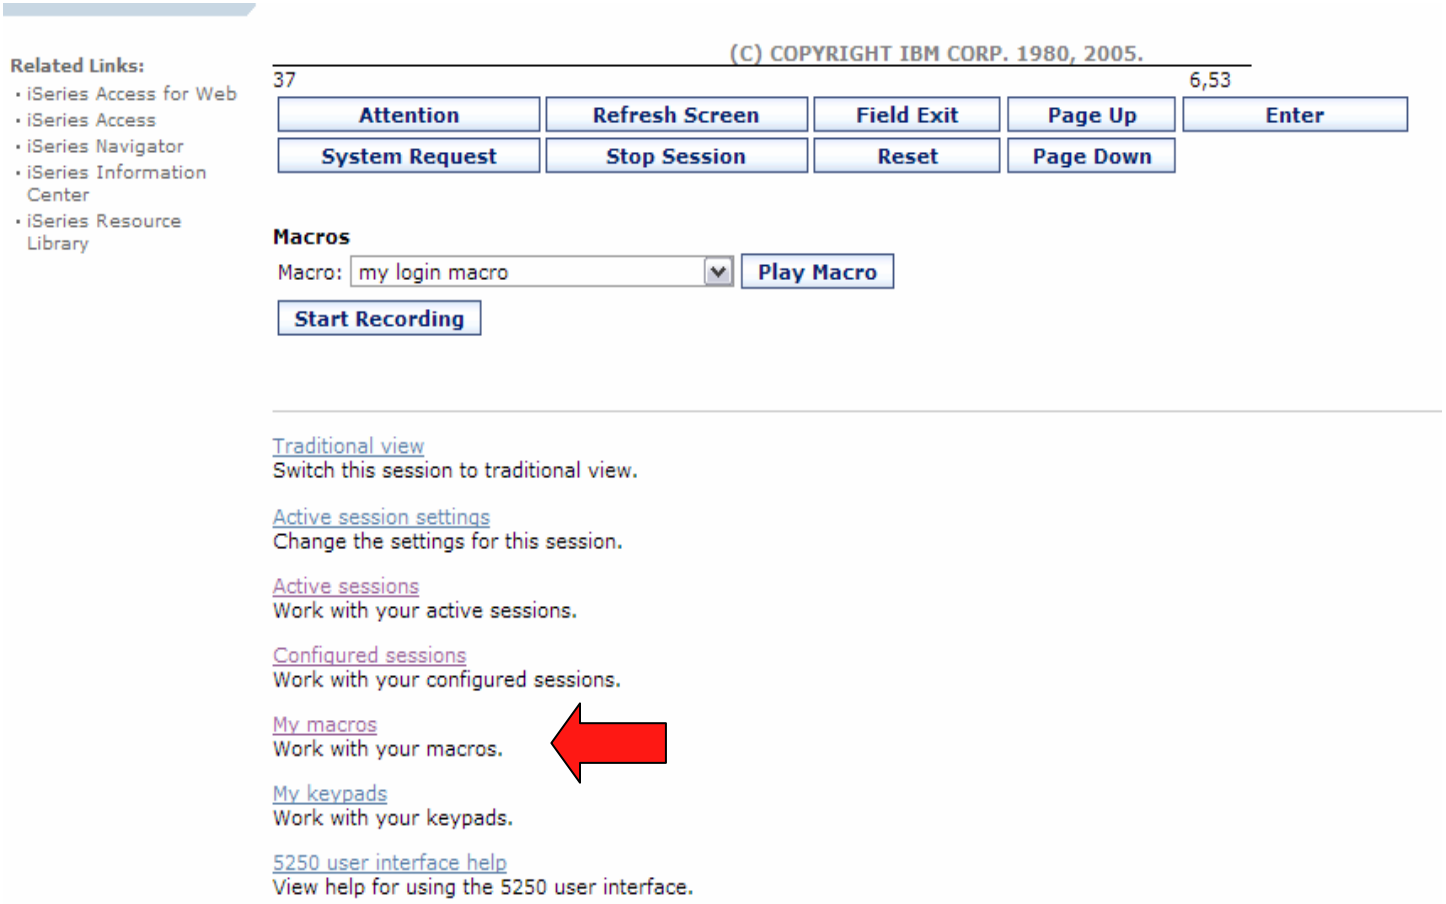
Playing Macro



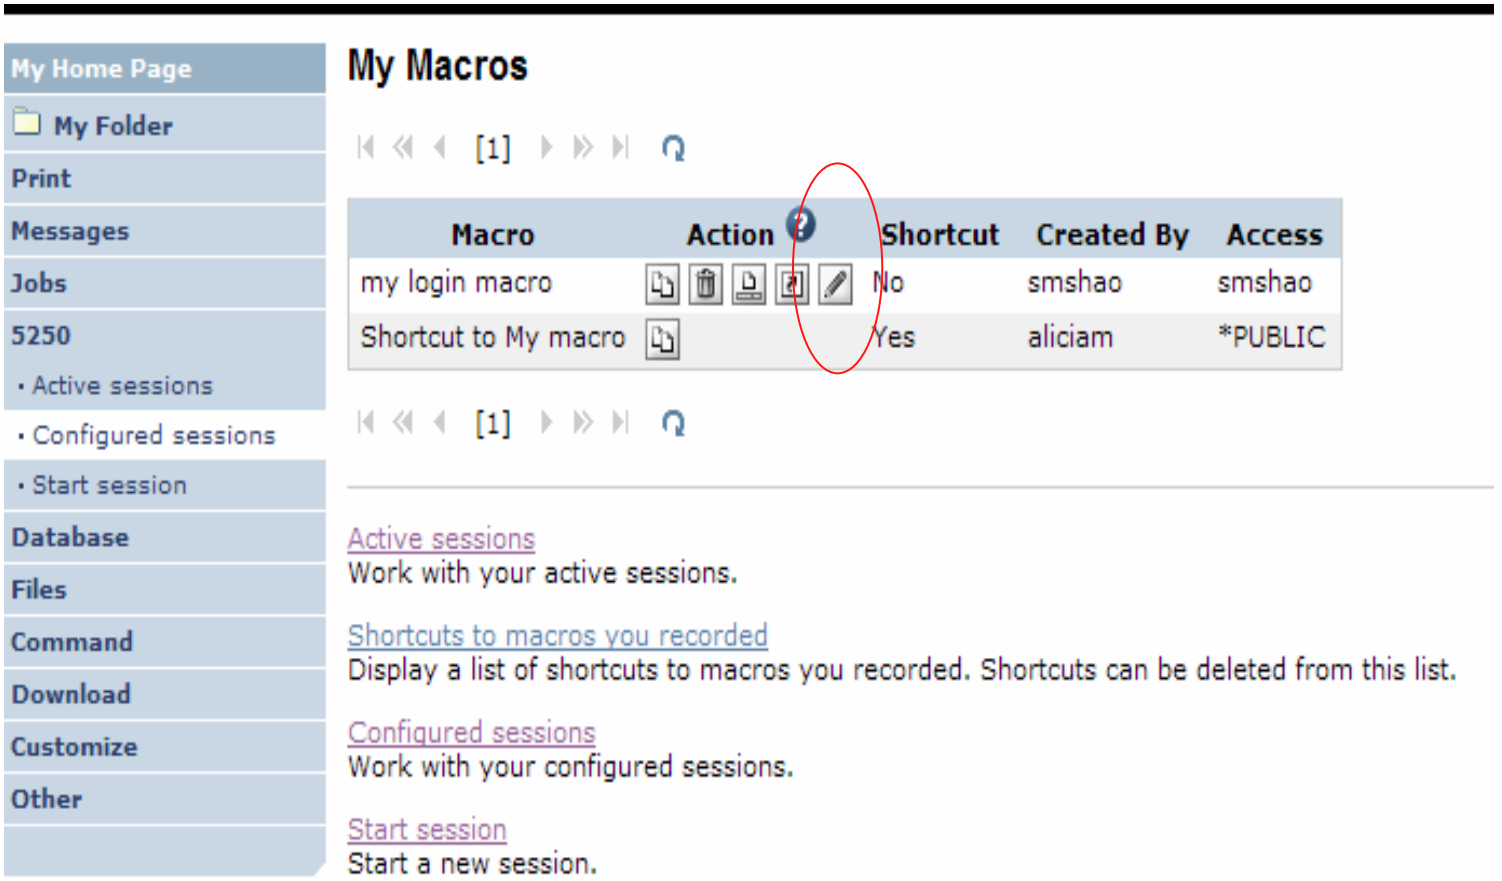
© 2007 IBM Corporation

Managing Macros



© 2007 IBM Corporation

My Macro List → Edit Macro



© 2007 IBM Corporation

Single Sign On with Macro

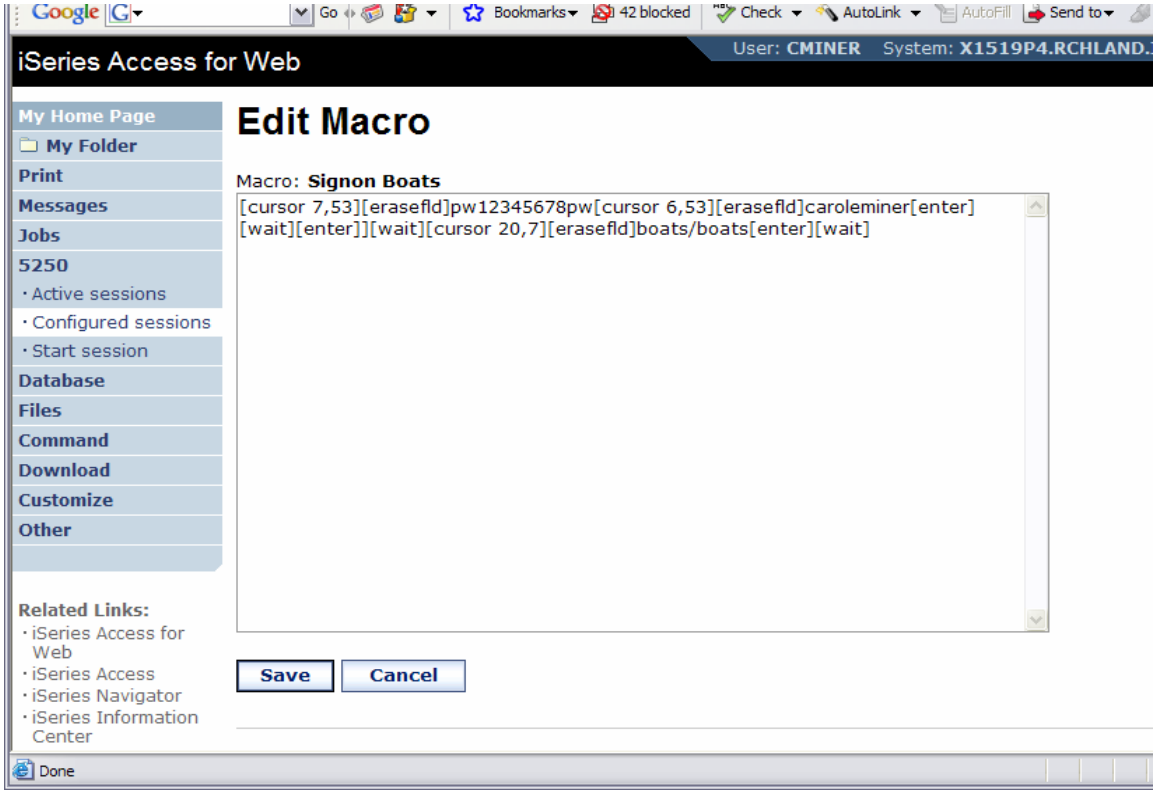
- Create a macro to login to 5250
  - Using your own user ID and password
- Edit the macro and replace your user ID and password with directives to use the user's login
- Share the macro (create shortcut) with the user or group
- Associate the macro with a session so the macro is executed when the session starts
- Share the session (create shortcut) with the user or group

© 2007 IBM Corporation

Editing a Macro

This macro was created to bypass the i5/OS sign-on screen and to put the user directly into an RPG application called BOATS.

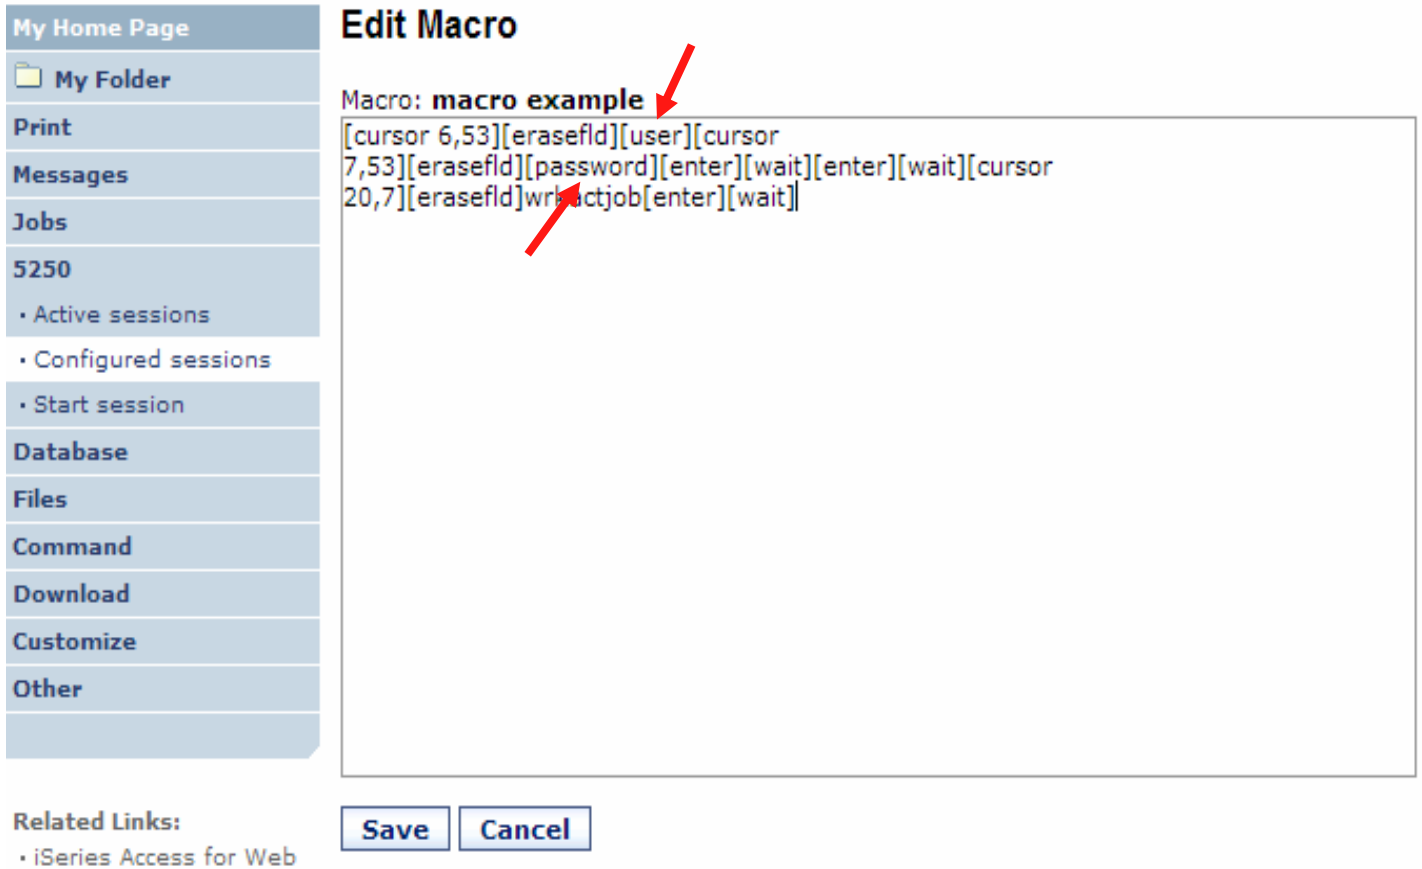
- **Note that the user-ID and password are listed in clear text.**



© 2007 IBM Corporation

Edit Macro

Replace the recorded user ID with [user]
Replace the recorded password with [password]



© 2007 IBM Corporation

Supported Commands for Macros

The supported cursor positioning commands are:

General macro commands

[attn] - Attention
[altview] - Alternate View
[backspace] - Backspace
[backtab] - Backtab
[bof] - Beginning of field
[clear] - Clear
[down] - Cursor down
[left] - Cursor left
[right] - Cursor right
[cursel] - Cursor select
[up] - Cursor up
[delete] - Delete character
[dspsosi] - Display SO/SI
[dup] - DUP field
[enter] - Enter
[eof] - End of field
[eraseeof] - Erase EOF
[erasefld] - Erase field
[erinp] - Erase input
[fldext] - Field exit
[fieldmark] - Field mark
[field-] - Field minus
[field+] - Field plus

General macro commands...

[pf1] - F1
[pf2] - F2
[pf3] - F3
[pf4] - F4
[pf5] - F5
[pf6] - F6
[pf7] - F7
[pf8] - F8
[pf9] - F9
[pf10] - F10
[pf11] - F11
[help] - Help
[home] – Home
insert] - Insert
[newline] - New line
[pa1] - PA1
[pa2] - PA2
[pa3] - PA3
[pageup] - Page up
[pagedn] - Page down
[reset] - Reset
[sysreq] - System request
[tab] - Tab field

[pf12] – F12
[pf13] – F13
[pf14] – F14
[pf15] – F15
[pf16] – F16
[pf17] – F17
[pf18] – F18
[pf19] – F19
[pf20] – F20
[pf21] – F21
[pf22] – F22
[pf22] – F23
[pf24] – F24

Bi-directional text support commands

[base] - Base
[close] - Close
[fldrev] - Field reverse
[latinlayer] - Latin layer
[screenrev] - Screen reverse

Other macro commands

[cursor row,column] - Locate cursor at specified row and column. Row and column must be numbers.
[password] – authenticated password
[pause] - Pause 1 second
[pause n] - Pause n seconds
[userid] – authenticated user-ID
[wait] - Wait for input

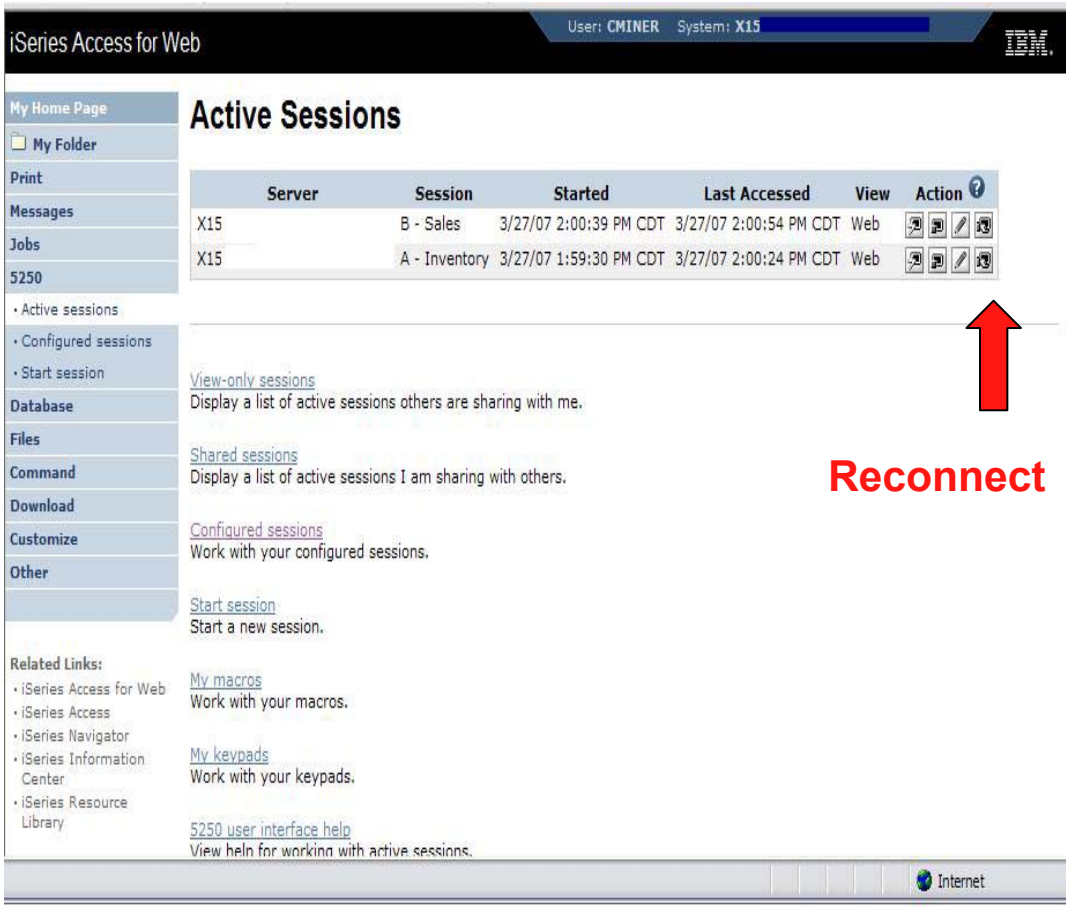
Active Sessions

© 2007 IBM Corporation

Active Session

- An active session is a session that has been started
  - Dynamically or configured session
- A user may have more than one active sessions

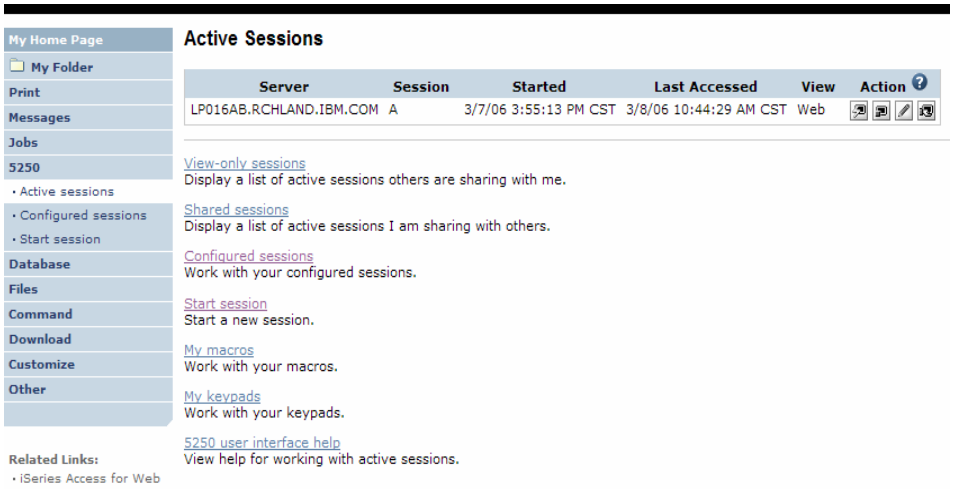


Reconnect

© 2007 IBM Corporation

Active Session Life Span

- Session resides on the server, not the workstation
- Session remains active until
  - User ends (stops) the session, or
  - Session time out due to inactivity
    - Time out value is configurable through Access for Web



Taking advantage of active session behavior

- Leave the session and browse on the web, or
- Leave your workstation and go to another workstation and
- Reconnect to your session

© 2007 IBM Corporation

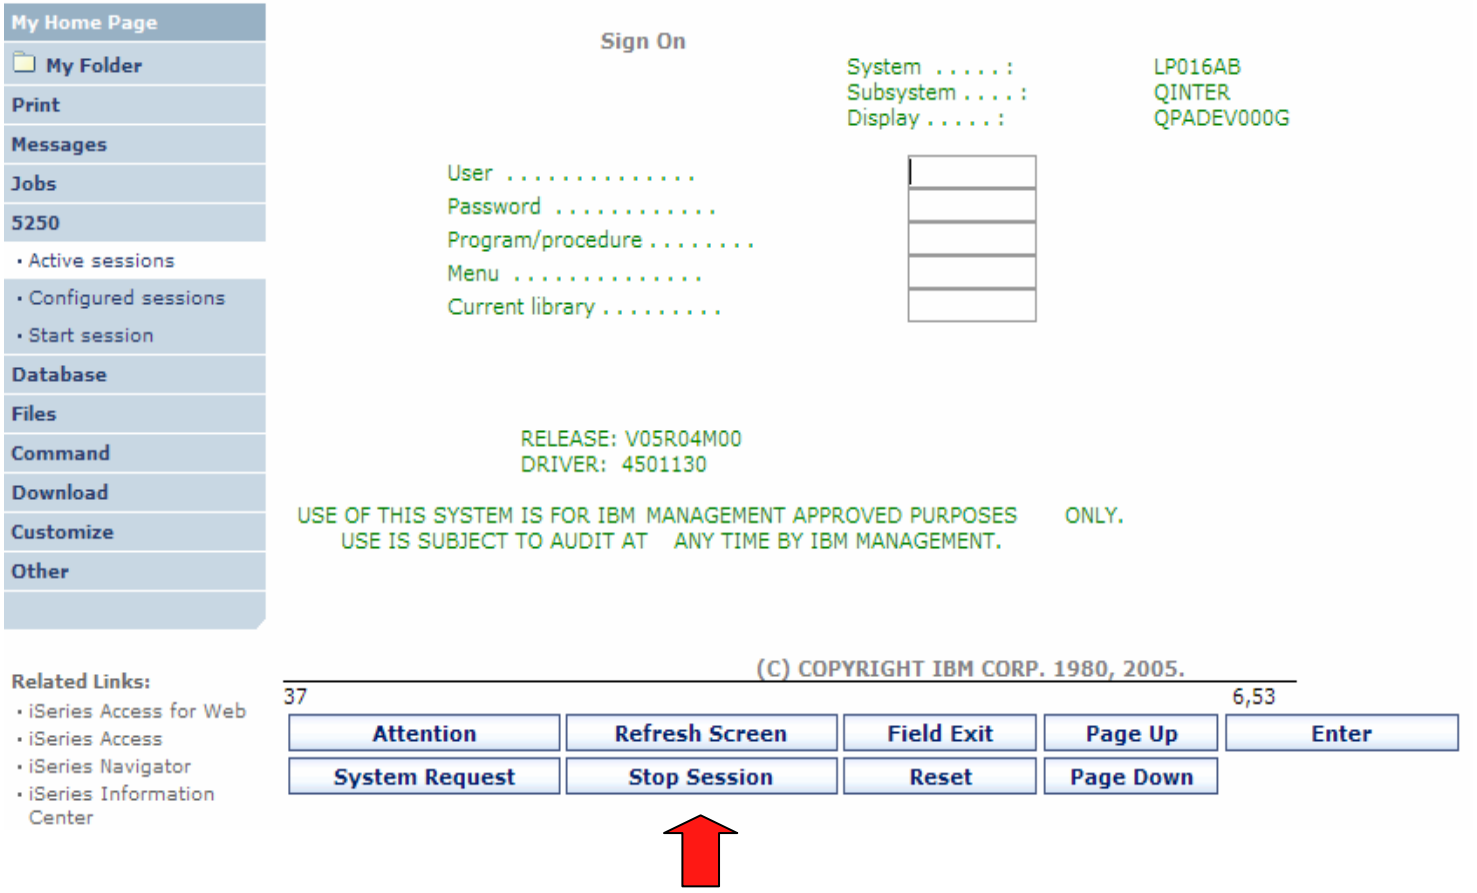
Ending a Session

Closing the browser or turning off the workstation does not end the session

- **Two ways to end a session**
  - **From an active session**
  - **From active session list**
- **Properly cleaning up TN5250 connection**
  - **Frees up resources in application server (Access for Web)**
  - **Frees up resources on target server (TN5250)**

© 2007 IBM Corporation

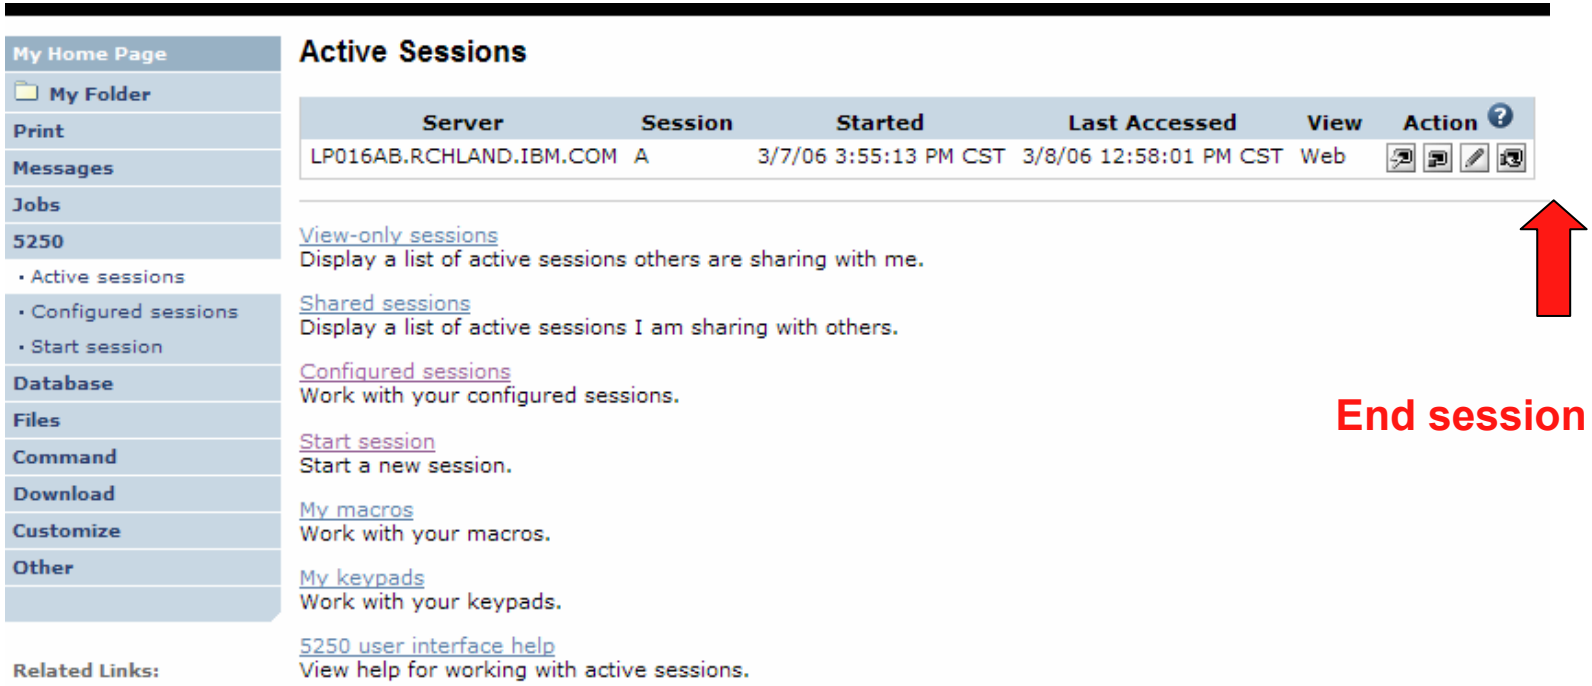
Ending a Session from Active Session



End this active session

© 2007 IBM Corporation

Ending a Session from Active Session List



© 2007 IBM Corporation

Changing Active Session Settings

Does not affect the configured session settings

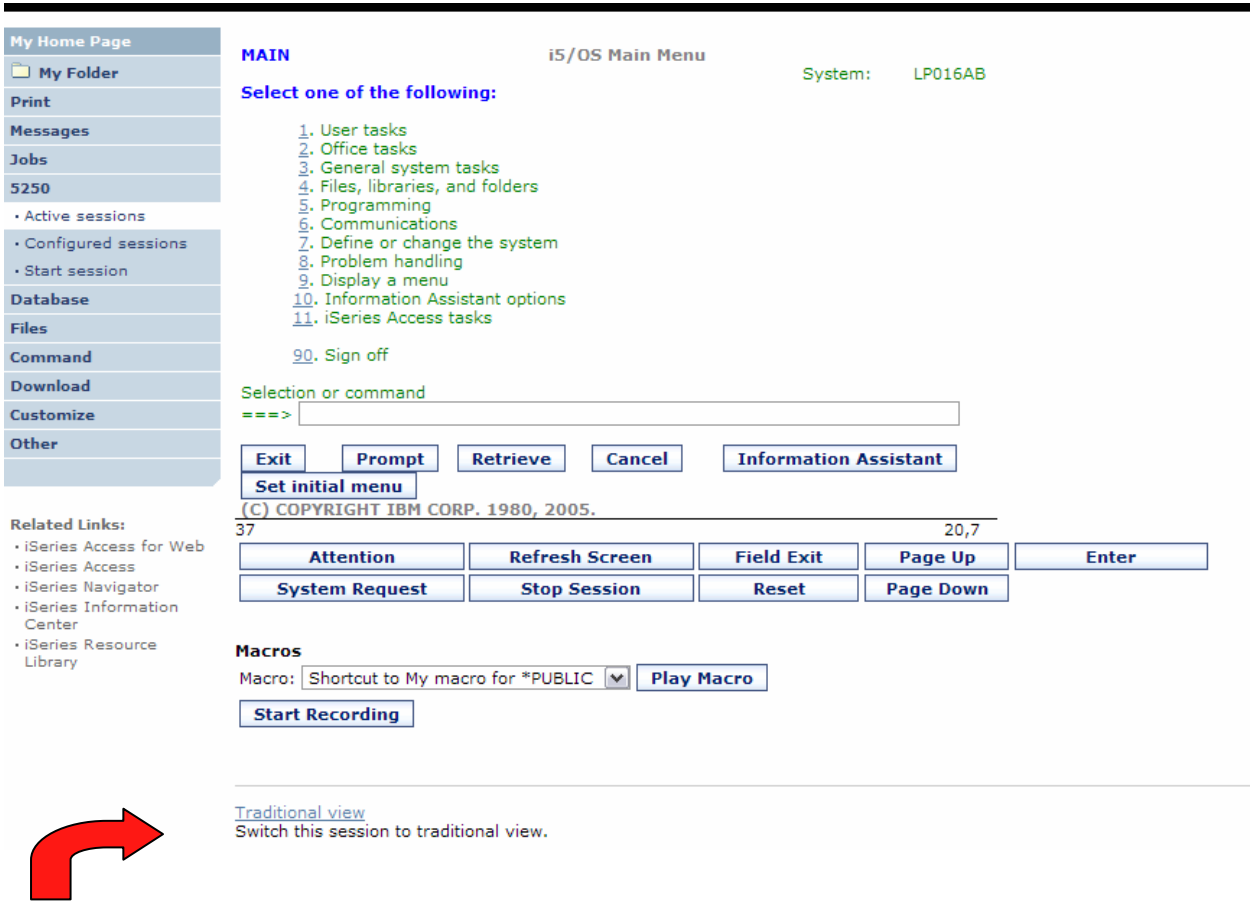
- The changes are tied to the running instance of the session
- Changes only affect how this particular active session behaves

Some settings are not modifiable

- Server name
- Port
- Code page
- Workstation ID
- Default view (web or traditional)
- Initial macro

© 2007 IBM Corporation

Active Session - Web View



Switch to traditional view by selecting the “Traditional view” link

© 2007 IBM Corporation

Active Session - Traditional View

Switch to web view by selecting the “Web view” link

© 2007 IBM Corporation

Web View vs. Traditional View

Web View

- Proportional font
- Menu displayed as links
- Active function keys displayed as buttons
- Allows cursor positioning at non-input fields
- Display “More…” as button
- Message line (25th line) treated as help

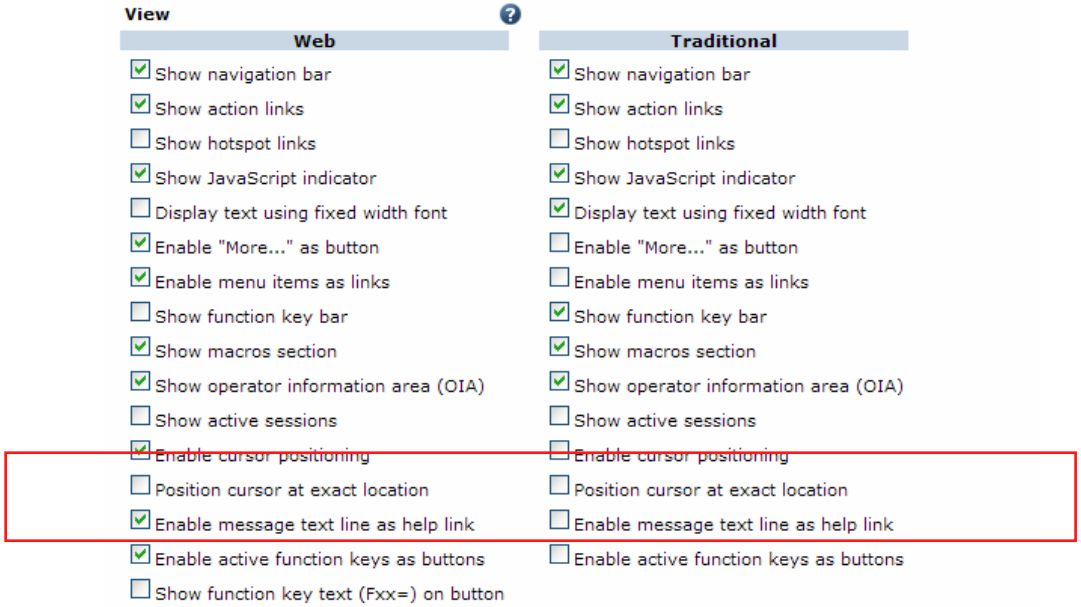
Traditional View

- Fixed width font
- Function key bar (F1-F24)
- Background color configurable (default is black)

- All the view settings are configurable.
- Configure web and traditional view settings for your environment.

© 2007 IBM Corporation

Cursor Positioning



© 2007 IBM Corporation

Cursor Positioning

Problem

- Many 5250 applications rely on cursor location for context sensitive help and prompting
- Web pages does not have a “text cursor” except in input fields

Solution

- All non input fields are turned into links
- Clicking on the link places the cursor at that location
- Two settings for cursor positioning
  - Place cursor at the beginning of the field
    - Smaller HTML content
    - May not work for applications that require exact cursor location
  - Place cursor at the exact location
    - Larger HTML content

© 2007 IBM Corporation

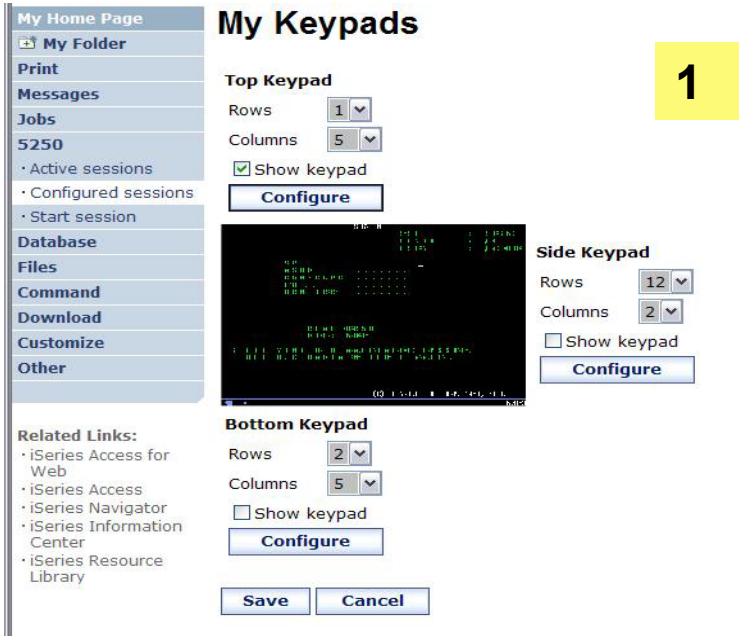
Keypads

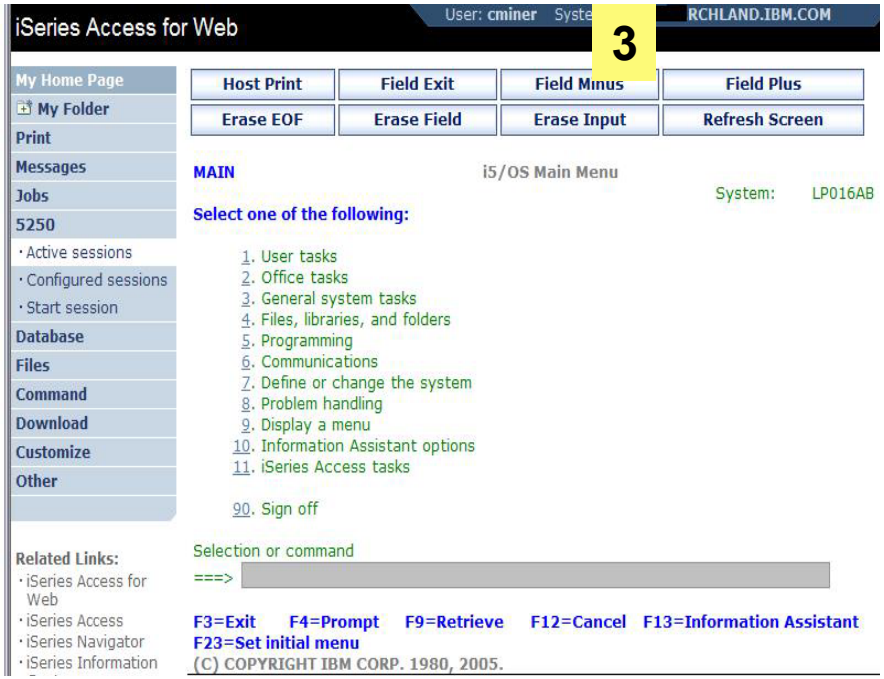
© 2007 IBM Corporation

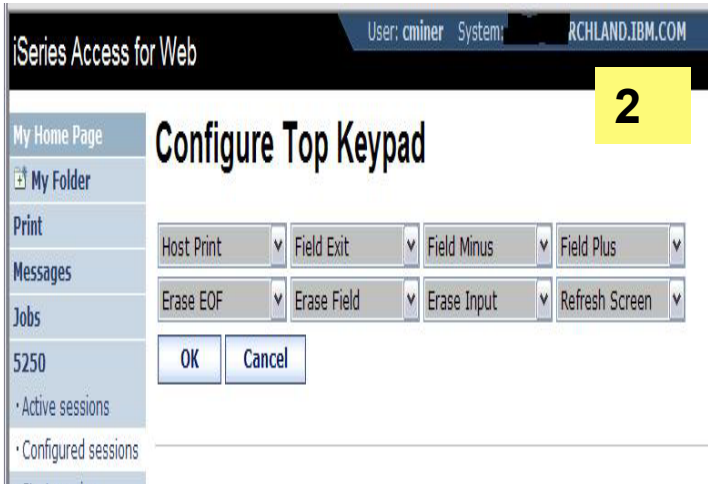
My Keypads

Configuring a Keypad is a very effective way to simplify many end user tasks

- **For example, a button to do a 'Host Print' of a screen**







© 2007 IBM Corporation

Keypads

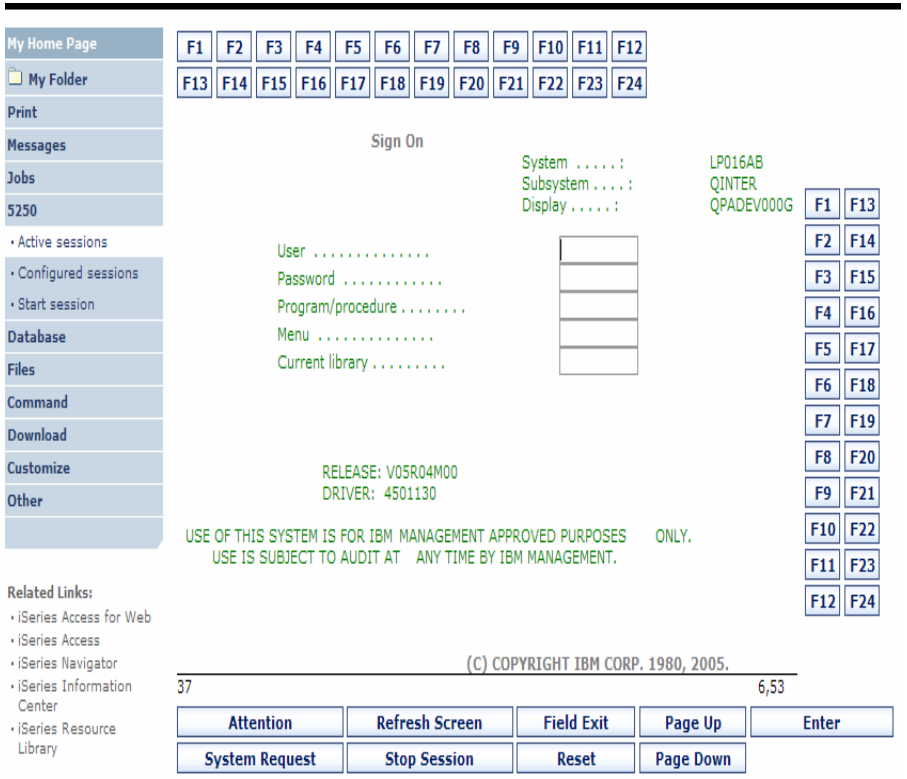
Three sets of keypads

- Top, right, and bottom
- Each set can be customized
- Each set can be turned on or off

Macros can be assigned to keypad

Configuration is per user

- One keypad configuration per user
- Global across all session configurations
- Not tied to session configuration



Keypads cannot be set by administrator for users

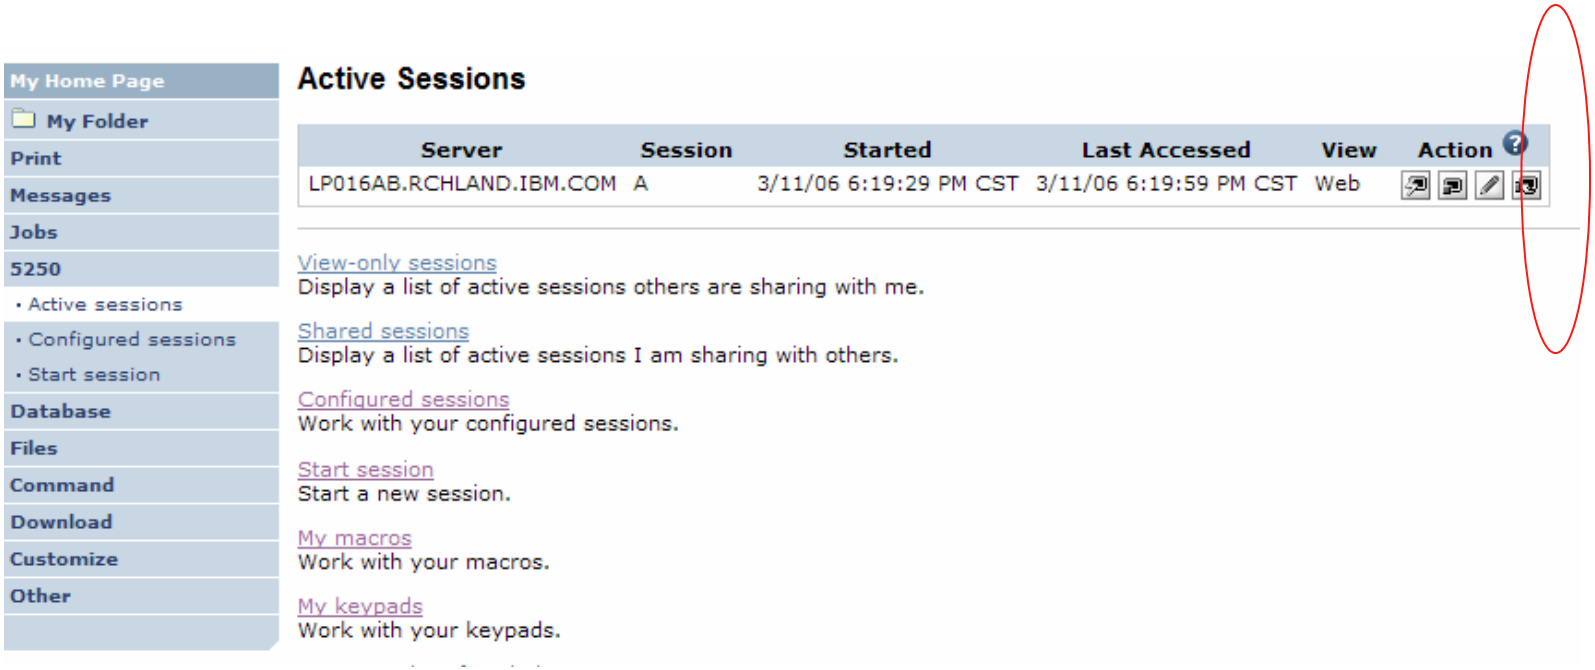
Shared Sessions

© 2007 IBM Corporation

Sharing an Active Session

Give another user or group a read only view into an active session.



© 2007 IBM Corporation

Notes: Shared Sessions

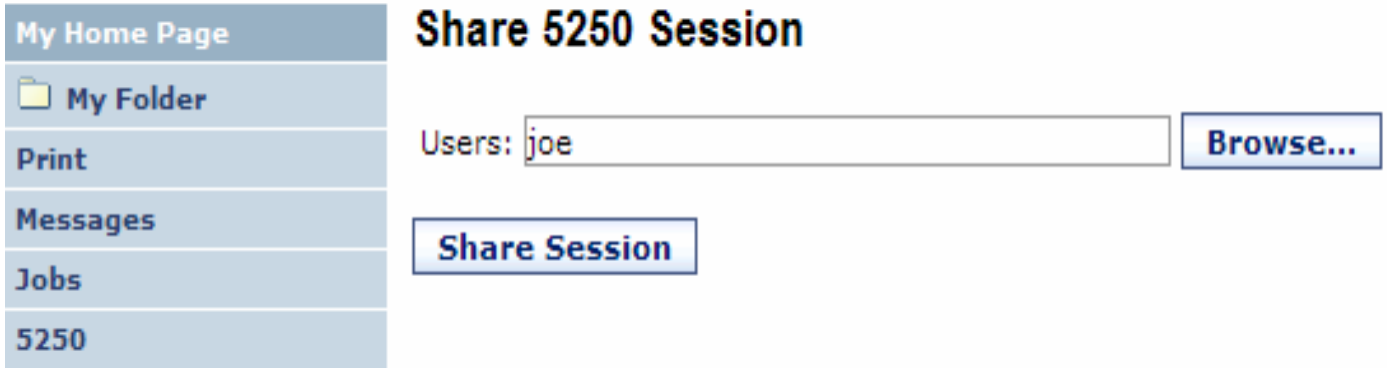
Active sessions can be shared with other users and groups. The user who starts the session maintains full control of it. Users with whom the session is shared can only view the session. They cannot enter input or change the session settings.

Changes to a shared session are not automatically seen by users viewing the session. The browser's refresh button must be used to see the latest changes.

© 2007 IBM Corporation

Sharing an Active Session

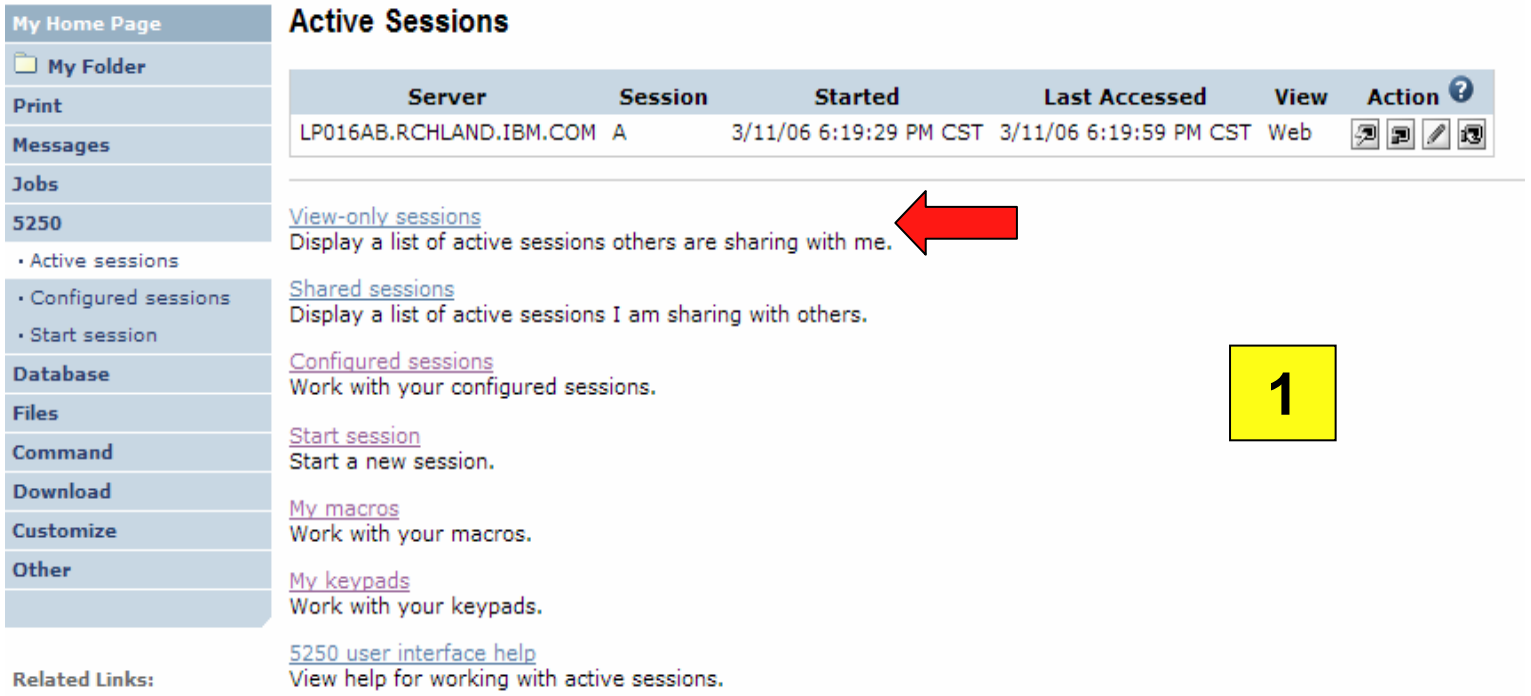
Enter the user or group profile to share the session with.



© 2007 IBM Corporation

View-only Sessions

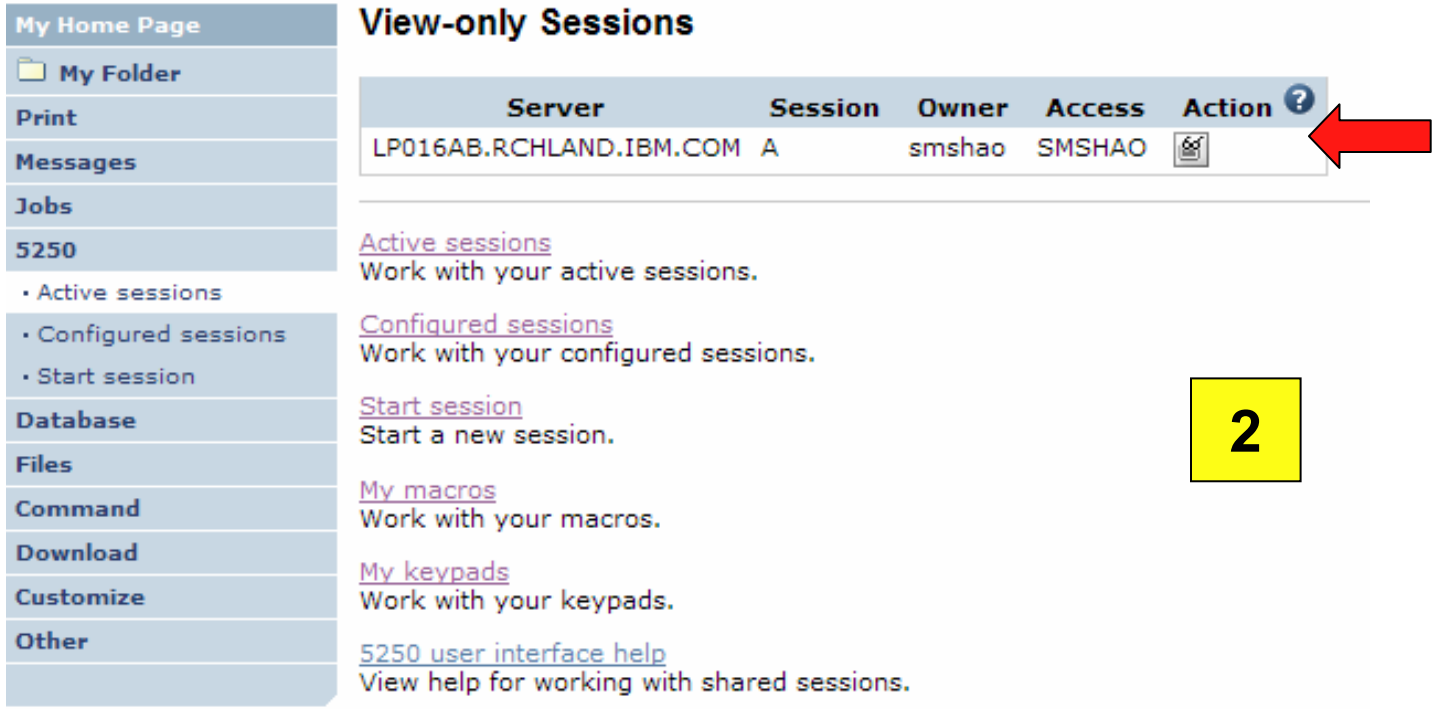
- **To view a Shared Session, select the "View-only sessions" link from the Active Sessions page.**



© 2007 IBM Corporation

View-only Session List

Click the "View" button to view the session.

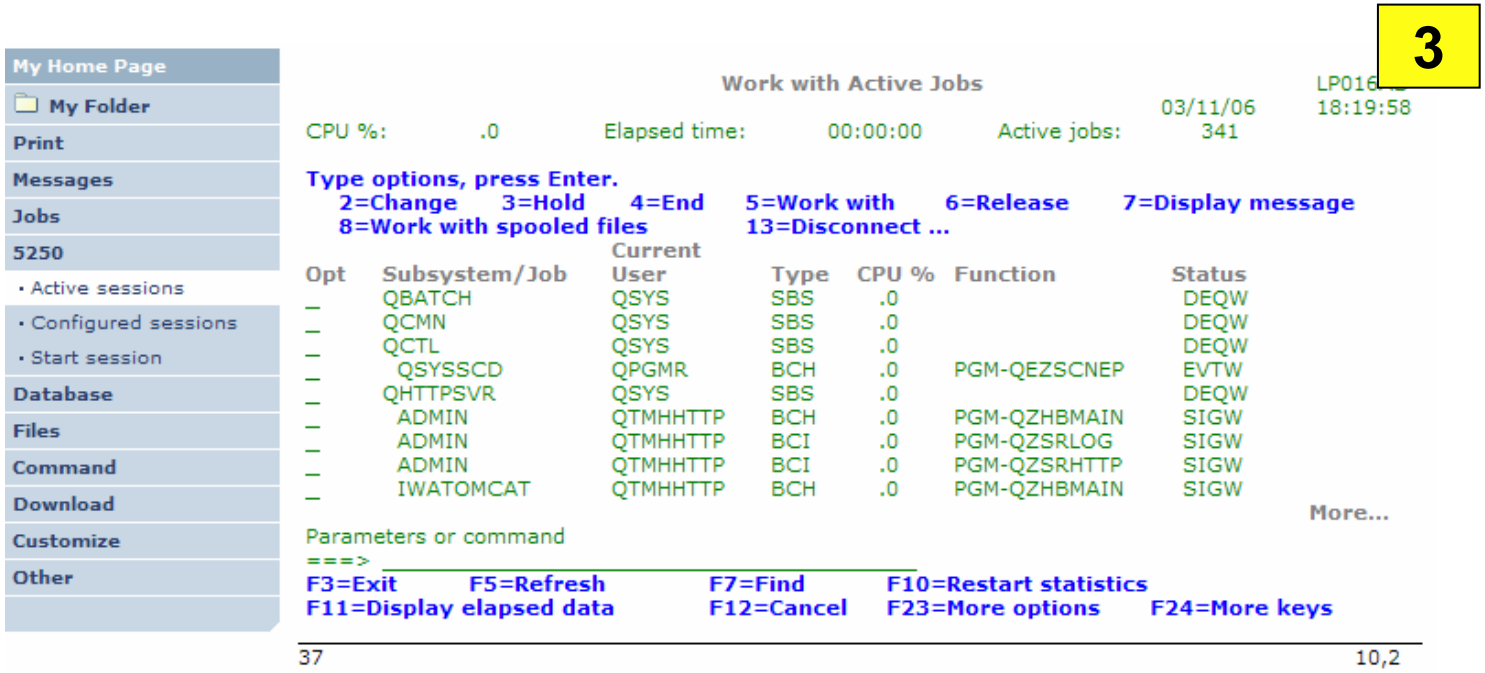


© 2007 IBM Corporation

View-only Session

View-only session - input fields are disabled.

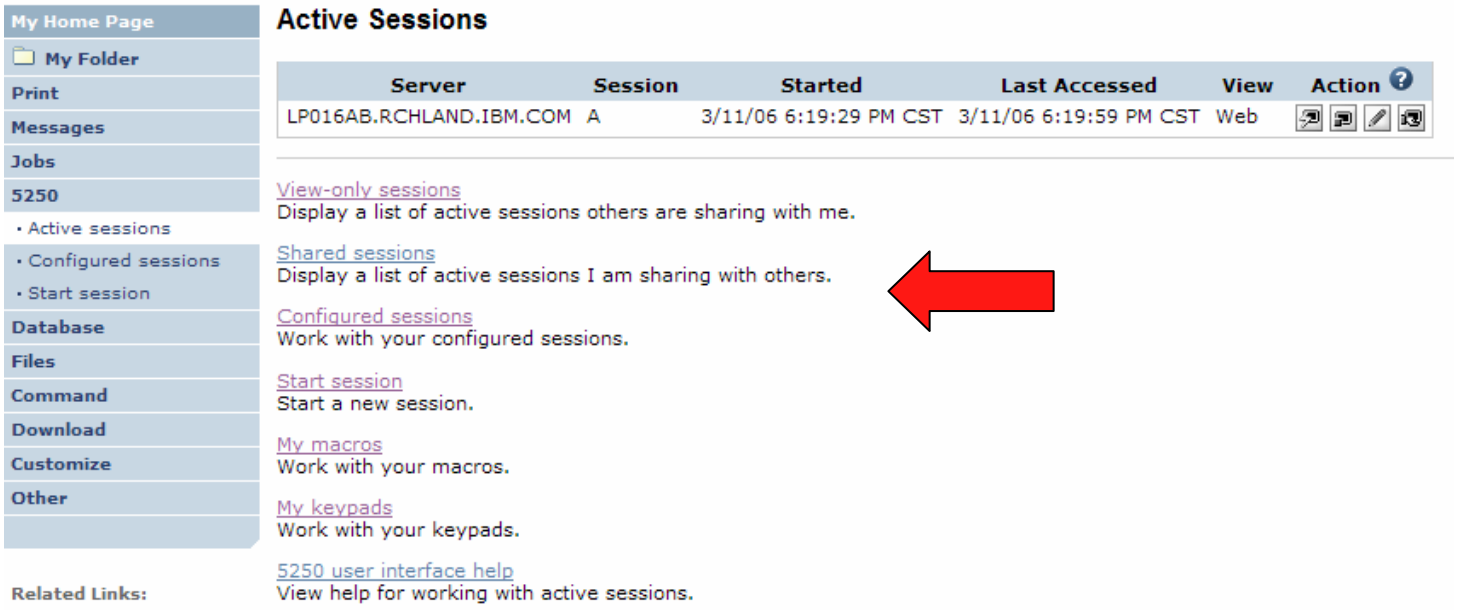
Use the browser “Refresh” button to display updated screens.



© 2007 IBM Corporation

Managing Shared Sessions

Select “Shared sessions” from the “Active Sessions” list to display the list of active sessions that are being shared.



© 2007 IBM Corporation

Shared Session List

Use the “Stop sharing” button to stop sharing this session.
