available in your country. IBM makes no commitment to make  
available any products referred to herein.

*Simplify your IT.*

## Abstract

**If you are looking for an extremely simple and highly functional way to work with System i resources, then System i Access for Web is the best option!**

**Users simply start up their favorite browser and point-and-click their way through easy-to-use GUIs and wizards. This session shows how users can run host applications, work with the database, printers, and the IFS. Network administration is a breeze as nothing is installed or configured on the PC, and control is at the server. You will see how to:**

- **Run host applications (5250 emulation), upload and download database information, and use the iSeries as a file and print server**
- **Convert spooled printer output to PDF and either print it or email it**
- **Work with printers, jobs, run commands, send messages -- all through easy-to-use GUIs designed around the browser interface**
- **How an administrator can set up different views ('window') of the iSeries for different groups of users.**
- **Learn about the new features in the V5R4 version of System i Access for Web.**

## Requirements?

Would you like to see some other features in System i Access for Web?

Please submit requests for enhancements via the FITS system.

The url is:

<http://www.ibm.com/eserver/iserries/access/>

And click on link “[Request for Design Change](#)”

*This really helps development get new functions into the planning process*

## Packaging and Ordering

V5R2 End of Support (EOS) is 4/30/2007

## iSeries Access and System i Express

- Each i5/OS user on System i is entitled to use any client in the iSeries Access Family at no additional charge
- With iSeries Access, users can:
  - Access traditional i5/OS applications using the 5250 emulation function
  - Query and retrieve DB2 information through easy-to-use GUIs
  - Upload spreadsheet information into DB2
  - Use i5/OS as a file server
  - Access i5/OS printer output, convert it to .PDF, and print it on PC printers
- iSeries Access Family (5722-XW1) unlimited user feature included with 515 and 525 systems

***Just announced in  
April 2007***

## Table of Contents

- **What is Access for Web?**
- **Getting Started**
- **Ways to roll out to end users**
- **Control Access to functions**

# What is System i Access for Web?

*End users can leverage business information, applications, and resources across an enterprise by extending the iSeries resources to the client desktop through a web browser*

## Provides access to System i through a browser

- **5250 access**
- **Access to database, integrated file system, printers, output queues, jobs**
- **Can run batch commands and send/receive messages**

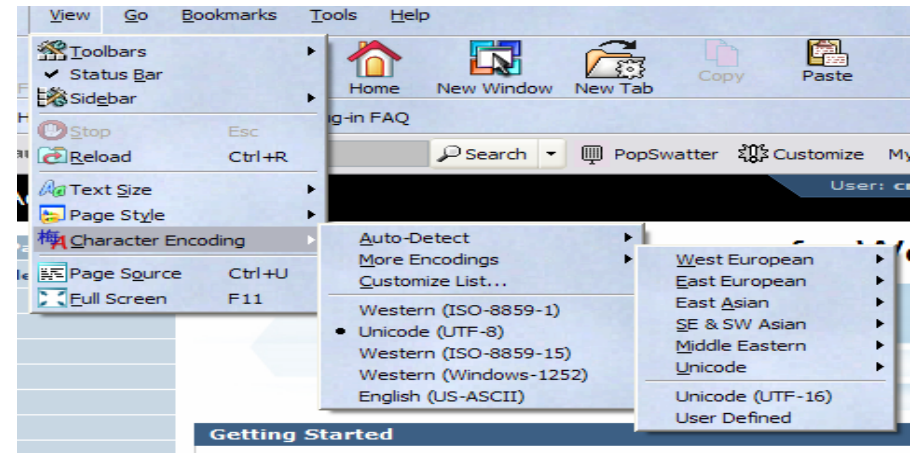

## It has the following advantages:

- **Is server based**
- **Requires only a browser on the client, no configuration required at desktop, no applets installed on desktop**
- **Uses industry standard protocols - HTTP, HTTPS and HTML**

## Fully Integrated with your Browser

- Use any code page available in your browser
  - System i Access for Web, V5R4, translated into 38 NLVs (including DBCS)
    - New Japanese Feature 2930 in V5R4
  - See screens in preferred language
- Use any keyboard setting available in Windows
- Font Size
- Set up your SSL through your browser

# Functions you can perform with System i Access for Web 5722-XH2, V5R4

## Print

# Getting Started

**Before you start with Access for Web you must get your web application server running**

## Supported Web Application Servers

iSeries Access for Web servlet code can be used with any of the following web application servers:

- **Integrated web application server – announced October 10, 2006**
- **WebSphere® Application Server V6.1 and V6.0 – Express for i5/OS**
- **WebSphere Application Server V6.1 and 6.0 Base and Network Deployment**
- **WebSphere Application Server V5.1 - Express for iSeries**
- **WebSphere Application Server V5.0 - Express**
- **WebSphere Application Server V5.1 and 5.0 Base and Network Deployment Editions**
- **ASF Tomcat**

iSeries Access for Web portlet code can be used with any of the following portal servers.

- **IBM Workplace Services Express V2.6 (V5R4 iSeries Access for Web)**
- **IBM Workplace Services Express V2.5**
- **WebSphere Portal for Multiplatforms V6.0**
- **WebSphere Portal for Multiplatforms V5.1.0.1**
- **WebSphere Portal Express for Multiplatforms V5.0.2**
- **WebSphere Portal Express Plus for Multiplatforms V5.0**

## October 10 Announcement: “System i Web Enablement Made Easy”

### Two pieces relate to iSeries Access for Web:

- **iSeries Access for Web supports the use of a Web application server integrated with i5/OS.**
  - Configure iSeries Access for Web without having to install or configure a Web Application server
  
- **Web Enablement for i5/OS: Express Runtime Environment**
  - Auto configure of Web servers, components, applications using WAS – Express V6.0
  - iSeries Access for Web is part of the environment

### PTFs required:

- **iSeries Access for Web: PTF SI25122**
- **HTTP Server: Group PTF SI99114 (Level 6)**
- Refer to: <http://www.ibm.com/eserver/iseries/access/web/servicepacks.html>

It can also handle the specified growth.

# Setting up your web application server

*Only need to set up 1 web application server*

## Port Requirements Comparison

### iSeries Access for Windows (5722-XE1)\*

- Port 449 for Port Mapper
- Port 8476 (9476) for Sign-on
- Port 8470 (9470) for Central
- Port 8472 (9472) for Data Queues
- Port 8471 (9471) for Database
- Port 8475 (9475) for Remote Commands
- Port 8473 (9493) for Print
- Port 2001 (2010) for Web Admin
- Port 446 (448) for DDM
- Port 23 (992) for Telnet
- Port 137, 138 for NetServer
- Port 389 (636) for LDAP
- Port 5555 (5566) for Mgmt Central
- Port 53 if using DNS Server

### iSeries Access for Web (5722-XH2)

- Port 80 (or any other port) for HTTP Server
- Port 443 (or any other port) for HTTPS Server

\*See Information APAR  
II12227 for detailed  
information

## Get Access for Web running

- **Print a copy of the Access for Web Install & Users Guide**
  - Downloadable from web at <http://www.ibm.com/eserver/series/access/web>
- **Install iSeries Access for Web from your i5/OS stacked media.**
  - **RSTLICPGM - Install Access for Web, 5722-XH2, into QIBM directory**
- **Configure and start Access for Web.**
  - **CFGACCWEB2 - Configure the iSeries Access for Web application server**
  - **STRACCWEB2 - Start the iSeries Access for Web application server.**
- **Set some policies to enable or limit access to various functions of Access for Web**

# Access for Web Documentation on the Web...

## 4 CL Commands in Access for Web

- **Configure** Command example when using WebSphere Application Server V5.1 - Express for iSeries
  - CFGACCWEB2 -appsvrtype \*WAS51EXP -wasinst iwa51exp -appsvr iwa51exp
- **Start** Command example when using WebSphere Application Server V5.1 - Express for iSeries
  - STRACCWEB2 APPSVRTYPE(\*WAS51EXP) WASINST(MYINST) APPSVR(\*DEFAULT)
- **End** Command example when using WebSphere Application Server V5.1 for iSeries
  - ENDACCWEB2 APPSVRTYPE(\*WAS51) WASINST(DEPTXYZ) APPSVR(\*DEFAULT)
  - Sometimes you may need to end Access for Web so you can make changes, then start it again.
- **Remove** Command
  - The Remove iSeries Access for Web (RMVACCWEB2) command is used to remove the iSeries Access for Web configuration from a web application servers

## Users can now Connect!

- Open browser
- Key in iSeries url
- Prompted for i5/OS user id and password

## Different Ways to Roll Out Access for Web

- **Use ‘out of the box’**
  - Set some policies to limit what functions are accessible to your users, and give them the url address to Access for Web
- **Use ‘out of the box’, but set up predefined functions**
  - You can set up preconfigured 5250 sessions that users (or groups of users) can run, can create predefined database requests for users to run, set up commands users can run, etc.
- **Create your own ‘window’ to your system through Access for Web**
  - Add company banners to screens, set up ‘click and link’ tasks that users can perform, set up macros to simplify user access.
- **Use Access for Web with the IBM WebSphere Portal solution**
  - A single unified workspace in which your employees, trading partners, and customers can easily find and use the applications and information that they need

## Different Ways to Roll Out iSeries Access for Web

- Use 'out of the box'
- Use 'out of the box', but set up predefined functions
- **Create your own 'window' to your system through iSeries Access for Web**
- Use the WebSphere Portal solution

# Customized Home Page

## Customized view of the Home Page

- Could be used as 'entry' point to System i
- Let's drill down and look at some of this...

The screenshot shows a web browser window with the address bar displaying `http://seriesd.dfw.ibm.com/webaccess/iWAHome`. The page features a blue header with the IBM logo and the text "Access for Water Supplying quality boats since 2002". The main content area is divided into several sections:

- Services:** Includes links for "See boat details - 5250", "See boat details - HATS", "View available boats", and "Order a boat".
- Work Items:** Includes links for "Work with invoices", "Update an order", "Check messages", "Check system messages", "Administrator tasks", "Manage incoming items", "Monitor jobs", "Download client software", and "Reassign job responsibilities".
- This Week's Special:** Features a photo of a white boat and text describing a "Beautifully maintained 28 foot 1978 Carver Santa Cruz for only \$23,900. Head and galley refurbished in 2005. Only 31 hours on completely rebuilt motor. Click [here](#) to see this boat cruising the seas."
- Great Deals:** Text states "For those bargain conscious among you, we have a large selection of new and slightly used boats for under \$75,000. Whether you are planning on sailing in your backyard pond or navigating the mighty Mississippi we can meet your wants, needs, or desires. [View our selection of modestly priced boats.](#)"
- Site Support:** Text says "Your comments are important to us. Please let us know if you have questions about the boats we offer or if we can help you in any way. Address your message to user BOATHELP. [Send us a message](#)". Below it, it says "If you prefer to contact us directly, use our [telephone directory](#) to lookup phone numbers and e-mail addresses."
- Weather Conditions:** Text asks "Is it a great day for boating? Check out today's forecast." and includes a weather map of the United States with various weather icons and temperature readings for different cities.

<http://seriesd.dfw.ibm.com/webaccess/iWAHome>

## Your **Window** to your i5/OS

*http://<myseries>/webaccess/iWAHome*

### Window view is associated with i5/OS user profiles

- An administrator can create many different views ('window') for different types of users -- based on user profile / group profile
- Can tightly control what functions a user can perform on your i5/OS
- Tie in with other web applications (such as WebFacing and HATS) from here as well
- Link to other systems, not just System i

### **Customized 'window' to i5/OS**

- **One view and set of functions for the Accounting department**
- **Another view and set of functions for the Warehouse staff**

## Using 5250 emulator in Access for Web

The company banner, 'Access for Water' is carried forward on all screens

- Went into 'Customize → General' and pointed at file with the company .gif.

### 5250 emulator in Access for Web

- Application looks better and did no work
- Can use 5250 Bypass Signon (new in V5R4) to bypass i5/OS sign-on screen
- Can use Access for Web Macro support to start the RPG application (BOATS)

Address http://seriesd.dfw.ibm.com/webaccess/WA5250?sessname=boat&initmac=startboat

mywebsearch  Search

**Access for Water** *Supplying quality boats since 2002*

[Home](#)

AS/400 WSG Boat Demo 8/24/04 15:22:18

Enter your search parameters

Type  P=Powered, S=Sailing, T=Tug, C=Commercial, A=All

Length (feet)

Year built  year to start from

**Zero (0) extra steps**

# Host Access Transformation Services (HATS)

*Easy to link to other web applications*

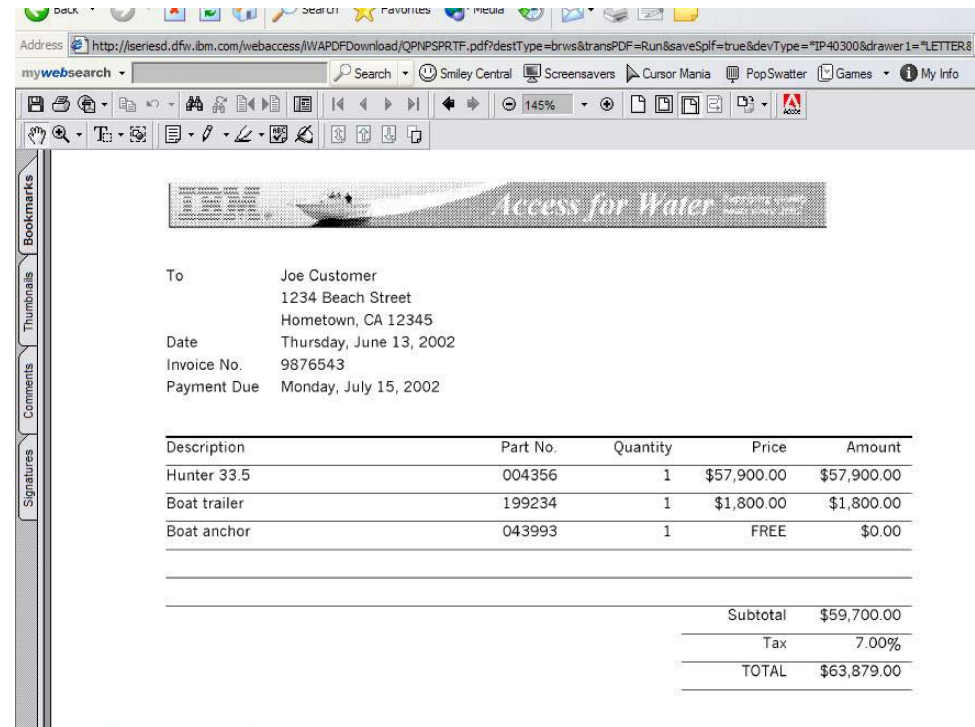

- Work with 'AS/400 WSG Boat Demo' application that was refaced using the IBM HATS Tool
- May require additional sign-on

The screenshot shows a web application interface for 'JK Enterprises - iSeries'. The header features a collage of sports equipment including a baseball, football, basketball, and tennis racket. Below the header, the page is divided into a left sidebar and a main content area. The sidebar contains navigation links under 'JK Links' (Home Page, Site Map, Jobs) and 'JK Products' (Products, Downloads, Support), along with four buttons: Reset, Default, Refresh, and Disconnect. The main content area displays the application title 'AS/400 WSG Boat Demo' and a timestamp '5/02/06 13:33:57'. It includes a search section titled 'Enter your search parameters' with three input fields: 'Type' (with a dropdown menu), 'Length (feet)' (with a numeric input), and 'Year built' (with a numeric input). The 'Type' field has a legend: 'P=Powered, S=Sailing, T=Tug, C=Commercial, A=All'. At the bottom of the page, there is a link for 'F3=End'.

## Task Oriented – not function oriented...

### Selected 'work with invoices'

- This takes user to 'Printer Output' – user's Spoolfile printer output
- SCS or AFP printer output is converted to PDF 'on the fly' by Access for Web to PDF
- Since it is now in .PDF format, user can print it to any network printer

## email PDF output

### Email integrated with iSeries Access for Web

- Your mail server can be anywhere in your network
- Users receiving your email need only an email address

### User selects an option in the Printer Output screen to 'email PDF output'

- The PDF document is then included in an email note
- User's email address filled in; user only needs to address it.

Here is the invoice for the boat you have ordered.

Attachment: QSYSPRT.502274.CMINER.CMINER0.1.PDF

Access for Water

To: Joe Customer  
1234 Beach Street  
Hometown, CA 12345

Date: Thursday, June 13, 2002

Invoice No: 9876543

Payment Due: Monday, July 15, 2002

Description	Part No	Quantity	Price	Amount
Hunter 33.5	004356	1	\$57,900.00	\$57,900.00
Boat trailer	199234	1	\$1,800.00	\$1,800.00
Boat anchor	043993	1	FREE	\$0.00
Subtotal				\$59,700.00
Tax				7.00%
TOTAL				\$63,879.00

# Run a System i Database Query

Clicked on 'View our selection of modestly priced boats'

- Administrator had previously built an SQL Query using the System i Access for Web 'Database' function
- Could also have been set up to show in an .XLS or .PDF format
  - a variety of other output types as well

BNAME	BFEET	BYEAR	BCOST	BNT01
Mako Sportfisher	19	1989	13000	-Located in Anacortes, WA.
Monk Bridgedeck Cruiser	36	1956	19900	-Built of mahogany, oak, and cedar.
Carver Santa Cruz	28	1978	23900	-Constructed of fiberglass.
Bill Garden Schooner	36	1953	27500	-The hull is 1/8" caravel cedar planked atop 1 1/4" x 1 1/2" oak frames
Monk Flybridge/Sedan	34	1985	55000	-Double planked cedar on oak frames.
Hunter 33.5	33	1990	57900	-The boat has a large wheel steering a spade rudder.
Mariner Ketch	40	1979	63000	-Full keel and the rudder is keel hung
Morgan 382 Race/Cruise Sloop	38	1978	69000	-Has an Airex hull and skeg rudder. Has been rated by LLoyd's
Corsair 27	27	1994	69950	-Equipped for cruising and racing

# Mechanism to Distribute PC software/files to users

Clicked on 'Download client software'

- Administrator had previously packaged some PC software using the iSeries Access for Web 'Download' function
- Administrator controls who will see each of these download options via i5/OS user profiles

## Try out Access for Web for yourself!

Start your browser and connect to the following web site:

<http://iseriesd.dfw.ibm.com/webaccess/iWAHome> (case sensitive)

<p><b>User ID = WUSER</b></p> <p><b>Password = demo2pwd</b></p>	<p>This shows the basic look of Access for Web as we ship it. You can try various functions -- including working with printer output, creating database requests, etc. Click on the 5250 tab, sign onto the iSeries, then start an RPG application called BOATS and run it.</p>
<p><b>User ID = BOATADMIN</b></p> <p><b>Password = demo2pwd</b></p>	<p>This is an example of how a customer might design a web page for their use. You will see that an end user could start the same BOATS application by clicking on the 5250 session -- or they could have used HATS to run the application. You will also see other links that would let a user work with spoolfile information, work with IFS, run database requests, etc..</p>

## More Documentation...

### Tailor iSeries Access for Web

by [Janet Weber](#)

iSeries access for Web provides a browser interface to i5/OS resources. You can use it to access printer output, run database queries, start 5250 user interface sessions, and work with files in the IFS. But one of its most powerful features is its ability to be customized to fit the needs of individual users. Out of the box, iSeries Access for Web might be viewed as a set of utilities for accessing i5/OS resources. But the product can be transformed to look more as if it were designed for a specific company. Here, I provide an example of transforming iSeries Access for Web into a tool for selling boats.

#### Overview

You access iSeries Access for Web content through a set of URL-addressable pages. You can directly access any of the resource-specific functions (such as running a database request or starting a 5250 session), or you can start at one of the general product pages and navigate to the desired functionality.

iSeries Access for Web provides two general product pages: the home page (<http://system/webaccess/iWAHome>) and the main page (<http://system/webaccess/iWAMain>). The content of these pages is retrieved from static HTML files. The resource-specific pages' content is dynamically generated and enclosed within a static template, which is also supplied in a static HTML file.

The product provides default content for the home, main, and template files. The default home page contains a product overview and serves as a customized home page example. The default main page includes an overview of the iSeries Access for Web functions. The default template provides a header that displays the product name, current user, and current system. It also contains a footer with links to related sites. You can replace any or all of these files with your own content.

You use the customize feature of iSeries Access for Web to specify which files provide the static page content. To access the customize feature, you must have \*SECADM special authority or be granted administrator authority to the product. Once you have the proper authority

## Different Ways to Rollout Access for Web

- Use 'out of the box'
- Use 'out of the box', but set up predefined functions
- Create your own 'window' to your system through Access for Web
- Use the WebSphere Portal solution

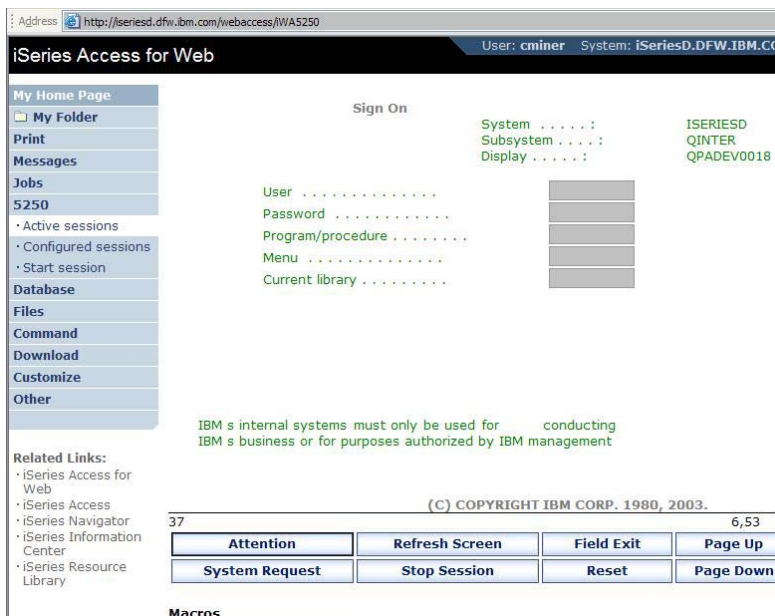

# Access for Web has many entry points

'URL Interfaces to iSeries Access for Web' manual available on the web

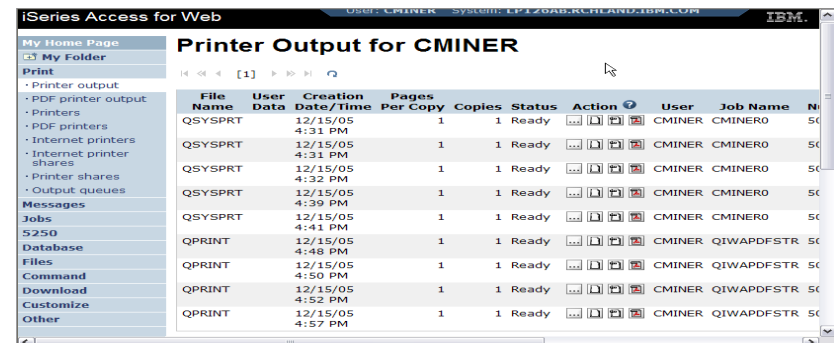

- Can enter at many different pages
- Can use navigation bar to move from function to function

<http://<myiseries>/webaccess/iWA5250>

<http://<myiseries>/webaccess/iWAMain>

<http://<myiseries>/webaccess/iWASpool>

# Reduce functions you give to users

Reduce tabs that get displayed

Reduce options under tabs

# Printer Output - Spoolfile

## 1. Print Tab

- User only has one option available, ie, 'Printer

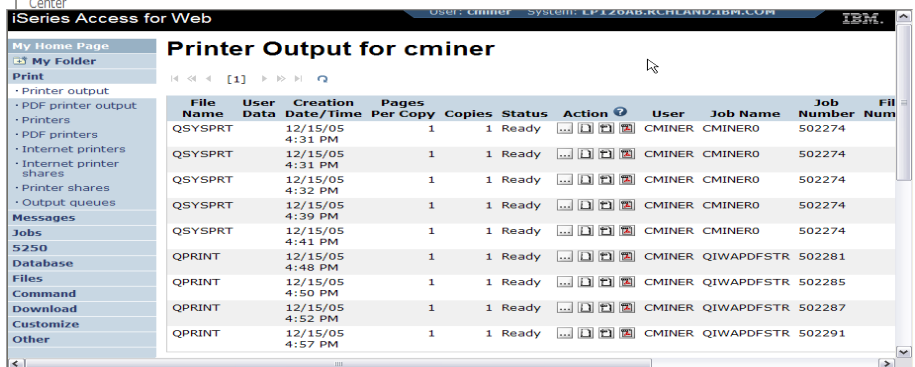

## 2. Default look of 'Printer Output'

## 3. Customized look of 'Printer Output' for signed on user

- Removed many of the columns of printer output
- Reordered list
- Removed several end user actions

1

2

3

# Printer Output - Spoolfile

## 1. Requested 'View PDF'

- Can select any option on pulldown for my printer output

## 2. View in Browser

- Shows overlays, etc
- Can print on any printer in network

## 3. Send .PDF document in an email

- Mail server does not have to be installed on iSeries

The image displays three sequential screenshots of the iSeries Access for Web interface, illustrating the process of viewing and sending a PDF document.

**Screenshot 1: PDF Output Settings**  
 The interface shows the 'PDF Output Settings' page. A yellow box labeled '1' highlights the 'Printer output' section, which includes a pulldown menu for 'Destination'. The menu is open, showing options: 'Browser', 'Mail as attachment', 'Personal folder', and 'Output Queue'. A 'Run' button is visible below the menu.

**Screenshot 2: Document Preview**  
 The interface shows a document preview page. A yellow box labeled '2' highlights the document title 'Access for Wat'. The document content includes a header with a boat image, a 'To' field (Joe Customer, 1234 Beach Street, Hometown, CA 12345), a 'Date' field (Thursday, June 13, 2002), an 'Invoice No' (9876543), and a 'Payment Due' date (Monday, July 15, 2002). Below this is a table with columns: Description, Part No., Quantity, Price, and Amount.

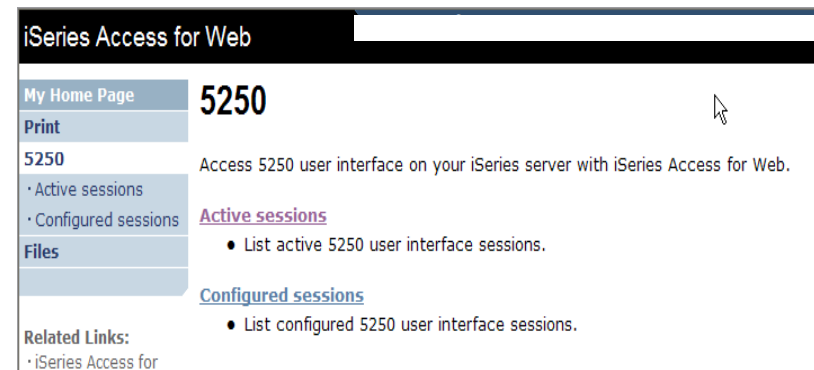

Description	Part No.	Quantity	Price	Amount
Hunter 33.5	004396	1	\$57,900.00	\$57,900.00
Boat trailer	199234	1	\$1,800.00	\$1,800.00
Boat anchor	043993	1	FREE	\$0.00

**Screenshot 3: Convert Printer Output to PDF**  
 The interface shows the 'Convert Printer Output to PDF' dialog box. A yellow box labeled '3' highlights the 'Subject' field. The dialog includes fields for 'From' (cminer@us.ibm.com), 'To', 'cc', 'bcc', and 'Subject'. Below these fields is a large empty text area and an 'Attachment' field containing the text 'Attachment: QSYSPRT.507343.CMINER1.CMINER10.3.PDF'. 'Send' and 'Cancel' buttons are at the bottom.

# Run Pre-Configured 5250 Sessions

You want to limit users to only starting 5250 sessions that you have preconfigured

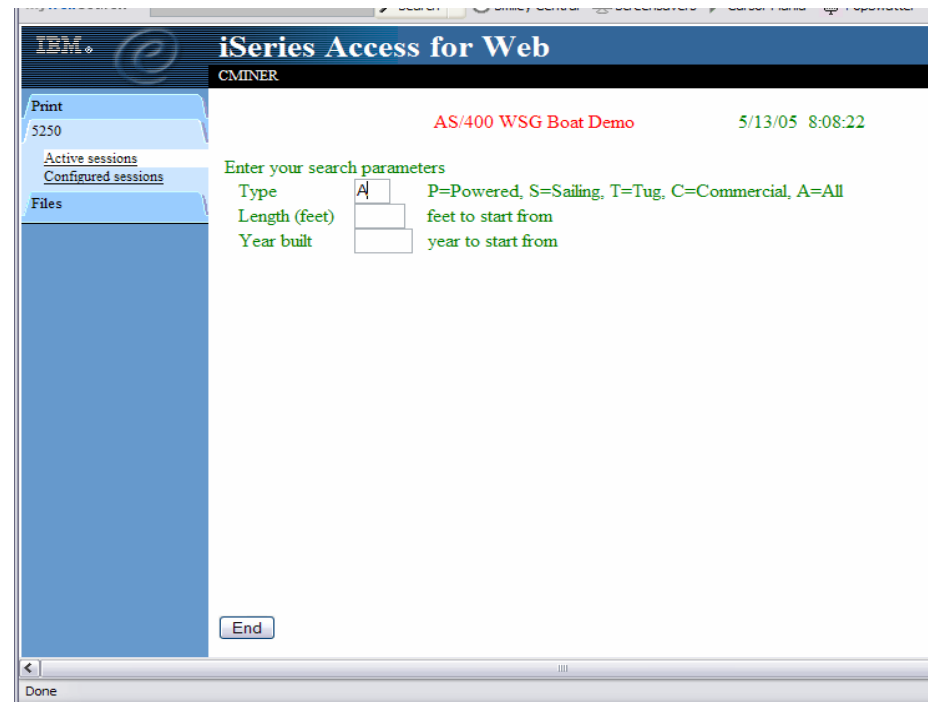

- You have removed user's ability to configure a session
- User selects 'Configured Sessions'
  - Only one listed, only action user can perform is to 'start' it
- User clicks on Start

## User can run 5250 application

User is placed in this application

- The session could be configured to include a macro to put the user directly into a specific application on the iSeries
  - Or on a menu screen
- Use CHGUSRPRF, LMTCPB=Yes to remove command line from user's screen

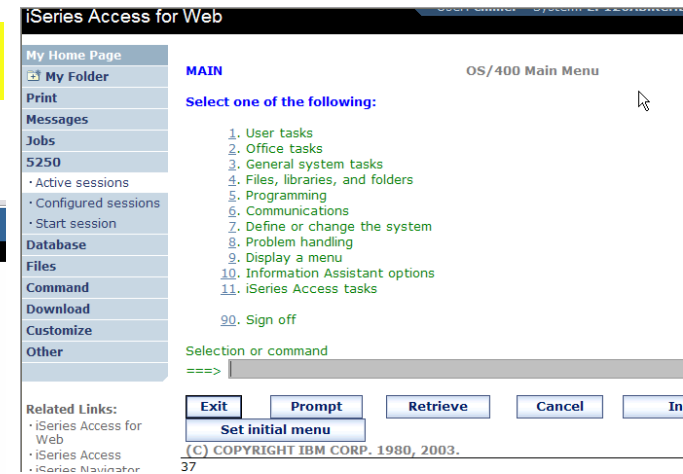

# Change look of 5250 session

1. Default 'web' look

1

2. Changed colors, added keypad at side, changed buttons at bottom to words

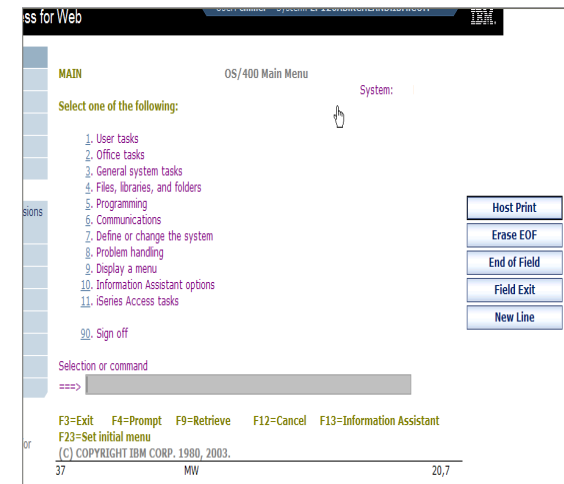

2

3. Removed navigation bar, put keypad on top

3

4. Selected 'traditional' view, removed navigation bar

## Work with Files in the IFS

- **Navigate and browse the directories located on your iSeries server integrated file system**
  - **Don't need to map drives**
  - **Don't need to know directory structures**

- **View, upload, and download files**
- **Copy and mail files**
- **Rename and delete files and directories**
- **Zip and unzip files and directories**
- **Edit authorities and change ownership of objects in the integrated file system**

## Browse Files - 'Filtered View'

When I click on 'Browse Files', I see only a directory called 'cminer1' and its content

- **Because the administrator set a 'Default Directory' policy for me**

Actions I can perform:

- **Subdirectories:** Create new ones, Rename, Work with
- **Files:** Copy, Rename, Delete, Mail, Work with (ie, Zip, Unzip, etc)

# Portal built for IBM Employees

The screenshot shows a web portal interface for IBM employees. The header includes the user's name "Carole A. Miner's On Demand Workplace" and navigation links like "w3 Home", "BluePages", "HelpNow", and "Feedback". The main content area is divided into several sections:

- What's new:** A green bar indicating "Currently, there are no new items".
- Essential links:** A list of links including "About IBM", "About w3", "Buy on demand", "Collaboration Central", "Corporate Security", "Customer Reference Materials", "Emergency Planning", "Expense Reimbursement", "Global Print", "IBM Business Controls", "IBM Club", "IBM Rochester SiteNews", "IBM SiteServ", "IBM Standard Software Installer", "IBM ThinkPlace", "IBM Travel", "IT Help Central", and "IT Security".
- News:** A section titled "Top stories" with a "Past 7 days" filter. It features three articles:
  - Oracle's outlook disappoints:** Accompanied by an image of a blue and yellow swirl. Text: "Analysts look at the long term and fear predictions may be wrong. [Profiled for all IBM]"
  - Five innovations, five years:** Accompanied by an image of a blue and red swirl. Text: "Amazing things are happening at IBM labs. [Profiled for all IBM]"
  - Lemming, chicken, caveman?:** Accompanied by an image of a director's chair. Text: "Only a few days remain to submit your innovation video to the contest. [Profiled for all IBM]"
- IBM technology takes the high-k road:** Accompanied by an image of a road with light trails. Text: "Semiconductor industry gets a big boost. [Profiled for all IBM]"
- Yo Yo Ma and the Genographic Project:** Text: "Giving students a unique way to learn about the ancient migratory history of humans. [Profiled for all IBM]"
- Rochester SiteNews:** Text: "ICEFEST 2007! Please register now through February 9, Celebrate Valentine's Day by donating blood! [Profiled for Rochester]"

On the right side, there is a **Search** section with a "BluePages" search type, a search input field, and a "GO" button. Below it, there are "Other searches" with radio buttons for "IBM web pages (w3 and ibm.com)", "IBM forums, blogs, and wikis", "IBM news articles", "IBM Learning (site search)", and "IBM World Wide Q&A". A second "GO" button is provided. At the bottom right, there is a "Market report" section with a "GO" button.

# Portal built on i5/OS

The screenshot displays a WebSphere Portal interface with the following components:

- Navigation Bar:** Includes "Welcome", "My Work", "My Finances", "My Newsroom", "My iSeries", and "My Favorites".
- IBM v5 Banner:** A large graphic with the text "Welcome to WebSphere Portal version 5.0".
- Instructions:** Text explaining how to rearrange portlets using the "Show tools" icon and how to create a new page.
- Bookmarks:** A list of links including "WebSphere Portal home", "WebSphere Portal Zone", "WebSphere Portal catalog", "WebSphere Portal product documentation", "WebSphere Portal support", and "WebSphere Portal offerings".
- My Vertical News:** A news section with a photo of police and a headline: **"Iraq al-Qaeda link" - 15 Islamists are arrested in Spain**. Below the headline is a summary: "A handcuffed suspect is led away by members of the Spanish Police following a raid against suspected members of a radical ...".
- World News (includes photo):** A list of news items:
  - "Iraq al-Qaeda link" - 15 Islamists are arrested in Spain
  - U.S. releases some Saddam-era detainees
  - Israel's Sharon suffers minor stroke
  - Baghdad hospital car bomb kills two
- US News (includes photo):** A list of news items:
  - Unrest in Congress over Bush's wiretaps
  - Secretary of State defends NSA spying
  - Time honors three who live to give
  - NYC transit strike begins
- Market & Economy News:** A partially visible headline: "Late shoppers get benefit of bargain".
- My Stocks:** A table showing stock prices as of Monday, December 19, 2005, 1:31:00 PM EST.
 

IBM	83.48	0.11	0.1
\$COMPO	2,235.15	-17.33	-0.7

# iSeries Access for Web Portlets on iSeries Portal

The screenshot displays the iSeries Portal interface. The top navigation bar includes 'Welcome', 'My Work', 'My Finances', 'My Newsroom', and 'My iSeries', with 'My iSeries' highlighted by a red circle. Below the navigation bar, the 'iSeries 5250 Session' portlet is visible, containing a 'Start Session' form with fields for 'Server' (x1519p4.rchland.ibm.com), 'Port' (23), and 'Code page' (37). The 'Workstation ID' section has radio buttons for 'Use user ID' and 'Specify workstation ID', and checkboxes for 'Avoid duplicates for this user' and 'Avoid duplicates with other users'. A 'Start Session' button is located below the form. The main content area displays a 'Welcome' message and a list of iSeries Access portlets:

- 5250 portlet
  - Run commands and access full-screen 5250 character-based applications.
- IFrame portlet
  - Access any of the iSeries Access for Web servlets using the IFrame portlet.
- Integrated file system (IFS) browsing portlets
  - Browse the iSeries integrated file system.
  - View, edit, upload and download files.
- Printers, printer output, and output queues portlets
  - View printer status, start and stop the writer job associated with a printer.
  - Hold, release, print, delete and view printer output files.
  - Move printer output files to another output queue or printer.
  - Hold and release output queues.
- Database tables and SQL portlets
  - View database tables, add and update records.
  - View query results, customize format of results.
  - Run SQL statements dynamically.
- Commands portlets
  - Run CL commands.

The iSeries Access portlets are included with iSeries Access for Web. The iSeries Access for Web product is part of the iSeries Access Family (5722-XW1). For more information regarding iSeries Access, iSeries Access for Web, and the iSeries Access

Welcome to the iSeries Access portlets - specifically developed for iSeries Access customers. These portlets allow you to access information on your iSeries servers through a Web browser.

iSeries Access portlets include the following:

- 5250 portlet
  - Run commands and access full-screen 5250 character-based applications.
- Iframe portlet
  - Access any of the iSeries Access for Web servlets using the IFrame portlet.
- Integrated file system (IFS) browsing portlets
  - Browse the Series integrated file system.
  - View, edit, upload and download files.
- Printers, printer output, and output queues portlets
  - View printer status, start and stop the writer job associated with a printer.
  - Hold, release, print, delete and view printer output files.
  - Move printer output files to another output queue or printer.
  - Hold and release output queues.
- Database tables and SQL portlets
  - View database tables, add and update records.
  - View query results, customize format of results.
  - Run SQL statements dynamically.
- Commands portlets
  - Run CL commands.

The iSeries Access portlets are included with iSeries Access for Web. The iSeries Access for Web product is part of the iSeries Access Family (5722-XW1). For more information regarding iSeries Access, iSeries Access for Web, and the iSeries Access portlets, refer to the following web sites:

- **Use 'out of the box'**

- **Use 'out of the box', but set up predefined functions**
- **Create your own 'window' to your system through Access for Web**
- **Use the WebSphere Portal solution**

## Control User Access to functions

1. How do I keep my users from using all these functions?
2. How do I set up the environment for my users?
3. Should I let my users set have some individual screen settings for some functions?

You need \*SECADM authority to customize profiles

## Access for Web uses OS/400 User Profiles

When an iSeries Access for Web user attempts to access any function on the iSeries, the following sequence of checks are made to authenticate user access:

- User profile
- Group profile(s)
- \*PUBLIC profile

**\*PUBLIC profile is the set of default policy settings shipped with Access for Web**

- The defaults allow most functions to be available to all users

The settings in these policies indicate what functions within iSeries Access for Web, a user can attempt to use.

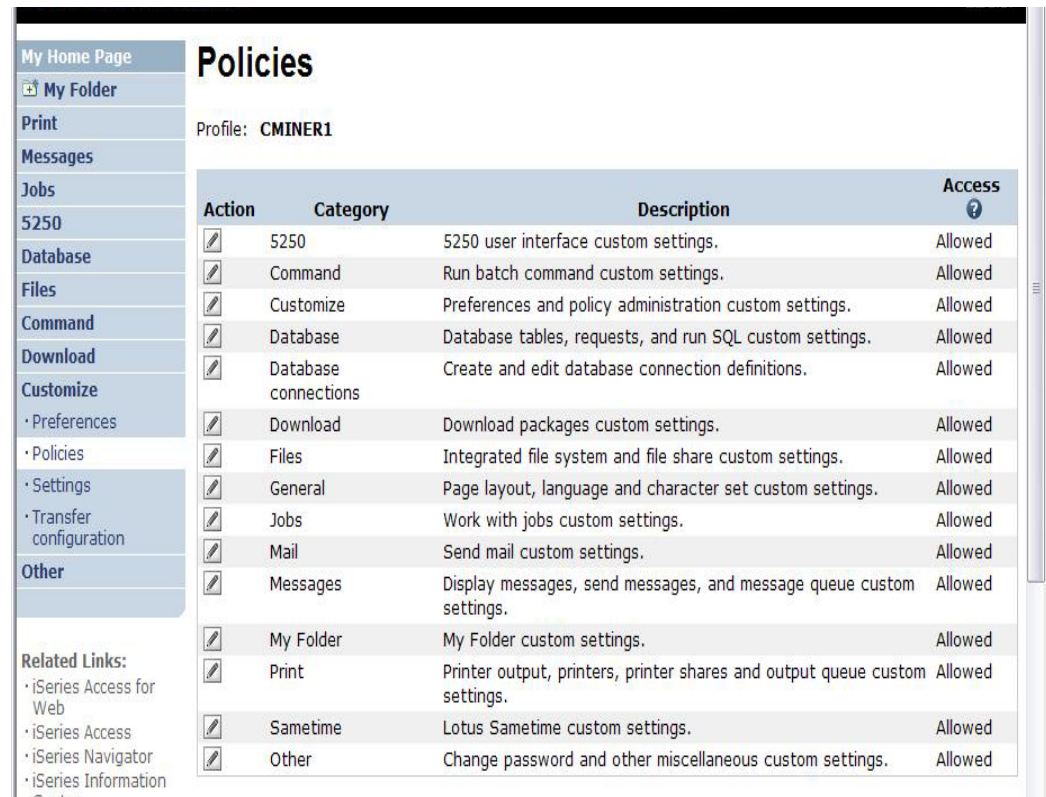

- For Example: Let's say you give users full access to the 'Database' tab.
- You have Object Level authority set up on your data
- When a user attempts to use one of the iSeries Access for Web Database GUIs to get at the database information, the user will get an i5/OS message indicating they are not authorized to access data

## Customize → Policies

**Policies are used to control access to iSeries Access for Web functions**

**For example:**

- **A Files access policy can be set to Deny or restrict a user or group from accessing the file function.**
- **Policies are saved and associated with the appropriate i5/OS user or group profile.**
- **Each 'Category' expands for granular control**

**Policies**  
Profile: CMINER1

Action	Category	Description	Access
	5250	5250 user interface custom settings.	Allowed
	Command	Run batch command custom settings.	Allowed
	Customize	Preferences and policy administration custom settings.	Allowed
	Database	Database tables, requests, and run SQL custom settings.	Allowed
	Database connections	Create and edit database connection definitions.	Allowed
	Download	Download packages custom settings.	Allowed
	Files	Integrated file system and file share custom settings.	Allowed
	General	Page layout, language and character set custom settings.	Allowed
	Jobs	Work with jobs custom settings.	Allowed
	Mail	Send mail custom settings.	Allowed
	Messages	Display messages, send messages, and message queue custom settings.	Allowed
	My Folder	My Folder custom settings.	Allowed
	Print	Printer output, printers, printer shares and output queue custom settings.	Allowed
	Sametime	Lotus Sametime custom settings.	Allowed
	Other	Change password and other miscellaneous custom settings.	Allowed

**Related Links:**  
 • iSeries Access for Web  
 • iSeries Access  
 • iSeries Navigator  
 • iSeries Information Center

## Policies - customize for all users at once

One alternative...

Use the \*PUBLIC group profile and set policies for all users

- 'Deny' functions for all users in a single step
- Then 'Allow' specific users access to functions via their User or Group profiles

**Problem:**

You're locked out too, until you go in and **“Allow”** functions to yourself

iSeries Access for Web System: RCHLAND.IBM.COM

**Policies**  
Profile: \*PUBLIC

Action	Category	Description	Access
	5250	5250 user interface custom settings.	Allowed
	Command	Run batch command custom settings.	Allowed

## Good articles on setting up users

### iSeries 400 Experts Journal

- Sept/Oct 2006, 'iSeries Access for Web: Getting Started'
- Nov/Dec 2006, 'Making iSeries Access for Web available to your users: Beyond the Basics'
- Mar/Apr 2007, 'iSeries Access for Web: Additional Tips on rolling 5250 out to users'

## Policies - customize a group of users at once

### Another Alternative...

Set up a group profile and add users to that group. Then set policies for that group

- 'Deny' functions for all users in the group in a single step

### Problem:

If you create multiple groups, you need to keep track of what policies were set for who.

Action	Category	Description	Access
<input checked="" type="checkbox"/>	5250	5250 user interface custom settings.	Allowed

# Set Policy to Default to Specific Directory in IFS

Set a 'Default Directory' for:

- **\*PUBLIC**
- **Groups of users**
- **Specific user**

**Edit Policies - Files**  
Profile: **CMINER1**

Policy	Derived From	Action	Setting
Files access	Shipped default	Use current setting	Allow
Files tab	Shipped default	Use current setting	Show
Display directory contents in new window	Shipped default	Use current setting	No
Enable sort links for directory contents	Shipped default	Use current setting	Yes
Display directory contents statistics	Shipped default	Use current setting	Yes
Browse files	Profile setting	Use current setting	Allow
Copy files to server	Shipped default	Use current setting	Allow
Copy files from server	Shipped default	Use current setting	Allow
Default directory	Profile setting	Use current setting	/cminer1
Display subdirectory contents	Shipped default	Use current setting	Allow
Display parent directory contents	Shipped default	Use current setting	Allow
Display default directory	Shipped default	Use current setting	Deny

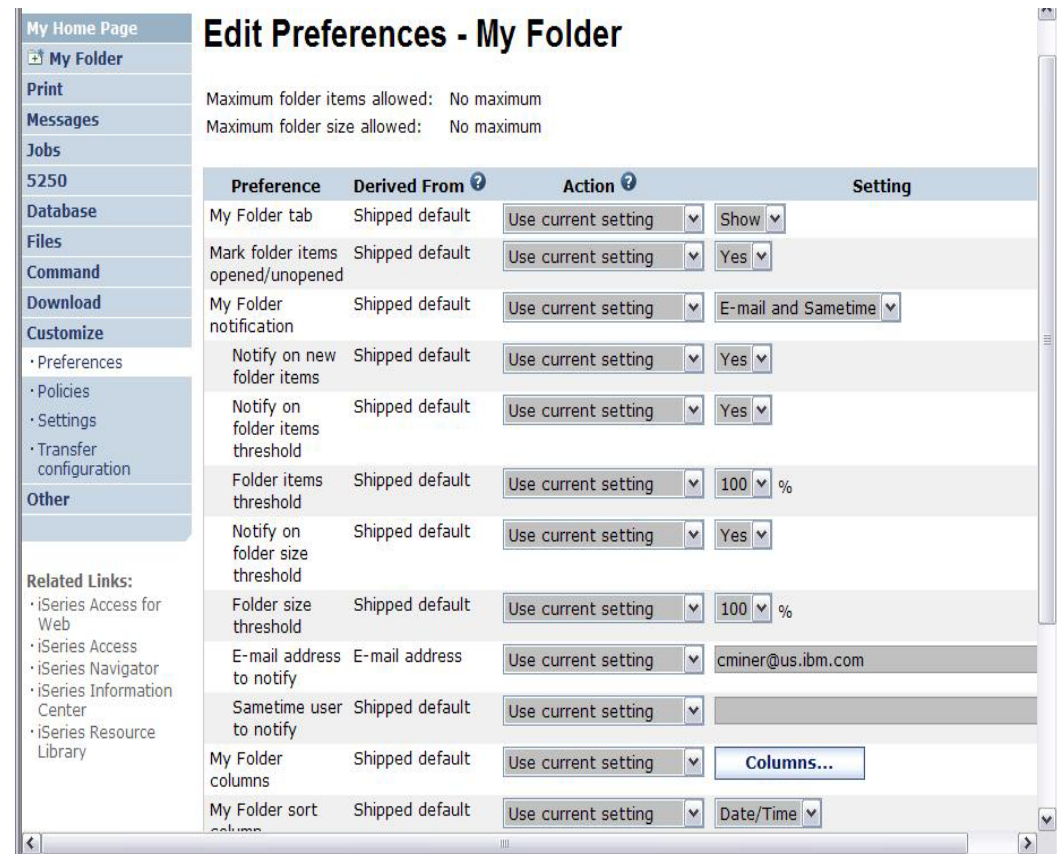

*In this example, I went into CMINER1 profile, and set policy to show only the 'CMINER1' directory to this user...*

# Preferences

Preferences are used to control how functions operate

- For example, a user can select which columns to display when viewing a the My Folder list
- By default, all users can configure their own preferences
- Preferences are saved and associated with the user's iSeries user profile

**Edit Preferences - My Folder**

Maximum folder items allowed: No maximum  
Maximum folder size allowed: No maximum

Preference	Derived From ?	Action ?	Setting
My Folder tab	Shipped default	Use current setting	Show
Mark folder items opened/unopened	Shipped default	Use current setting	Yes
My Folder notification	Shipped default	Use current setting	E-mail and Sametime
Notify on new folder items	Shipped default	Use current setting	Yes
Notify on folder items threshold	Shipped default	Use current setting	Yes
Folder items threshold	Shipped default	Use current setting	100 %
Notify on folder size threshold	Shipped default	Use current setting	Yes
Folder size threshold	Shipped default	Use current setting	100 %
E-mail address to notify	E-mail address	Use current setting	cminer@us.ibm.com
Sametime user to notify	Shipped default	Use current setting	
My Folder columns	Shipped default	Use current setting	Columns...
My Folder sort column	Shipped default	Use current setting	Date/Time

# How to Configure a 5250 Session and save it

## Select to 'Start Session'

- Provide name of System i you wish to connect to → can be any system in the network
- Provide how you want Workstation ID handled
- Can check to Bypass additional i5/OS sign-on screen

Once you are connected, click on the 'Active' session link to save this session

1

**iSeries Access for Web**

**Start Session**

Server: MYISERIES.RCHLAND.IBM.COM

Port: 23

Code page: 37

**Workstation ID**

Use user ID

Specify workstation ID

Avoid duplicates for this user

Avoid duplicates with other users

**General**

Initial macro:

Bypass signon

Display HTML data in fields

**Start Session**

[Active sessions](#)  
Work with your active sessions.

[Configured sessions](#)  
Work with your configured sessions.

2

**OS/400 Main Menu** System: LP126AB

Select one of the following:

1. User tasks
2. Office tasks
3. General system tasks
4. Files, libraries, and folders
5. Programming
6. Communications
7. Define or change the system
8. Problem handling
9. Display a menu
10. Information Assistant options
11. iSeries Access tasks
20. Sign off

Selection or command

====>

**Exit** **Prompt** **Retrieve** **Cancel** **Information Assistant**

Set initial menu

Type option number or command.

37 MW 20,7

**Macros**

**Start Recording**

## How to Configure a 5250 Session and save it (continued)

### Click on Active Session link

3

- Click on 'Edit' icon in Actions column
- Can set colors, define keypads, etc.

Server	Session	Started	Last Accessed	View	Action
RCHLAND.IBM.COM	A	12/20/05 5:11:57 PM CST	12/20/05 5:12:47 PM CST	Web	

### You then save your 'Active' session and give it a name

4

- Next time you want to start that session, you simply click on **'Configured Sessions'**

Configured session name must be specified.

Session:

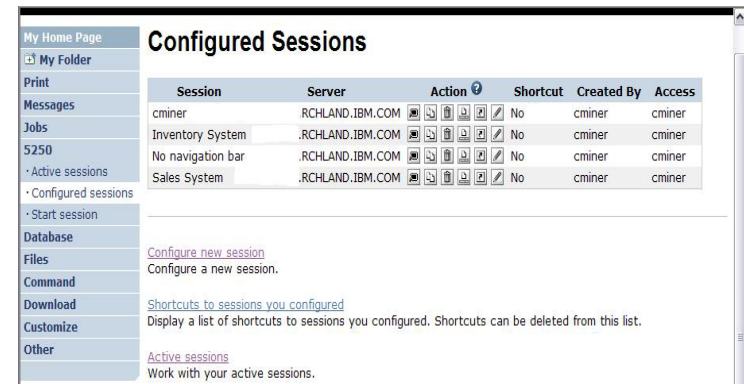

Replace if already exists

# How to Configure a 5250 Session and save it (continued)

## Click on Configured Sessions

5

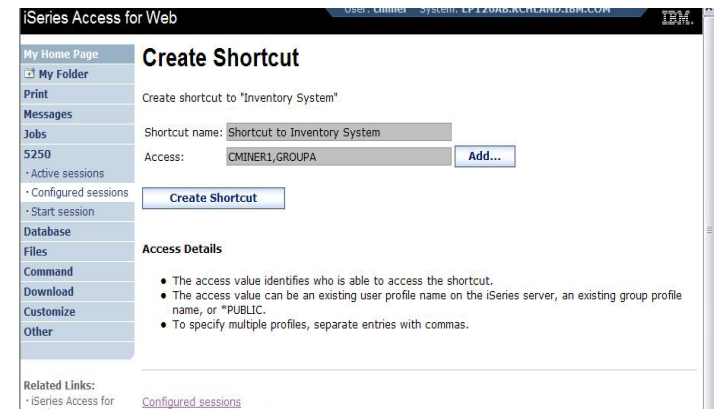

- On 'Inventory System' select the Action Icon to 'Create Shortcut'

## Create Access to you Configured Session

- Add the users, groups of users, or all users (\*Profile) whom you want to be able to use this session connection

6

## Shortcut to Configured Session (continued)

### User CMINER1

- Does not have a 'Start Session' link
- Has only has 'Configured Sessions' link
- Has a Shortcut to a Configured Session created by CMINER

### Policies have been set on CMINER1

- So that the only Action user can take is to start this session. User cannot:
  - Copy, Delete, Rename, Create Another Shortcut, Edit

iSeries Access for Web User: cminer1 system

## Creating a Macro to use with 5250

### 1. Record the Macro

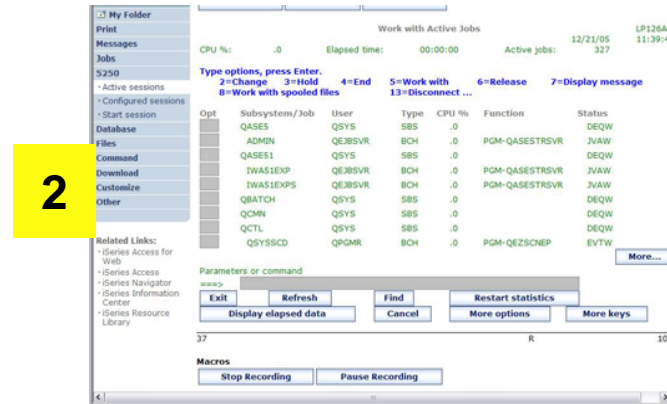

- Start Session and get to OS/400 sign-on screen
- Go to bottom of screen and start macro record
- Continue recording macro until you have reached spot you want users to come into (ie, OS/400 Main Menu, your own menu, a particular application...)
- Go down to bottom of screen and stop macro recording
- When you get to the save macro screen, select a macro name

### 2. Edit the Macro to bypass sign-on screen

- Go to 'Start Session' and go to bottom of page and select 'My Macros' to work with macro you just created
- Remove your password that was recorded and put in **[password]**, then remove your workstation id and put in **[user]** in the macro.
  - This is documented in 5250 User Interface Help at bottom of 'Configure New Session' page

# Record and Save Your Macro

Press **Stop Recording** when you've reached point you want users to come in at

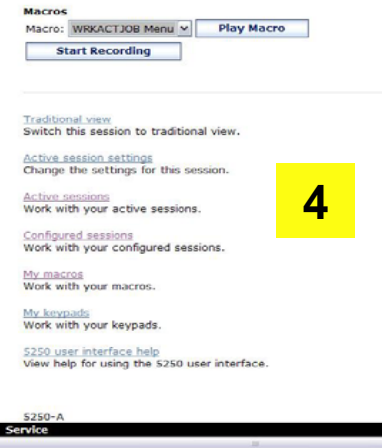

Start at i5/OS sign-on screen and click on **Start Recording** to create your macro

Then give the Macro a name

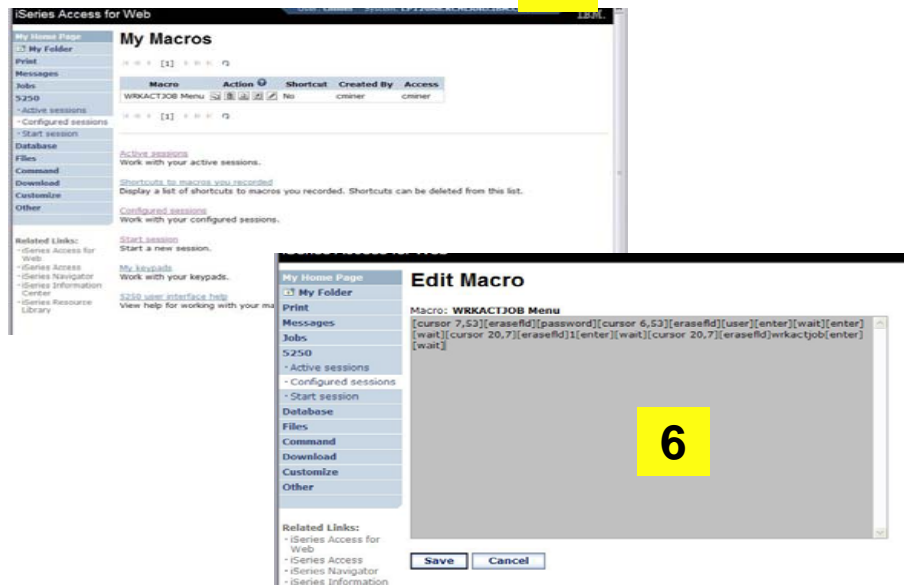

Go to bottom of 5250 screen and select to **Edit** the macro you just created

# Edit Your Macro and Create A Shortcut for it

5

Select Action to **Edit** your macro

6

- Replace your password with [password] and your user id with [user]
- Then when this runs, the signed on user id and password will be plugged in

- Go back to My Macro page and section Action to **Create Shortcut** to your Macros
- Add whomever can use this Macro

7

# Add Macro Name to a 5250 Session

8

**Start Session**

Server: MYISERIES.RCHLAND.IBM.COM

Port: 23

Code page: 37

**Workstation ID**

Use user ID

Specify workstation ID

Avoid duplicates for this user

Avoid duplicates with other users

**General**

Initial macro: WRKACTJOB Menu

Bypass signature

Display HTML

**Start Session**

[Active sessions](#)  
Work with your active sessions.

**Edit Configured Session**

Session: Sales System

Default view: Web

Initial macro: WRKACTJOB Menu

Bypass signature

Display HTML

Enable advanced security

**Server**

Server: MYISERIES.RCHLAND.IBM.COM

Port: 23

Code page: 37

**Workstation ID**

Use user ID

Specify workstation ID

- Select one of your **Configured Sessions** and add the **Macro shortcut**

# iSeries Access for Web – Database Functions

Access database tables on your iSeries server with iSeries Access for Web.

## Tables

- View a list of database tables on your iSeries server.
- Perform actions on these tables without having knowledge of SQL and its syntax.
- View the contents of a table in a paged list, using the Quick view action.
- Add and update records in a table using the Insert and Update actions.
- Create your own customized SQL request for a table using the Run SQL action.
- Create your own customized copy data request for a table using the Copy data to table action.

## My requests

- View a list of previously saved requests.
- Run or Edit requests from this list.
- Manage lists using the Copy, Delete, and Rename actions
- Create and manage shortcuts to requests

## Run SQL

- Run SQL statements dynamically.
- View output as a paged list or in a popular file format, like Microsoft Excel or Lotus 1-2-3. (Output format depends on how you have your browser configured and whether the browser can locate a plug-in for the output type you choose.)
- Customize how data is returned by setting options specific to the output type.
- Build SELECT statements using an SQL Wizard.
- Save requests for repeated use.

## Copy data to table

- Copy existing data files from your PC to a database table on your iSeries server.
- These data files can be in many popular file formats, including Microsoft Excel and Lotus 1-2-3.
- Replace the contents of a table or add data to an existing table.
- Create a new database table based on the contents of a workstation file.
- Save requests for repeated use.

## Import request

- Import Client Access Data Transfer upload and download requests into iSeries Access for Web copy data and SQL requests.
- Imported requests are automatically converted to iSeries Access for Web format.
- Run and edit converted requests on your iSeries server just like other copy data and SQL requests.

## Import query

- Import queries generated by Query for iSeries and DB2 UDB for iSeries Query Manager.
- Imported queries can be saved into iSeries Access for Web database requests.
- Run and edit converted queries on your iSeries server just like iSeries Access for Web SQL requests.

## Extract server data

- Extract server object information into a database table.

## Upload PC Data to the iSeries

- Upload data from a variety of file types
  - Excel, XML, Lotus, etc
  - OpenOffice **new V5R4**
- Put into iSeries database
  - 'Replace' contents of table
  - 'Append' to existing data
- If no table exists on the iSeries, you will get a wizard to help you create a new table

# PDF Printer Output

<http://<myiseries>/webaccess/iWAPDFPrinterOutput>

Printer output  
**automatically**  
converted to PDF and  
placed in PDF Printer  
Output Queue

Actions include:

- View
- Copy to File
- Copy to Folder;  
Delete
- Mail

Actual host application could additionally send spoolfile printer output to another output queue (in SCS or AFP mode)

# My Folder

## My Folder

### Folder resides in the iSeries IFS

- Folder does not show up in IFS directory listing
- Administrator can control size of Folders (new in V5R3)

### Folder can only be accessed by owner

- Good for long-running requests (ie, actions performed asynchronously so the browser is not tied up)
- An easy way to avoid large attachments (ie, a large query result)

### Can place information in other users' Folders

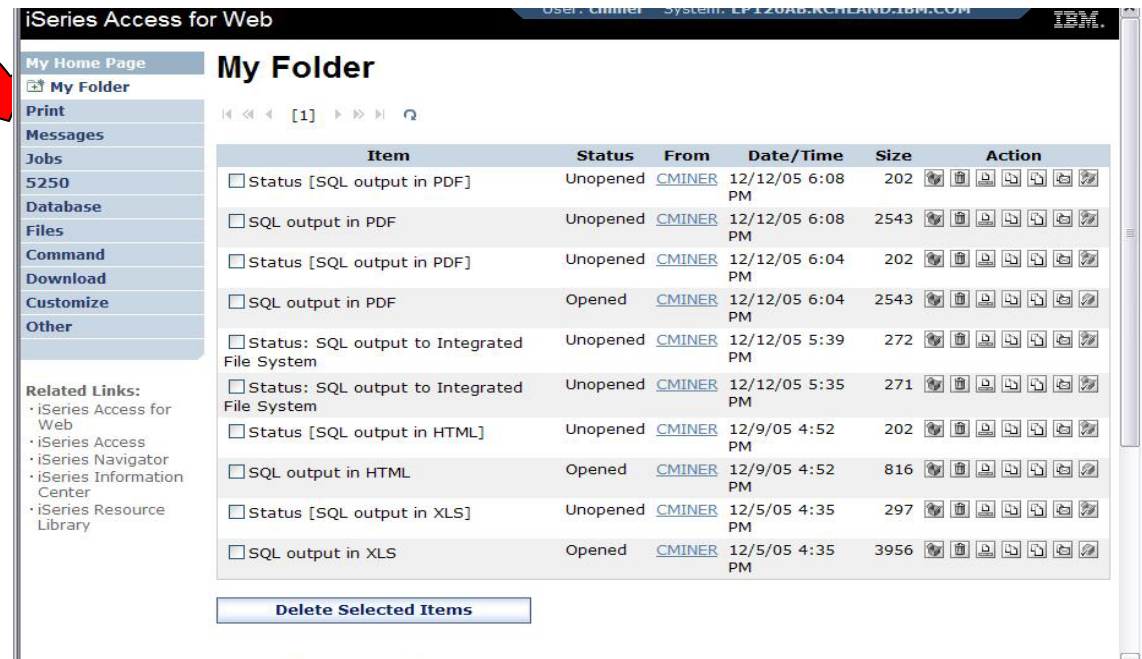

- Performing requests for someone else
- Mechanism for workflow.

### Combine email and My Folder functions to:

- Perform requests for someone else
- Distribute results to a group of users
- Send email to others when you place information in their Folder
- Be notified when new items are placed in your Folder

## Simply click on 'My Folder' to see items

- Can store items, email them, delete them, etc
- Do not need to understand any Directory structure to put information in My Folder or another's Folder

# Messages

- Display Messages
- Send Message
- Send Break Message
- Operator Messages
- Message Queues

iSeries Access for Web

**Messages**

Access messages on your iSeries server with iSeries Access for Web.

[Display messages](#)

- Display, answer and manage messages in the message queue for the logged on user.

[Send message](#)

- Send a message to users and message queues.

[Send break message](#)

- Send a Sametime announcement to iSeries Access for Web Sametime users.
- Send a break message to iSeries work stations.

[Operator messages](#)

- Display, answer and manage messages in the system operator message queue.

[Message queues](#)

- List message queues on the iSeries server.
- Select, display and manage messages in message queues.

**Message Queues**

Message Queue	Description	Action
<a href="#">\$BEACH/BLDSTAT</a>	BEACH Build Status message queue.	
<a href="#">\$BEACH/FAILURELOG</a>	BEACH Build Failure message queue.

<a href="#">\$BLDTTEST/SUCCESSLOG</a>	BLDTTEST Build Success message queue.	

# Send Message / Send Break Message

## Send Messages

- Goes to user's 'Display Messages' queue

## Send Break Message

- Generates an instant message to Sametime users
- Sends a Break Message to **workstation** users (not iSeries Access for Web 5250 users → goes into QSYS/CMINER message queue)

## Add Button

- Retrieves list of workstation and Sametime users on the server

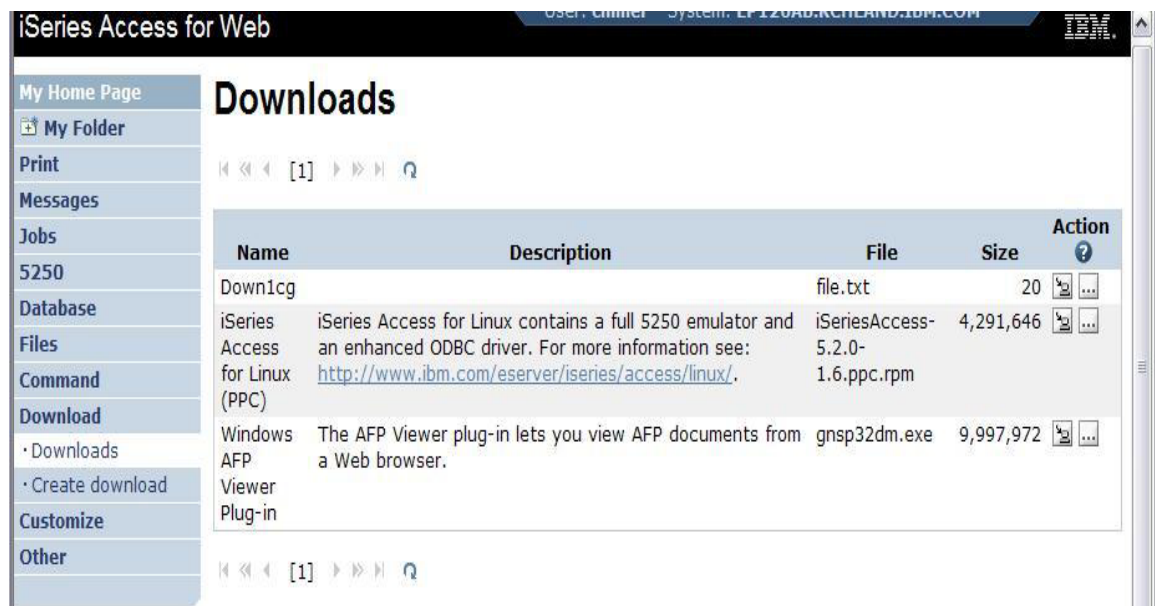

## Downloads (New in V5R3)

## Downloads – for file/program distribution

*http://<myiseries>/webaccess/iWAPackages*

- Mechanism to distribute files / programs to users
- Administrator can create downloads
- Management functions included for updating downloads and for controlling access to them

Name	Description	File	Size	Action
Down1cg		file.txt	20	 
iSeries Access for Linux (PPC)	iSeries Access for Linux contains a full 5250 emulator and an enhanced ODBC driver. For more information see: <a href="http://www.ibm.com/eserver/iseries/access/linux/">http://www.ibm.com/eserver/iseries/access/linux/</a> .	iSeriesAccess-5.2.0-1.6.ppc.rpm	4,291,646	 
Windows AFP Viewer Plug-in	The AFP Viewer plug-in lets you view AFP documents from a Web browser.	gnsp32dm.exe	9,997,972	 

## Example of how you might use this function

### Scenario

- I have some users who need the ODBC driver from iSeries Access for Windows.
- What would be an easy way to make this available?

### Solution

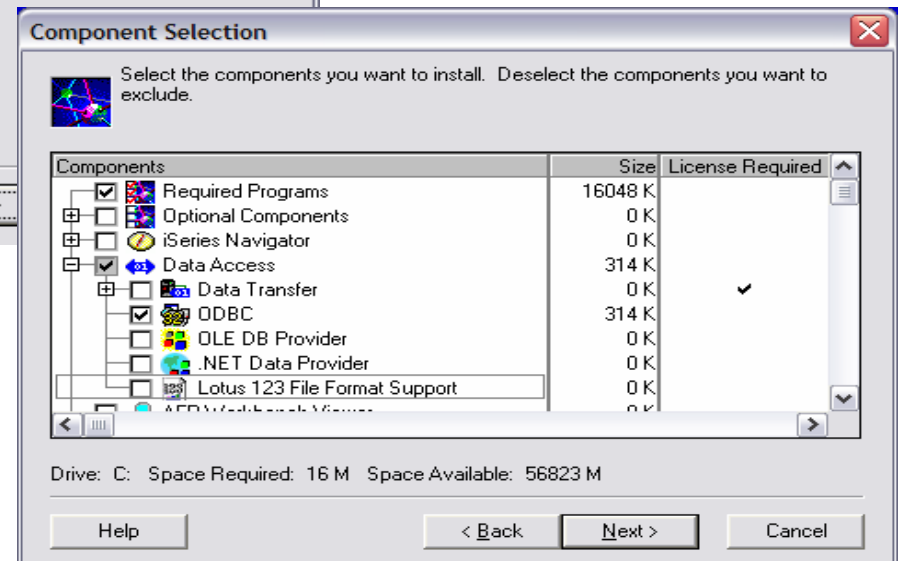

- Use iSeries Access for Windows to build an install image that contains only the ODBC drive
- Use iSeries Access for Web to enable users to install it on their PCs

# Create Tailored Install Image of ODBC driver

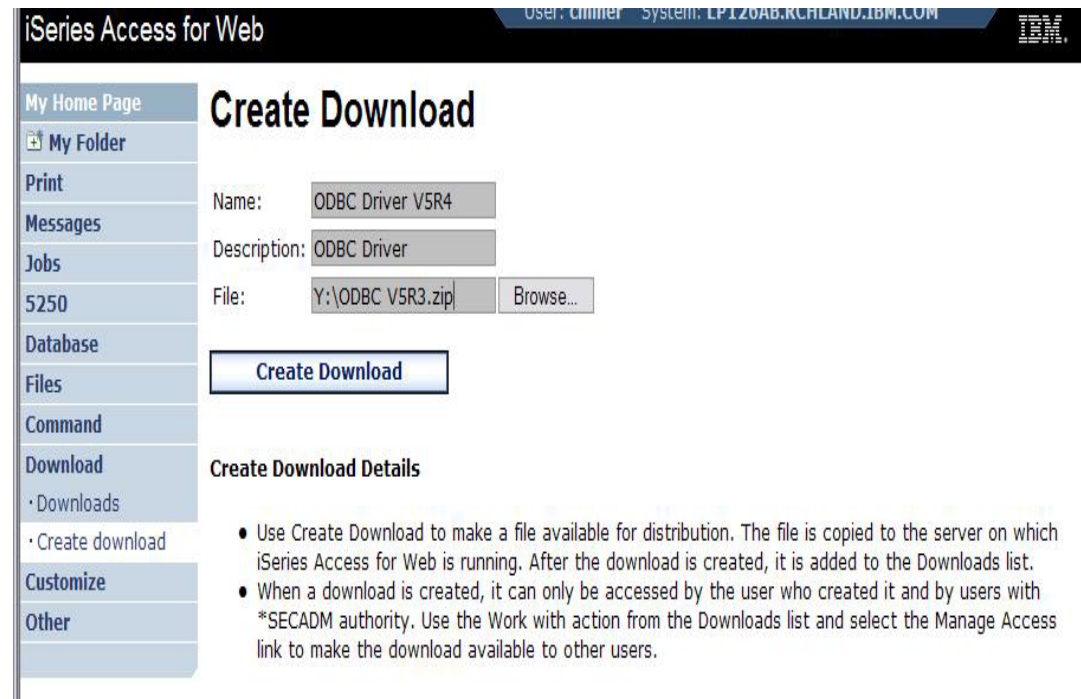

**Use iSeries Access  
for Windows  
Tailored Install  
wizard to capture  
only the Windows  
ODBC driver**

- Run CWBINIMG.BAT
  - This program is in  
:\<myiseries>\qibm\ProdData  
\CA400\Express\Install\Image
- Then zip up the directory that gets created

## Use the 'Create Download' feature

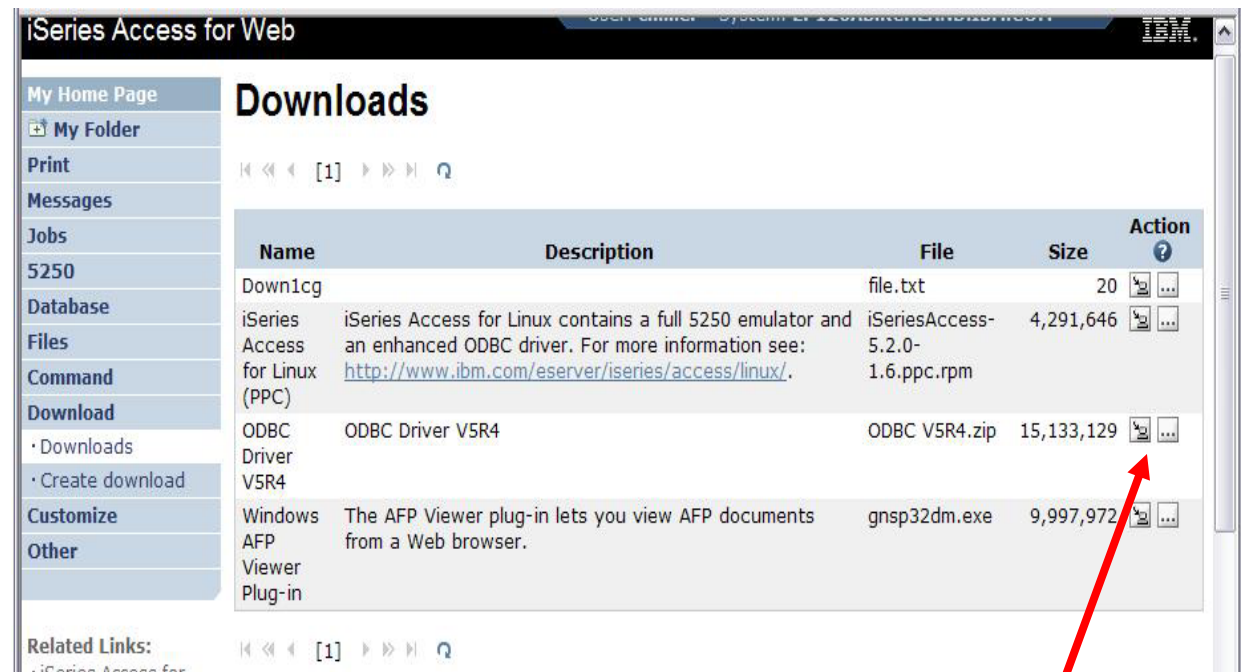

- Use Create Download to make a file available for distribution
- The file is copied to the server on which iSeries Access for Web is running
- After the download is created, it is added to the Downloads list.

The screenshot shows the 'iSeries Access for Web' interface. The top navigation bar includes the user name 'User: cimmer' and the system name 'System: LP126AB.RCHLAND.IBM.COM'. The main content area is titled 'Create Download'. On the left, there is a vertical menu with options: My Home Page, My Folder, Print, Messages, Jobs, 5250, Database, Files, Command, Download (with sub-items 'Downloads' and 'Create download'), Customize, and Other. The 'Create Download' form contains the following fields: 'Name' with the value 'ODBC Driver V5R4', 'Description' with the value 'ODBC Driver', and 'File' with the value 'Y:\ODBC V5R3.zip' and a 'Browse...' button. A 'Create Download' button is positioned below the form. Underneath the form, there is a section titled 'Create Download Details' which contains two bullet points: 'Use Create Download to make a file available for distribution. The file is copied to the server on which iSeries Access for Web is running. After the download is created, it is added to the Downloads list.' and 'When a download is created, it can only be accessed by the user who created it and by users with \*SECADM authority. Use the Work with action from the Downloads list and select the Manage Access link to make the download available to other users.'

## ODBC now added to Download List

- When a download is created, it can only be accessed by the user who created it and by users with **\*SECADM** authority
- Use the **Work with action** from the Downloads list and select the Manage Access link to make the download available to other users

The screenshot displays the 'Downloads' section of the 'iSeries Access for Web' interface. A table lists several downloads, including 'Down1cg', 'iSeries Access for Linux (PPC)', 'ODBC Driver V5R4', and 'Windows AFP Viewer Plug-in'. A red arrow points to the 'Action' column for the 'ODBC Driver V5R4' entry.

Name	Description	File	Size	Action
Down1cg		file.txt	20	[Icons]
iSeries Access for Linux (PPC)	iSeries Access for Linux contains a full 5250 emulator and an enhanced ODBC driver. For more information see: <a href="http://www.ibm.com/eserver/iseries/access/linux/">http://www.ibm.com/eserver/iseries/access/linux/</a> .	iSeriesAccess-5.2.0-1.6.ppc.rpm	4,291,646	[Icons]

Windows AFP Viewer Plug-in	The AFP Viewer plug-in lets you view AFP documents from a Web browser.	gnsp32dm.exe	9,997,972	[Icons]

## Work With Download options

- Edit Name and Description
- Update File
  - The new file will replace the current file that is available for downloading.
  - The current file will no longer be available to download.
- Delete
- Manage Access
  - This action enables you to either give or deny access to users.

The screenshot shows the 'iSeries Access for Web' interface. On the left is a navigation menu with items: My Home Page, My Folder, Print, Messages, Jobs, 5250, Database, Files, Command, Download, Downloads, Create download, Customize, and Other. The main content area is titled 'Work With Download' and displays the following information:

Name:	ODBC Driver V5R4
Description:	ODBC Driver V5R4
File:	ODBC V5R4.zip
Size:	15,133,129
Last updated:	12/22/05 3:59:43 PM

Below this information is an 'Action' section with a bulleted list of options:

- [Edit name and description](#)
- [Update file](#)
- [Delete](#)
- [Manage access](#)

# Manage Access to New Download File

## Set up who can access new download file

- Deny Access **defaults** to only the creator of the download can access and manage this download
- Now select the users you wish to access it
  - Can be All Users (\*PUBLIC), groups of users, specific users
- Set who else can manage this download

The screenshot shows the 'iSeries Access for Web' interface. The top bar displays 'User: cminer' and 'System: LP120AB.KCHLAND.IBM.COM'. The main window is titled 'Manage Access' and shows details for a file named 'ODBC Driver V5R4'. Below the details are three columns: 'Allow Access', 'Deny Access', and 'Manage'. The 'Allow Access' column contains the user 'cminer'. The 'Deny Access' column contains '\*public'. The 'Manage' column contains 'cminer'. Each column has 'Add...' and 'Remove' buttons. A red arrow points from the 'Add...' button in the 'Allow Access' column to the 'Add User' dialog box. The 'Add User' dialog box shows a list of users, including 'All users', 'AAA', 'ACBARRON', 'ACN', 'ACNTEST', 'ADSECAD', 'ADSIERRA', 'ADUSER', 'ADUSERZ', 'AGALINDO', 'AHANSON', 'AHOMIKE', 'AITANA', 'AJSLOMA', and 'ALICIAM'. The 'OK' and 'Cancel' buttons are at the bottom of the dialog.

## Download and Install ODBC on Desktop

- If you had originally zipped up the Tailored Install directory using some product like **Install Shield's Package For the Web**, then it would initiate the install for the end user.

## Who will benefit from Access for Web

- Any iSeries customer -- with any hardware model - can quickly get started working in a Web environment
  - If your system is not capable of running WAS, you can easily install the ASF Tomcat web application server. ASF Tomcat runs on hardware with 70 CPW and 256 MB memory
- Any iSeries customer -- with little Web experience - can easily get started working in a Web environment
  - iSeries Access for Web is simple to install and configure
  - There is no programming skills required to set it up
- Any iSeries customer -- with no training or setup on users' desktops - can extend the reach of iSeries resources to your end users
  - Use customize facility to set up view ('window') to iSeries and to control access to various iSeries resources
  - All built around OS/400 user profiles
  - Uses standard HTML, uses existing HTTP/HTTPS ports

***A great reason to get your iSeries into the web world***

Information is provided "AS IS" without warranty of any kind.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only. Contact your local IBM office or IBM authorized reseller for the full text of the specific Statement of Direction.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Photographs shown are of engineering prototypes. Changes may be incorporated in production models.
