Abstract

If you are looking for an extremely simple and highly functional way to work with i5/OS resources, then System i Access for Web is the best option!

Users simply start up their favorite browser and point-and-click their way through easy-to-use GUIs and wizards. This session shows how users can run host applications, work with the database, printers, and the IFS. Network administration is a breeze as nothing is installed or configured on the workstation, and control is at the server. You will see how to:

- Run i5/OS applications (5250 emulation), upload and download database information, and use the system as a file and print server
- Convert spooled printer output to PDF and either print it or email it
- Work with printers, jobs, run commands, send messages -- all through easy-to-use GUIs designed around the browser interface
- How an administrator can set up different views ('window') of i5/OS for different groups of users.
- Learn about the new features in the V5R4 version of System i Access for Web.

Agenda

- **Part 1. Overview of System i Access for Web**
- **Part 2. Install and Configuration**
- **Part 3. Tips on Managing End User Access**
- **Part 4. Using 5250 emulation**
- **Part 5. Using the Database function**
- **Part 6. Summary**
- **Appendix A. LAB. Getting Started, Setting Policies**
- **Appendix B. Home page customization**

System i Access Family and System i

System i Access Family (5722-XW1) unlimited user feature included with the following System i hardware

- **System i Model 515 Express configurations**
 - See Announcement Letter 107-181 dated 4/1/07 for more details
- **System i Model 525 Express and CBU configurations**
 - See Announcement Letter 107-182 dated 4/1/07 for more details
- **System i Model 570 with POWER6 technology**
 - See Announcement Letter 107-448 dated 7/31/07 for more details

Any i5/OS user connecting to the above System i models is entitled to use any of the System i Access Family products at no additional charge. This includes:

- **System i Access for Windows**
- **System i Access for Web**
- **System i Access for Linux**
- **System i Access for Wireless**

iSeries Access Family and System i (continued)

The iSeries Access products provide users with **simplified GUIs to work with i5/OS resources**. Users can quickly and easily:

- Access traditional i5/OS applications using 5250 emulation
- Query and retrieve DB2 information without understanding SQL concepts
- Upload spreadsheet information into DB2 for i5/OS
- Use i5/OS IFS as a file server
- Access i5/OS printer output, convert it to .PDF, and print it on PC printers
- Incorporate the use of their email server to distribute files, database information, and printer output through simple point-and-click interfaces.
