

SoftLayer Additional VLANs Request Form

Deprecation Notice:

The VLAN request form is no longer accepted as a means to acquire VLANs. Premium VLANs can be acquired via the API or Portal. Visit the following documentation to learn how to place a VLAN order.

<https://console.bluemix.net/docs/infrastructure/vlans/order-vlan.html>

Differences between the request form and Premium VLANs:

- Premium VLANs are delivered without any specified Primary Subnet size. This means if you don't require a subnet, you are no longer required to select one, nor pay for a subnet you do not intend to use.
- Documentation for the new process for requesting special Primary Subnet allocations can be found in the VLAN FAQ under the question, *"What options do I have if I need devices on different private subnets within the same VLAN to communicate by default, but I don't want to enable VLAN Spanning?"*

See <https://console.bluemix.net/docs/infrastructure/vlans/faq.html>
