Celebrate Reinvention

New data-driven technologies and business processes are empowering big shifts in enterprise IT, and IBM is your trusted guide to uncovering new sources of competitive advantage. Think is where you can discover the biggest bets in technology in 2019 and beyond – advancements that are driving business reinvention for nearly every enterprise. Bring your team and reinforce a culture of continuous learning, innovation and fun in an environment where your digital transformation priorities are top of mind.

Here’s a preview of session content:

• What IT Leaders can learn from the world’s #1 supercomputer
• How to design a data-driven architecture for AI and analytics
• How MD Anderson built a Nobel Prize-winning research environment
• A peek behind the quantum curtain – IBM Q and quantum computing
• Augmented reality product tours
