In 2017, nearly 1,134,000 units of IT equipment were prepared for reuse and resale.

If you only take the laptops¹ that were processed and stack them, their height would extend 8.6 miles (13.8 kilometers) into the atmosphere.

Remanufactured IBM servers, IBM storage systems, and PC products are available for resale worldwide.

In 2016, IBM Global Asset Recovery Services’ remanufacturing and demanufacturing combined operations processed 49.7 million pounds (approximately 22,551 metric tons) of IT product, parts and materials.

Weight is approximately 57 Airbus A380 planes²
