Affordably acquire IBM solutions for the retail industry

How IT financing helps retailers meet three key imperatives to drive growth

Advanced technologies continue to transform how consumers communicate, interact and research—and how they choose and shop for goods and services.

IBM offers technology, consulting, and solutions to help retailers meet three critical imperatives: First, rethink the role of the store using advanced technology to meet today’s consumers high digital expectations. Second, reinvent the supply chain to minimize the impact of global and local events on your supply chain. And third, to minimize the impact of global and local events on your supply chain.

IBM Global Financing offers flexible funding options to meet these imperatives and make future growth more affordable.

Remove budget obstacles to innovation

To help retailers deploy advanced technologies including cloud, AI, data and blockchain, IBM Global Financing customizes funding solutions to help speed implementation and improve cash flow. Client examples include:

• Financing helped a furniture retailer acquire an analytics system to gain clearer insights on customer buying patterns. Access to capital throughout the project helped avoid reductions in scope due to budget constraints.
• To help a grocery store leverage business intelligence to improve marketing execution through a new in-store promotion system, IBM Global Financing provided a solution which covered the total project—including hardware and software.
A retail trade association saved over $100,000 per year by leasing an upgrade to their order management system through IBM Global Financing, so those savings could be redeployed to other projects.

**Access the financing expertise to support your vision**

Financing is available for hardware, software and services—both IBM and non-IBM. Additionally, IBM Global Financing provides leases and loans with competitive interest rates for these solutions.

With IBM Project Financing™, credit-qualified retailers can secure a dedicated source of funding to avoid delays for large scale projects. IBM Global Financing can also offer customized payment plans that help align project costs to anticipated benefits, improve return on investment, and reduce total cost of ownership.
Why IBM?

IBM Global Financing has been in operation for more than 35 years and serves clients in over 60 countries, spanning more than 20 industries. With a global reach and expertise in IT financing, working capital, credit and IT asset recovery services and processes, IBM Global Financing offers flexible payment plans for IT infrastructure, software and services from both IBM and non-IBM suppliers.

IBM Global Financing offerings are provided through IBM subsidiaries and divisions worldwide to qualified commercial and government clients. IBM Global Financing lease and financing offerings are provided in the United States through IBM Credit LLC. Rates and availability are based on a client’s credit rating, financing terms, offering type, equipment and product type and options, and may vary by country. Non-hardware items must be one-time, non-recurring charges and are financed by means of loans. Other restrictions may apply. Rates and offerings are subject to change, extension or withdrawal without notice and may not be available in all countries. IBM and IBM Global Financing do not, nor intend to, offer or provide accounting, tax or legal advice to clients. Clients should consult with their own financial, tax and legal advisors. Any tax or accounting treatment decisions made by or on behalf of the client are the sole responsibility of the client. For IBM Credit LLC in California: Loans made or arranged pursuant to a California Financing Law license.
