

New xSeries 440 server delivers number-one TPC-C performance for 4-way IA-32 systems

August 22, 2002 ... The new IBM® eServer xSeries™ 440 scored a performance result of 61,168.83 tpmC at \$5.14 per tpmC with availability of December 31, 2002. (1) This score sets a record for 4-way performance on an Intel® 32-bit architecture system.

The x440 delivered 75 percent more throughput than the Dell PowerEdge 6650. The x440 also delivered 25 percent more throughput and 21 percent better price/performance than the HP ProLiant DL580 G2. (2)

The xSeries 440 server used four Intel 2.4GHz Xeon™ Processors and ran Microsoft® SQL Server 2000 Enterprise Edition and Microsoft .NET Enterprise Server. The Dell and HP systems each used four Intel 1.6GHz Xeon MP processors and ran Microsoft SQL Server 2000 Enterprise Edition and Microsoft Windows® 2000 Advanced Server.
