Agenda

What's in the Enterprise Edition?

- Overview of the Software and Hardware Included
- Vouchers for Education and Services
- What You Will Receive Documentation and Media
- How is Support and Maintenance handled
- How to Register the Edition

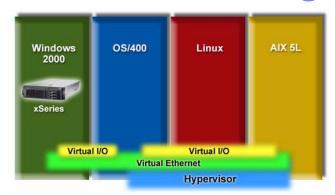

Business Uses of the Enterprise Edition

- WebSphere
- Sametime
- QuickPlace
- Tools for System Management and DB2
- Linux
- IXA/IXS

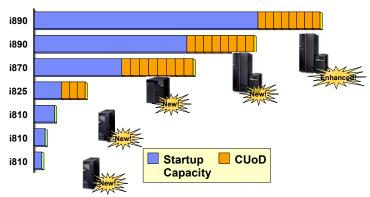

All of the Enterprise Editions Contain the Following:

- Support for Multiple Operating Environments
 - ► OS/400
 - ► Linux
 - Windows Integration Support
 - AIX 5L (Statement of Direction 2004)
- Support for Dynamic Logical Partitioning (LPAR)
- Support for 5250 OLTP (maximum CPW)
 - Unlimited use of the available capacity on the servers for Interactive Workload
- Support for Web Modernization
 - Applications refaced with the IBM WebFacing Tool do not use Interactive Workload
- Licensing for OS/400
 - Licenses for OS/400 and software that is processor based are provided for each of the base or "start-up" processors for the server model
 - 810 (1 to 2)
 - **-** 825 (3)
 - **-** 870 (8)
 - 890 (16 with Feature Code 2497)
 - 890 (24 with Feature Code 2498)

Plus These Software Products...

Packaging Depends on the Model - 810, 825, 870, 890

Model 810

e-business software

- WebSphere
 - WAS V5 Express

Datacenter Mgmt Tools

- Performance Tools
- DB2 Qry Mgr/SQL Dev Tool Kit

Model 825

e-business software

- WebSphere
 - WAS V5 Express
 - WAS V5 Base
 - WAS V4 Single Server
- Sametime
 - ► 100 User Licenses
- QuickPlace
 - ▶ 100 Users Licenses
- DB2 Qry Mgr/SQL Dev
- DB2 Extenders & SMP
- DataPropagator

Datacenter Mgmt Tools

- Tivoli
 - Monitoring for Web
 - Tivoli Monitoring
 - Storage Mgr EE
 - Server + 15 Clients
- BRMS & Media/Stg Ext
- Performance Tools
- HA Switchable Res.

Model 870

e-business software

- WebSphere
 - ► WAS V5 Express
 - WAS V5 Base
 - WAS V4 Single Server
- Sametime
 - ► 100 User Licenses
- QuickPlace
 - ► 100 Users Licenses
- DB2 Qry Mgr/SQL Dev
- DB2 Extenders & SMP
- DataPropagator

Datacenter Mgmt Tools

- Tivoli
 - Monitoring for Web
 - ▶ Tivoli Monitoring
 - Storage Mgr EE
 - Server + 40 Clients
- BRMS & Media/Stg Ext
- Performance Tools
- HA Switchable Res.

Model 890 (FC 2497 and FC 2498)

e-business software

- WebSphere
 - WAS V5 Express
 - WAS V5 Base
 - WAS V4 Single Server
- Sametime
 - ► 100 User Licenses
- QuickPlace
 - ▶ 100 Users Licenses
- DB2 Qry Mgr/SQL Dev
- DB2 Extenders & SMP
- DataPropagator

Datacenter Mgmt Tools

- Tivoli
 - Monitoring for Web
 - ► Tivoli Monitoring
 - Storage Mgr EE
 - Server Plus 80 120
- BRMS & Media/Stg Ext
- Performance Tools
- HA Switchable Res.

And These Hardware Features!

- Each Model comes with an Integrated xSeries Server Card (IXS)
 - ▶ 1.6 GHz Intel® Xeon processor with 1 GB server memory
 - Integrated 10/100 Mbps Ethernet Adapter
 - Virtual disk resources
 - Shares iSeries Tape, DVD, CD-ROM
 - Windows 2000 Server® support

- Models 870 & 890 come with an additional processor activated for Linux
 - Processor Activation of one Model 870/890 stand-by processor will be activated for Linux
 - Linux distribution must be obtained separately
 - If this processor is to be used by OS/400, one OS/400 processor license is required

Enterprise Editions Includes Education & Services Helping customers take the first step

	Solution	Education	Services
WebSphere			
Linux			
Windows Integration			

Included with the Enterprise Package on the i825, i870 and i890

- Select one Getting Started service
 - WebSphere / Linux / Window Integration
- Receive IBM Learning Services education vouchers for selected courses
 - Systems Management / WebSphere / Linux / Windows Integration / Tech Conference

i825

How to Use the Vouchers for Education

Classroom training at a steal.

The education entitlement provides the customer with vouchers that can be used for admission to selected classes designed to help maximize the usefulness of the new systems

IBM iSeries Model Education vouchers included

- ► iSeries 825 Enterprise Edition 1 voucher included with each system
- iSeries 870 Enterprise Edition 3 vouchers included with each system
- iSeries 890 Enterprise Edition 5 vouchers included with each system

Classes and conferences that qualify for the vouchers

- Course Number AS24/S6229: <u>iSeries System Operator Workshop Version 5</u> (4 days)
- Course Number AS30/S6225: lmplementing Windows Server on iSeries (2.5 days)
- Course Number AS36/S6226: <u>Linux on iSeries</u> (3 days)
- Course Number AS89/S6289: Getting started with WebSphere on iSeries (3 days)
- Course Number AS85/S6585: Web Enabling 5250 Applications Using the IBM WebFacing Tool (2 days)
- ► IBM eServer iSeries Technical Conference (US) (4.5 days)

How to Use the Vouchers for Services

There are three special services engagements that are available as part of the Edition to help you "get started" in a leading edge applications with the Enterprise Editions!

Getting Started with Linux for iSeries

The service will establish the logical partition (LPAR) configuration for Linux and install the customer-acquired Linux distribution. Networking configuration will be implemented for the Linux partition and initial user profiles will be defined. The service will establish file serving for Linux using SAMBA, NFS, and FTP. The default web server will be established using Apache HTTP Server. At the conclusion of the engagement the customer will be provided a configuration summary of the Linux partition.

Getting Started with WebSphere for iSeries

The service will provide the initial installation and setup of WebSphere Application Server - Express for iSeries or WebSphere Application Server v5 for iSeries on a single iSeries server or logical partition. The service will install the selected WebSphere Application Server product, if not installed. The IBM HTTP Server (powered by Apache) V5R2M0 will be configured and integrated with the WebSphere Application Server. The WebSphere Application Server environment will be verified using pre-installed sample applications. For WebSphere Application Server - Express the IBM Telephone Directory will be installed and launched. At the conclusion of the engagement the customer will be provided with a summary of steps and configuration.

Getting Started with Windows Integration for iSeries

The service will install and cable an Integrated xSeries Server or the Direct Attached xSeries via Integrated xSeries Adapter, including High Speed Link and System Power Control Network cables. Installation of the customer-acquired Microsoft Windows Server Operating System on the xSeries Server will be included. The service will provide an overview on Storage Management concepts, Backup and Recovery, sharing of iSeries Tape and CD ROM devices, and High Availability. At the conclusion of the service engagement the customer will be provided a configuration summary of the Windows Installation.

What Documentation You Will Receive

Register for Software Maintenance & Technical Support
The Software Maintenance and technical support for
the Lotus, Tivoli and WebSphere products included with
your Edition requires registration. There is no additional
charge. Registration is available on the Web at:

 http://www.ibm.com/servers/eserver/iseries/hardware/editions (select Registration)

Register for IBM Education and Services Vouchers
These are limited time offers for customers who have purchased the 825, 870 and 890 Enterprise Edition.
These entitlements are included with systems purchased and installed in the Americas, Europe, the Middle East and Africa. Registration must occur within the 120 days. To register and to find out more about the courses, conferences and on-site services included in your purchase visit the Web at:

http://www.ibm.com/servers/eserver/iseries/hardware/editions (select Registration) Chrismic per extents um reno Bild e Deuver Rented

What Media You Will Receive

Feature of Enterprise Edition Shipment	Number of CDs
OS/400 - SLIC (1 CD) - OS/400 and Features (7 CDs) - License Keyed Solutions (2 CDs) - Bonus Programs (2 CDs)	12
Lotus Sametime (ships with a copy of Domino)	4
Lotus QuickPlace (ships with a copy of Domino)	4
Tivoli Monitoring for Web (14 CDs required for iSeries install) - The CDs for all platforms are included in the shipment - http://www-1.ibm.com/servers/eserver/iseries/hardware/editions/web-page	42
Tivoli Storage Manager	12
WebSphere (Express, WAS V4 Single Server & V5 Single Server)	10
Plus the additional CD-ROMs for other software ordered that is not included in the Enterprise Edition package	iseries Enterprise Edition

How is Support and Maintenance Handled

 Support for traditional iSeries OS/400 features is handled through the new software maintenance coverage when you purchase or upgrade to the new iSeries models

 The Software Maintenance for the Lotus, Tivoli and WebSphere products is also included with your Edition,

- Does not involve a separate or additional charge for the first 12 months starting at the installation of the new processor or the upgrade
- Software Maintenance includes both software subscription and voice support for usage or technical issues
- With Software Maintenance you will receive upgrades to the Lotus, Tivoli and WebSphere products

Registering for Support

- North America and Japan If you need help with your account, please contact the IBM Registration Help Desk at:
 - US and Canada 1-888-426-4409
 - US and Canada 1-416-383-3906

iSeries registration

Thank you for registering with ibm.com.

Your registration enables you to take advantage of the one year Software Maintenance agreement for the Lotus, Tivoli and WebSphere products that were included with your purchase. This Software Maintenance includes both software subscription and technical support - so you're covered whether you need to upgrade or have a technical issue to resolve.

Your registration also includes IBM Education and Services vouchers to help you get the full value from your iSeries immediately. If you selected these options on the registration form, your request has been forwarded to the appropriate Education or Services support group for your country, they will contact you to arrange delivery of the vouchers. The IBM representative that contacts you will provide additional information, confirm your address, mail the education vouchers to you and provide you with the process for starting your services engagement.

Registration also provides membership in iSeries Nation, a community of passionate, enlightened iSeries customers and access to IBM Community Tools, a suite of peer-to-peer applications for community-based problem solving.

Thank You for registering your iSeries. Please feel free to visit the following locations for more information on IBM eServer iSeries - see the advantages it can bring to your business.

WebSphere - Choices...Choices...Choices.

825/870/890 Select From the Following Choices*:

- WebSphere Application Server V5 Express
- WebSphere Application Server V5 (Base)
- WebSphere Application Server V4 Single Server Edition
- WebSphere Application Server V5 Express
 - Minimum Footprint 300 CPW, 768 MB Memory
 - Based on J2EE standards
 - Support for EJBs not included
- WebSphere Application Server V5 Base
 - ► Minimum Footprint 1,000 CPW, 1 GB Memory
 - ► Full support of J2EE standards as of V5 including EJBs
 - No support for clustering or fail-over
 - Terms and Conditions: One server instance, but can span multiple processors
- WebSphere Application server V4 Single Server Edition
 - ► Footprint 1,000 CPW, 1 GB Memory
 - ► Full support of J2EE standards as of V4 including EJBs
 - No support for clustering or fail-over
 - Select if compatibility is needed with V4 level of support
 - Terms and Conditions: One server instance, but can span multiple processors

* 810 ships with WAS V5 Express

Application Refacing is the Hottest Topic!

Do you Realize You Can Use These Tools with Your Copy of WebSphere?

iSeries Access for Web	Host Publisher	HATS Limited Edition	HATS Full Edition	IBM WebFacing Tool
iSeries Access (Client Access) Host Integration Solutions WebSphere Development Studio				
WebSphere Application Server V5 Express				

Tool	Packaging	Version
iSeries Access for Web	iSeries Access	V5R1, V5R2 (best function)
Host Publisher V4	iSeries Access	V5R1, V5R2
HATS Limited Edition	iSeries Access	V5R2 (June 2003)
HATS V4	Host Integration Solutions	V3.0
IBM WebFacing Tool	WebSphere Dev Studio	V5R1, V5R2 (best function)

iSeries Access for Web Packaging:

iSeries Access (Client Access) V5R1 and V5R2

Pros

- Easy to install and implement
- 5250 emulator allows for device naming
- All functions except 5250 run as non-interactive workload
- Allows access to a variety of iSeries resources
- Covered by iSeries Software Maintenance
- Supports Tomcat and a variety of browsers
- Non invasive no source required
- More individual end user control

Cons

- All refaced screens must use the same "look and feel"
- 5250 emulator requires 5250 Interactive (OLTP) Workload
- Refaces 5250 screens only

Best Use:

- End user access to iSeries functions through a browser
- Complements WebFacing, Host Publisher, HATS

Demo iSeries Access for Web (All entries case sensitive)

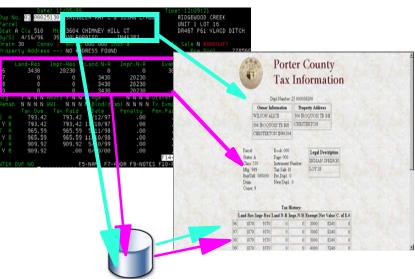

- http://iseriesd.dfw.ibm.com/webaccess/iWAHome
- Use the following User ID and password to sign in:
- User ID of WUSER
- Password of GUEST1

Host Publisher

Packaging:

iSeries Access (Client Access) V5R1 and V5R2

Pros

- Fairly easy to install and configure on server
- Programmable navigation through applications via scripts & macros
- Can merge / split applications
- Can consolidate many screens into one or break one into many
- 3270 and 5250 Interfaces
- Non invasive no source required
- Covered by iSeries Software Maintenance

Cons

- Future is uncertain relative to HATS
- Studio requires education to use
- 5250 emulator requires 5250 Interactive (OLTP)
 Workload

Best Use:

 Can take an existing full-function, in-house application and present only selected paths to Web users

Demo WebSphere Host Publisher

- Beaver Creek Web Solutions Demo site
- Live site!

Host Access Transformation Server LE (HATS LE)

Powered by Eclipse™ technology Windows®

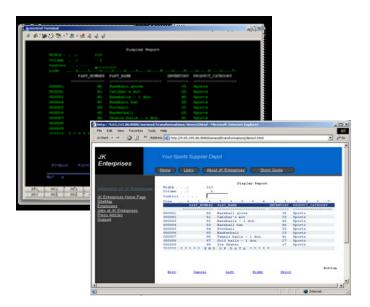

WebSphere Welcome to IBM WebSphere Host Access Transformation Server (HATS)

© Livense: Materias - Pioperty of Btv Corp. © Copyright by BtriCorp. and others (2000, 2002. All Rights Reserved. Btv and WedSphale are trademarks or registered technicals of Btv Corp. Windows and Airchows Trate registered technicals of the Corp. Windows and Airchows and all Juvent Associations of another trademarks or registered technicals and airchows the specific and another technical state of the countries, or look.

Packaging:

iSeries Access (Client Access) V5R2 - June 2003

Pros

- Easy to install and configure
- 5250 access only
- Provides a high level of GUI look and feel with no programming
- Covered by iSeries Software Maintenance

Cons

- Provides a choice of only one "look and feel" for all applications
- Requires 5250 Interactive (OLTP) Workload
- iSeries only subset of the full HATS server

Best Use:

End user 5250 access to iSeries through a browser

Host Access Transformation Server (HATS)

Powered by Eclipse™ technology Windows®

Welcome to IBM WebSphere Host Access Transformation Server (HATS)

© Livense: Materias - Pioperty of Eth Corp. © Copyright by Bth/Corp. and others (2000, 2002, All Rights Reserved.)
Bith and WeoSphaleses trademarks or registered trademarks of Eth Corp. Windows and Mindows Nir are registered trademarks of flutting of flutting trademarks or support trademarks or registered trademarks or support and all terms are trademarks or registered trademarks or the United States of the countries, or both.

Packaging:

Host Integration Solution bundle

Pros

- Host screens are converted to GUIs on the fly, in real time, eliminating need to customize every screen
- Easy Web-to-host first step, Low skills requirement
- HATS can apply: an individual rule set to each host application
- Covered under SW Maintenance

Cons

- 5250 emulator requires 5250 Interactive (OLTP)
 Workload
- Cost per user internal and external pricing

Best Use:

 Add customization by using Macros (Screen consolidation), Global variables, Tabbed folders, Graphs, Java Widgets (e.g. calendar,calculator)

Now you have everything you need for Refacing!

Think about how many ways you take advantaged of refaced applications...

Value: Replace fat-clients with browser access where appropriate
 Reduces the complexity of desktop maintenance - fewer on-site updates/installations
 \$avings: Reduce the number of help desk/system analysts maintaining your environment
 Allows easier, often less expensive, access from remote sites
 \$avings: Trade in expensive leased lines for Internet access

Value: Bring your business to the web for selected customers/vendors
Don't rewrite! Leverage existing applications by refacing them for broswer access \$avings: Why write/buy new applications, use existing tools with WebSphere Offer access to order status data for selected customers, roll-out as needed \$avings: Reduce calls to Customer Service Department, offer access 24/7 Allow access to specific inventory items by vendor \$avings: Just-in-time restocking can possibly reduce investment in inventory

Value: Reface existing 5250 based applications that "appear" old and tired Tired of having new employees say....Gee I Have not seen a DOS screen in a long time... \$avings: Don't buy new Apps! Refresh the interface to reveal state-of-the-art applications

#3 Web Conferences

Real Time Collaboration Has 3 Important Concepts...

#1 Awareness

#2 Conversation

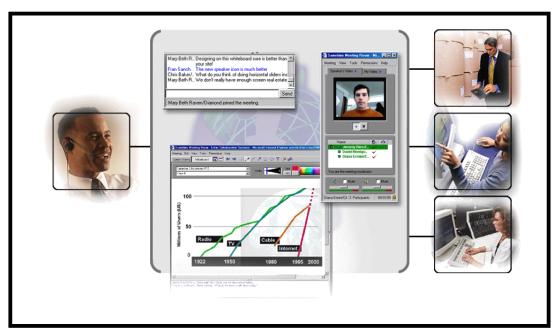

#3 Web Conferences

Concept #3: Web Conferencing

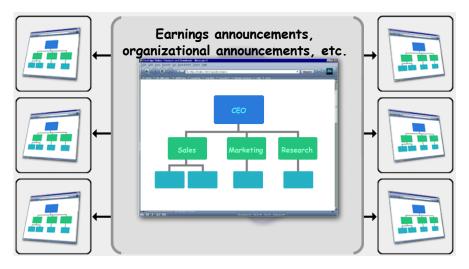

- Real-time sharing of documents, files, and applications
- Shared Whiteboard Appropriate for...
 - Giving presentations
 - Online collaboration
 - Letting the other person drive: local applications can be remotely controlled
- Different types of Web conferences for different purposes
 - Collaboration meetings for smaller groups working on something
 - Moderated Presentation or Demo meetings for demonstrating products or presenting to larger groups
 - Broadcast meetings for few-to-many, large broadcasts

Many Ways to Use Sametime....

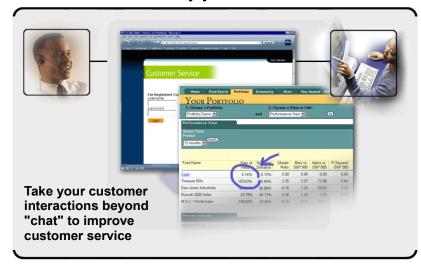

Broadcast and Train

Access Expertise

Share Applications

Help via the Web

Business Reasons for Sametime

- Reducing travel expenses by conducting virtual meetings
- Reducing telecommunication costs
- Increase employee productivity
- Gaining more customers and reducing customer churn rates
- Decreasing time to market
- Increasing website functionality
- Expand training capabilities
- Reduce cost of service
- Reduce strains on server storage space

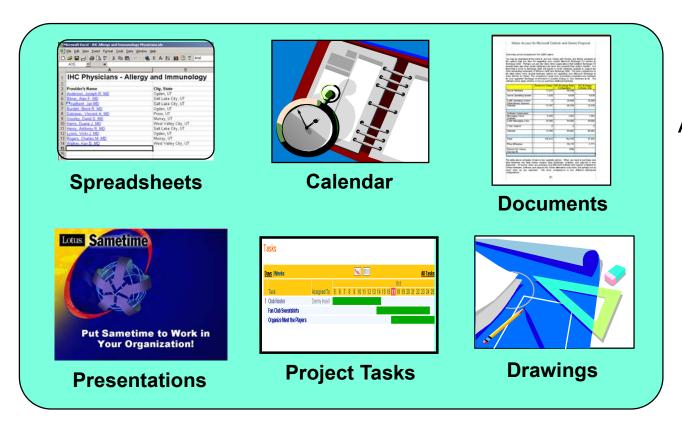

QuickPlace is for Team Collaboration

End Users Love It!

Administrators
Love It!

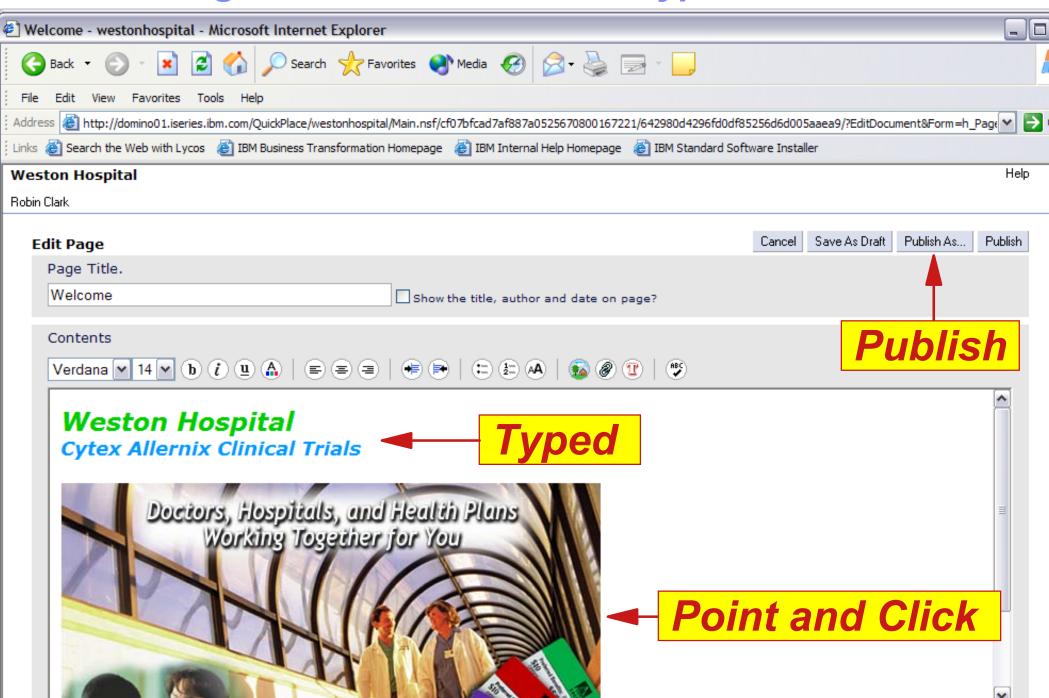

Lotus QuickPlace:

- Is a secure, self-service Web tool for team collaboration;
- Enables instant user-based creation of a secure workspace(s) on the Web;
- Embraces integrated, in-place instant messaging; and
- Is structured for immediate participation within/beyond the Enterprise.

Create Pages with Point, Click or Type then PUBLISH!

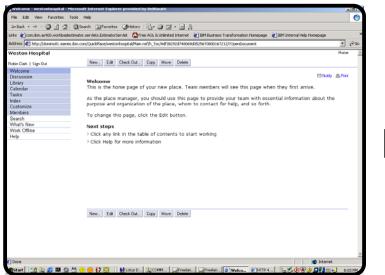

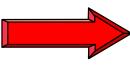

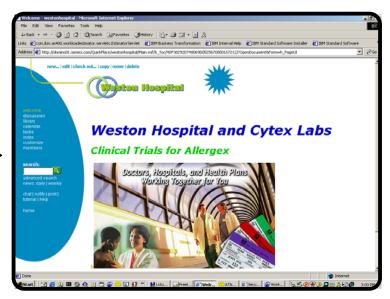

Customization of Your QuickPlace

The Design of your QuickPlace can be...

- Simple- Just use the Standard Theme
- Easy Changes To QuickPlace Name and Logo
- Selection of Theme Basic Themes or Theme that can be customized
- Very Sophisticated Look and Feel of your Corporate Website

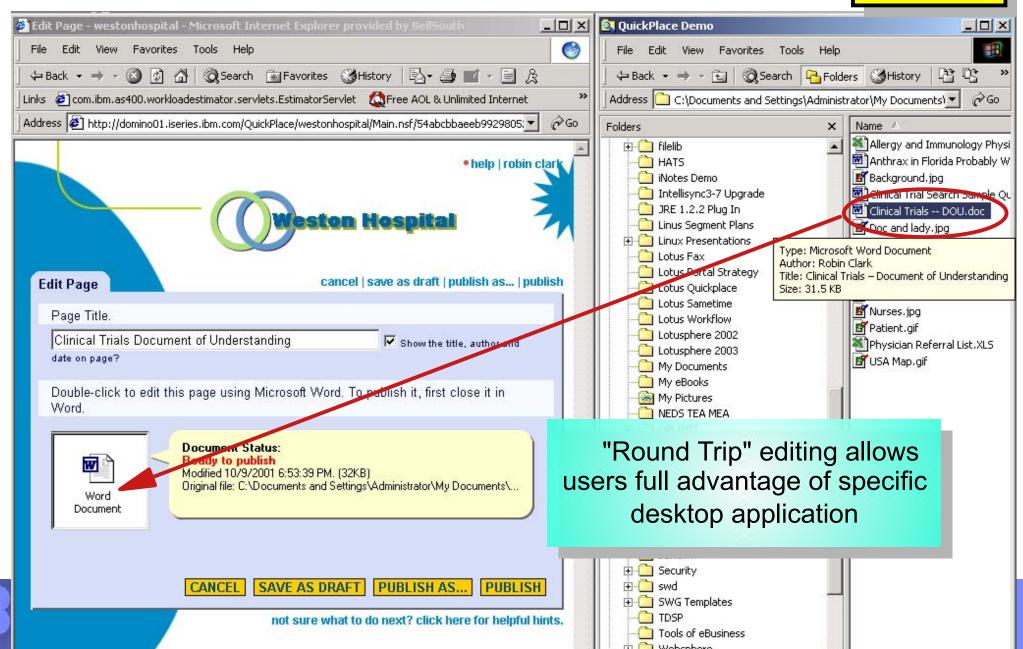

Add Content with MS Word, Excel, PowerPoint...

Microsoft Office Integration

Business Reasons for QuickPlace

- Reduced travel costs
- Faster decision-making
- Business process cycle shortened by efficient collaboration
- Increased productivity
- Demonstrates immediate ROI
- Leverages existing infrastructure for reduced TCO
- Integrates with web applications
- Continue work on- or off-line
- Security
- Quick deployment, minimal upkeep

3 in 1 Benchmark

- Objective: strong proof point of iSeries mixed workload message
- Configuration: iSeries for Domino (810-2469) 2-way with 8GB memory and 30 x 18 GB disk
- Results: During 6 hour run under rigorous benchmark conditions in Rochester, the performance team ran these workloads simultaneously:

Workload	Number of users	Average CPU utilization	Average response time
NotesBench: R6iNotes	500	26.7%	0.234 seconds
Sametime Instant Messaging	500	5.2%*	0.197 seconds
Sametime eMeeting (Web	5 users x 10		
conferencing)	meetings / hour		
WebSphere: Trade2	750	19.8%	0.223 seconds
Java OLTP: jBOB	500	22.3%	0.300 seconds
TOTAL		74.0%	

^{*}Sametime IM + eMeetings together used 5.2%

Tivoli Storage Manager

IBM Tivoli® Storage Manager Enterprise Edition

- Delivers integrated data protection for client backup and archive
- Centralized management, comprehensive policy based automation
- Complements Backup Recovery and Media Services for iSeries

DB2 UDB for iSeries

Ease of DB management

Typical DBA Tasks	DB2 UDB for iSeries		
Manage DASD Space Allocation	Automated		
Review Table Space Allocations & Extents	Automated		
Review & Balance Indexes	Automated		
Application Rebinding	Automated		
Maintain Database Integrity	Automated		
Update Database Statistics	Automated		
Synchronized OS & DB User Security	Automated		
Reload Data for Hardware & Software Upgrades	Automated		
Load Data into Data Base	Parallel Data Import/Export		
Build and Manage DB Backup & Recovery	iSeries Navigator		
Create & Review Indexes for Tables	iSeries Navigator		
Performance Analysis & Tuning (DB & System)	iSeries Navigator		
Create and Maintain DB Schema	iSeries Navigator & 3rd Party Tools (ERwin, PowerDesigner)		
Automated DB Performance Profiling	DBA Essentials		
Advanced DB Performance Analysis & Tuning	iSeries Navigator DB Essentials		
Data Replication & Consolidation	Multiple IBM & 3rd Party Products		

Ease of DB management

Self-configuring

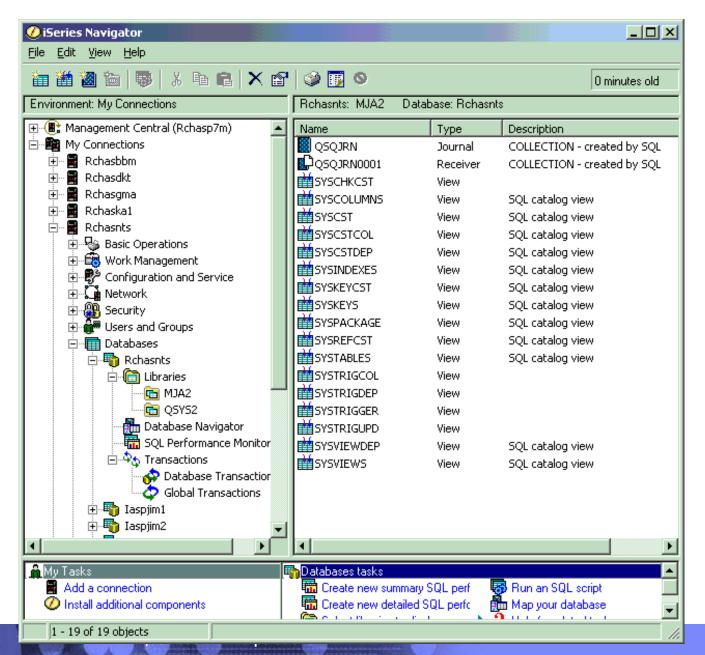

- No install/configuration of database necessary to start using it
- Automatic data striping and disk balancing
- Automatic object placement and additional storage allocation
- Automatic configuration of database for distributed access
- Automatic collection of database object relationships for analysis
- -Automatic start of database servers with TCP/IP startup
- Automatic self-balancing indexes
- National language defaults based on user defaults for character tagging, date/time formats, sorting, etc.

Self-protecting

- Object-based kernel
- Digital signing of objects to prevent unauthorized access/updates
- -Kerberos
- Resource management controlled by OS
- 128-bit data encryption and SSL
- C2 compliant object auditing
- Automatic enforcement of query user limits
- Automatic enforcement of user storage limits

iSeries Navigator

-V5R1

- Generate SQL
- Database Navigator
- Show Locked Objects for a Job
- Show Open Files for a Job
- Script Enhancements (Java)

-V5R2

- PRTSQLINF
- SQL Packages
- New Database Navigator
- Commitment control status
- Relational Database Directory
- Statistics
- Prompted SQL
- Additional lock status

-Future Enhancements

- RDB Alias
- WRKPFCST support
- Reorganize enhancements
- Sequences
- BINARY and VARBINARY
- Partitioning support
- Object type folders
- Additional Java deployment

DB2 UDB & XML

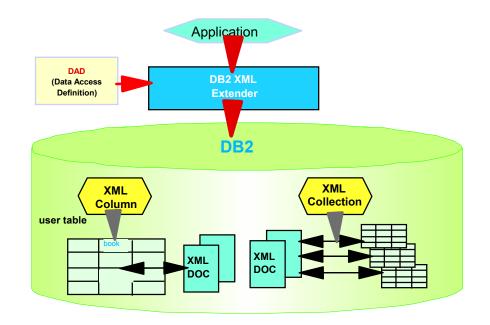

DB2 XML Extender - 5722-DE1

XML column

- Store and retrieve entire XML documents as DB2 column data
- XML data represented by XML column

XML collection

- Decompose XML document into a collection of relational tables
- Compose XML documents from a collection of relational tables

DB2 UDB and XML future enhancements

- Standard XML functions provided in the database engine
- XML query
- XML data type

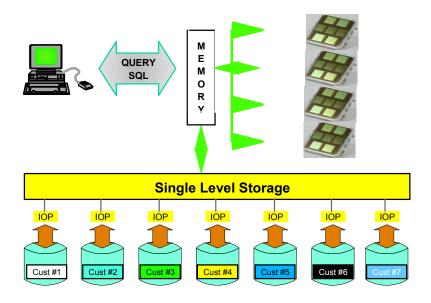

UDB for iSeries Scalability

- Single table 1 terabytes
- Single distributed table 32 terabytes
- Single index 1 terabyte
- Single distributed index 32 terabytes
- Symmetric MultiProcessing (SMP)
- Massively Parallel Processing (MPP)
- Restore of 2.6 terabytes of data in one hour on a 24-way SMP model 840
- Parallel table scan of 1 terabyte table (4.1 billion rows) in under 11 minutes SMP model 890 32-way (less than 50% CPU utilized)

iSeries DB SMP Parallelism

- Shared everything parallelism
- Partitioning not necessary
- Parallel Methods
 - Parallel table and index scan
 - Parallel hash join
 - Parallel hash group by
 - Parallel index build
 - Parallel data load
 - Parallel index ANDing/ORing of dynamic bit maps
 - Parallel index maintenance
 - Parallel Encoded Vector Index
 - Parallel I/O and parallel recovery

iSeries Windows 2000 Server® Integration

Solutions

- ► Extend OS/400 applications with Windows[™]
- Consolidate Windows Servers

Approach

- ► Leverage xSeries hardware
- Use Standard Windows Server software
- Add value to Windows servers

Choice of Offerings

- Server "under the covers" Integrated xSeries Server
- Direct Attach xSeries Server Integrated xSeries Adapter

Integrated xSeries Server

- Intel[®] 1.6 GHz Xeon[™] Processor
- Integrated 10/100 Mbps Ethernet Adapter
- Virtual disk resources
- Shares iSeries Tape, DVD, CD-ROM
- iSeries Models 270, 8xx
- Windows 2000/2003 Server® support

www.ibm.com/eserver/iseries/windowsintegration

Integrated xSeries Adapter

- Attaches the latest 2, 4, 8-way xSeries Servers*
 - ► x235, x255, x360, x440
- Virtual disk resources

- Shares iSeries Tape, DVD & CD-ROM
- iSeries Models 270, 8xx
- Windows 2000/2003 Server Support

www.ibm.com/eserver/iseries/windowsintegration www.ibm.com/eserver/xseries

^{*} Selected Open Bay models of x235, x255, x360, and x440

Integrated xSeries Adapter

PCI Card

- xSeries Server Proven Adapter
- 2 Slots
- 1 64 bit 66 MHz connection
- Slot location depends on model

Two HSL Connectors

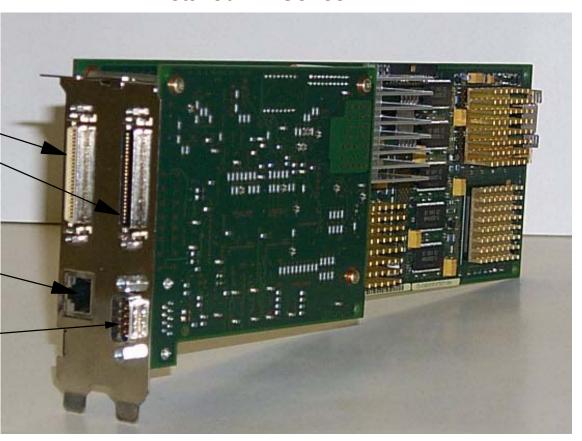

Uses same data interface as iSeries I/O tower

RS485 Connector -

Interface to xSeries Service Processor

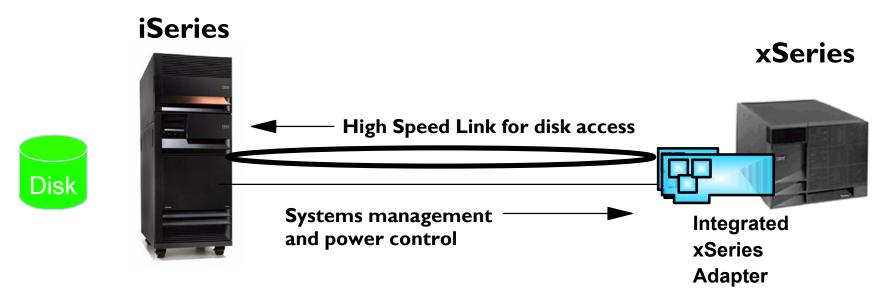

SPCN Connector

 Uses same system power and control interface as iSeries I/O tower Integrated xSeries Adapter Installed in xSeries

Integrated xSeries Adapter

IXA attaches n-way IBM xSeries servers to iSeries 8xx and 270

Supports x235,x255,x360,x440

Retains features and value of Integrated xSeries Server

- Uses OS/400 storage consolidation and systems management
- xSeries Server has processors, memory, ServerProven adapters but no disks

Complementary Application Support Server Consolidation

User Administration

Problem

Multiple system user management

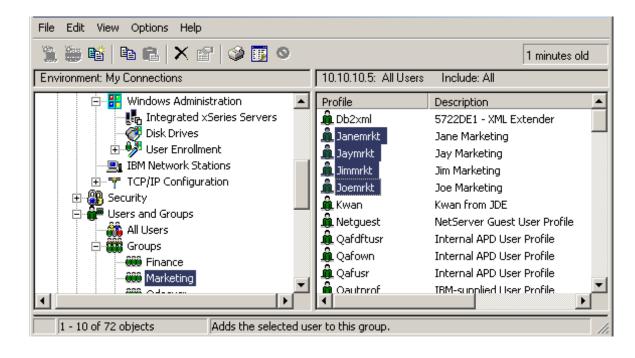

iSeries Solution

Adding OS/400 Users and Groups to Windows 2000 Server Domains and

Synchronizing Passwords

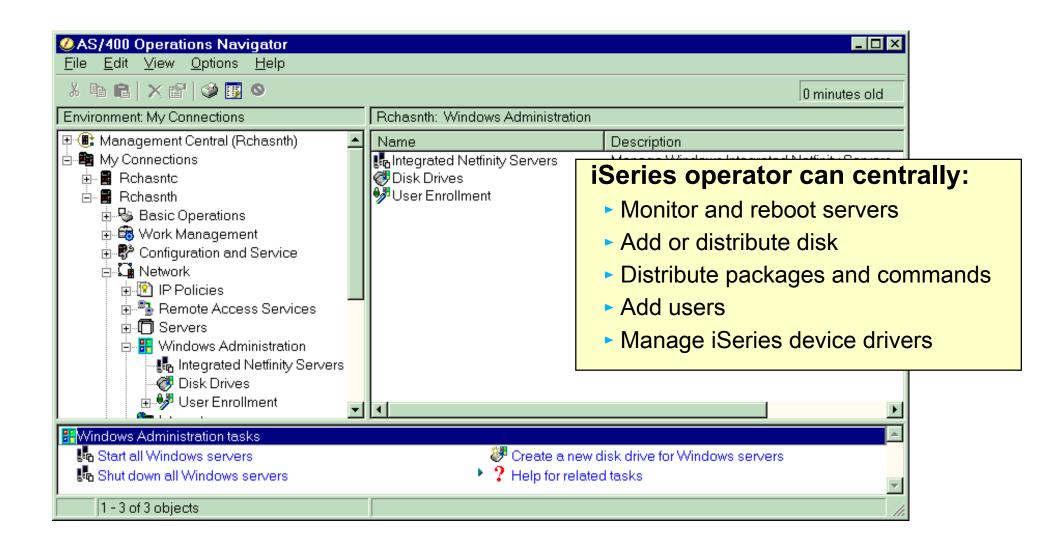

Benefit

Can reduce costs with integrated user management

Managing Remote Servers

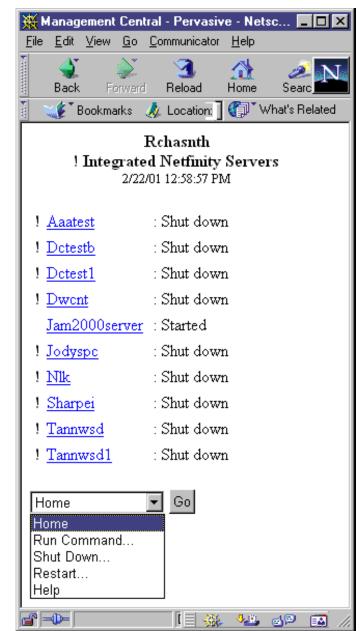

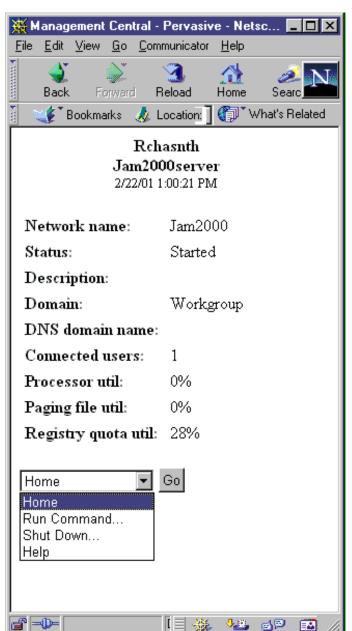

Management Central Pervasive

Manage Windows Servers from a Cell Phone or Personal Digital Assistant.

- View status of servers
- Startup/Shutdown servers
- Run Windows commands
- Monitor events

Virtual Networking

Problem

 Upgrading network infrastructure to support high-speed application communication is expensive in terms of time, resources and equipment

iSeries Solution

- Virtual Ethernet at OS/400 V5R2 provides 1 Gb Connections with no LAN Adapters/Switches
- Windows to Windows to OS/400 to Linux
- Up to 5 Connections per IXS / IXA

Benefit

- Extremely secure and reliable server communication over high-performance connections
- Can reduce network traffic and exposure to "sniffing"

Virtual Storage

Problem

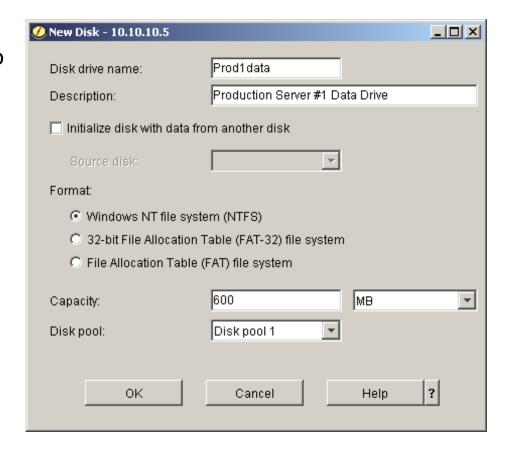

Storage management across the server farm

iSeries Solution

- Flexible Virtual Disks from 1 MB to 64 GB.
- Up to 2 TB per Windows server
- Hot add of iSeries Storage Space to Windows 2000 Server

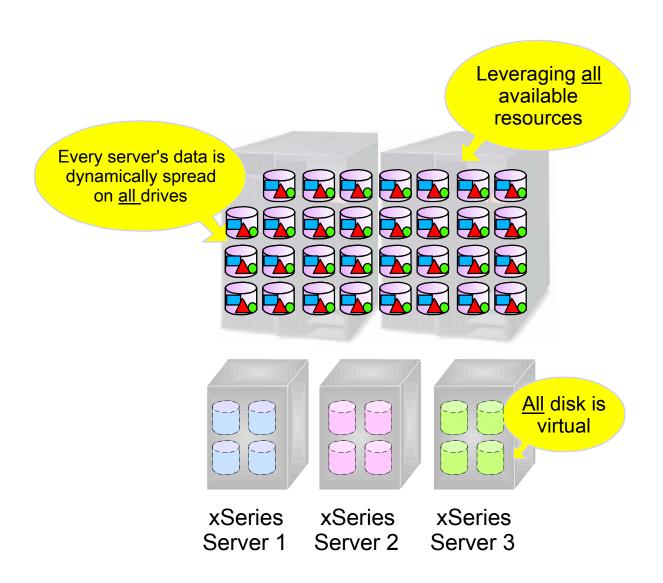

Benefit

 Can reduce costs with flexible, centralized storage management

iSeries Virtual Storage Advantages

Integrated Backup

Problem

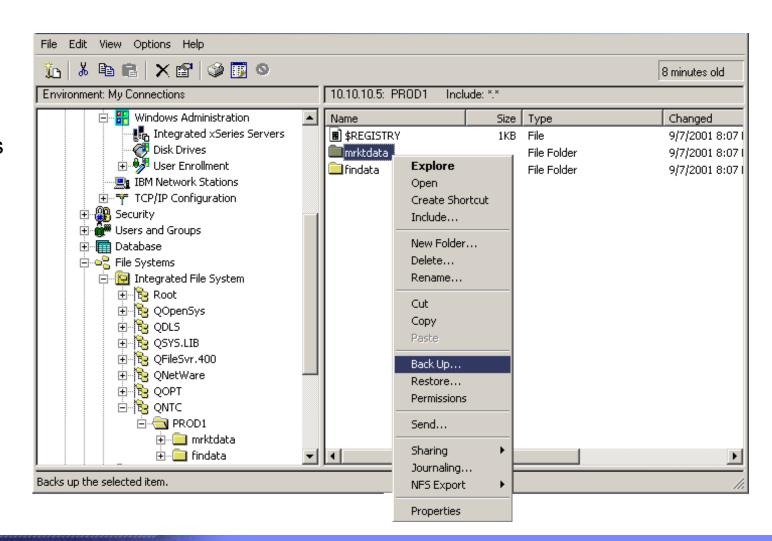

Managing and automating heterogeneous backups

iSeries Solution

 Save OS/400 and Windows storage spaces to iSeries tape drives

Benefit

 Can reduce costs by leveraging iSeries resources and skills

Availability

Problem

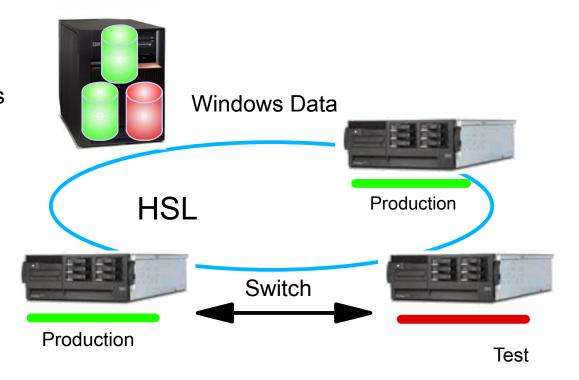

Providing an effective and efficient availability solution

iSeries Solution

 Hot Spare allows one xSeries server to provide a backup to several production servers

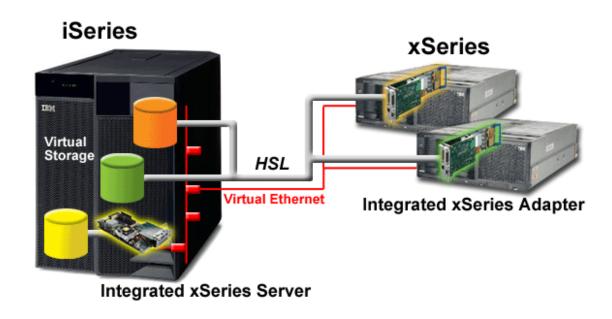

Benefit

 Efficient availability solution for planned or unplanned server outages

iSeries Adds Value to Windows 2000/2003 Servers

- Integrate server management and user administration
- Leverage investment in iSeries resources and operations
- Simplify server test and deployment using Virtual Storage Spaces
- Communicate securely over 1 Gbps Virtual Ethernet connections

Windows / Linux Server Consolidation on iSeries

3-Year ROI for Server Consolidation (per 100 users)							
		Years					
Annual cost savings		\$	180,909				
Net Present Value (NPV)		\$	302,052				
Total investment		\$	141,227				
ROI = NPV/Investment			213.9%				
Payback = (Investment/ First year cash flow)			261 days				
Discount Rate			12%				

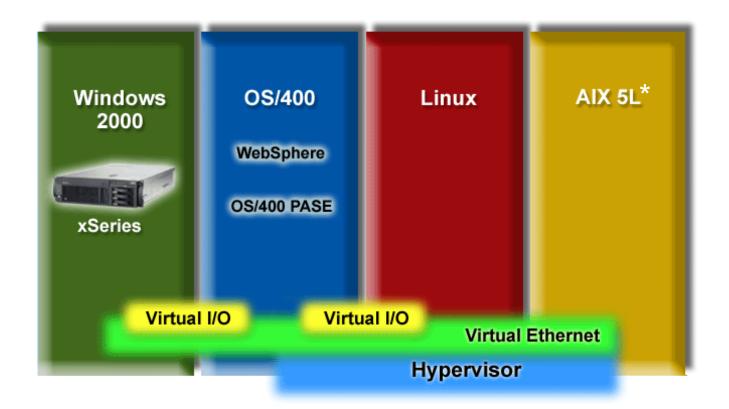

- IDC analysis of six SMB customers who consolidated x86 (Intel) workloads on iSeries in the following ways:
 - Deployed Windows on Integrated xSeries Servers/Adapters
 - Linux in logical partitions (LPARs)
- "The iSeries solutions, including those that leveraged xSeries co-processors, reduced the combined downtime associated with Windows and Linux servers by more than 90% compared to x86 server environments running Windows and Linux."
- The full report is available on the web: www.ibm.com/servers/eserver/iseries/conslt/idc_roi/

IDC White Paper July 2003: The ROI of Windows & Linux Server Consolidation on IBM eServer iSeries:

Analysis and Case Studies in Small and Medium Businesses

iSeries Server Consolidation

iSeries offers application flexibility
iSeries innovative technology can lower cost of management
iSeries makes enterprise IT management simple

*Statement of Direction: This presentation contains IBM plans and directions. Such plans are subject to change without notice.

Customer Success Stories

- Wesco Aircraft
- Huhtamaki
- IU Medical Group Primary Care
- Banco do Brasil
- Coleman Cable
- Chick's Sporting Goods

- Marshall Erdman & Associates
- Associated Grocers of New England
- Sanistaal A/S
- Mediocredito Fondiario Centroitalia
- Munce's Superior, Inc.

www.ibm.com/eserver/iseries/windowsintegration Click on "Case Studies"

Huhtamaki

"Before consolidating on the iSeries and xSeries we required at least three dedicated administrators to run our servers...now because of its ease of use, we need only two administrators to run the new system."

Brendan Carlton
Systems Administrator,

Huhtamaki

"One of the things I enjoy most about the IBM iSeries and xSeries integration is that I have been able to take a painstaking process of building a brand new Wintel server from scratch and getting it deployed from approximately a three to four day procedure down to 20 minutes."

Indiana University Medical Group

Background

A practice of 100 faculty physicians at the Indiana University (IU) School of Medicine, IU Medical Group-Primary Care offers health care packages for corporations as well as services for individual patients.

Objectives

- Growing server demands
- Growing storage demands for data warehousing, file serving, e-mail and Web applications
- Consolidate 8 PC servers

Solution

- iSeries
- 4 Integrated xSeries Servers
- 2 xSeries attached to iSeries with IXA

Benefits

- Much faster backups days to 1 hour
- Consolidated systems management
- Simplified adding capacity

Why Linux

Drivers of Linux Deployment

- Initial Price
- Reliability/Availability
- Issues with Microsoft Licensing
- Ongoing Cost of Operations
- Availability of Applications
- Open Source Model
- Linux features and functions
- Reduce dependence on Current OS vendors

*Source: TechRepublic survey, 2001

Cost of Computing - leveraging Linux to reduce your overhead

	Servers	Storage	Software: Middleware	Software: Applications	Business Innovation Services	Integrated Technology Services
Ratios	\$1	\$0.59	\$1.94	\$2.69	\$4.83	\$1.99

Source: Assessing the Marketplace for Linux, IDC, 2-4-03

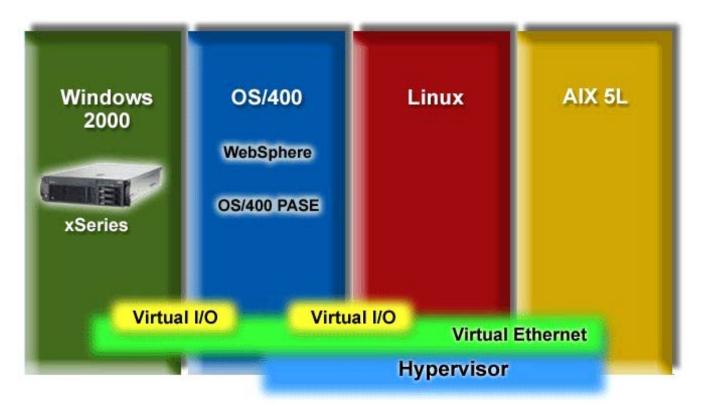

IT Consolidation Drivers

- Reduce costs and dramatically improve TCO
- Improve service levels, simplify systems management and enhance resources utilization
- Establish a foundation for future growth around new applications
- Enable data sharing, provides interoperability
- •Increase business continuity and recoverability

iSeries Server Convergence Strategy

Provide application flexibility to adapt to changing business needs

Deliver innovative technology to reduce operation costs

Simplify enterprise IT management

iSeries Logical Partitioning

Mainframe Class Partitioning

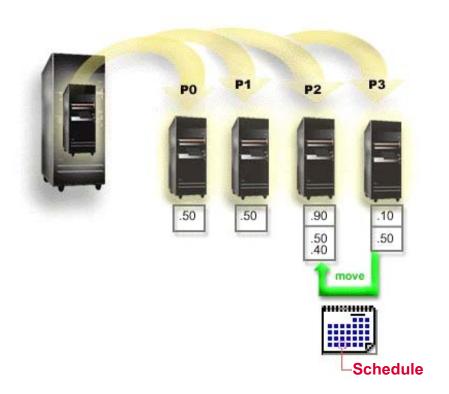

- ► Shared Processor
- ► Dynamic Resource Movement
- ► Virtual Ethernet
- ► Heterogenous OS Support
- Uni-processor partitioning
- ► Graphical management

Customer Benefits

- ► Quick consolidations
- ► Run multiple, yet independent workloads
- ► Maximize I/T investments
- ► Implement High Availability Solutions

Success

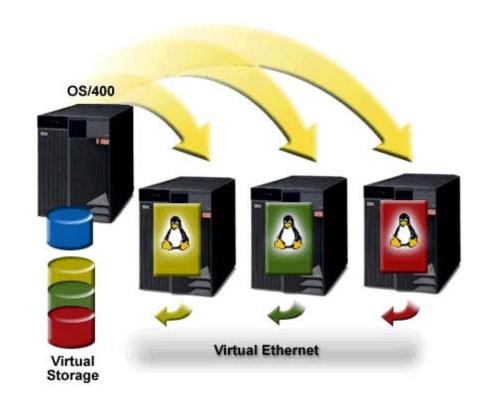

- ► 3000+ LPAR Installations -60% on 1-4 processor servers
- ►48% of i840s use LPAR

Linux on iSeries Value Proposition

- On Demand Virtualization
 - ► Up to 10 partitions per processor
 - ► On Demand Capacity
 - ► Virtual Storage, Ethernet, I/O
 - ► Independant Resource Movement
- Integration
 - ► Linux and OS/400 Applications
 - ► Server Management
 - **►** Consolidated Storage Management
- •64-bit powerPC

✓ Quick consolidations

✓ Maximize IT investment

✓ Run multiple, yet independent workloads

✓ Extend iSeries advantages to Linux

Linux Sofware Savings: MS vs Linux

MS Windows 2000 advanced Server (includes IIS HTTP server)	\$3,999	Comes w/ 25 Client Access Liscense (CALs). Additional CALs are \$67 each.	SuSE RedHat	•priced per CPU starting @\$1,269 Standard \$3,250 ** Premium \$4,250	All Linux Distributions include - file&print - DNS - FTP - Apache - POP mail - etc WITH NO CALs
Microsoft Exchange Server 2000	\$1,299	Comes w/ 5 CALs. Additional CALs are \$67 each	Bynari	Insight Server & 250 User Pack - \$6,000 Insight Server & 1500 User Pack 31,500	Fully functional alternative to Exchange!!
Microsoft Office Standard	\$479	Priced per users	Open Office	no-charge download	Linux Desktop Office solution

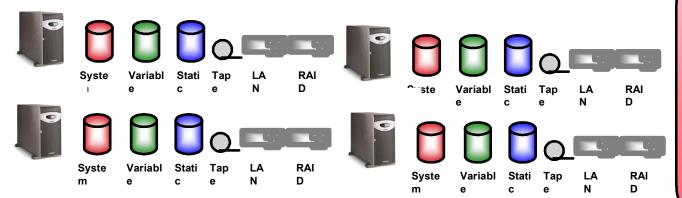

**RedHat has a 1Q03 promotion for \$1,050

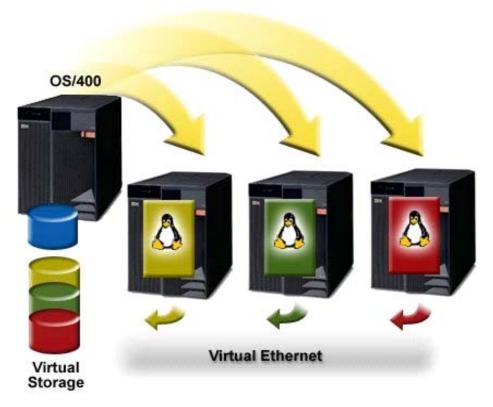

http://www.cyber.com.au/cyber/about/linux_vs_windows_pricing_comparison.pdf

LPAR, Virtual I/O, and Shared Storage Spaces lowers TCO

Server Farm

Intel solutions

- LAN, RAID and TAPE device for each server
- -memory, disk, and CPU is allocated to each server
- each server has to have its own backup and recovery solution
- Do you have a DR plan for this?

iSeries solutions

- Shared resources Fewer disk drives, tape drives and LAN adapters can be used
- Reduce disk administration iSeries Storage Management
- Improve performance with more disk arms
- Consolidated Backup of OS/400 and Linux (now that's DR!!)
- Resources can easily be moved to where they are needed

Linux and LPAR V5R2

Shared Processor Support*

- Linux shares processors with other OS/400 and Linux partitions
 - Up to 10 partitions per processor
 - -Minimum 0.10 processor in a partition

Dynamic Resource Movement

- ► Shared Processor Units*
 - -Minimum processor movement: 0.01
 - –Moved to/from Linux or OS/400 V5R2 partitions
 - -Immediate, scheduled, or under program control
- ► Virtual storage spaces
 - -Added to Linux partitions

Independent Resource Movement

- ► Processor, Memory, and I/O
- ► Dedicated Processors, Memory and I/O
 - Requires the Linux partition to be stopped and restarted
 - -Minimum memory movement: 1 MB

OS/400 V5R2 Primary Partition

# of Processors	Maximum # of	
in Server	Linux Partitions*	
1	9	
2	19	
3	29	
4 and up	31	

^{*} Shared processor is supported on iSeries servers with SStar and Power4 processors. Servers with IStar processors require a dedicated processor for Linux

Linux: What is New

Support for new servers

- ► Shared processor, Dynamic movement
- ► Virtual Storage and Ethernet
- Capacity Upgrade on Demand

Enhanced Direct I/O Support

- ► New 10/100/1000 Ethernet Adapter
- ► New Storage IOAs
- ► Raid 5 Support for Storage IOAs

Linux Processor Activation

- ► Included in Enterprise Package for i870 and i890
- Extra Processor Activation for Linux

Education Vouchers

- ► Included in Enterprise Package for i825, i870, i890
- ► Valid for iSeries on Linux Implementation (Course Code S6226)

Service Vouchers

- ► Included in Enterprise Package for i825, i870, i890
- ► Valid for iSeries Linux Integration QuickStart

OS/400 V5R2 Primary Partition

	# of Processors	Max Number of Linux Partitions
i800	1	9
i810	1-2	9 -19
i825	3 -> 6	29 - 31
i870	8 ->12	31
i890	12 ->32	31

Linux I/O Flexibility

SCSI Disk

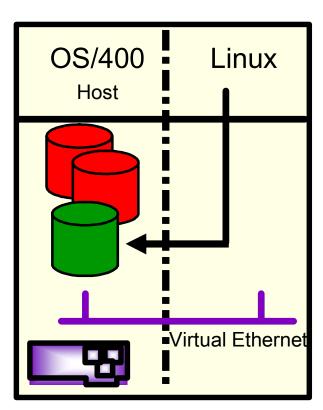

Fibre ESS

►CD, DVD

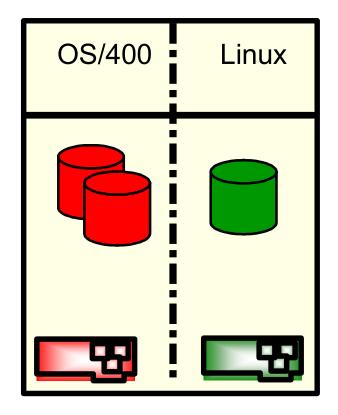

Tape

LAN

Virtual I/O

Direct I/O

- SCSI Disk
- ▶ Fibre ESS
- Tape
- **LAN**
- **WAN**
- ►CD, DVD

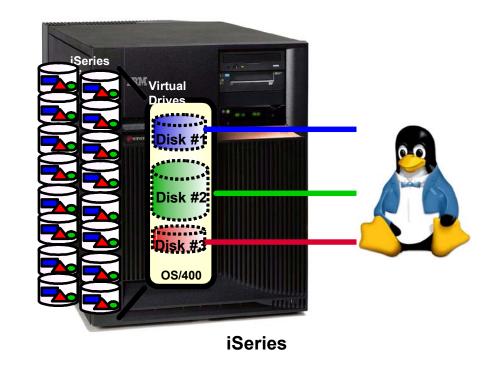

- Leverage iSeries resources
- OS/400 management

- Dedicated resources
- Linux management

Storage Virtualization

- Storage spaces created from OS/400
 - ►1 MB to 64 GB each
 - ► Up to 20 per Linux partition
- Dynamically added to Linux
 - Requires V5R2 Primary and Host
- Shared Storage
 - Storage spaces can be read from multiple partitions

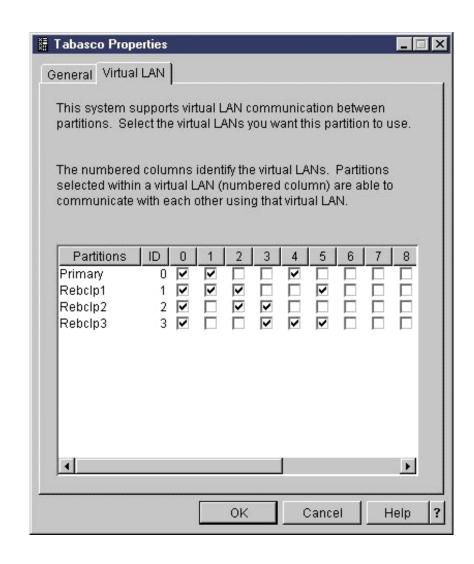

- Enables Linux to Leverage Advanced iSeries Storage Architecture
 - Data automatically spread and protected
 - ► More disk arms for better performance
 - ► Consolidated Backup of OS/400 and Linux
 - ► Flexible Storage Management
 - ► Easy setup of multiple Linux environments

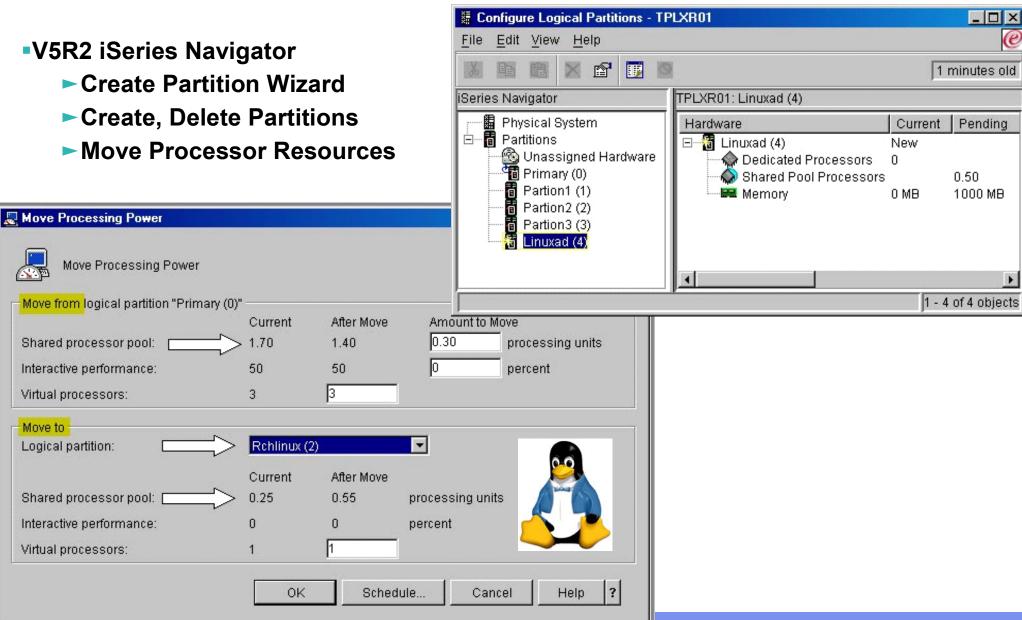

Virtual Ethernet

- •For fast, secure, reliable application communication between partitions
- Up to 16 high speed TCP/IP connections between partitions
 - Emulates 1 Gb Ethernet Adapters
 - Selective communications paths between partitions
 - ► Utilizes iSeries memory bus
 - ► No additional hardware required
- Supports communications between
 - ► OS/400 to OS/400
 - Linux to OS/400
 - ► Linux to Linux
 - Linux to Windows
- Included with OS/400 V5R1 and V5R2

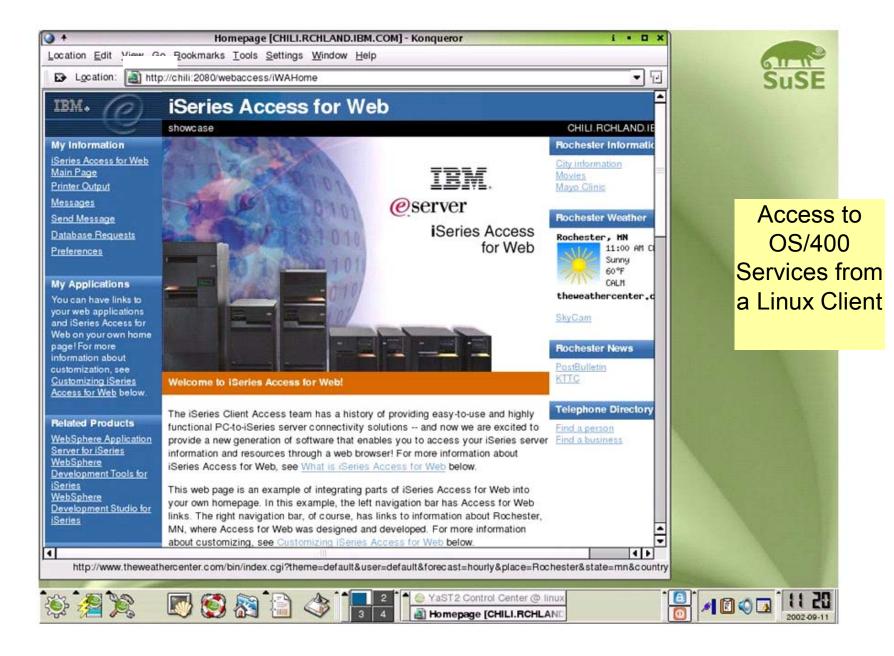

Linux Partition Management

iSeries Access for Web

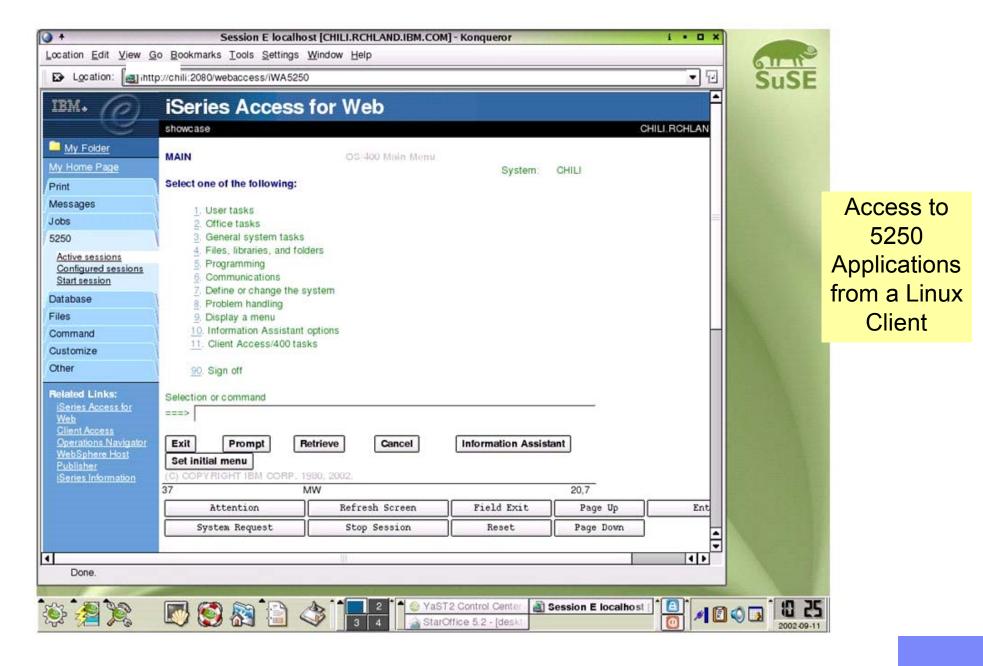

iSeries Access for Web

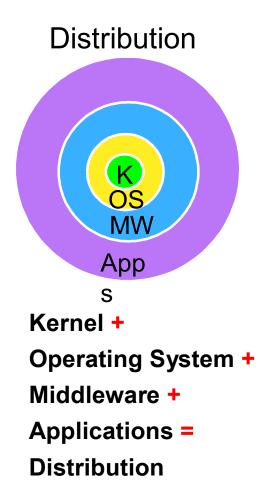

Linux Distributors

- Use PowerPC Linux kernel
- Add 100s of Operating System, Middleware, and Application components
- Add iSeries integration features
- Create Installation Documentation

Functions included in Typical Distribution

Functions	Key Middleware and Applications
Web Serving	Apache, Tomcat
Mail Server	SMTP(postfix), POP3, IMAP, Sendmail MTA
Print Server	Samba
File Server	Samba, NFS
Proxy Server	Squid
Security	NetFilter firewall, VPN, OpenSSL
Name server	DNS, DHCP, WINS, FTP
Directory	OpenLDAP
Database	MySQL, Postgres
Languages	C, C++, PHP, Pearl
Desktop	KDE, Gnome

The things that most people are using Linux for come with the distribution

Linux Distributions for iSeries

SuSE

► SuSE Linux Enterprise Server 8

- -64-bit kernel, 64 and 32-bit applications
 - Available December, 2002
- ► SuSE Linux Enterprise Server 7
 - -64-bit kernel, 32-bit applications
 - Available January, 2002

- -64-bit kernel, 64 and 32-bit applications
 - Planned Available March 2003
- Turbolinux Server 7 for iSeries
 - -64-bit kernel, 32-bit applications
 - Available, April 2002

Red Hat

- ► Red Hat Linux 7.1 for iSeries (64-bit)
 - -64-bit kernel, 32-bit applications
 - Available, December 2002
- ▶ Red Hat Linux 7.1 for iSeries
 - -32-bit kernel
 - Available February 2002

Linux Distribution Pricing

- Suse sles 8
 - ► Subscription based on iSeries Model per year
 - -Media 4 CDs
 - •3 United Linux, 1 SuSE
 - -Annual Support
 - SuSE Support via email
 - Installation, usage, problem reporting
 - Updates and Fixes through SuSE Maintenance Web
- Red Hat Linux 7.1 (64-bit)
 - ► Subscription per server per year
 - -Standard \$5,250
 - •Red Hat Support (12x5), 4 hour response
 - Installation, Usage, Problem Reporting
 - Errata, bug fixes and updates through Red Hat Network
 - -Premium \$6,950
 - •Red Hat Support (24x7), 1 hour response
 - Errata, bug fixes and updates through Red Hat Network
- Turbolinux TLES 8
 - ► To be announced

iSeries	SLES 8 List Price
Model	
i800, i810,	\$1109 per system
i270	(\$149 for media kit and \$960 for maintenance)
i825, i820	\$1349 list price per 4 CPU
	block
	(\$149 for media kit and \$1200 for maintenance)
i870, i890,	\$2309 list price per 4 CPU
i830, i840	block
.555, .515	(\$149 for mdeia kit and \$2160 for
	maintenance)

IBM Middleware

- ■Java_{тм}
 - ► IBM Developer Kit for Linux, Java 2 Technology Edition
 - -1.3.1 Available for download at http://www6.software.ibm.com/dl/dklx130/dklx130-p
 - -Certified for Red Hat 7.1 for iSeries (64-bit) and SLES 8
 - ► iSeries Toolbox for Java provides access to DB2 UDB and OS/400 Services
- •DB2 UDB for Linux
 - ► Technology Preview started 1st quarter 2002
 - ► Statement of Direction April 29, 2002
 - ► Beta of DB2 UDB 8 January, 2003
- WebSphere Application Server for Linux
 - ► Technology Preview started 1st quarter 2002
 - ► Statement of Direction April 29, 2002

Application Sources

- Linux Distributions
 - **►** Contain popular Open Source Applications
 - -Apache, Samba, Sendmail MTA, Netfiler
- Open Source Applications
 - Download and compile for PowerPC
 - -Tomcat for Java Servlets and Java Server Pages http://java.sun.com/products/jsp/tomcat/
 - -OpenOffice Productivity Suite www.openoffice.org
- PowerPC Linux applications
 - ► Will run out of the box
 - ►iSeries, pSeries, Apple PowerBook,,,
- Intel Linux applications
 - Need to be compiled for PowerPC
- ISVs
 - ► PartnerWorld is working with ISVs to enhance iSeries application portfolio

Key Solutions

Included with Distributions

- Samba file server
- Apache web server
- Squid proxy server
- **-DNS/DHCP**
- MySQL database

-

Open Source

- Tomcat web application server
- OpenOffice office suite
- Netfilter firewall

Morehttp://www-1.ibm.com/servers/eserver/iseries/linux/apps.html

ISVs

Industry Solutions

- ▶eOne Commerce
- Assimilation Technologies Transportation Scheduling
- -MAPICS ERP
- Dimensional Insight BI
- ▶abas ERP
- **ACCPAC**
- MeritTrax Food Industry Supply Chain

ISVInfrastructure Solutions

- Symantec Enterprise Firewall
- Bynari mail server
- Dimensional Insight BI
- Vision Solutions HA
- Lakeview Technologies HA

Linux on iSeries Solutions

Consolidation

- ▶ Replace Windows or Linux Infrastructure servers
 - File and Print ServingDHCP
 - •Firewall •e-mail
 - DNS
- Run multiple Linux servers in partitions
- Consolidation Lowers Cost of Computing

Integration

- Extend (Modernization) OS/400 applications with Linux eBusiness Applications
- Run Linux applications on same server as OS/400
- Integration Lowers Cost of Computing

Application Flexibility

- Leverage Linux LOB application portfolio
- Run Linux applications on iSeries
- Flexibility Lowers Cost of Computing

Lotus and SmartSuite are trademarks of Lotus Development Corporation and/or IBM Corporation in the United States, other countries, or both.

Instruction: For a complete list of Lotus/IBM trademarks, see www.lotus.com/lotus/information.nsf/firstpages/copyright and edit the above statements to coincide with

MMX, Pentium, and ProShare are trademarks or registered trademarks of Intel Corporation in the United States, other countries, or both.

Microsoft and Windows NT are registered trademarks of Microsoft Corporation in the United States, other countries, or both.

Java and all Java-based trademarks are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both. SET and the SET Logo are trademarks owned by SET Secure Electronic Transaction LLC.

C-bus is a trademark of Corollary, Inc. in the United States, other countries, or both.

UNIX is a registered trademark of The Open Group in the United States and other countries.

Other company, product or service names may be trademarks or service marks of others.

Information is provided "AS IS" without warranty of any kind.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information in this presentation concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only. Contact your local IBM office or IBM authorized reseller for the full text of the specific Statement of Direction.

Some information in this presentation addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Photographs shown are of engineering prototypes. Changes may be incorporated in production models.
