

i have control. i have a new IBM System i5.™

i control complexity. *The one of a kind System i5 is server, storage, software, database and security, all-in-one.*

i control reliability. *System i5's legendary reliability helps keep you up and running so you can focus on your business, not your I.T.*

i control flexibility. *It's uniquely customizable platform lets you run multiple operating systems (Windows*, Linux, AIX 5L and i5/OS) simultaneously.*

i control my I.T. destiny. *IBM Systems are a range of innovative servers and storage – like the System i5 – designed to make your infrastructure and your life simpler.*
