IBM Advanced Job Scheduler for AS/400
(Course Number S6220)

This introductory class is designed to assist you in understanding the concepts of IBM Advanced Job Scheduler (IAJS) and becoming familiar with its capabilities.

Job Scheduler is designed to allow unattended operations, automate operator functions, and control report distribution.

Learn how to implement, manage, and use the functions and features of IAJS.

Duration: 2 1/2 days

Enrollment:
