

IBM zLUG Meeting

Mike Revitt / Paul Casey

22nd September 2009

Hatfield Solution Centre

- Largest of it's kind in EMEA
- Multi -vendor facility
- We train other Oracle Partners
- System z Briefing Sessions*
- DR Workload Profiling
- Setting Database Strategy for Virgin Media

The Solutions Centre is the closest we could get to conducting realistic tests that did not impact real systems and processes. If we had attempted the proof of concept in-house, the risks and costs would have been much higher.

Eoghan Doyle,
UK Technical Services Director,
Willis

Database Services
