

Lotus Notes E-mail Archiving The Challenge and a Solution

Robert Rosen rosenr@mail.nih.gov

Millie Jernigan jernigam@mail.nih.gov

National Institute of Arthritis and Musculoskeletal
and Skin Diseases - NIH

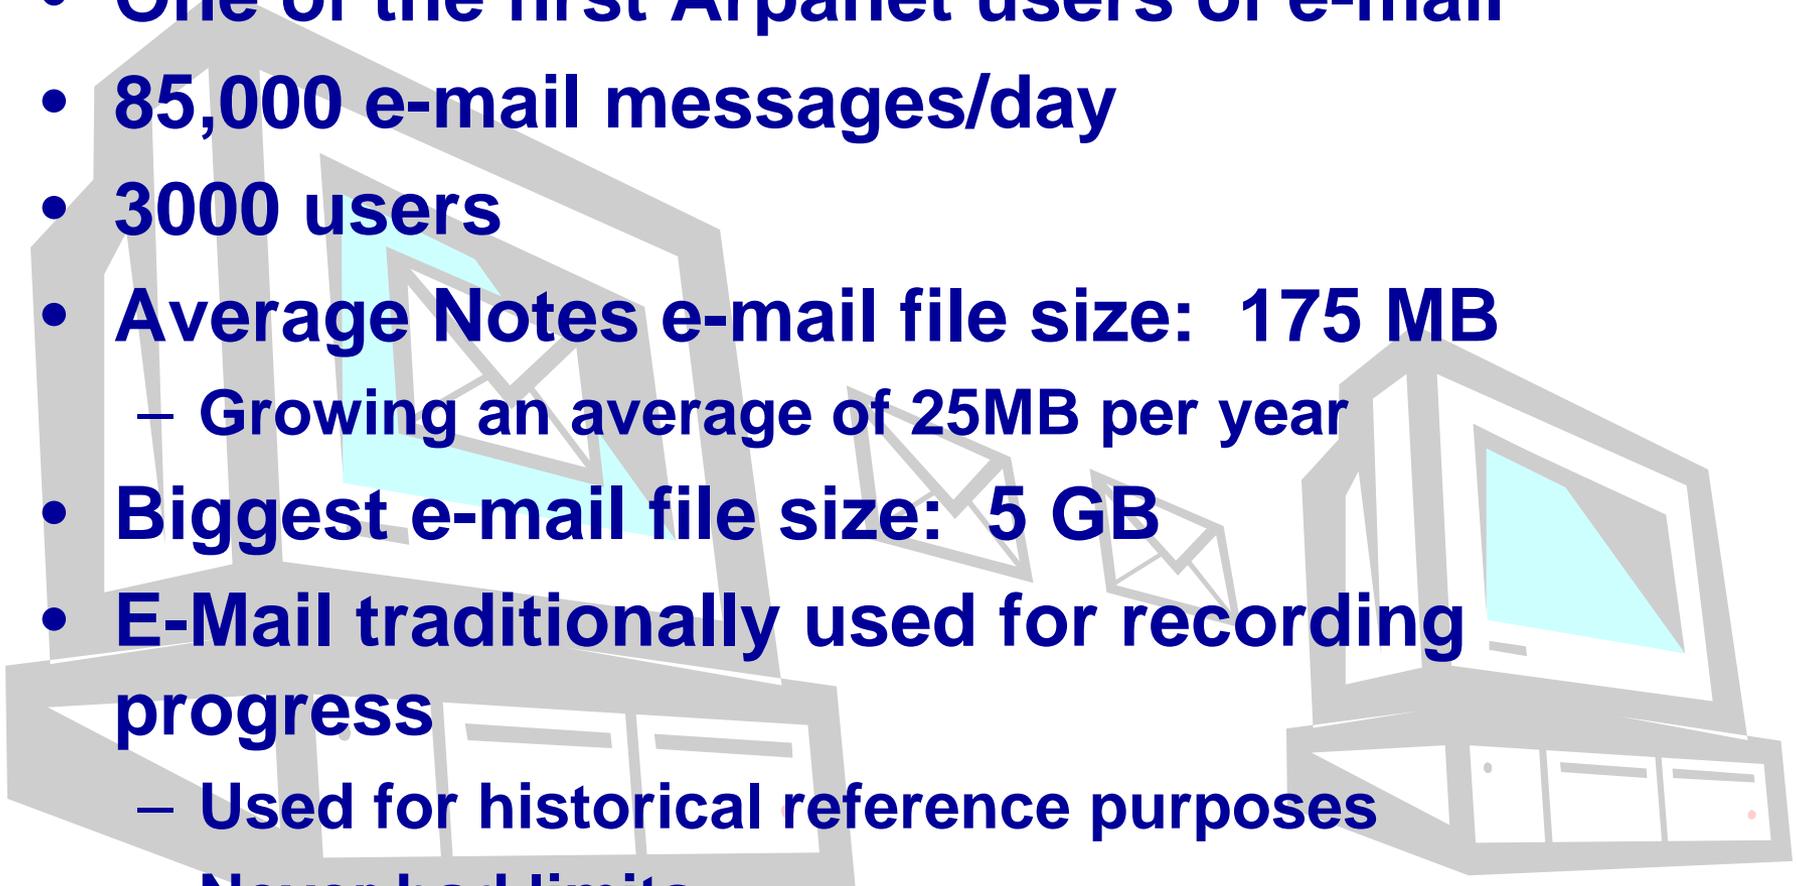

Session 8616

- **The lab addresses the key military technologies for Army and Department of Defense programs.**
- **E-Mail is a critical tool used in the operation of the lab and the conduct of research and development**

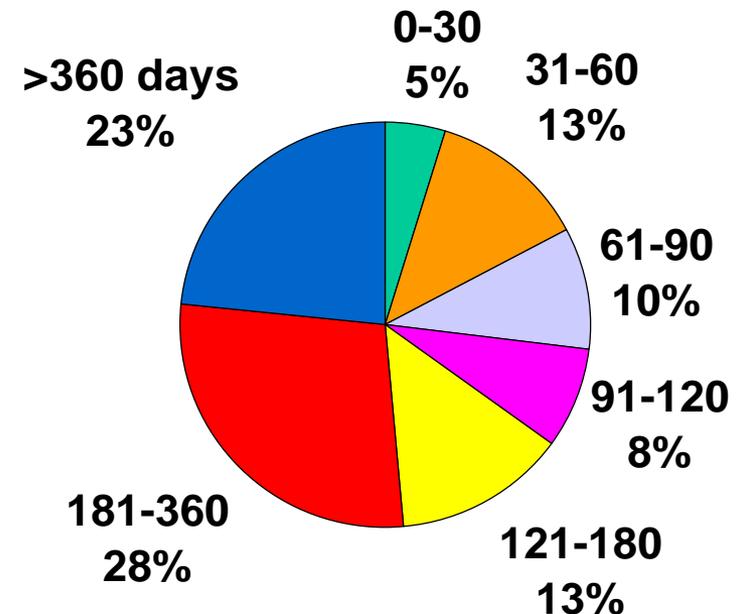

The E-Mail Challenge

- One of the first Arpanet users of e-mail
- 85,000 e-mail messages/day
- 3000 users
- Average Notes e-mail file size: 175 MB
 - Growing an average of 25MB per year
- Biggest e-mail file size: 5 GB
- E-Mail traditionally used for recording progress
 - Used for historical reference purposes
 - Never had limits

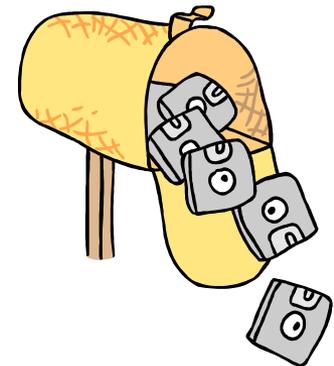

- 14 e-mail servers (and cluster backups)
- Servers at 98% storage capacity
- Requests to delete unneeded e-mail ineffective
- 1/2 mail >6 months old

- **E-mail 0-3 months on server**
- **E-mail 3-15 months on MSS**
 - E-mail stub left behind
 - Click on stub retrieves e-mail
- **E-mail 15-60 months on LTO tape**
 - E-mail stub left behind
 - Click on stub retrieves e-mail
- **E-mail > 5 years deleted**

How to do it?

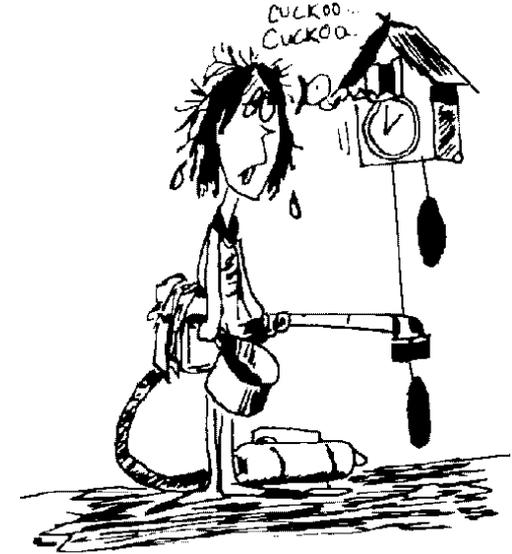

Common Store for Lotus Domino (CSLD)

- **Multipart Product**
 - **Common Store identifies and serves up documents from Domino into Content Manager**
 - **Content Manager stores the archived document**
 - **Content Manager maintains the database index of archived documents in DB2**
 - **Tivoli software manages DB2/docs on tape**

- **Turn Key?**
 - **NO!!**
- **What do you need**
 - **Tailoring**
 - **Notes developer skills**
 - **Optimizing**
 - **CSLD, Content Manager, DB2, TSM and hardware skills**

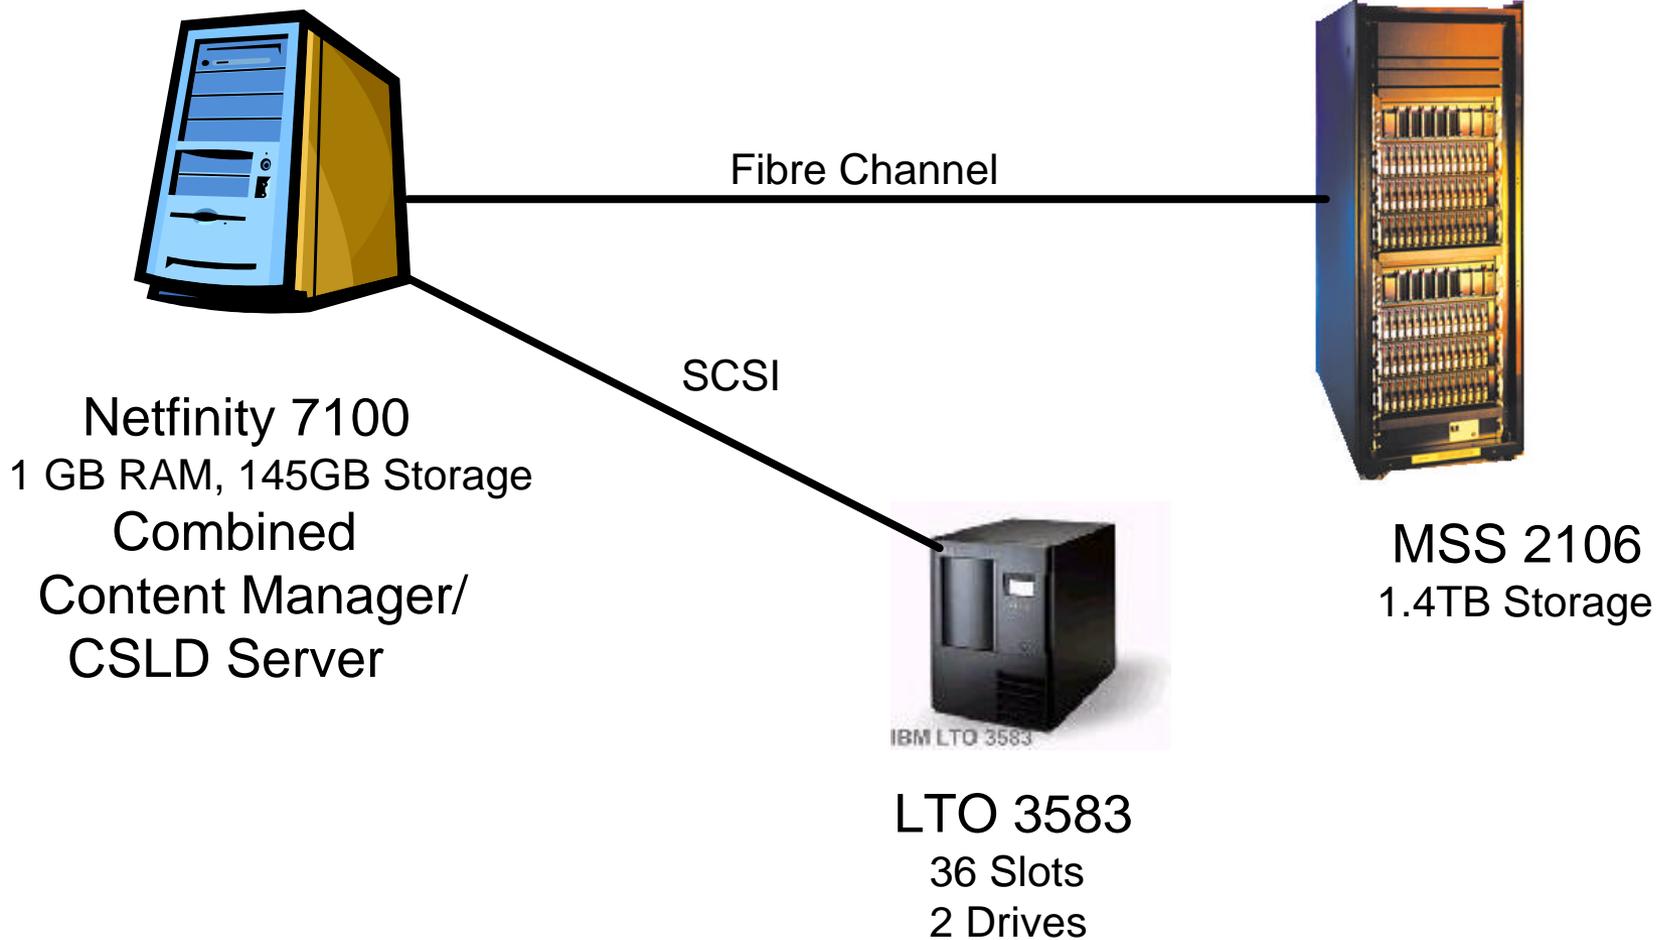

❖ **Specifics**

- **Installing MSS and LTO along with CSLD**
- **Installing Content Manager server (Netfinity)**

The screenshot shows a Lotus Notes email client window titled "> Hand Receipt Holders with CIRD - Lotus Notes". The window has a menu bar (File, Edit, View, Create, Actions, Attachment, Help) and a toolbar with various icons. The email header shows it is from Cindy Jones, dated 04/21/2001 01:18 PM. The recipient list (To) includes Nathan Boyer/arl@arl, and the carbon copy list (cc) includes Michael Quigg/arl@arl, Dann Barrick/arl@arl, Cal Friederich/arl@arl, Connie Lucas/arl@arl, and Cindy. The subject is "Hand Receipt Holders with CIRD". The body of the email contains the following text:

The attached contains the file you requested.

The only hand receipt that will not be scanned is the one located at West Point. We are still waiting for action from the gaining hand receipt holder.

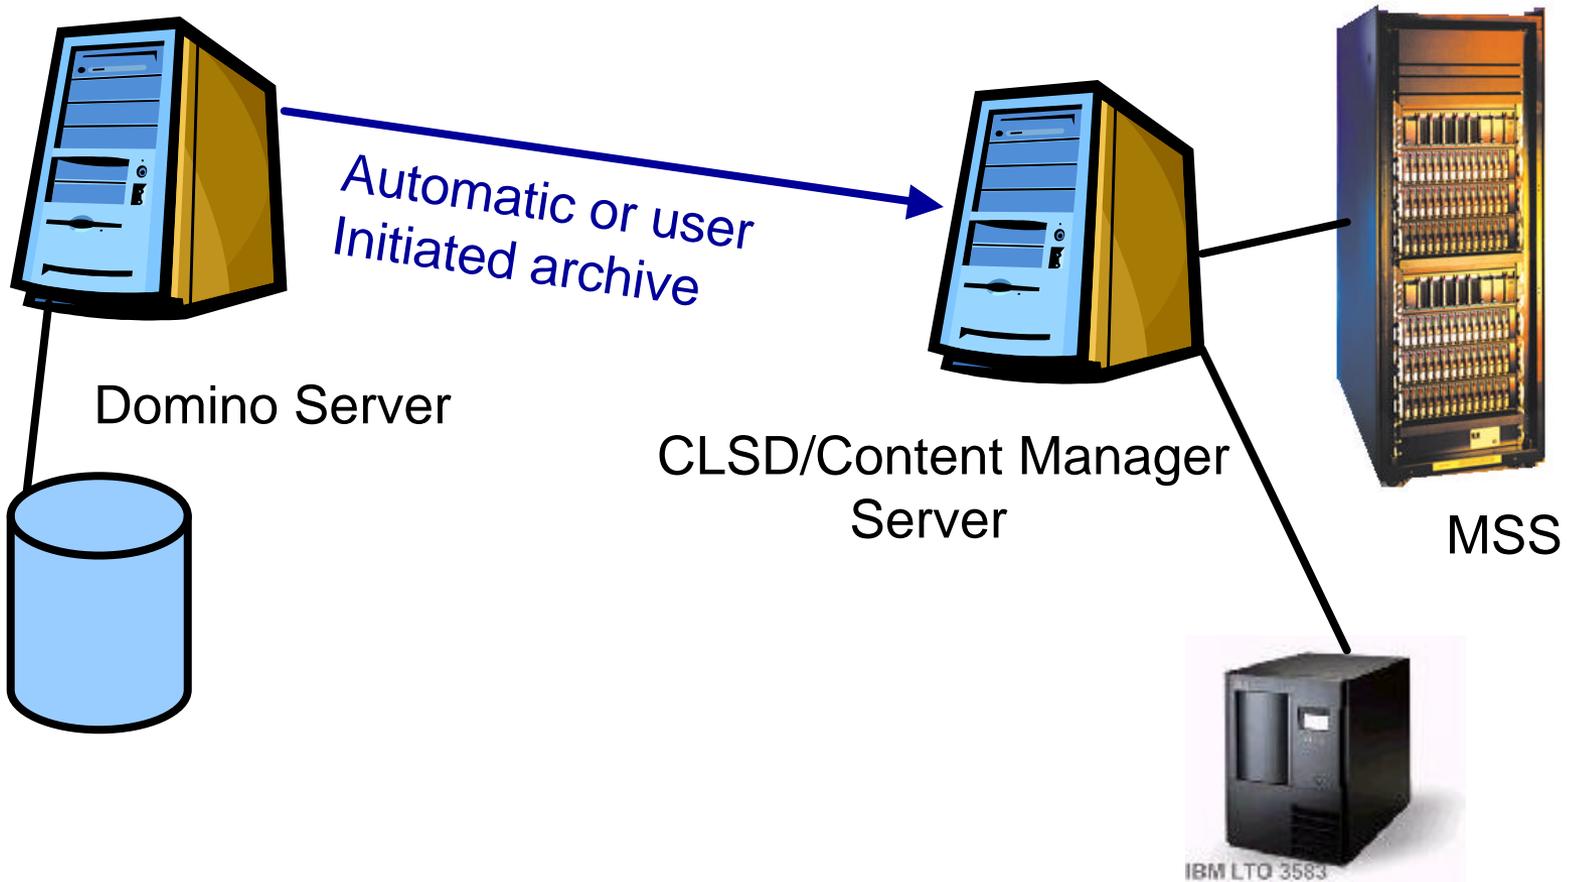

Also, you will find there are a few hand receipts that have zero balance at this time.

Cindy Jones

 CIRD HRHs.xls

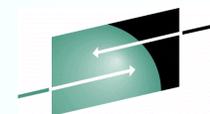

At the bottom of the window, a status bar indicates "12237 unread document(s) remaining" and the user's name "ARL-Havena" is visible.

The screenshot shows a Lotus Notes window titled "Hand Receipt Holders with CISD - Lotus Notes". The interface includes a menu bar (File, Edit, View, Create, Actions, Help), a toolbar with various icons, and a folder pane on the left. The main content area displays an email from Cindy Jones, dated 04/21/2001 01:18 PM. The email header shows the recipient list (To: Nathan Boyer/arl@arl, Michael Quigg/arl@arl, Dann Barrick/arl@arl, Cal Friederich/arl@arl, Connie Lucas/arl@arl, Cindy) and the subject "Hand Receipt Holders with CISD". The body of the email contains the text: "This document has been offloaded to an archive. To restore, select CommonStore->Retrieve." Below this text is a button labeled "CommonStore Retrieve". A blue arrow points to this button with the text "added button". The status bar at the bottom right shows "ARL-Havana".

CommonStore Query Hitlist for ARL
Document containing the Hitlist returned by an Archive Query

Query Requester: Robert Rosen/arl
Request Time: 07/05/2001 12:02:59 PM

The Query returned 2 Documents of type Memo:

Memo

	Folder/Doc	From	Subject	PostedDate	CSLD_AttachmentNames	C
Fetch View	Document	"Johnsen, Larry" <JohnsenL@ria.army.mil>	FW: Limericks	04/23/2001 11:12:14 AM	-	-
Fetch View	Document	CN=Wayne Reynolds/O=arl	Rick	04/23/2001 11:37:18 AM	-	-

ARL-Havana

- **Mail template extensively modified**
- **Nightly archive and stub agents**
 - Run manually until active mail contains only 90 days
 - Agents will then revert to nightly schedule
- **Hid the folder archive function**
 - Conflict on restores if folder contained previously archived documents
 - Not available in R4

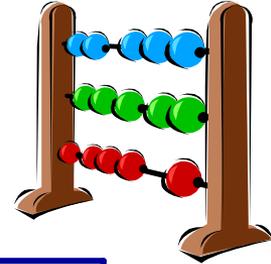

- **Good Question**
 - **Archive**
 - **Single document, <5 seconds**
 - **163,000 documents in 9.5 hours without restub agent (when DB2 table is optimized)**
 - **Retrieve**
- **Single document, <10 seconds**
 - **From tape, ~90 seconds**

Just gone live, no extensive data

- **Statistics to date**

Job Run	Docs older than	Number of Databases	Docs Archived	Archive Time
1	5 yrs	222	31,771	~ 2 hrs
2	4 yrs	397	77,580	~ 4 hrs
3	3 yrs	927	276,793	~ 12 hrs
4*	2 ½ yrs	968	350,915	~ 14 hrs
5	2 yrs	1,547	957,339	~ 336 hrs**
TOTAL			1,976,398	

* Job did not complete; but had to be stopped for disk maintenance

** Excessive time caused by errors encountered in archiving docs

- **Function of network speed**
 - **Domino server speed**
 - **Content Manager server speed**
-
- ✓ **Know a site that archived >200,000 documents in 6 hours (Content Manager was on a mainframe)**

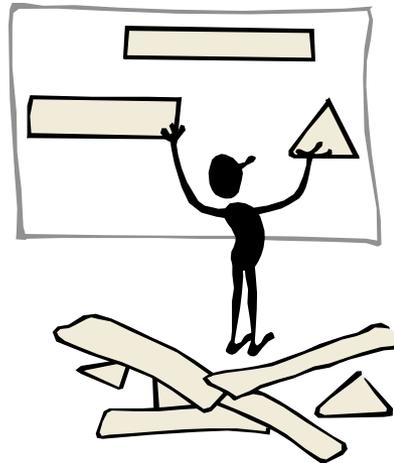

- **Second archive request submitted on same document before first request completes causes stub to be archived, erasing link to original document**
- **Search hit lists are not deleted from user mail files automatically**
- **CSLD executable can be held by a corrupt process which stops processing and requires an orderly shutdown and reboot**
- **CSLD tasks seem to drop or hang when they encounter network interruption**
- **DB2 table needs to be optimized frequently**
- **DB2 drops one of its NT Services once or twice a month**

- **Extensive testing using a copy of live data**
 - **This flushed out problems such as:**
 - **A bug in the compiler which affected the CSLD code, caused a huge memory leak, and slowed processing down to a crawl.**
 - **A bug in the Notes API toolkit which caused us to be unable to generate a hit list on a search function.**
 - **Application errors caused by carriage returns in fields not set for rich text and forwarded documents that contained the original form code.**
 - **Initial field lengths to be indexed were too small which caused many documents to not be archived (e.g., the whole message was in the subject field).**
- **Separated the stubbing agent from the archiving agent**
 - **Doubled the document archive speed**

- **Place CSLD and Content Manager on separate servers**
- **Ensure contract language provides firm deadlines**
- **Ensure latest versions of software are provided**
- **NOT be the first one to do it!**

The Dark Side

- **Product knowledge in IBM is rare**
- **Performance data is non-existent**
- **Experts are non-US citizens (security concerns)**

- Too soon to tell
- Concept is great
- Testing shows it does what we need
- Customer acceptance ?
 - Change is unpopular
 - Loss of “infinite” e-mail storage
 - Check back at next SHARE
