Agenda

- **ShopzSeries**
 - VSE operating system package
 - Optional Products
- **zSeries Support Portal**
 - PTFs
- **Recommended Service Level (RSL)**

What is ShopzSeries ?

- **IBM's productivity tool for planning and ordering zSeries software.**
- **With ShopzSeries you can:**
 - order tailored product and service packages for z/OS, z/OS.e and OS/390
 - order tailored product packages for z/VM, VM/ESA and VSE/ESA
 - review your software licenses in all of these environments
 - plan for future upgrades.
- **URL:**
 - <http://www.ibm.com/software/shopzseries>

What is ShopzSeries for a VSE customer?

- **Order VSE/ESA Operating System package**
 - for base install
 - for Fast Service Upgrade
 - ShopzSeries will check for existing licenses
- **Order optional products for VSE/ESA**
 - choose from a large product catalog
- **View your license inventory**

What's new in ShopzSeries?

- **New delivery media starting with VSE/ESA 2.7.2**
 - CD-ROM
 - VSE customers in US and selected EMEA countries
 - Download from the Internet (eDelivery)
 - And also on Cartridge (as before)

Bestellung	Traditionel	ShopzSeries

VSE/ESA Security

Have you seen the new "[VSE/ESA Security](#)" web page? You will find a link in the "Related Information" section on the lower right of this home page.

The link takes you to a new security page that contains information on topics such as

- Base VSE/ESA security
- Security planning and administration
- Related hardware features, including PCICA assist
- CICS Transaction Server for VSE/ESA security hints and tips
- TCP/IP and Secure Sockets Layer (SSL)

We hope this central source of security information will be helpful. Send your comments, suggestions or questions to the [VSE team](#).

Welcome to ShopzSeries, IBM's productivity tool for planning and ordering zSeries software. With ShopzSeries you can:

- order tailored product and service packages for z/OS, z/OS.e and OS/390,
- order tailored product packages for zVM, VM/ESA and VSE/ESA,
- review your software licenses in all of these environments, and
- plan for future upgrades.

Note: Product ordering is currently limited to the US and Western Europe.

You can learn more about ShopzSeries by reading the online [users' guide](#), or better yet, relax and watch the instructional [video clips](#).

The screenshot shows a Microsoft Internet Explorer browser window displaying the IBM Software ShopzSeries website. The address bar shows the URL: <https://www14.software.ibm.com/webapp/ShopzSeries/ShopzSeries.jsp>. The page features the IBM logo, a search bar, and navigation links for Home, Products & services, Support & downloads, and My account. The main content area is titled "ShopzSeries" and includes a welcome message, a "My orders" section with a bulleted list of actions, and sections for "My hardware systems", "My licensed software", and "My installed software". A left navigation menu lists various user options like "My orders", "My profile", and "My hardware systems". A right sidebar contains a "My ShopzSeries" section with a welcome message for "Ingo Franzki" and a "Tip" section.

About IBM | Privacy | Terms of use | Contact

<https://www14.software.ibm.com/webapp/ShopzSeries/> Internet

Download Director

- **small Java Applet**
- **resume downloads when connections are lost**
- **increases download speed using multiple connections**

CD-ROM vs. Download

■ CD-ROM

- is shipped to your shipping address
- contains tape image(s) in AWSTAPE format

■ Download

- you download the ZIP-files with Download Director or HTTP
- ZIP-files contain tape images in AWSTAPE format

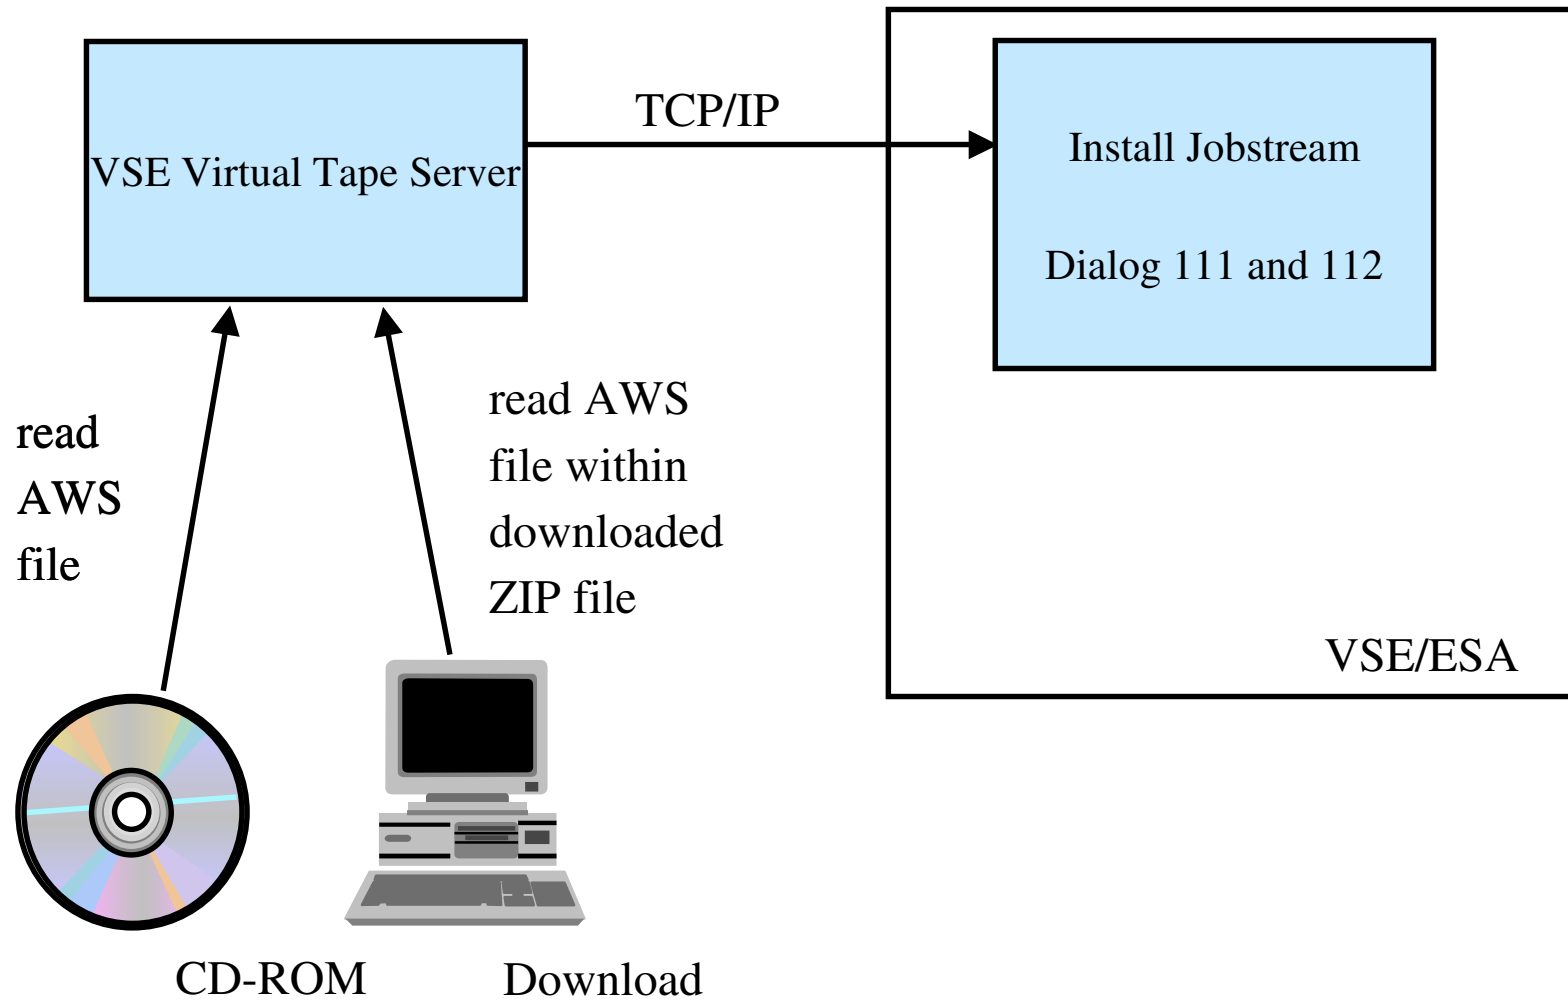

■ **A readme file is provided with information how to work with the tape images**

- points to VSE Homepage:
 - www.ibm.com/servers/eserver/zseries/os/vse/news/edelivery.html

Installing optional products

- **Optional product tapes come in a stacked format**
 - all products ordered are contained in one tape image file (e.g. VSEOPT27.aws)
- **Optional products can be installed via VTAPE using the dialogs 111 and 112**
 - using a remote tape image
 - AWS file (CD-ROM)
 - AWS file within a ZIP file (download)
 - using a VSAM tape image
 - upload of tape image into VSAM file needed

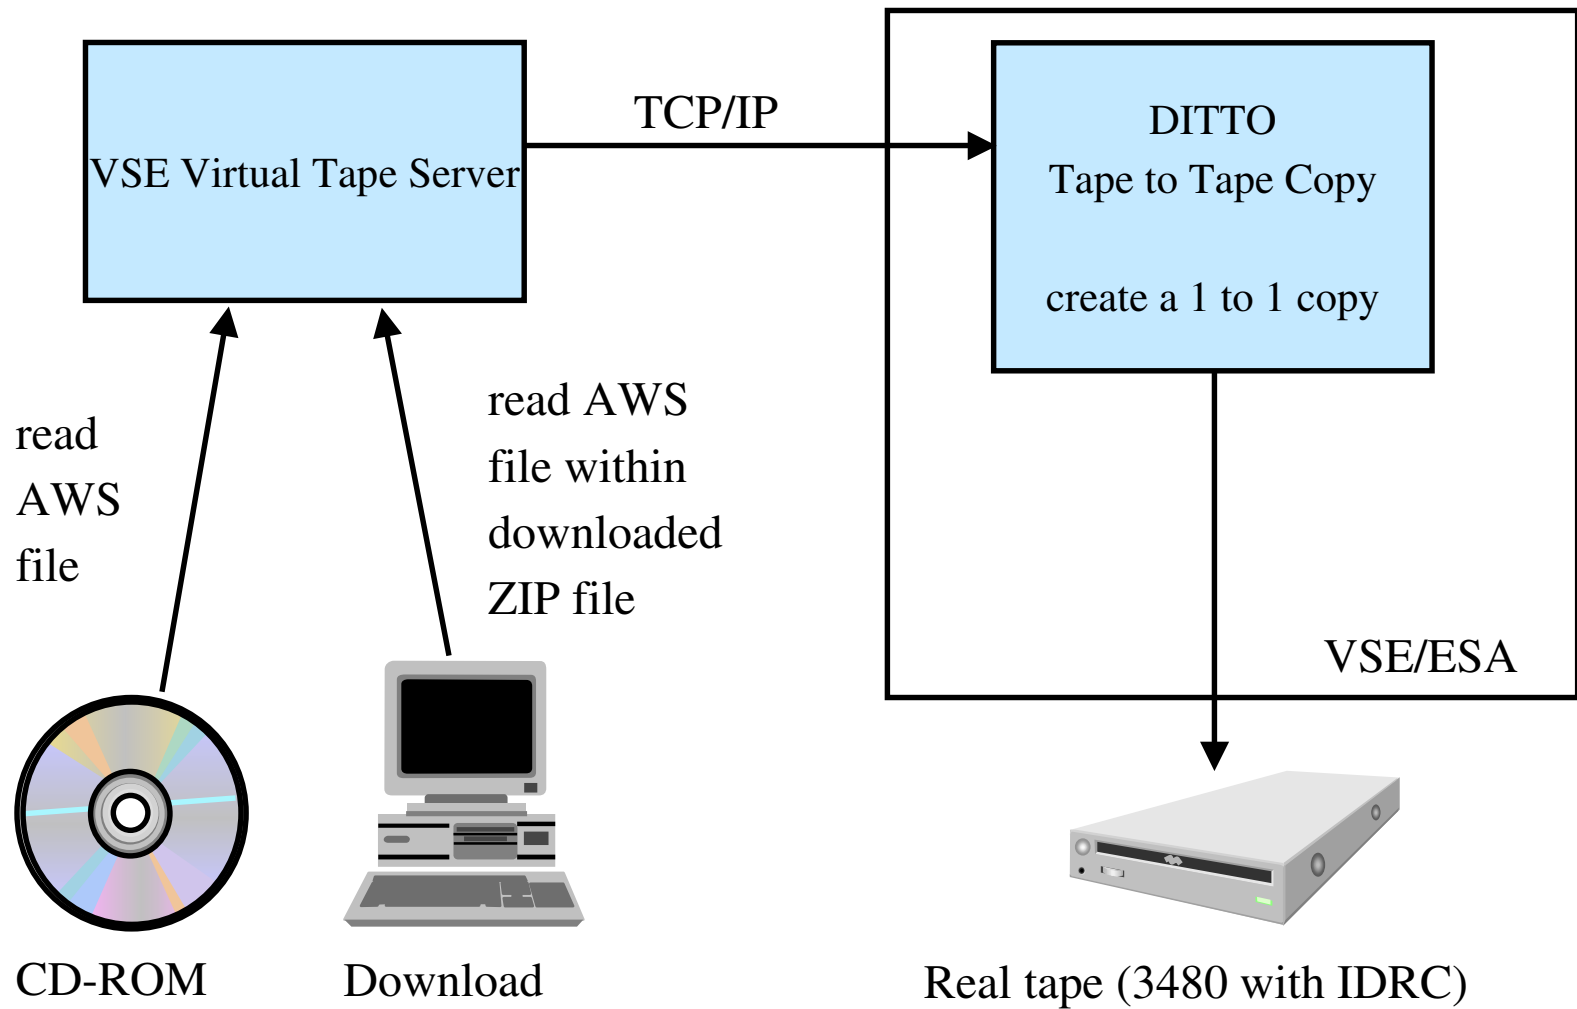

Installing optional products

Installing the VSE base system

- **Base installation can NOT be done from VTAPE**
 - except on MP3000, Flex-ES
- **You need to create a real tape from the tape image**
 - Use DITTO Tape to Tape Copy
 - source: VTAPE (remote tape image)
 - destination: real tape
 - Remote Tape image (source) can be
 - AWS file (CD-ROM)
 - AWS file within a ZIP file (download)
- **Base installation from real tape works as usual**
 - refer to VSE Installation manual

Create a real tape from a tape image

Create a real tape from a tape image

```
* $$ JOB JNM=COPYTAPE,CLASS=0,DISP=D
// JOB COPYTAPE
// PAUSE PLEASE MOUNT A TAPE ON <cuu2>
// UPSI 1
DVCDN <cuu1>
// PAUSE - DEVICE DOWN OK
// VTAPE START,UNIT=<cuu1>,LOC=<ip-address>,FILE='<tape image file>',READ
DVCUP <cuu1>
// ASSGN SYS010,<cuu2>,08
* OUTPUT MEDIA, 3480 COMPRESSED
// ASSGN SYS011,<cuu1>
* INPUT MEDIA
// EXEC DITTO
$$DITTO REW OUTPUT=SYS010
$$DITTO REW OUTPUT=SYS011
$$DITTO TT INPUT=SYS011,OUTPUT=SYS010,NFILES=<36>
/*
DVCDN <cuu1>
// VTAPE STOP,UNIT=<cuu1>
DVCUP <cuu1>
/&
* $$ EOJ
```

<tape image file>:

CD-ROM: **D:\VSEOPT27.aws** (D: ist Ihr CD-ROM drive)

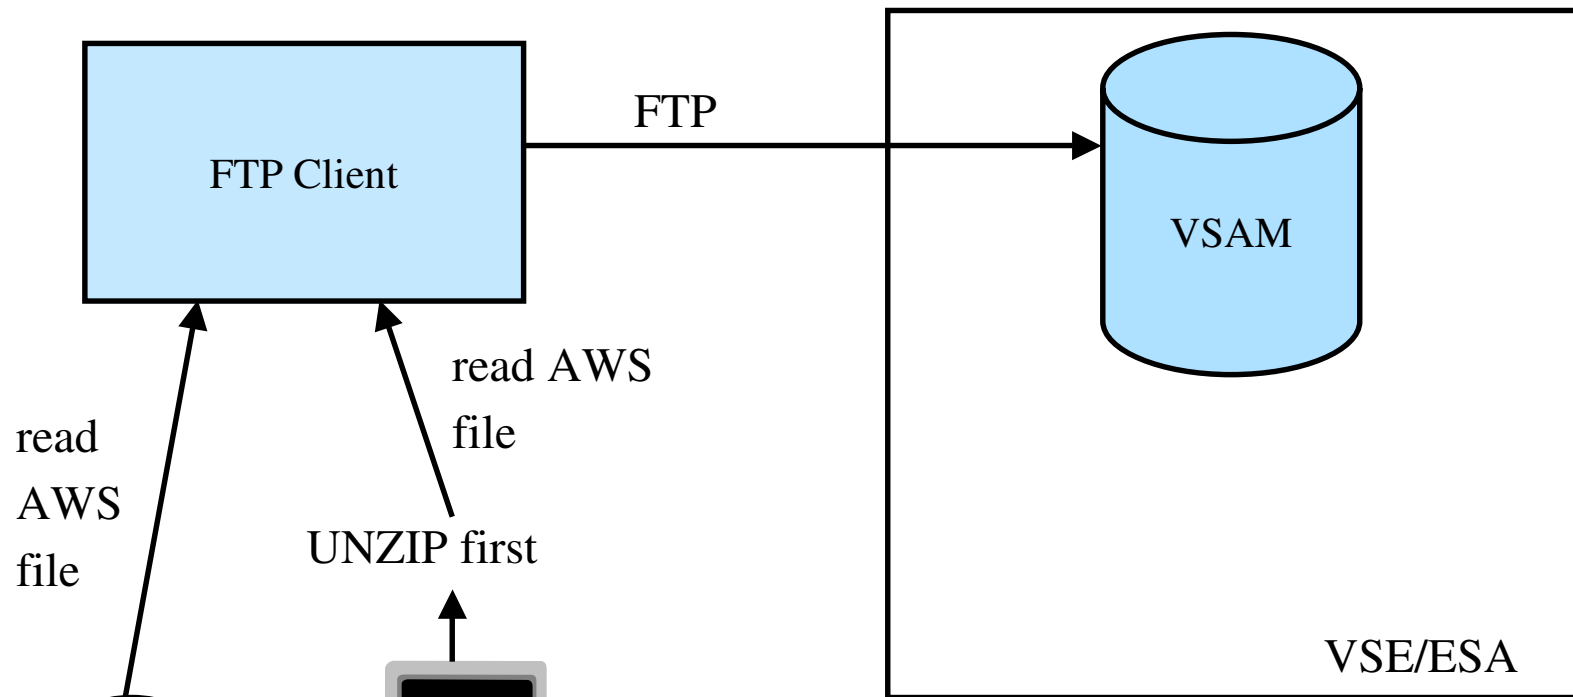

Download: **C:\VSE\V6045349.ZIP!VSEOPT27.aws**

(! separiert ZIP Name und Name des Tape iImages im ZIP file)

Performing an Fast Service Upgrade

- **FSU from VSE 2.5.x/2.6.x to VSE 2.7.x can only be done using a real tape**
 - except on MP3000, Flex-ES
 - You need to create a real tape from the tape image
 - Use DITTO Tape to Tape Copy
- **FSU from \geq VSE 2.7.0 to 2.7.x can be done with VTAPE (VSAM tape image)**
 - upload of tape image into VSAM file needed
- **FSU is done as usual (either from real tape or VTAPE)**
 - FSU Preparation - Dialog 1432
 - FSU Installation - Dialog 1433

Upload a tape image to VSAM

Upload:
 BINARY
 RECFM=V (variable)
 LRECL=nn (max rec len of cluster)

Ordering PTFs

- **Currently not supported by ShopzSeries for VSE**
- **zSeries Support Portal**
 - www-1.ibm.com/servers/eserver/support/zseries/index.html
 - Order specific PTFs
 - Download the PTFs via FTP/Browser
- **Service Update Facility (SUF)**
 - www.ibm.com/servers/eserver/zseries/zos/suf/
 - Application running on a customer PC or workstation
 - Order specific PTFs including all required prereqs

IBM eServer Support

Use of this service requires signing in with an [IBM ID](#).

Each service at this site is grouped under one of three access levels:

- Freely available to anyone with a web browser. No sign in required.
- Freely available but requires signing in with an IBM ID.
- Requires a special support agreement, usually associated with a support contract, or further registration.

How to buy

Order Submitted

Your order has been submitted for processing. Email will be sent to ifranzki@de.ibm.com.

COER NUMBER is 390156234. This number is used to submit your request. You will receive a confirmation email that contains your ORDER NUMBER.

Confirmation of receipt is generally sent out within 5 minutes but may take as much as 30 minutes. The final email with instructions and fix location will generally be sent out within 5 minutes but may take as much as 2 hours. You can [check the status of your order](#) by entering the order number or your customer number.

- The first e-mail will provide you with the ISMS (IBM Software Manufacturing Solutions) order number, which starts with the letter "B".
- When the order is packaged, a second e-mail will be sent to you and will provide you with the package carrier name and the carrier waybill (tracking) number.
- You will also receive a summary e-mail which provides the information above, plus a listing of the fixes that you ordered.

If you do not receive your initial e-mail confirmation within two hours of submitting this request, please either resubmit your request or order your maintenance fix via telephone. Please report any order failures through the [Feedback](#) form.

You can check the status of any specific order via the ISMS order number, or view all recent orders for your customer number, via the web at http://service.software.ibm.com/order_status

If you need the application for tersing/untersing files:

A version for z/OS and OS/390 is available from <http://techsupport.services.ibm.com/390/trsmain.html>. There you will find instructions on downloading, installing and using the application file 'trsmain'.

A version for VM is available via anonymous ftp from [ftp.software.ibm.com](ftp://ftp.software.ibm.com) in `/s390/vm/tools/deterse/files/`. There you will find a [README.txt](#) with instructions on retrieving and using the DETERSE MODULE.

```

Installing downloaded PTFs

- **You get ONE binary job stream (fixed 80)**
 - includes all ordered PTFs
- **Recommended installation procedure:**
 - upload into PTF.FILE (IJSYSPF)
 - see www-1.ibm.com/servers/eserver/zseries/os/vse/support/ptfappl.htm
 - or use Virtual Tape (PTF tape simulation)
- **Not recommended: submit into VSE reader**
 - no indirect PTF apply possible
 - PRE- and CO-requirements may not be fulfilled due to wrong order of PTFs
 - POWER JECL included in the data part of the PTFs will be processed while running the job.
 - Missing POWER JECL in the PTF file causes POWER to extract VSE JOB cards

Apply PTFs via Virtual Tape

Apply PTFs via PTF.FILE (IJSYSPF)

```
DEFINE FILE,TYPE=ESDS,DLBL=IJSYSPF,PUBLIC='IJSYSPF'
```

```
Upload:
  BINARY
  RECFM=F (fixed)
  LRECL=80
```

Recommended Service Level (RSL)

- **available since 19. March 2004**
- **all available PTFs at specified cutoff date**
- **monitored 6-8 weeks for PE**
- **a list of PTFs is kept in PSP and on VSE/ESA Home Page**
 - www.ibm.com/servers/eserver/zseries/os/vse/support/vsersl/vse_rsl_intro.html
- **standard PTF installation process**
- **helps customers to stay on current & reliable service level**
- **helps IBM service personnel to serve customers faster**
- **not to be confused with the RSU concept of zOS**

VSE Recommended Service Level

The following table contains lists of all available service on top of the individual VSE/ESA refresh levels at the specified date. These lists show the APAR number, corresponding PTF number and the applicable component-ID and CLC. Separate lists are provided which contain only the PTF numbers for easy ordering of the Recommended Service. Known PE solutions and requisite PTFs are included.

Service recommended for	PTF Order List	Cutoff Date
VSE/ESA 2.7.2	Base Products Optional Prod.	PTFs 272B PTFs 2720
VSE/ESA 2.7.1	Base Products Optional Prod.	PTFs 271B PTFs 2710
VSE/ESA 2.7.0	Base Products Optional Prod.	PTFs 270B PTFs 2700
VSE/ESA 2.6.3	Base Products Optional Products	PTFs 263B PTFs 2630
VSE/ESA 2.6.2	Base Products Optional Prod.	PTFs 262B PTFs 2620
VSE/ESA 2.6.1	Base Products Optional Prod.	Please order the latest refresh for these levels
VSE/ESA 2.6.0	Base Products Optional Prod.	
VSE/ESA 2.5.2	Base Products Optional Prod.	PTFs 252B PTFs 2520

To order PTFs via Internet, open the order list and copy the PTF numbers over to the PTF number entry field on URL
<https://techsupport.services.ibm.com/server390/electnforder>
