

WAVV 2000

Colorado Springs, Co - October 6-10
VSE/ESA e-business Roadmap

G. M. (Jerry) Johnston
Senior Advisor
IBM Böblingen Laboratory
p798000@us.ibm.com

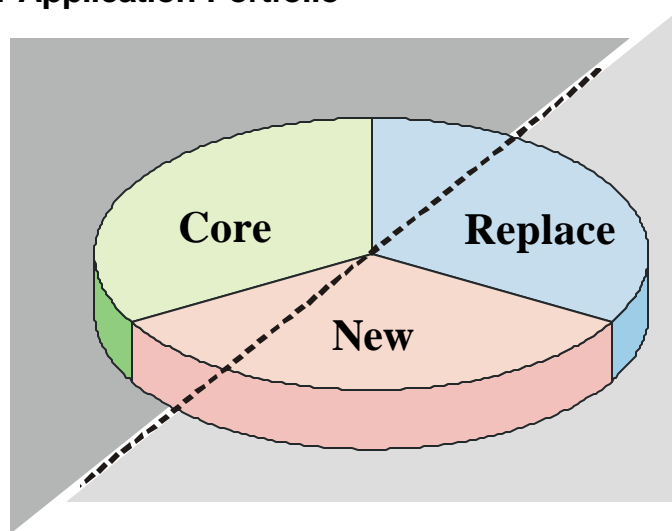

Agenda

- Background
- e-business Roadmap
- Customer Options

Customer Application Portfolio

Note: Pie arbitrarily divided into thirds. Percent of applications in each category varies widely among individual customers

Underlying Technology (simplified)

-S/390
CICS
COBOL
VSAM
3270 interface

-Platform Specific
'Client/Server'
C or C++
Relational
'GUI' interface

-Almost Any Platform
WebSphere
Java
Relational
Std Browser-based interface

S/390

1999 Survey Results

- What other Platforms are Currently Installed (not counting VM)?
 - ▶ 100% Windows NT
 - ▶ 100% AIX/Linux/Other Unix
 - ▶ further back in the pack
 - 60% Novell
 - 25% AS/400
 - 70% all other

We found an average of 3.5 *types* of platforms per customer.
There are no "VSE customers", only "customers with VSE"

S/390

1999 Survey Results

- Are You Growing Your VSE?
 - ▶ 70% + say 'Yes'
- How? Why?
 - ▶ 80% growth of existing applications
 - ▶ 60% new users/consolidation
 - ▶ 50% new applications

Core applications are mostly alive, well, and growing on VSE

S/390

© Copyright IBM Corporation 1998

1999 Survey Results

- Will You Move *Some* VSE Work to Another Platform?
 - ▶ almost 50 % say 'Yes'
- If so, Where?
 - ▶ Windows NT
 - ▶ AIX/Linux/Other Unix (a very close second)
 - ▶ further back in the pack
 - OS/390
 - Novell
 - AS/400
 - all other

Customers are both a) growing core VSE applications and b) implementing Replacement Apps on a variety of platforms

S/390

© Copyright IBM Corporation 1998

1999 Survey Results

- Why?
 - ▶ solutions available
 - ▶ tie - company policy
 - ▶ tie - performance/functionality
 - ▶ cost/price

Customers select replacement platforms for a number of reasons, many of which are unpredictable

S/390

© Copyright IBM Corporation 1998

1999 Survey Results

- What's Your Preferred Platform for e-business?
 - ▶ tie - VSE/ESA
 - ▶ tie - Windows NT
 - ▶ tie - AIX/Linux/Other Unix
 - ▶ further back in the pack
 - VM/ESA, OS/390
 - ▶ even *further* back in the pack
 - Novell, AS/400, OS/2, all other

VSE must deal with an e-business platform of choice that's unpredictable

S/390

© Copyright IBM Corporation 1998

Key Conclusions

- It's a 'Mixed-Platform' World
 - ▶ no one system does everything well
 - ▶ IBM product diversity is a strength
- Core Applications
 - ▶ mostly alive, doing well, and growing
- Platform of choice for Replacement Apps is unpredictable
 - ▶ often there's **both** core growth *and* replacement
- Platform of choice for New Applications is unpredictable

Customers need an e-business model that's flexible and extendable, while protecting existing investments

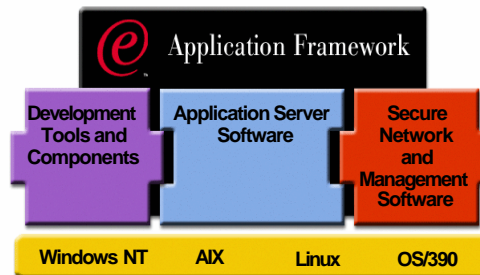

S/390

What's the Answer?

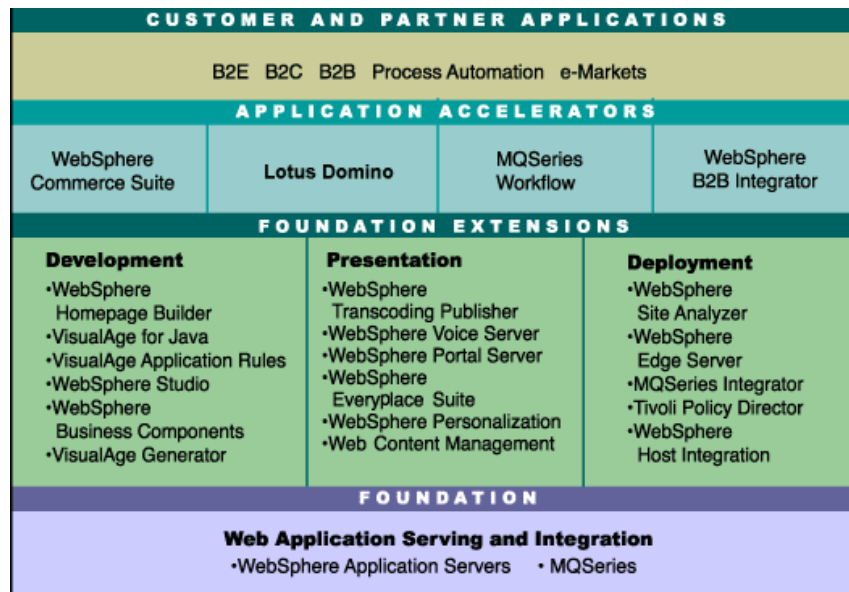

- the *IBM Application Framework for e-business*
 - ▶ provides a **comprehensive**, robust e-business model
 - ▶ is based on a set of industry **standards** and technology
 - ▶ offers **leadership** products
 - ▶ supports **key platforms**
 - ▶ helps **protect** core investments

VSE Directions

e-business Enablement

VSE/ESA V2.5 *Preview*

- Enhanced Interoperability

VSE/ESA V2.4 *June 1999*

- CICS Transaction Server for VSE/ESA
- e-business

Emphasis is on 3-tier e-business enablement, somewhat less on traditional VSE/ESA priorities such as more capacity, quality improvements, and expansion of OS/390 affinity

Summary

- Protect Core VSE Investments
 - ▶ modernize using
 - CICS TS VSE/ESA
 - DB2 Server, Visual Tools, etc.
 - ▶ extend core applications to the Web
- IBM *Application Framework for e-business* for significant Replacement and New Applications
 - ▶ **WebSphere Application Server**
 - ▶ IBM Servers including
 - S/390 (of course)
 - but also NUMA-Q, Netfinity, RS/6000, or AS/400

S/390

© Copyright IBM Corporation 1998

Important New Things For You to Consider

- IBM Application Framework for e-business
- WebSphere Application Server
- Linux for S/390
- IBM NUMA-Q (formerly Sequent)
- Modernized Core Applications
 - CICS TS VSE/ESA
 - DB2 Server
 - 'Visual' tools (VisualAge Generator, Cobol, etc.)
