

Sample Test:

This sample test is designed to give the candidate an idea of the content and format of the questions that will be on the certification exam. Performance on the sample test is NOT an indicator of performance on the certification exam and this should not be considered an assessment tool.

(Answer Key at end)

1. A customer has requested that for their IBM Datacap Taskmaster Capture configuration, they would like users not to enter a user id or password.

Which of the following authentication methods satisfy this requirement?

- A. Passport Authentication
- B. Taskmaster Authentication
- C. AD(ADSI) or LDAP Authentication
- D. ADLDS and LLLDAP Authentication

2. A customer is setting up an IBM Datacap Taskmaster Capture development environment. This environment will have the Datacap components installed on a single server.

Which components may be installed?

- A. NENU, RV2, DotVerify
- B. Batch database, Engine database, Admin database
- C. FastDoc, Datacap Rulerunner Service, Taskmaster Web
- D. Taskmaster Web, Datacap Studio, Datacap Protocol Service

3. A car dealership has documents to scan that have data that comes in various font sizes. For example, printed 3/4 of an inch down from the top of the page, the word SALE is printed using very large fonts. The word SALE does not appear in the OCR output.

Are the font type, size, and position important on images, and why?

- A. Yes, ONLY non dot matrix fonts are allowed.
- B. No, all machine print, font and sizes are allowed.
- C. Yes, Datacap cannot read data from the top inch of a page.
- D. Yes, too large or too small fonts cannot be data extracted by OCR / ICR engines.

4. A company requests that a validation on a field be between 8 and 12 numeric characters, inclusively. When the solution goes into QA, the operators see that the data is missing on some of the sample forms and they request that the field be allowed to pass if it is blank.

Which of the following is most appropriate for their needs?

- A. Function 1:
IsFieldPercentNumeric("100")
IsFieldLengthMin("8")
IsFieldLengthMax("12")
Function 2:
IsFieldLengthMax("0")
- B. Function 1:
IsFieldPercentAlpha("0")
IsFieldLengthMin("8")
IsFieldLengthMax("12")
Function 2:
IsFieldPercentNumeric("100")
IsFieldLengthMax("0")
- C. Function 1:
IsFieldPercentNumeric("100")
IsFieldLengthMin("0")
IsFieldLengthMax("12")
- D. Function 1:
IsFieldPercentNumeric("100")
IsFieldLengthMin("8")
IsFieldLengthMax("12")
Function 2:
IsFieldPercentNumeric("100")
IsFieldLengthMax("0")

5. A wholesale customer has invoices and purchase orders that they want to process in IBM Taskmaster Capture. The invoices document type have a page type called "attachment" and the purchase order document type also has a page type called "attachment."

Can a page type with the same name be created in multiple document types?

- A. No, the DCO will not allow duplicate names.
- B. No, the DCO will rename with a number along with name.
- C. Yes, but the pages in different documents will behave differently.
- D. Yes, the pages with same name will have the same properties and rules associated with that page.

6. A customer has an IBM Datacap Taskmaster Capture application that has a number of fingerprint templates.

When structured documents are scanned and processed in the Datacap system during Page Identification, in a batch, what happens with fingerprint matching if the current image does not match an existing fingerprint?

- A. Taskmaster matches the global fingerprint.
- B. Taskmaster does not offer fingerprint matching. Every page will have to be manually identified.
- C. Taskmaster cannot automatically compare the incoming page with the library of fingerprints for known page types.
- D. Taskmaster does fingerprint matching only for the first page in a document. The other pages will need to be manually identified.

7. The solution designer is creating an application using the FastDoc Rapid Application Development Environment which will be executed in Taskmaster mode.

What application will the solution designer use?

- A. wTM
- B. Datacap Studio
- C. Taskmaster Flex
- D. Microsoft Visual Studio

8. A solution designer has created a ruleset that performs a function that executes outside of the application's workflow.

What is needed to allow execution of this ruleset?

- A. A task profile.
- B. A batch profile.
- C. The runtime DCO.
- D. The Main Job task

9. As of IBM Datacap Taskmaster Capture, V8.1.0, the thick components Taskmaster Client and Batch Pilot are no longer available. The administrative and configuration functions that were delivered in the V8.0.1 thick Taskmaster Client is now available in V8.1 Taskmaster Web.

Which replacement migration option is NOT one of the three possible migration choices to replace batch pilot scan?

- A. Taskmaster DotScan
- B. FastDoc for scanning
- C. Taskmaster DotEdit Scan
- D. Taskmaster Web scancl, vscan, and uplbcl tasks

Answer Key:

1. C
2. C
3. D
4. A
5. D
6. A
7. B
8. A
9. C
