SAMPLE Test for: C2170-051 IBM i2 Analyst's Notebook V8.9

This sample test is designed to give the candidate an idea of the content and format of the questions that will be on the certification exam. Performance on the sample test is NOT an indicator of performance on the certification exam and this should not be considered an assessment tool.

(Answer Key at end)

1. Which of the following statements about identity is true?

- A. It is available in entities and links.
- B. It is case-sensitive, but not character-sensitive.
- C. It allows for easy duplication of entities and links.
- D. It determines merging when copying from chart to chart.

2. Intelligence has arrived in a number of documents. A typical example is "Zackary Armstrong arrived at a meeting at 12:05 on 5 Mar 2012". An intelligence analyst has been tasked with creating a timeline chart where events with a date and time are put in the correct order by the software. Questions such as the following, must also be answered:

- What meetings took place between 1 Mar 2012 and 8 Mar 2012?

Which of the following chart structures would be able to answer this question using a search?

A.

B.

Meeting	
	Zackary arrived
05 Mar 2012 12:05:00	

C.

5 Mar 2012	
	Meeting - Zackary arrived
W 12:05:00	

D.

3. The data set being imported contains a column of Social Security numbers preceded by a 4 digit prefix and a 5 digit suffix. For the purpose of the chart being created, the prefix and suffix need to be removed from all entries prior to import.

Which of the following is the MOST efficient Column Action to accomplish this task?

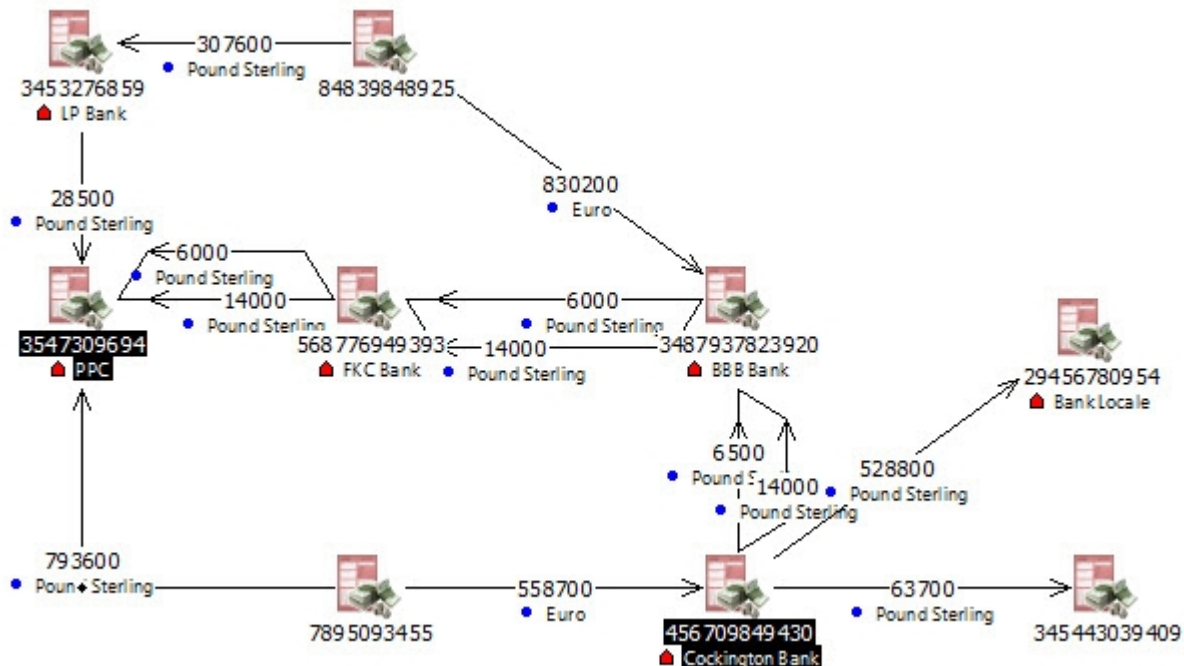

- A. Remove Prefix
- B. Trim Characters
- C. Remove Characters
- D. Extract Portion of Text

4. An intelligence analyst wants to import telephone record data to look for patterns of activity. Particularly, the dates and times of telephone calls between two key suspects.

Which is the BEST import design for the analyst to use?

- A. Sequence of transactions
- B. Network of telephone calls
- C. Sequence of telephone calls
- D. More complex association chart

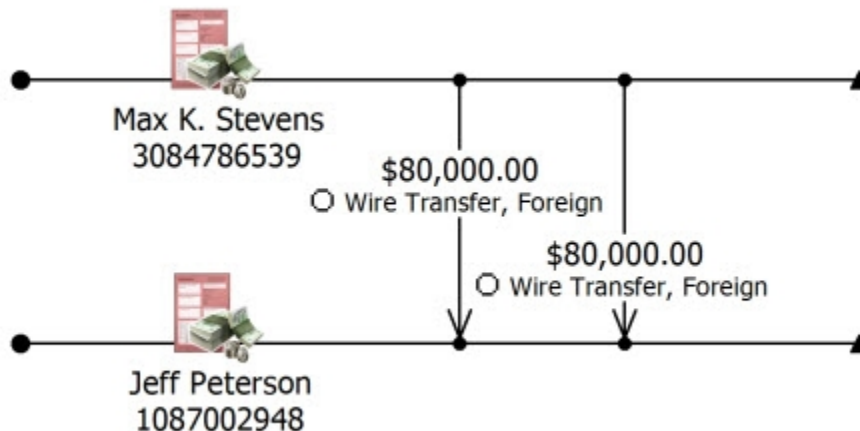

5. Review the following image:
