Your business demands precision. Is your   printer up to the task?

You work hard to get everything just right. But then your aging printer distorts a bar code. Or prints a picking list where 8's look like 3's. Or jams up on the loading dock, bringing everything to a standstill. All of a sudden, you've got delayed shipments. Wrong orders going out. Wrong customers getting them. Why let that happen? IBM® impact printers are precision instruments built to perform reliably in tough industrial environments. And with available software, you can have centralized control over all printer output. You set high standards for yourself. Get a printing solution that lives up to them. To learn more, call 1 800 358-6661 and select option 3 and ask for priority code 1C837033. Or visit us at **www.printers.ibm.com/industrial**

Impact printers with the precision you need.
