

## VSE Online Message Explanation (OME) File

VSE supports an Online Message Explanation (OME) file which allows to display the message explanation text at the console by moving the cursor to the displayed message number and pressing the F9 key.

The number of Independent Software Vendors (ISVs) adding their messages to the OME file is increasing and with this the chance of conflicting keys in this message file.

This table shows the message prefixes used by VSE and ISV's (as far as known) and can be used as reference.

Every user of the OME is invited to provide their message prefixes (which are used to generate the key) by sending note to: [vse@de.ibm.com](mailto:vse@de.ibm.com)

Legend:

Blue entries = Placeholder. Currently not placed into OME

n = 0...9

\* = 0...9 A...Z

x = 0...F

c= A...Z

	Prefix	Company	Component/Product
<b>0</b>			
	0Cnn	IBM/VSE	vCheckpoint Messages
