

z/VM, VSE/ESA, and Linux for S/390 and zSeries

Dr. Klaus Goebel
VSE Program Manager
Böblingen, Germany
kgoebel@de.ibm.com

IBM @server. For the next generation of e-business.

Agenda

- z/VM
- VSE/ESA
- Linux for S/390 and zSeries
- Customer Scenarios

IBM @server. For the next generation of e-business.

z/VM Status and News

IBM @server. For the next generation of e-business.

VM Evolution

Expand your opportunities with z/VM

IBM @server. For the next generation of e-business.

VM's Hardware Support

VM/ESA V2	z/VM V3	z/VM V4
-	eServer z800, z900	eServer z800, z900
S/390 Parallel Enterprise Servers incl. G3, G4, G5, G6	S/390 Parallel Enterprise Servers incl. G3, G4, G5, G6	S/390 Parallel Enterprise Servers G5 and G6
S/390 Multiprise 2000 S/390 Multiprise 3000	S/390 Multiprise 2000 S/390 Multiprise 3000	S/390 Multiprise 3000
S/390 Integrated Server P/390 R/390	S/390 Integrated Server P/390 R/390	-
-	-	IFL for z800, z900, G5, G6, Multiprise 3000

ALS1

ALS2

IBM @server. For the next generation of e-business.

z/VM Version 4 Enhancements

Release 1, Release 2, Release 3

- **New terms and conditions**
 - OTC per processor engine (IPLA pricing)
- **Support for both, standard processor and IFL (Integrated Facility for Linux) processor engines**
- **Enhanced guest support**
 - 64-bit: z/OS, z/VM V3, Linux for zSeries
 - 31-bit: OS/390, VSE/ESA, VM/ESA, CMS, Linux for S/390
- **Exploitation of new HW technology**
 - HiperSockets, ESS large volume support
- **Connectivity enhancements**
 - Ficon, OSA-Express Token Ring, TCP/IP improvements
- **Virtualization technology exploitation**
 - Automated shutdown
 - Fibre Channel Protocol guest support
- **Enhancements in installation, service, systems mgmt**

IBM @server. For the next generation of e-business.

z/VM Futures

Frequent release delivery expected to continue

Future processor and architecture support

Future device support and networking

Virtualization technology enhancements and improvements

- Extending the industry's best-of-breed hypervisor support

Application infrastructure

- Language Environment upgrade
- New levels of compilers

Ease-of-Use

- Configuration
- Operations
- Installation / service / release-to-release migration

IBM @server. For the next generation of e-business.

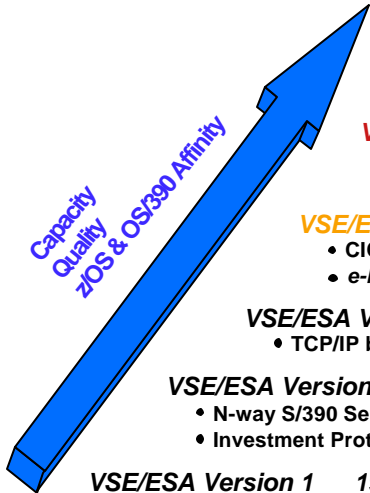

VSE/ESA

Status and News

IBM @server. For the next generation of e-business.

VSE/ESA satisfies Customer Requirements

VSE/ESA V2.6 December 2001

- Enhanced Interoperability
- Internet Security

VSE/ESA V2.5 September 2000

- Improved Interoperability
- e-business Connectors

VSE/ESA V2.4 June 1999

- CICS Transaction Server for VSE/ESA
- e-business

VSE/ESA Version 2.3 1997

- TCP/IP based Communication

VSE/ESA Version 2 1994

- N-way S/390 Servers
- Investment Protection - Year 2000

VSE/ESA Version 1 1990

- Constraint Relief
- ESA Exploitation

IBM @server. For the next generation of e-business.

IBM Application Framework for e-business

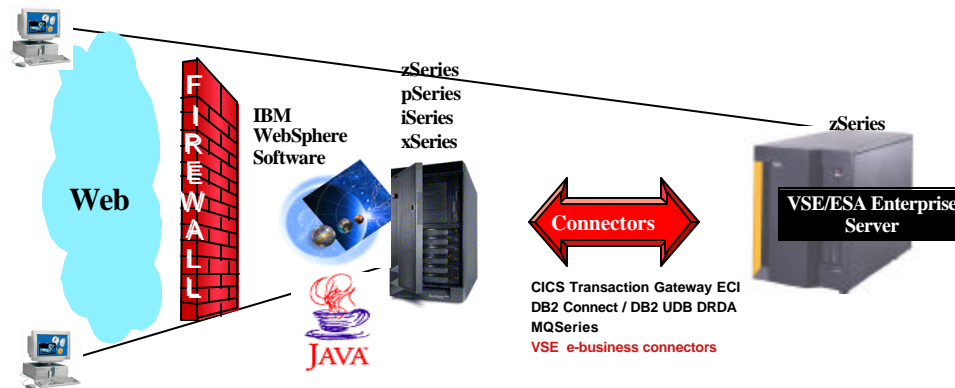

World Wide Web

IBM @server. For the next generation of e-business.

VSE/ESA V2.5+ and the Application Framework for e-business

IBM @server. For the next generation of e-business.

VSE/ESA V2.5 - GA 09/2000

■ Interoperability between VSE and Web Application Server

- ▶ Server code on VSE, JavaBeans/Servlets on Web Application Server
- ▶ Access to VSAM, POWER, Librarian, ICCF, VSE Console
- ▶ DB2-based Connectors with access to VSAM and DL/I resources
- ▶ Complements existing IBM- and Vendor-Connectors

■ Base Enhancements

- ▶ More dynamic classes
- ▶ VSAM LSR Hashing
- ▶ FlashCopy (ESS) support
- ▶ VSAM exploitation for IXFP/SnapShot

IBM @server. For the next generation of e-business.

VSE/ESA V2.6 - GA 12/2001

■ Enhanced Interoperability Focus

- ▶ TCP/IP support for the CICS External Call Interface (ECI)
- ▶ Internet security (SSL included in TCP/IP for VSE/ESA)
- ▶ VSAM Redirector
- ▶ VSAM JDBC Interface
- ▶ VSE connectors updated to Java2 standard

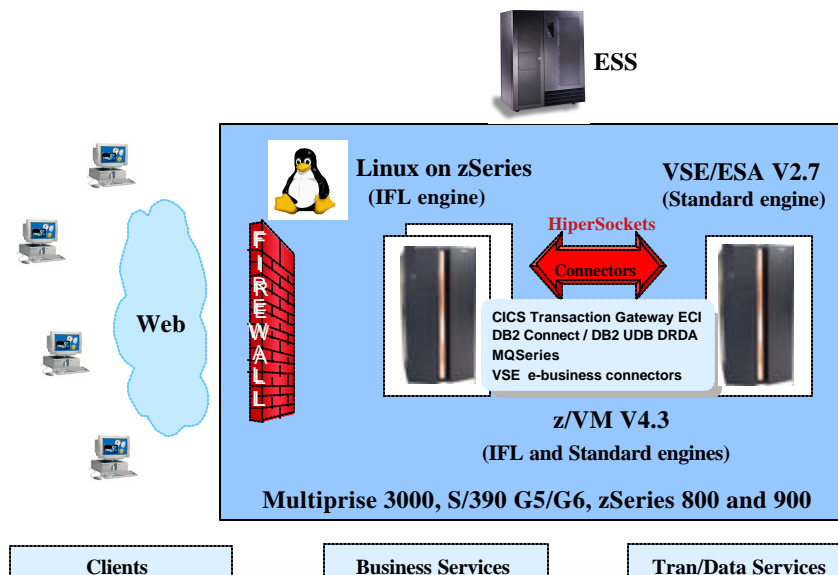

■ More Enhancements

- ▶ New release of DB2 Server for VSE and VM Version 7
- ▶ New Virtual Tape facility
- ▶ Support for leading edge technology, e.g. zSeries 900 (31-bit), FICON, OSA-Express, IBM 2074, VSAM support for large 3390-9 DASD, ESS FlashCopy

IBM @server. For the next generation of e-business.

VSE/ESA V2.7 - GA xx/2003

IBM @server. For the next generation of e-business.

VSE/ESA Future Directions

VSE/ESA V2.7 *Previewed in 2/2002*

- HiperSockets, ALS2

VSE/ESA V2.6 *Dec. 2001*

- ECI via TCP/IP, SSL

VSE/ESA V2.5 *Sept. 2000*

- e-business Connectors

VSE/ESA V2.4 *June 1999*

- CICS Transaction Server for VSE/ESA
- e-business

Protect your existing core VSE investments - emphasize open, hybrid e-business solutions (especially leveraging Linux on zSeries) for many newer workloads.

IBM @server. For the next generation of e-business.

Linux on S/390 and zSeries

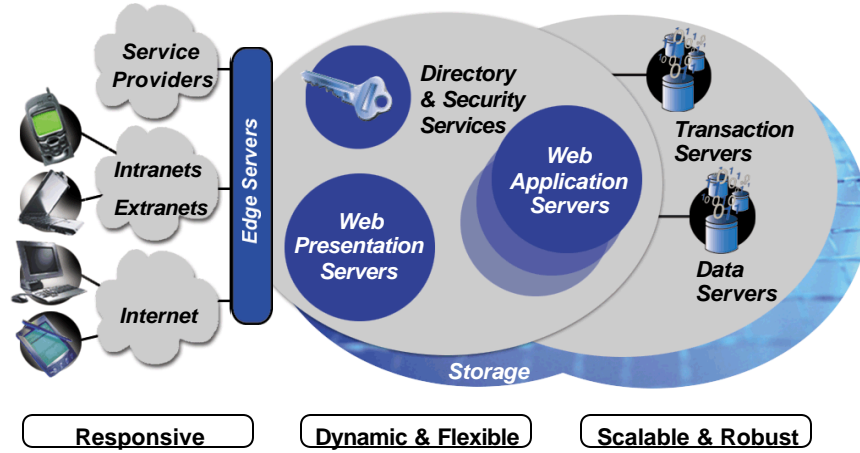

Status and News

IBM @server. For the next generation of e-business.

Infrastructure for e-business on Demand

IBM @server. For the next generation of e-business.

What is Linux for S/390?

Operating system that runs in an LPAR, on VM/ESA, or on z/VM

- Pure Linux, an ASCII environment

Linux Distribution Partners (LDPs)

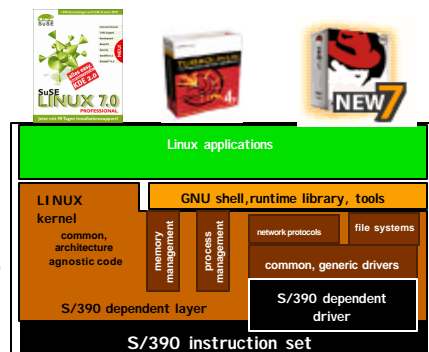

- SuSE: www.suse.com
- Red Hat: www.redhat.com

Support

- Offerings available from IBM and LDPs incl. problem resolution and 'how to'

Services

- Offerings available from IBM and LDPs incl. infrastructure, application implementation, and customized solutions

IBM @server. For the next generation of e-business.

Integrated Facility for Linux (IFL)

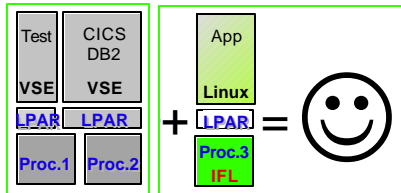

- **Additional processing capacity exclusively for Linux workloads**

- ▶ For zSeries: z900, z800, IBM 9672 G5/G6, Multiprise 3000 (Mod H30+H50)

- **Lower price than for standard engine**

- **Pricing concept is supported by**

- ▶ IBM S/390 and zSeries Operating System Software and Middleware
e.g. z/VM, DB2, WebSphere, Tivoli, ...
 - ▶ Independent Software Vendors (ISVs)
e.g. BMC, CA, SAG, SAP, Oracle, ...

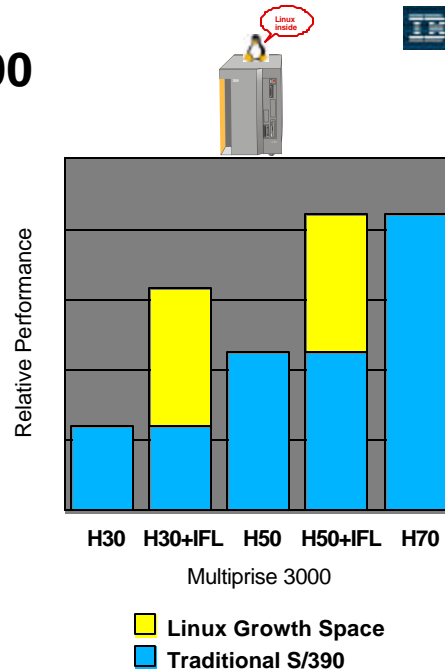

Traditional S/390 software charges unaffected

IBM @server. For the next generation of e-business.

IFL on Multiprise 3000

- ▶ Two new features on MP3000
- ▶ Upgrades from H30 and H50
- ▶ Additional processing capacity exclusively for Linux workloads
- ▶ Traditional S/390 software charges unaffected
- ▶ Linux SW and Services priced at one engine (1 x IFL)
- ▶ Processor storage increased to 4GB

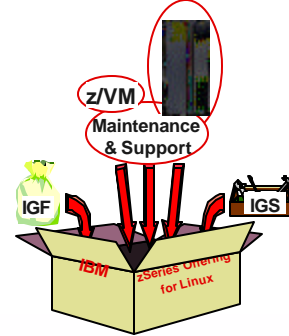

IBM @server. For the next generation of e-business.

zSeries Offering for Linux

- **zSeries Hardware**
 - ▶ z800 Model OLF
 - ▶ 1 to 4 Integrated Facility for Linux engines
 - ▶ Memory pre-configured to match enabled processor configuration
 - ▶ Includes FICON™ and OSA Connectivity
- **zSeries Virtualization Technology**
 - ▶ z/VM Version 4
- **zSeries Maintenance**
 - ▶ 3 years hardware warranty and maintenance
 - ▶ 3 years z/VM Subscription and Support License
- **TOTAL Solution Financing - optional**
 - ▶ Financing options available from IBM® Global Finance
- **IBM Global Services - optional, such as:**
 - ▶ IBM Support Line Software Services for Linux
 - ▶ IGS Linux Rapid Deployment Solution

IBM @server. For the next generation of e-business.

z800 Model 0E1 - GA 10/2002

- ▶ **New General Purpose Model of z800**
- ▶ **One 40 MIP traditional engine plus one standard IFL engine**
- ▶ **Upgrade to 0A1 with microcode**
- ▶ **Downgrade from 0A1 with microcode**
- ▶ **zELC Software pricing**

IBM @server. For the next generation of e-business.

zSeries Entry License Charge (zELC)

- **zELC Delivers Model Based Pricing**
 - ▶ Software price performance improvements
- **Comparing Equal Software Stacks:**
 - ▶ Newest model 0E1 zELC pricing is less than H30 GOLC pricing
 - ▶ Model 0A1 zELC pricing is equivalent to H30 GOLC pricing
 - ▶ Model 0B1 zELC pricing is equivalent to H50 GOLC pricing
 - ▶ Larger models have stepped-pricing that begin to approach PSLC

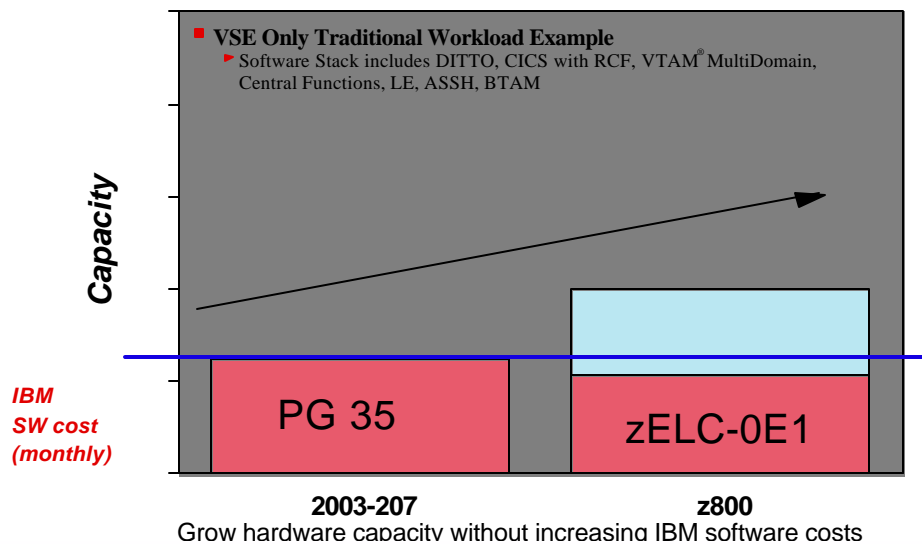

z800 machine	engines	Rated MSUs	zELC vs. PSLC Monthly License Charge Savings*
0E1	1 + IFL	7	-20%
0A1	1	13	-33%
0B1	1	20	-34%
0C1	1	25	-29%
0Q1	1	32	-30%
0A2	2	44	-25%
0Q2	2	60	-10%
0Q3	3	84	-6%
0Q4	4	108	-6%

*SW Stack Example (US prices): z/OS, DB2, IMS, CICS, MQSeries

IBM @server. For the next generation of e-business.

Example: VSE/ESA - Model 0E1 Price Compares

IBM @server. For the next generation of e-business.

Example: 0E1 with IFL with z/VM and VSE/ESA

z800-0E1 with zELC

Notes:

- ▶ Having the Integrated Facility for Linux (IFL) engine on the Model 0E1 does not affect IBM software license charges on the traditional engine
 - The 0E1 machine actually has 2 engines, 1 general purpose engine and 1 IFL
- ▶ This example assumes that virtualization technology is required on IFL

Product	License
CICS	zELC Model 0E1
DITTO	zELC Model 0E1
VSE/ESA	zELC Model 0E1
z/VM V4	IPLA for each engine - 2 copies required**

** This example assumes that z/VM is required on the IFL and the traditional engine

IBM @server. For the next generation of e-business.

Why Linux for zSeries ?

Exploding number of applications & solutions on Linux

Large number of highly skilled programmers familiar with Linux

Integrated business solutions

- ▶ Data richness from zSeries
- ▶ Web capabilities of Linux applications

Industrial strength environment

- ▶ Qualities of service from zSeries
- ▶ Flexibility and openness of Linux

Unique ability to easily consolidate large number of servers

IBM @server. For the next generation of e-business.

IBM Middleware for Linux on zSeries

■ Connectors

- ▶ DB2 Connect™, Version 7.1
- ▶ MQSeries® client, Version 5.2
- ▶ CICS® Transaction Gateway, Version 4.0
- ▶ IMS™ Connect, Version 7

■ WebSphere® Family

- ▶ WebSphere Application Server Advanced Edition, Version 4.0
 - including JDK 1.3.0 & JIT
- ▶ WebSphere Personalization, Version 3.5
- ▶ WebSphere Commerce Suite, Version 5.1
- ▶ WebSphere Host on-Demand, Version 5.0.3

■ Data Management

- ▶ DB2® Universal Database™, Version 7.2
- ▶ DB2 Intelligent Miner™ Scoring, Version 7.1
- ▶ DB2 Net Search Extender, Version 7.2

■ Tivoli®

- ▶ Tivoli Storage Manager Client 4.2
- ▶ Tivoli Enterprise Console 3.7.1
- ▶ Tivoli Software Distribution 4.0
- ▶ Tivoli Distributed Monitoring 4.1
- ▶ Tivoli Workload Scheduler 8.1

■ *SW license cost consistent with Linux on other platforms*

■ *SW licence cost are per engine*

■ *SW products are on same product level as on other platforms*

IBM @server. For the next generation of e-business.

ISVs supporting Linux on zSeries

ERP, Production Planning, Logistics

- ▶ ABAS Software AG
- ▶ SAP

Database

- ▶ Oracle 9i
- ▶ Software AG Tamino (XML Database)

Application & e-business Integration

- ▶ Tibco
- ▶ Iona
- ▶ BEA WebLogic Server
- ▶ Aeonware (B2B/B2C)

Systems Management

- ▶ BMC Patrol
- ▶ BMC Mail Server Knowledge Agent
- ▶ BMC Web Server Knowledge Agent
- ▶ Computer Associates

Windows migration, ASP

- ▶ Halcyon Software

Stock tracking

- ▶ RTS Realtime Systems

Core Banking Applications

- ▶ Sanchez

Mail & Calendar Server

- ▶ Sendmail
- ▶ Bynari

Print server

- ▶ Macro4

Development & Test Tools

- ▶ Logics Software
- ▶ Lattwein
- ▶ Rational Software
- ▶ Roguewave Software
- ▶ Dignus
- ▶ ACTS (testing)

Backup Software

- ▶ Computer Associates

Firewall

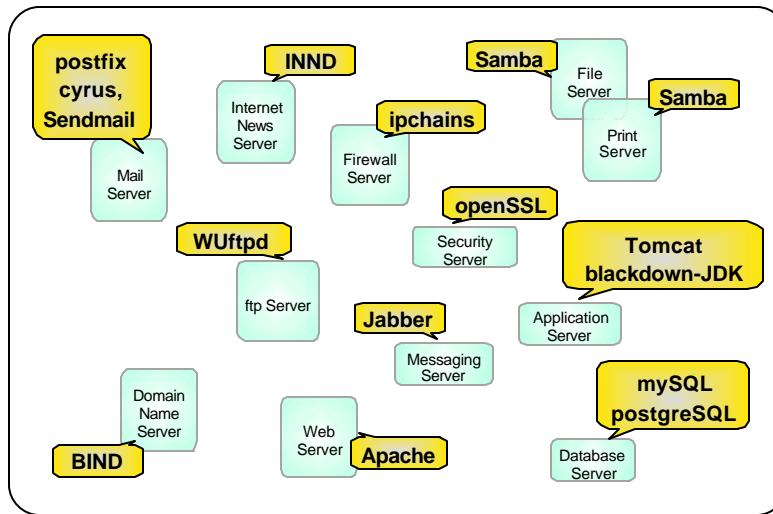

- ▶ zGuard

More than 200 applications from 100+ vendors!

IBM @server. For the next generation of e-business.

Open Source Software

IBM @server. For the next generation of e-business.

Linux Development Focus 2002/2003

- **ISV / Middleware enablement**
- **Networking**
 - **HiperSockets**
Cross partition communication at "memory speeds"
 - **High Speed Token Ring**
- **IRD (Intelligent Resource Director)**
 - **WLM world to Linux**
- **Storage**
 - **Enhanced Shark support**
 - **Tape support**
- **Enhanced Security Exploitation**
 - **Enablement of H/W Cryptography**
- **Enhanced RAS**
 - **Dynamic I/O**
 - **DASD error recovery**
 - **Dump, dump analysis, trace tools**
- **Compiler optimizations**
- **64-bit Linux distributions**
- **openFCP/SCSI**
 - **Technology demo at LinuxWorld, NYC 01/2002**
with ESS disks, DVD-ROM, CD-RW, 3580 LTO tape drive
 - **Announced for z800 and z900 in 04/2002**
 - **Limited Availability since 06/2002**
 - **GA planned for 1H2003**

IBM @server. For the next generation of e-business.

Customer Scenarios

IBM @server. For the next generation of e-business.

How Customers are using Linux for S/390 ...

Consolidation of servers

Single purpose
Internet-related
servers

Web servers
Internet news servers
Domain name servers
File/print servers

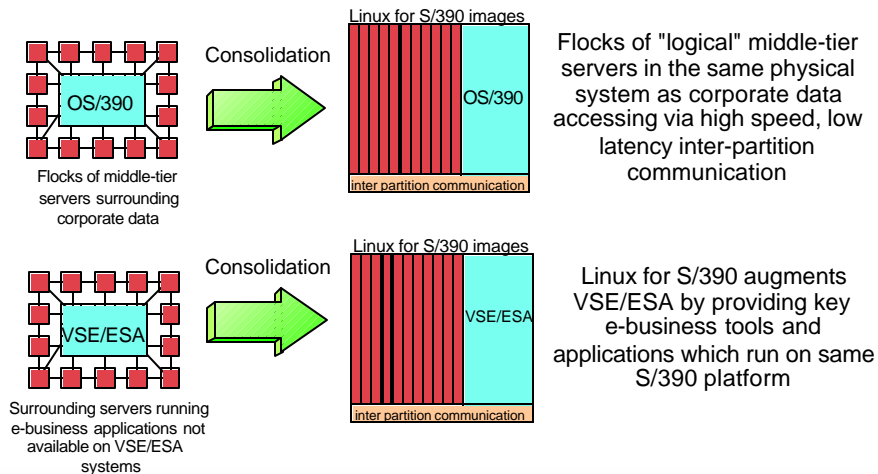

IBM @server. For the next generation of e-business.

How Customers are using Linux for S/390

Enhancing their S/390 investment

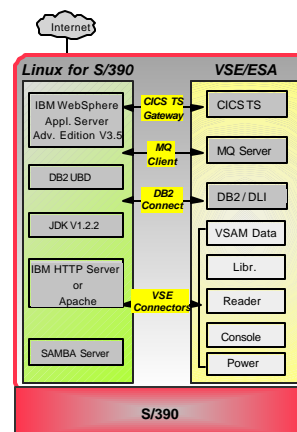

IBM @server. For the next generation of e-business.

Linux & VSE Connectors

- **VSE Connectors**
 - ▶ **Java-based connector**
 - Connectivity via TCP/IP
 - Implemented as long running partition
 - JavaBeans on Web Application Server
 - Access to: VSAM, POWER, Librarian, ICCF, console
 - ▶ **DB2-based connector (using DRDA)**
 - Connectivity via TCP/IP or SNA
 - Implemented as DB2 stored procedures
 - Standard JDBC/ODBC calls on Web Application Server
 - Access to VSAM and DL/I - as well as DB2
- **Java-based Solutions**
 - ▶ VSE Navigator
 - ▶ JConVSE (Java console for VSE)
 - ▶ JDataMig (Java data migration)
 - ▶ VSAM Redirector

VSE is an excellent back-end system partner.

IBM @server. For the next generation of e-business.

Customer References

Winnebago Industries

Linux for S/390 - Distributed Application Server

In distributed application environments Linux provides:

- Highly stable Open Source operating system
- Large selection of low cost, high quality applications
- Large numbers of trained administrators & programmers

S/390 provides Linux with

- The ability to run many Linux instances on a single S/390
- Secure isolation of user workload and data
- Upgradability without repurchase
- Reliability and availability

- Recreational Vehicle Manufacturer in Iowa
- Replaced Microsoft e-mail servers with Bynari Insight server on Linux on zSeries
- Users still use Microsoft Outlook e-mail clients
- 'Traditional' applications run on VSE/ESA
- Plans to consolidate 30-40 Intel PCs on Linux
- Runs VSE, SuSE, and VM on **Multiprise 3000**

"Upgrading to Microsoft Exchange or Novell GroupWise would cost Winnebago about \$100,000. We expect Bynari Insight Server to cost a third or even a quarter of that, because Winnebago will be able to make use of excess capacity on the company's IBM Multiprise 3000 mainframe. The mainframe is our industrial-strength system that stays up, and that's where our expertise is." - Dave Ennen - Technical Support Manager - Winnebago Industries

IBM @server. For the next generation of e-business.

Grede Foundries

Linux for S/390 - Infrastructure server consolidation

In VM and VSE environments Linux provides:

- A wide range of applications not available on VM/ESA or VSE/ESA
- The ability to leverage existing applications and data in e-business scenarios

S/390 provides Linux with

- Fast connection to VSE/ESA managed data
- Reliability and availability
- An economical alternative to stand-alone servers

- Milwaukee-based manufacturer of iron and steel castings for the auto and heavy equipment industry
- Reduced costs for servers, software, and administration by not adding additional NT servers
- Improved performance through use of S/390 internal high speed network versus external LAN
- DNS servers, mail servers, Apache web servers, SAMBA file servers on Linux for S/390
- IBM DB2 UDB for Linux, DB2 Connect
 - ▶ Moving to WebSphere Application Server
- VSE, SuSE, and VM on a **Multiprise 3000**

IBM @server. For the next generation of e-business.

Other Examples of VSE Users running Linux

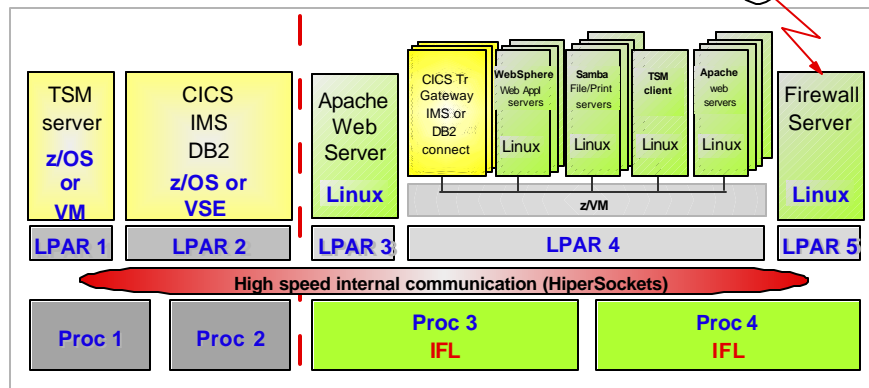

- **Health Management Associates - Healthcare (Florida)**
 - ▶ Acquires and operates hospitals
 - Exploits IT to increase efficiency and reduce cost
 - Needs to integrate existing IT infrastructures
 - ▶ WebSphere Application Server and ViaSQL
 - ▶ VSE/ESA and SuSE (under LPAR) on **Multiprise 3000**
- **Price Chopper - Retail (New York)**
 - ▶ Wanted an attractive web site
 - Online catalog shopping
 - Used Linux-based web technology
 - ▶ VSE/ESA, SuSE, and VM/ESA on **Multiprise 3000**
- **GE Capital Bank - Consumer Finance (Switzerland)**
 - ▶ Consolidation of UNIX servers under Linux on zSeries
 - ▶ VSE/ESA, SuSE, and VM/ESA on **G6**

IBM @server. For the next generation of e-business.

Bringing it all together !

e.g. z800

■ Integrated solution

- ▶ Linux applications provide front-end to DB2, CICS, IMS
- ▶ 3-tier architecture on 2-tier hardware
- ▶ High speed communication between virtual servers

IBM @server. For the next generation of e-business.

Summary

z/VM, VSE/ESA, and Linux on zSeries

means:

Fit for e-Future (Fun)!

IBM @server. For the next generation of e-business.
