Trademarks

The following are trademarks of the International Business Machines Corporation in the United States and/or other countries. For a complete list of IBM Trademarks, see www.ibm.com/legal/copytrade.shtml: AS/400, DB2, e-business logo, ESCO, eServer, FICON, IBM, IBM Logo, iSeries, MVS, OS/390, pSeries, RS/6000, S/30, VM/ESA, VSE/ESA, WebSphere, xSeries, z/OS, zSeries, z/VM

The following are trademarks or registered trademarks of other companies:

Lotus, Notes, and Domino are trademarks or registered trademarks of Lotus Development Corporation.
 Java and all Java-related trademarks and logos are trademarks of Sun Microsystems, Inc., in the United States and other countries.
 LINUX is a registered trademark of Linux Torvalds.
 UNIX is a registered trademark of The Open Group in the United States and other countries.
 Microsoft, Windows and Windows NT are registered trademarks of Microsoft Corporation.
 SET and Secure Electronic Transaction are trademarks owned by SET Secure Electronic Transaction LLC.
 Intel is a registered trademark of Intel Corporation.
 * All other products may be trademarks or registered trademarks of their respective companies.

NOTES:

Performance is in Internal Throughput Rate (ITR) ratio based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput improvements equivalent to the performance ratios stated here.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

All customer examples cited or described in this presentation are presented as illustrations of the manner in which some customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics will vary depending on individual customer configurations and conditions.

This publication was produced in the United States. IBM may not offer the products, services or features discussed in this document in other countries, and the information may be subject to change without notice. Consult your local IBM business contact for information on the product or services available in your area.

All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Information about non-IBM products is obtained from the manufacturers of those products or their published announcements. IBM has not tested those products and cannot confirm the performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Prices subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.

References in this document to IBM products or services do not imply that IBM intends to make them available in every country.

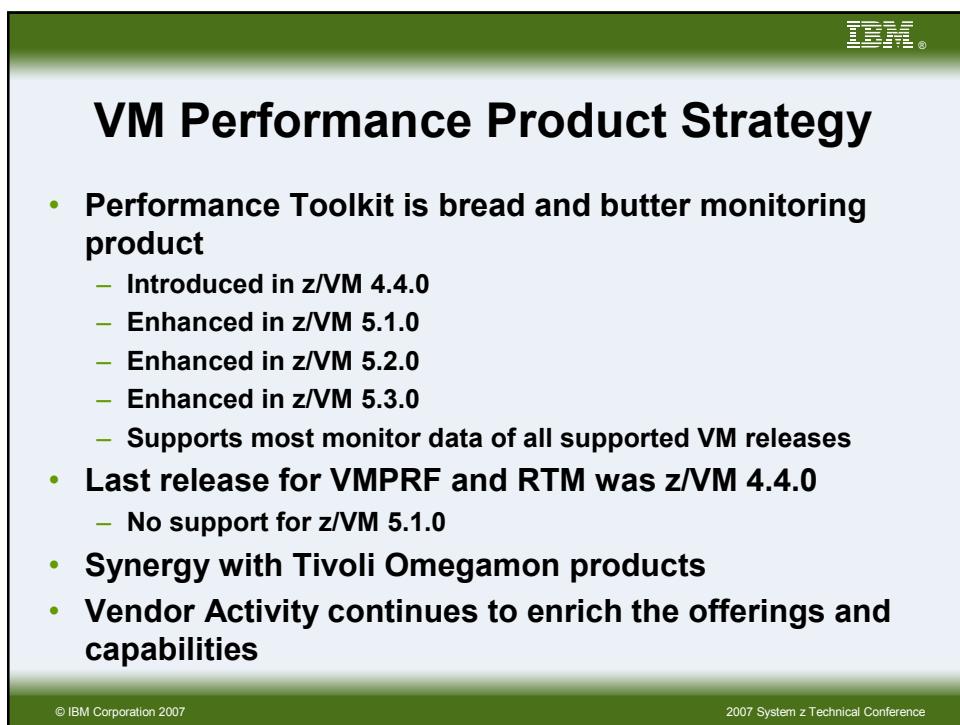

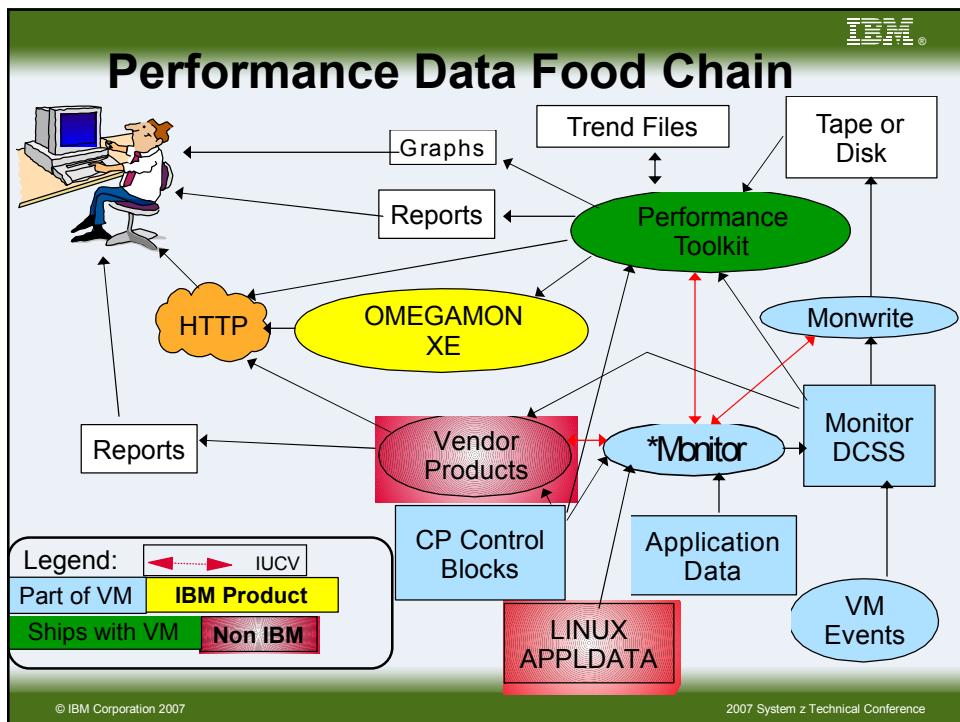

Any proposed use of claims in this presentation outside of the United States must be reviewed by local IBM country counsel prior to such use.

The information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

Any references in this information to non-IBM Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this IBM product and use of those Web sites is at your own risk.

Performance Toolkit Naming Conventions

- **FCON** = Full Screen Operator Console
 - FCON/XA, FCON/ESA are previous names for Toolkit
- **FCX** = 3 letter module prefix
 - Used in messages, displays, etc.
- **Performance Toolkit for VM** = full name
- **PERFKIT** = module that invokes it
- **PERFSVM** = default userid where Performance Toolkit runs
- **FCXRES00** = default APPC resource name
- **5VMPTK20** = installation userid for FL520
- **5VMPTK30** = installation userid for FL530

© IBM Corporation 2007

2007 System z Technical Conference

Usages

- **Real time Monitor**
 - Allows viewing of current status of the system
 - Scheduled report generation
 - Recording for historical records
- **MONSCAN**
 - View Monwrite Data as if you were looking at live system
- **BATCH or VMPRF**
 - Post processing of Monwrite data
- **Re-display of historical records**
- **Systems Operations**

© IBM Corporation 2007

2007 System z Technical Conference

New for z/VM 5.2.0

- **Support for new z/VM Monitor Data and Features**
 - System Execution Space Reports
 - New/Changed Paging Reports
 - QEBSM Reports
- **New Central Data Collection Processing**
 - “Pull” from other FL520 PERFKIT’s
 - “Push” from other FL510 PERFKIT’s

Changes for FL530

- Shipping text decks
 - Reduce the size of PTFs
 - Consistent with other VMSES/E service
- FCXLEVEL changes
- New dump format
 - DUMPOLOAD – increased the PERFSVM 191
 - Send the DUMP and the LOADMAP from 5VMPTK30
 - Consistent with other dumps for service
- Support for pass phrase from Web logon
 - Using DMSPASS interface
 - DIAG88 required in user directory for WEB server
- FC MONCOLL SEGOUT used by OMEGAMON XE

© IBM Corporation 2007 2007 System z Technical Conference

New dump format

- DUMPLOAD – increased the PERFSVM 191
 - Send the DUMP and the LOADMAP from 5VMPTK30
 - Consistent with other dumps for service
- VMDUMPTL – used to look at dumps (like with CP)
 - PKINIT – New VMDUMPTL macro to show highlights of dump
 - Shows point of DUMP (FCXBAS)
 - Shows point of abend and reason
 - PKTRACE
 - Shows back trace of internal trace macro

© IBM Corporation 2007

2007 System z Technical Conference

PKINIT – abend point

Pass phrase support

- Keeping up with the rest of VM
- Used for WEB LOGON
- Password/passphrase is case sensitive
- PERFSVM now requires OPTION DIAG88 in the user directory
 - PERFKIT uses DMSPASS for authentication (New CMS lvl)
- SSL recommended if being used outside your own installation
- In keeping up with the rest of VM, This is the only option now available. IDTEST will be ignored with an informational message.

© IBM Corporation 2007

2007 System z Technical Conference

New for z/VM 5.3.0

- Support for other IBM products
 - FC MONCOLL SEGOUT for use with OMEGAMON XE

© IBM Corporation 2007

2007 System z Technical Conference

FC MONCOLL SEGOUT used by OMEGAMON XE

- Provides data in a shared segment
- Used by OMEGAMON XE
- Leaves the calculations in PERFKIT
- Provides data to OMEGAMON XE for viewing with other platforms

Miscellaneous Hints

- **Do not use 370 Accomodation**
 - While RTM required this, it will result in problems with Performance Toolkit
- **If you are going to have Performance Toolkit store data in SFS, you need to ensure SFS is first in autolog sequence**
- **User classes in Batch Mode are defined in SETTINGS file via FC UCLASS command, not via UCLASS file.**
- **PERFKIT uses some common interrupt areas, don ‘t use other programs from within PERFKIT that also do this. For example: PING**
