Topics

- What is Coexistence
- Coexistence scenarios
- Sharing resources
- SVA considerations
- VSE support
- Summary

What is Coexistence

- Support for staged migration of obsolete CICS functions
- Coexistence release
 - CICS/VSE 2.3
 - Shipped with VSE/ESA 2.4+
 - Optional product on extended base tape
 - Runs in same VSE 2.4+ system with CICS TS

What is Coexistence...

- CICS/VSE 2.3 coexistence release
 - Support for withdrawn CICS functions
 - BTAM
 - Macro level programs
 - Unsupported languages
 - Internal security, etc.
 - Supports DL/I DOS/VS 1.10
 - Supports DB2 for VSE 6.1 and above

What is Coexistence...

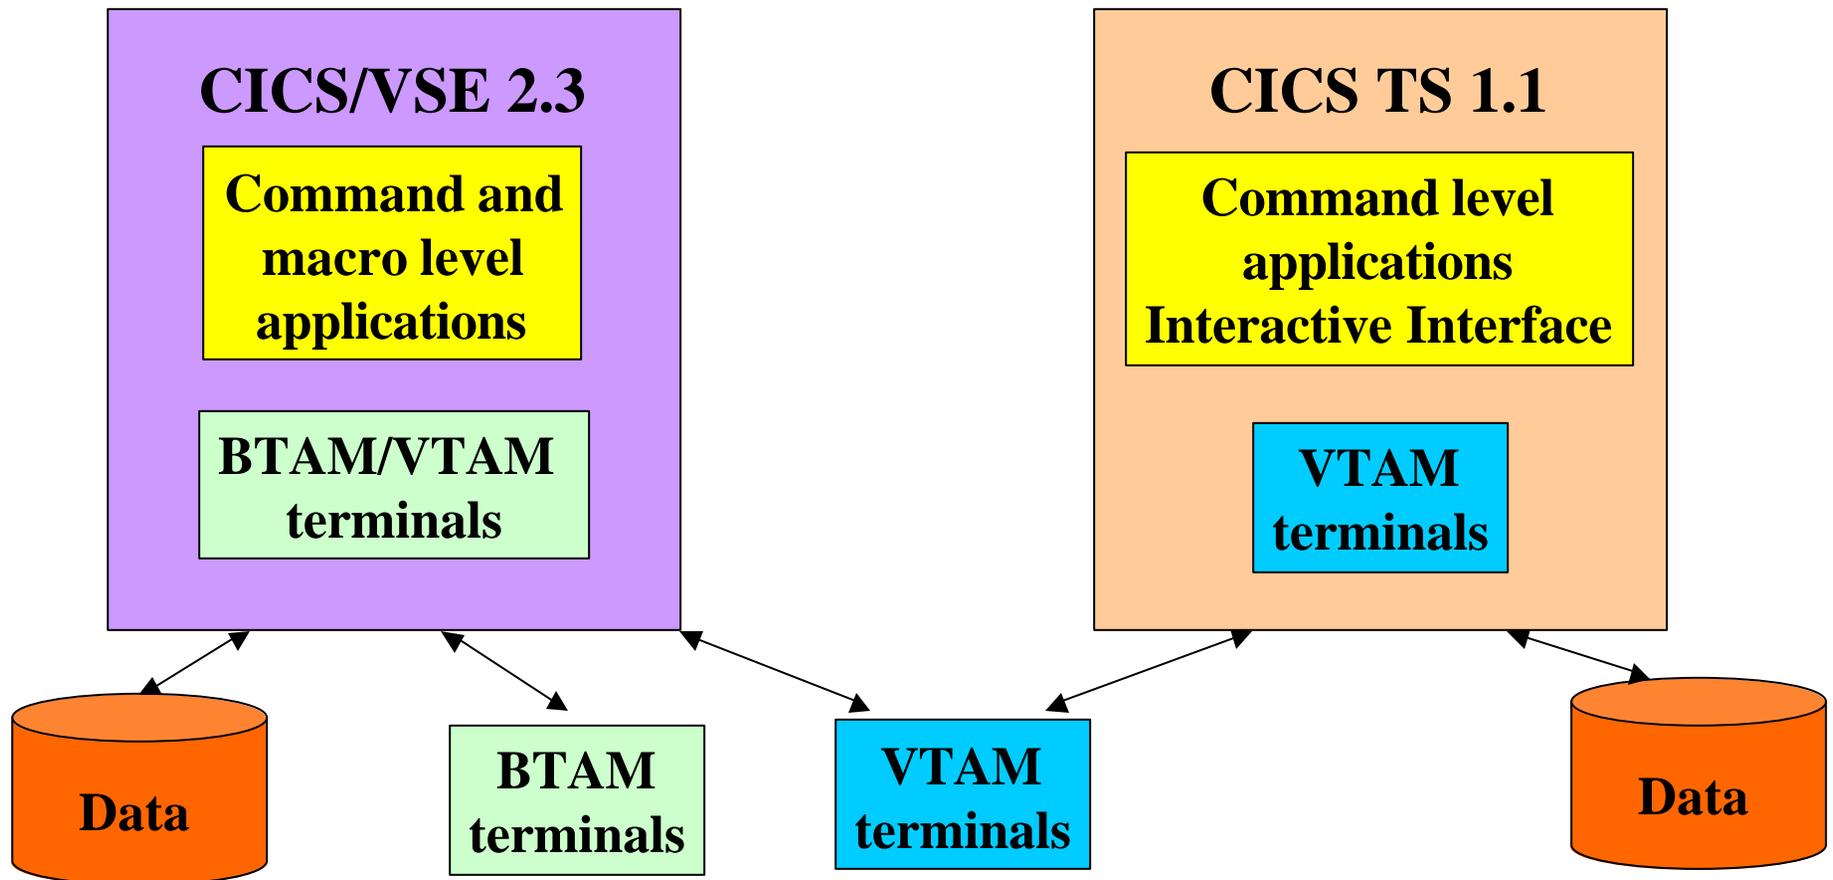

- CICS/VSE 2.3 coexistence release...
 - No Interactive Interface support
 - No ICCF support
 - No OLPD support

Interactive Interface and ICCF must run
in CICS TS partition

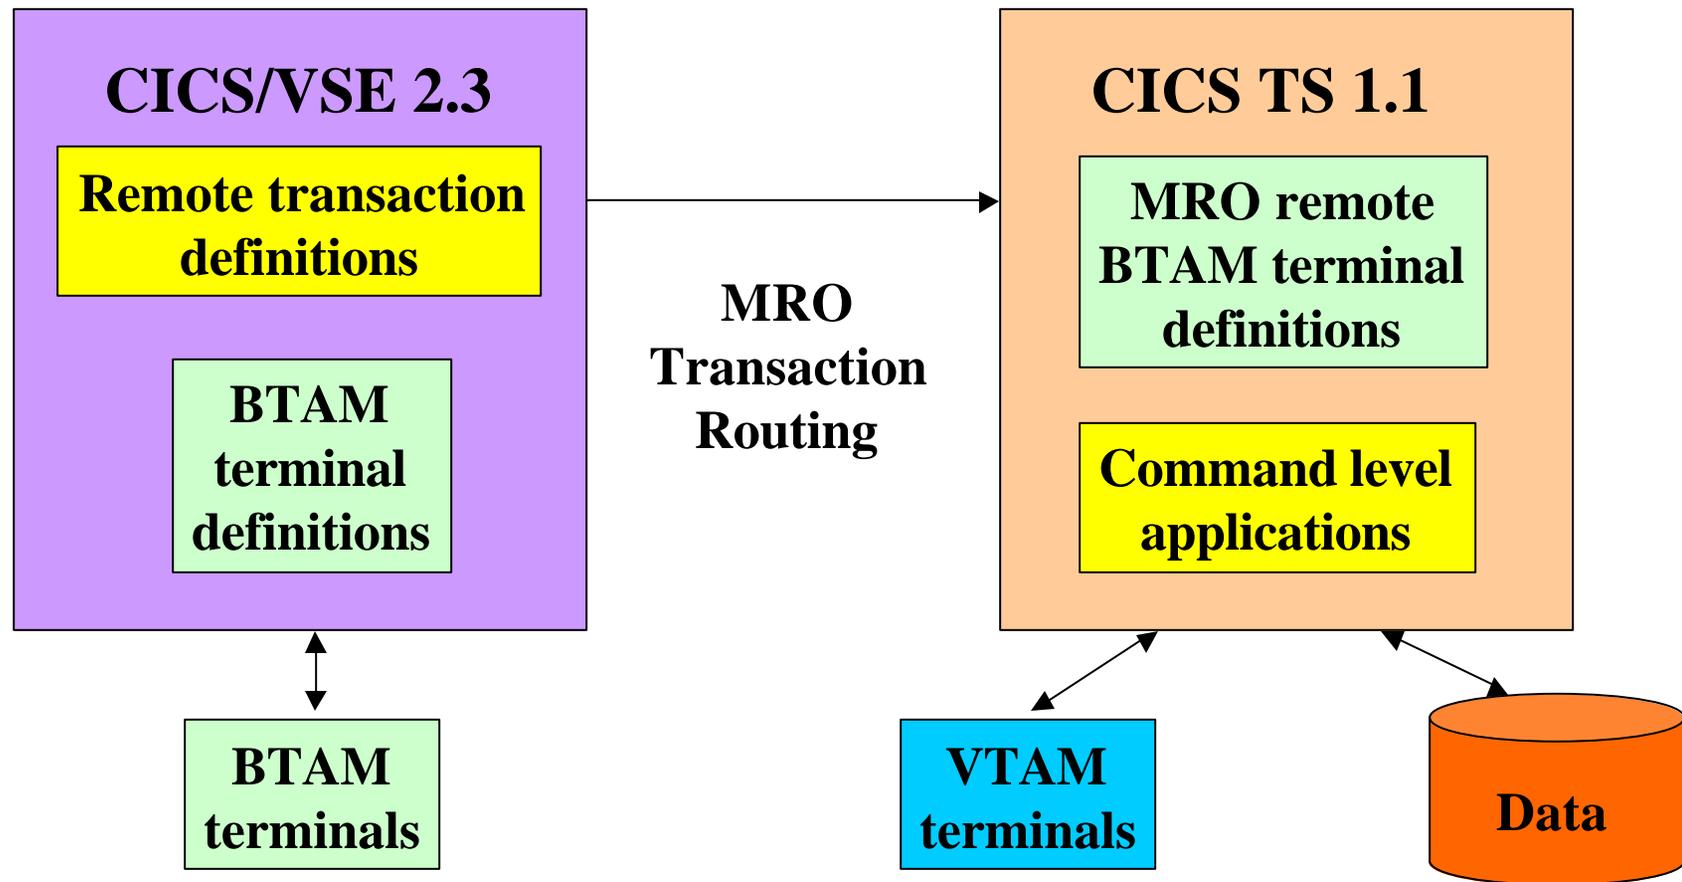

Coexistence scenarios

Separate standalone partitions

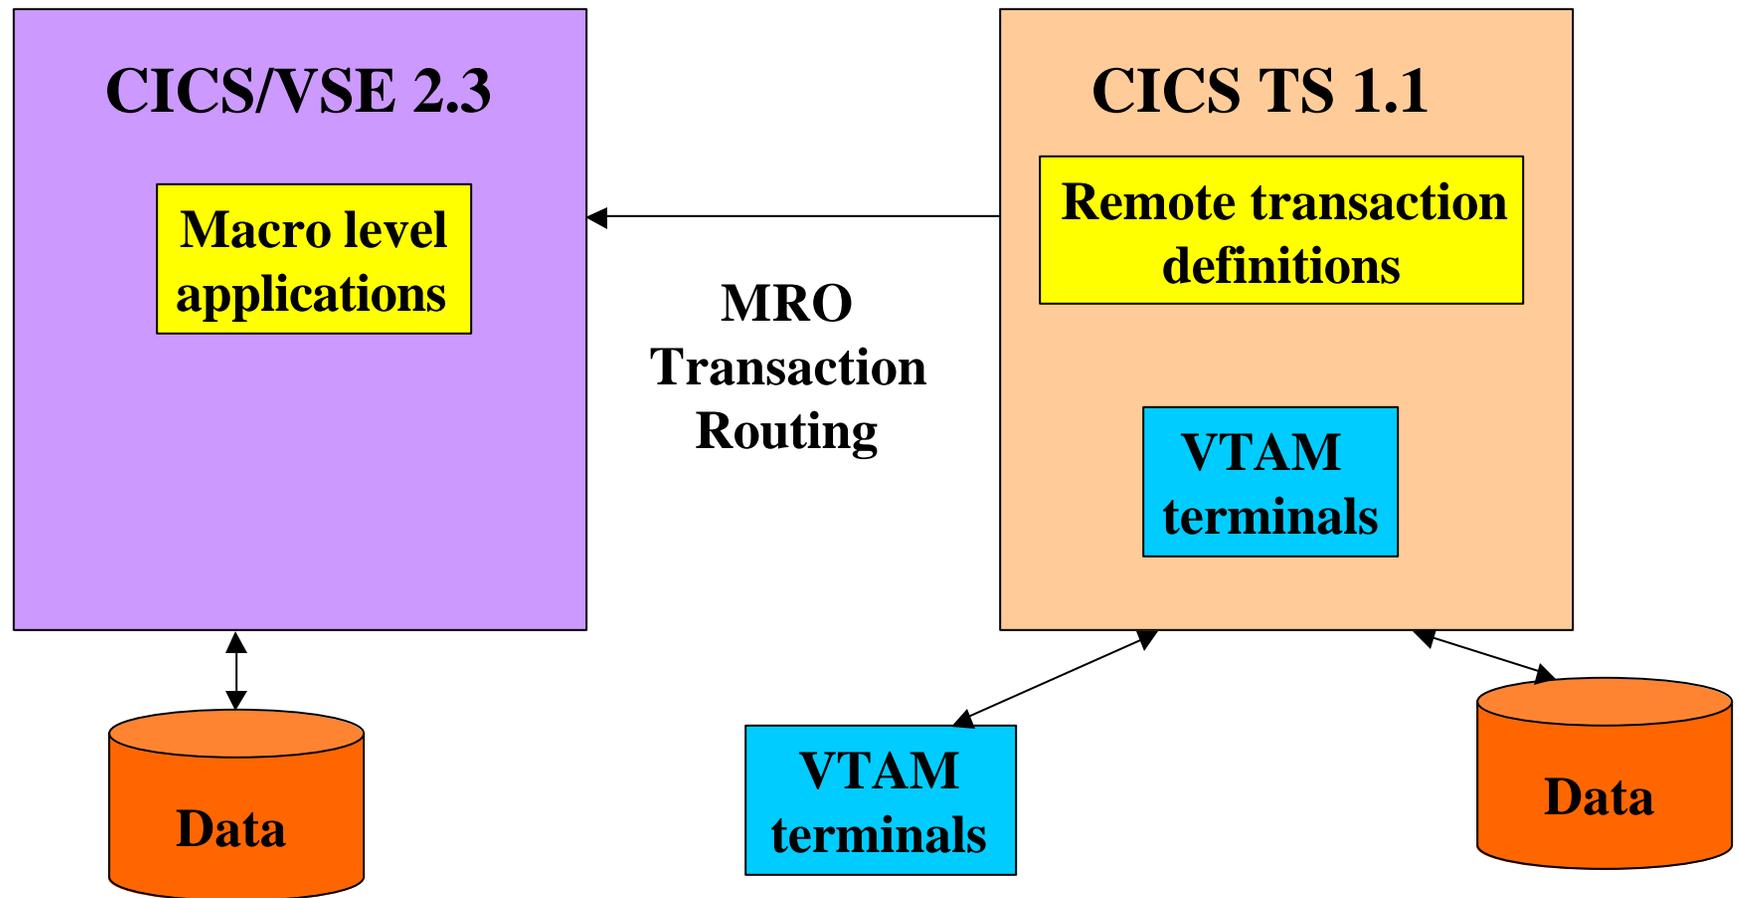

Coexistence scenarios...

BTAM terminal access to CICS TS applications

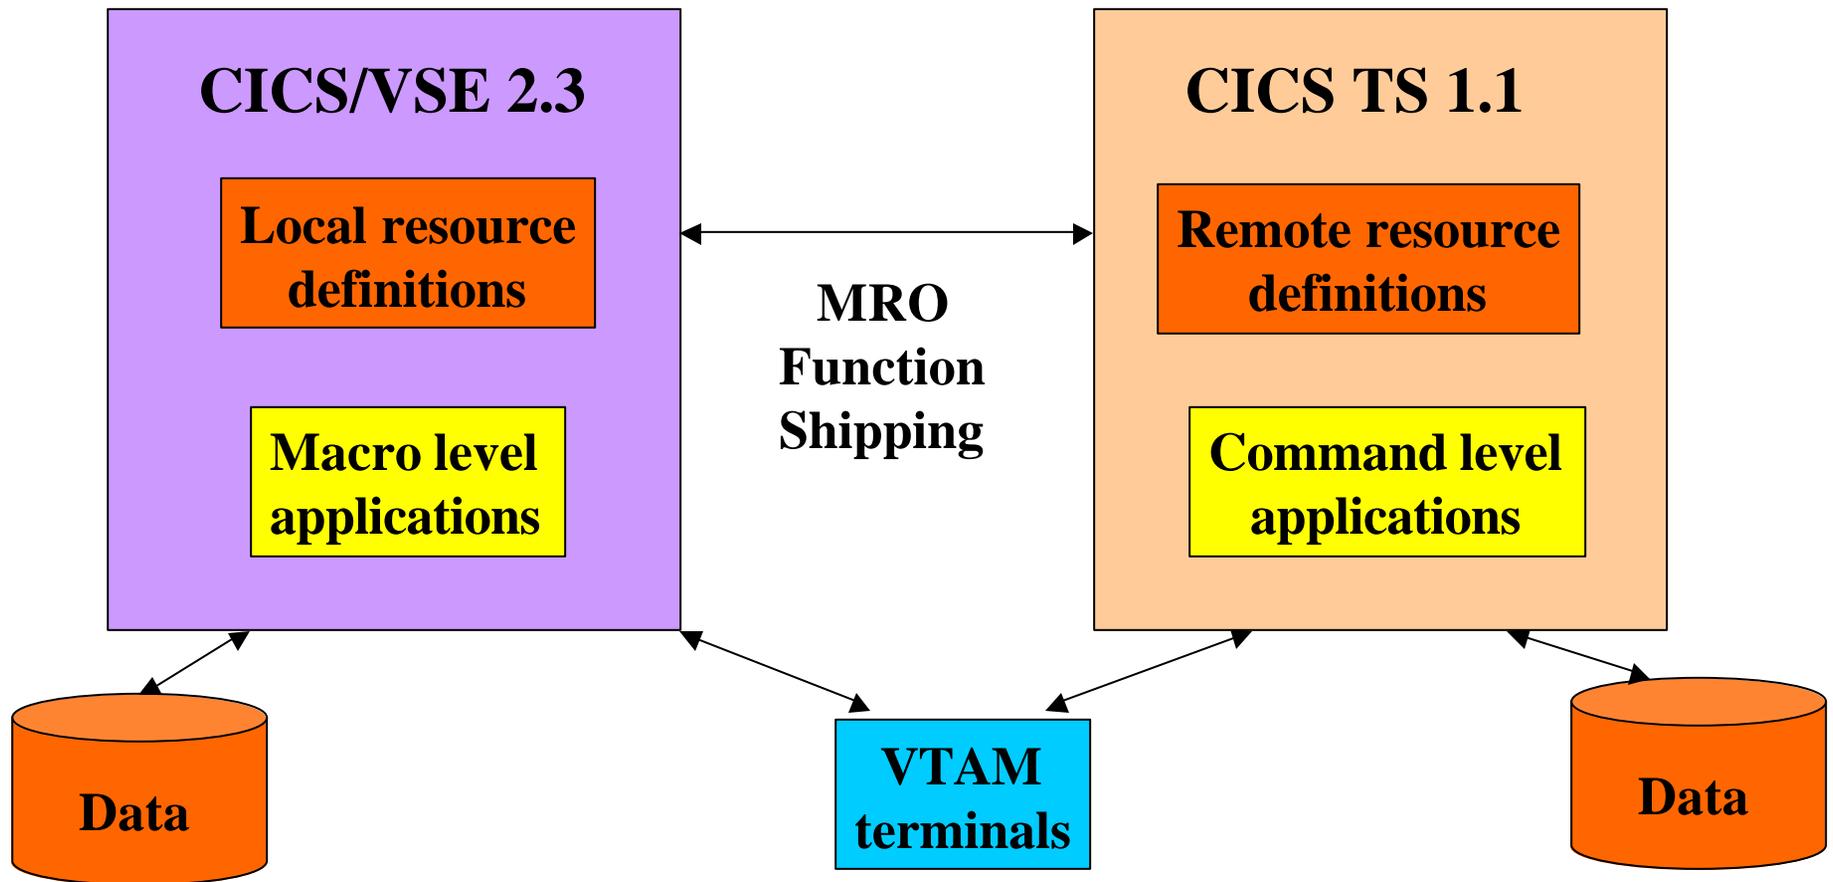

Coexistence scenarios...

CICS TS terminal access to macro level applications

Coexistence scenarios...

CICS TS application access to CICS/VSE data

Coexistence Considerations

- Sharing data between CICS TS and CICS/VSE
 - Do both partitions need access to the same data?
- Application and system definitions for separate CICS releases
 - Maintain separate libraries and compile procs
 - Compile applications and maps using CICS/VSE 2.3 libraries

Sharing Data Resources

- Same considerations as prior releases
- Command level applications
 - Use MRO function shipping between CICS partitions to ensure data access integrity
 - FCT, transient data, temporary storage, DL/I, data tables, EXEC START
 - CICS/VSE 2.3 access to shared data tables through function shipping request to CICS TS

Sharing Data Resources...

- Macro level applications
 - No support for MRO function shipping
 - Data must reside in same partition as application

Sharing the CSD

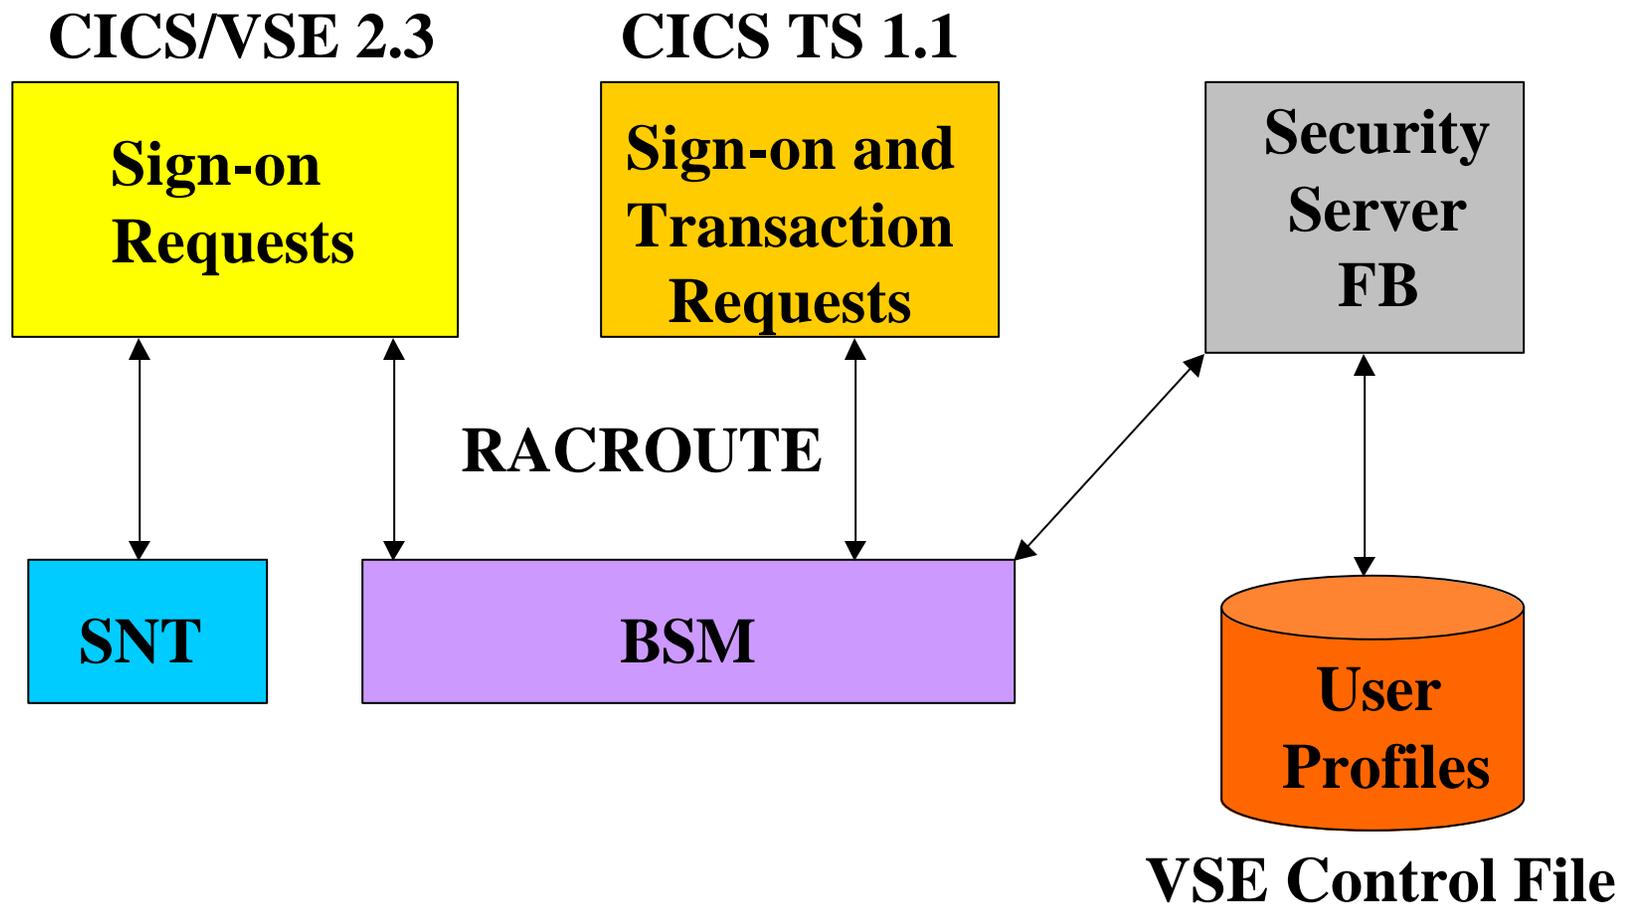

- Support to share CSD between CICS/VSE 2.3 and CICS TS
 - Update with CEDA from CICS TS or DFHCSDUP
 - | Supports updating CICS/VSE parameters
 - Define as read-only to CICS/VSE
 - Compatibility groups
 - | CICS/VSE 2.3 definitions that are obsolete or incompatible with CICS TS definitions
 - DFHCOMP1, DFHCOMP2 (Report Controller)
 - | Add last in CICS/VSE group list

Sharing the CSD...

- Create separate CSDs for CICS/VSE and CICS TS
 - CICS TS CSD installed with VSE/ESA 2.4+
 - Use CSD from old system
 - Backup from current system and restore on VSE/ESA 2.4+
 - Run DFHCSDUP to upgrade to CICS/VSE 2.3 level
 - Remove ICCF and Interactive Interface entries
 - VSE skeleton SKPREPCO creates new CICS/VSE 2.3 CSD on VSE/ESA 2.4+

Sharing BSM Security

Sharing BSM Security ...

- Implement CICS/VSE 2.3 BSM support
 - Assemble CICS/VSE 2.3 ESM interface modules
 - | DFHXSE and DFHXSSCO
 - | Source supplied in PRD1.BASE as .A books
 - | Macro program assembly
 - See CICS/VSE Customization Guide for DFHXSE example
 - | Requires CICS/VSE production and generation source libraries (PRD2.CICSOLDP, PRD2.CICSOLDG) and VSE generation library (PRD2.GEN1)
 - Add PPT entry for DFHXSSCO

Sharing BSM Security ...

- Implement CICS/VSE 2.3 BSM support ...
 - SNT required with default user entry
 - | DFHSNT TYPE=(ENTRY,DEFAULT)
 - | OPERID, OPERPRIORITY, operator class and transaction security keys taken from default entry if parameters coded in SNT
 - Fields are blank if no parameters coded
 - | Modify DFHXSSCO to use CICS security values from BSM user profiles
 - Specify EXTSEC=YES in SIT

SVA Considerations

- CICS TS modules required in SVA
 - DFHC SVC, DFHDSPEX (mandatory)
 - DFHIRP, DFHCSTE, DFHIRW10 (MRO support)
 - DFHCSEOT (MRO and data tables support)
 - DFHDTSVC, DFHDTSAN (data tables support)
 - DFHCDDAN (XRF)
 - Loaded in BG ASI by \$SVACICS loadlist
- Downward compatible with CICS/VSE 2.3

SVA Considerations...

- CICS/VSE and CICS TS cannot share SVA-eligible modules with the same name
- Load CICS/VSE 2.3 modules in SVA
- Use CICS TS parameters to control SVA access

SVA Considerations...

- CICS TS SVA controls

- SIT SVA=NO

- | SVA-eligible modules loaded in read-only DSAs
 - | SVA is not used except for required modules

- PRVMOD system initialization parameter

- | List of SVA-eligible modules loaded in read-only DSAs if SIT SVA=YES
 - | List of common modules in DFH\$SVEX.J in PRD1.BASE
 - | Input from SYSIPT only

SVA Considerations...

- LE for VSE/ESA modules can be in SVA
 - Shared by CICS/VSE and CICS TS
 - Specify SVA=YES and CICS common SVA modules in PRVMOD for CICS TS
- DL/I
 - DL/I VSE 1.11 SVA controls
 - DLZACT CONFIG SVA=NO
 - SVA-eligible modules loaded in read-only DSAs
 - Specify if CICS/VSE 2.3 uses DL/I DOS/VS 1.10

VSE 2.4+ Support

- CICS/VSE 2.3
 - Optional product on extended base tape
 - Default libraries
 - PRD2.CICSOLDP (production)
 - PRD2.CICSOLDG (generation)
 - Skeletons in ICCF library 59

VSE 2.4+ Support...

- Supplied CICS/VSE 2.3 Skeletons
 - Startup job – SKCICSOL
 - CICS/VSE 2.3 system file definitions
 - | SKPREPCO – creates CICS/VSE 2.3 CSD and other CICS/VSE system files
 - | SKPREPSO – shares CICS TS CSD and creates other CICS/VSE system files
 - | SKJOURO – format CICS/VSE journal files

VSE 2.4+ Support...

- Supplied CICS/VSE 2.3 Skeletons...
 - CICS tables
 - | DFHxxxCO
 - DCT, FCT, JCT, SNT, PPT, PCT, SIT, TST, TCT, XLT
 - | DFHxxxSO
 - PCT and PPT for use with shared CICS TS CSD
 - | DFHPLTPO, DFHPLTSO
 - Auxtrace and dump dataset print jobs
 - | DFHAUXOL, SKCIDUMP

VSE 2.4+ Support...

- Supplied CICS/VSE 2.3 Skeletons...
 - CICS User Replaceable Modules
 - | Autoinstall program (IESZATCO)
 - | Node error program (IESZNEPO)

VSE 2.4+ Support...

- Documentation to create a coexistence environment
 - VSE/ESA Administration manual
 - | CICS/VSE setup and tailoring
 - | Definitions for MRO connections to CICS TS

Summary

- Coexistence environment to support withdrawn functions
 - Facilitates migration to CICS TS
- CICS/VSE coexistence release
 - Run as separate, independent partition or interconnected to CICS TS with MRO
- VSE/ESA 2.4+ support for installation and tailoring

Available CICS TS Classes

- CICS TS Migration - A3731

- What you need to know to migrate to CICS TS

- Hands-on machine labs

- 3 day class

- Chicago 5/6-8

- Atlanta 7/17-19

Available CICS TS Classes...

- CICS TS Tuning and Problem Determination
- A3732

- Getting the best performance from CICS TS
- Handling dumps, abends, traces, and so forth
- Hands-on machine labs
- 3 day class

WAVV	4/17-19
Dallas	6/19-21
Atlanta	8/12-14

Available CICS TS Classes...

- CICS TS Under the Covers - A3733
 - Using new function in CICS TS
 - Understanding more about how it works
 - Hands-on machine labs
 - 2 day class
 - Dallas 6/17-18
 - Atlanta 8/15-16
