Topics

- What's new
 - Restructured CICS
 - Problem Determination facilities
- CEMT and CETR transactions
- CICS TS Trace
- CICS TS System Dumps
- Summary

What's New

- CICS Transaction Server for VSE/ESA 1.1
 - Restructured CICS product
 - New domain structure
 - Based on CICS for MVS/ESA 4.1 + function from CICS TS for OS/390
 - Code base ported from OS/390
 - Uses OS/390 "family" API

What's New...

- Restructure of CICS into domains
 - More 31-bit exploitation
 - Standardized interfaces
 - Improved CICS code quality
 - Better serviceability and problem determination
 - Enhances CICS use of extended architecture
 - Object code only (OCO) modules

What's New...

■ CICS TS Problem Determination Facilities

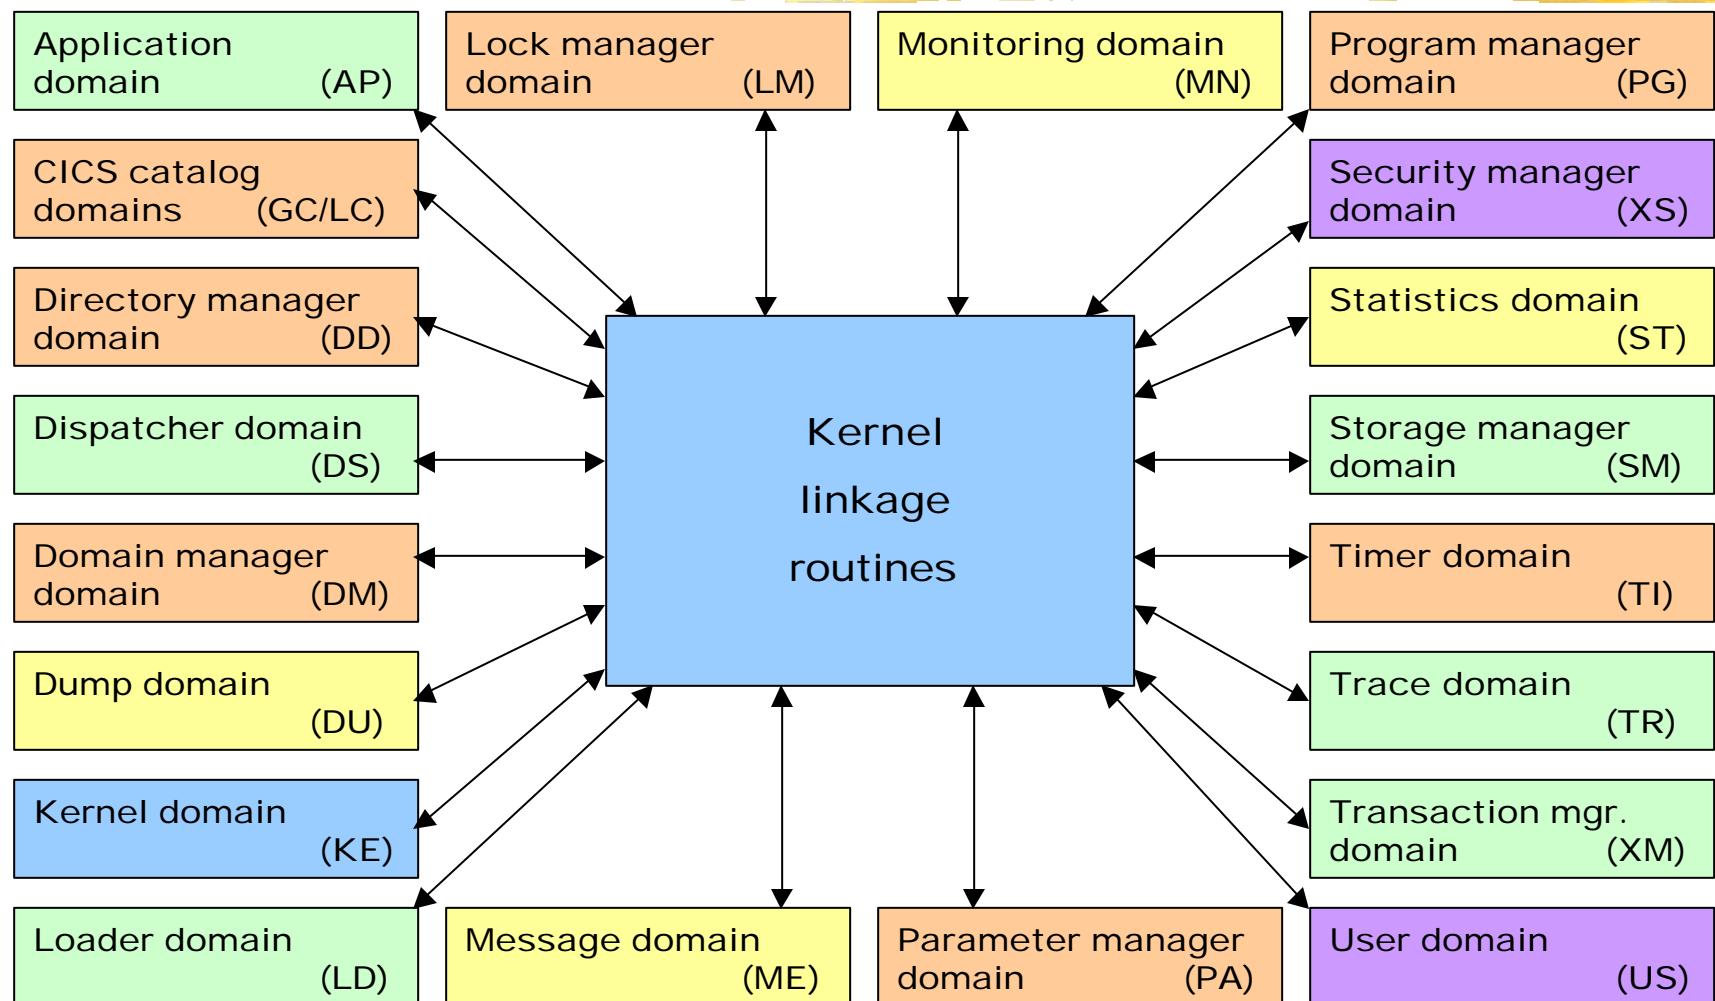

- Enhanced in CICS TS
- More information in trace and dumps
- More user controls for trace and dumps
- New dump and trace utility programs
- New and changed debugging transactions

Restructured CICS

- Standard interfaces between domains
 - Each domain responsible for specific functions and associated data
 - Domain gate is entry point into a domain
 - “Domain calls” used for communication and transfer of data between domains
 - Kernel linkage routines used for routing calls

Restructured CICS...

Restructured CICS...

- Standard interfaces between domains
 - Two character domain identifier used in CICS trace, formatted dumps, and messages

Trace Example

```
05045 1 AP 0590 APXM ENTRY TRANSACTION_TERMINATION
XM      1 AP 0591 APXM EXIT   TRANSACTION_TERMINATION/OK
          └── Application domain
          └── Transaction manager domain
```

Restructured CICS...

Formatted dump Example

```
====AP: AP DOMAIN TRANSACTION SUMMARY  
.  
====DS: DISPATCHER DOMAIN - SUMMARY  
.  
====KE: Kernel Domain KE_TASK Summary  
.  
==KE: KE Domain Error Table Summary  
.  
====XM: TRANSACTION MANAGER DOMAIN - SUMMARY  
.  
==XM: GLOBAL STATE SUMMARY  
.  
==XM: TRANSACTION SUMMARY
```

Restructured CICS...

Message Examples

F2 0096 DFHAP1203I DBDCCICS Language Environment for VSE/ESA is being initialized.

F2 0096 DFHSI8430I DBDCCICS About to link to PLT programs during the third stage of initialization.

F2 0096 DFHSI8434I DBDCCICS Control returned from PLT programs during the third stage of initialization.

F2 0096 DFHSI1517 DBDCCICS Control is being given to CICS.

Domain identifier

Restructured CICS...

■ Kernel domain

- Main CICS control structure
- Tracks existence and status of domains
- Involved in every domain call
- Intercepts errors and invokes error recover routines for all domains
 - Program checks, runaway tasks, operating system abends, internal errors

Restructured CICS...

Kernel domain

- | Manages tasks in task table
 - | Kernel number assigned to each system task, user task and TCB
 - Different number than transaction number
 - | Linkage stack for each task
 - Calls to programs
 - Link and return register save areas

Restructured CICS...

- Transaction manager domain
 - Controls creation, termination, inquire and purging of tasks
 - Assigns transaction number to task
 - Manages transaction definitions and transaction classes

Restructured CICS...

■ Dispatcher domain

- Controls attaching, running and detaching of user and system tasks
 - Attaches tasks to dispatcher and kernel domains
 - User task attached only to dispatcher domain if at MXT limit
 - Handles task priority, suspend and resume
- Schedules VSE subtasks

Restructured CICS...

■ Application domain

- Where application programs run
- Contains parts of CICS that are not restructured
- New interfaces between unstructured components and other domains
 - Example: KC interface for task control program (DFHKCP) to issue dispatcher and transaction manager domain calls

Restructured CICS...

■ Application domain

■ Familiar control blocks

- | Common Systems Area (CSA)
- | Common Work Area (CWA)
- | Task Control Area (TCA)
- | Task Work Area (TWA)
- | TCT Terminal Entry (TCTTE)
- | TCT User Area (TCTUA)
- | Terminal Input/Output Area (TIOA)
- | Most have changed

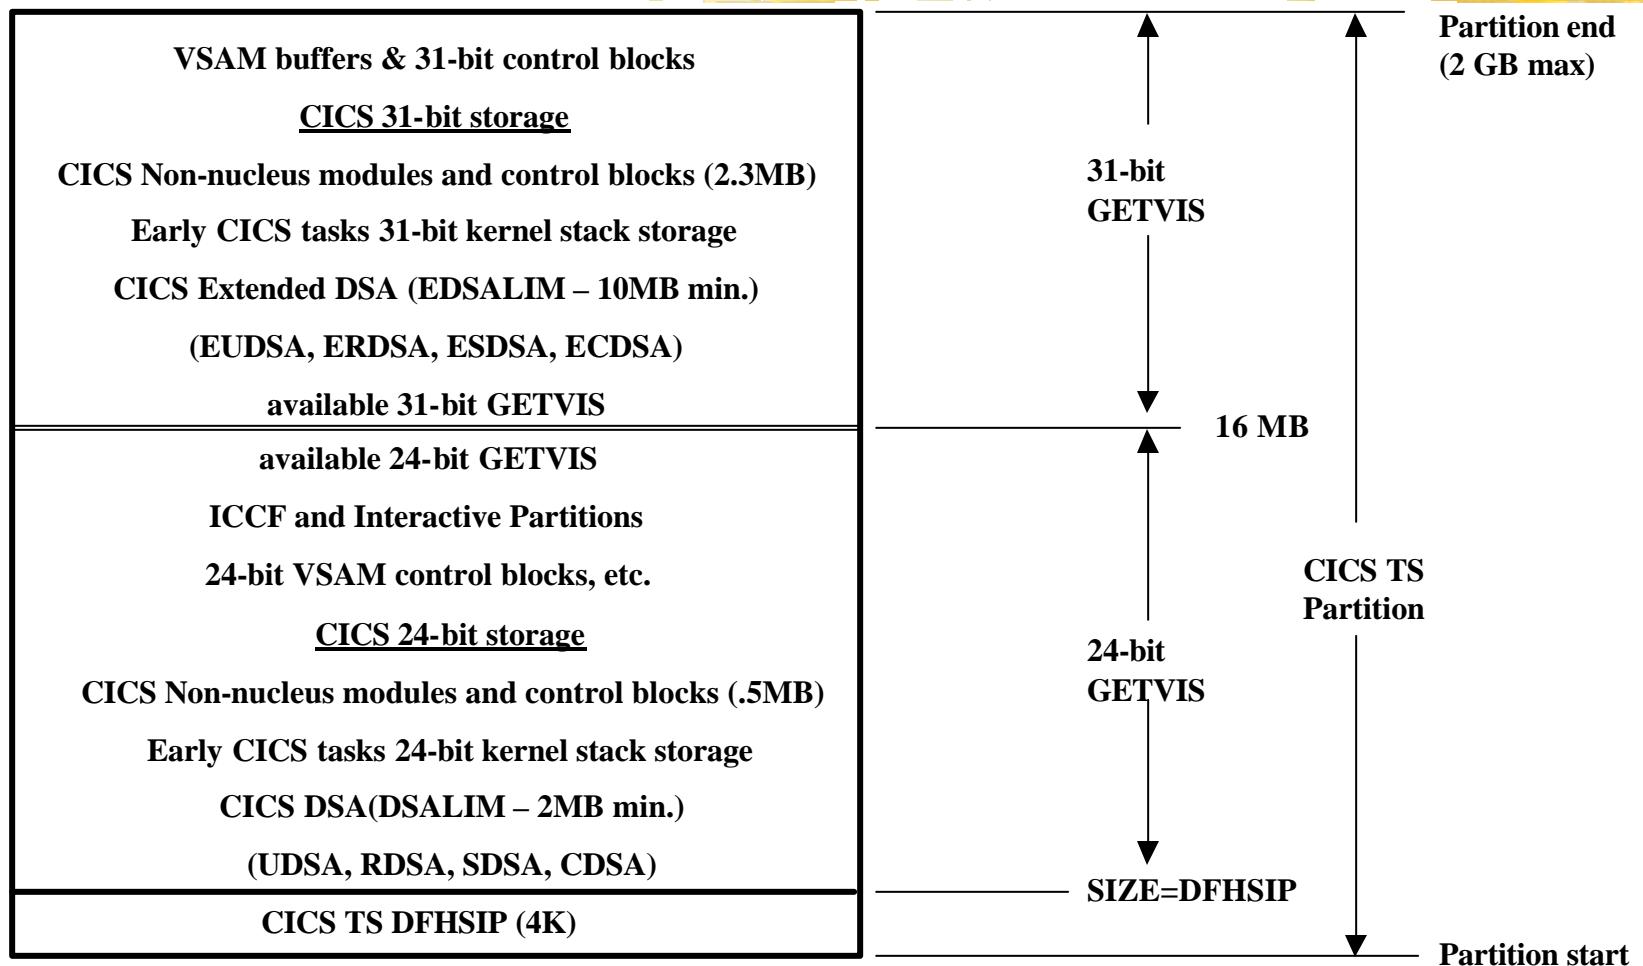

Restructured CICS...

■ CICS TS Partition Storage

- Most of CICS nucleus above 16 MB line
- All major CICS control blocks above 16 MB line
- 8 Dynamic Storage Areas (DSA)
 - 4 DSAs above 16 MB line in extended (31-bit) DSA (EDSA)
 - 4 DSAs below 16 MB line in 24-bit DSA

Restructured CICS...

CICS Transaction Server Partition

Restructured CICS...

- Dynamic Storage Areas
 - CDSA and ECDSA
 - CICS-key non-reentrant programs, control blocks and task-lifetime storage
 - UDSA and EUDSA
 - User-key task-lifetime storage
 - SDSA and ESDSA
 - User-key non-reentrant programs and EXEC CICS GETMAIN....SHARED storage
 - RDSA and ERDSA
 - All SVA-eligible programs not in SVA

Restructured CICS...

■ Dynamic Storage Areas

- Short-on-Storage (SOS) condition
 - Insufficient storage in DSA to satisfy unconditional GETMAIN request
 - Can occur in any of DSAs
 - DFHSM0131 - SOS in 24-bit DSAs
 - DFHSM0133 - SOS in 31-bit DSAs

CEMT Transaction

- System and DSA settings
 - CEMT INQ SYSTEM
 - CEMT INQ DSA
- Information about tasks
 - CEMT INQ TASK
- Request CICS system dump
 - CEMT PERFORM SNAP
- Control system dumps

CEMT Transaction...

CEMT INQUIRE SYSTEM

CICS TS Trace

■ Trace Recording Facilities

■ CICS internal trace

- | Allocated in CICS partition 31-bit GETVIS
- | Written in system dumps

■ CICS auxiliary trace

- | Written to sequential dataset
 - SAM dataset, VSAM-managed SAM or tape

■ CICS transaction trace (new in CICS TS)

- | Allocated in CICS partition 31-bit GETVIS
- | Written in transaction dumps

CICS TS Trace...

- Types of trace
 - Standard trace
 - | Predefined trace points in CICS modules
 - | Trace of all tasks and functions in CICS
 - Special trace
 - | Tracing by specific task and terminal
 - | Controlled by CCTR transaction

CICS TS Trace...

■ Types of trace...

■ Exception trace

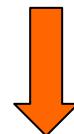

- | First failure data capture points in CICS logic
- | Cannot be suppressed

■ User trace

- | User application requested trace entries
 - EXEC CICS ENTER TRACENUM
- | User application exception trace entries
 - EXEC CICS ENTER TRACENUM EXCEPTION
 - Cannot be suppressed

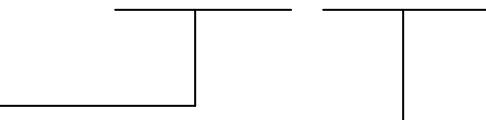

CICS TS Trace...

Exception trace entries

```
14404 1 AP 0001 USER *EXCU APPLICATION-PROGRAM-EXCEPTION MAPKEY 111111
14404 1 AP 1942 API *EXC* Program-Check           START_PROGRAM,SAMPASRA,CEDF,...
14404 1 AP 0781 SRP *EXC* ABEND_ASRA             SAMPASRA,000009D4,CICS
```

Failing Program

Displacement into
Program of failing instruction

CICS TS System Dumps

- Created by system abend or CEMT request
 - Dump of CICS partition storage
- Written to VSE dump library SYSDUMP
- Written to SYSLST if dump library full
 - Suppress with OPTION SYSDUMPC on VSE/ESA 2.4 and above
- Formatted by Info/Analysis and CICS dump exit program

CICS TS System Dumps...

- New CICS dump exit program
 - DFHPD410 replaces DFHDAP from CICS/VSE
 - Formats CICS TS dumps only
 - Formatting levels
 - Default level for all components (DEF={0|1|2|3})
 - Selective by CICS component
 - Suppress formatting (xx=0)
 - Summary information (xx=1)
 - Full formatting of control blocks (xx=2)
 - Both summary and full formatting (xx=3)

CICS TS System Dumps...

```
// JOB DFHPD410  ANALYZE CICS TS DUMP
// EXEC PROC=DTRINFOA
// EXEC INFOANA,SIZE=INFOANA,OS390
      SELECT DUMP MANAGEMENT
          DUMP NAME SYSDUMP.F2.DF200012
              RETURN
      SELECT DUMP VIEWING
          CALL DFHPD410 DATA KE=3,DS=3,TR=3,LD=3
              RETURN
          DUMP NAME SYSDUMP.F2.DF200012
      SELECT DUMP VIEWING
          PRINT FORMAT
              RETURN
      SELECT END
/*
/&
```

CICS TS System Dumps...

■ CICS dump tables

- Defined with CEMT and EXEC CICS SET
 - CEMT or EXEC CICS INQ|SET TRDUMPCODE
 - CEMT or EXEC CICS INQ|SET SYDUMPCODE
- Options based on dump codes
 - Suppress dump
 - Maximum number of dumps CICS will take
 - Terminate CICS after occurrence

CICS TS System Dumps...

■ What to format

- Start with summary (xx=1)
- Trace, Kernel and Transaction manager domains (KE=1, XM=1, TR=1)
- Hung tasks or system
 - Dispatcher domain (DS=1) and other related areas
- Storage problems
 - Application (AP=) and storage manager (SM=) domains

CICS TS System Dumps...

Currently SOS above 16M:	NO

Summary

- More functions in CICS TS to facilitate system problem determination
- New trace and dump options
- New and changed control transactions
- More user controls
- More granularity
- Knowledge of tools will help resolve problems faster

Available CICS TS Classes

- CICS TS Tuning and Problem Determination
 - A3732

- Getting the best performance from CICS TS
- Handling dumps, abends, traces, and so forth
- Hands-on machine labs
- 3 day class

WAVV 4/17-19

Dallas 6/19-21

Atlanta 8/12-14

Available CICS TS Classes...

■ CICS TS Under the Covers - A3733

- Using new function in CICS TS
- Understanding more about how it works
- Hands-on machine labs
- 2 day class

Dallas 6/17-18

Atlanta 8/15-16

Available CICS TS Classes...

■ CICS TS Migration - A3731

- What you need to know to migrate to CICS TS
- Hands-on machine labs
- 3 day class

Chicago 5/6-8

Atlanta 7/17-19
