

APAR PK10699 - PTF UK06576

This PTF establishes new dialogs for the enhanced security concept introduced with z/VSE

3.1.1. After PTF application you must perform following steps **in the described order**:

1. Logon with user SYSA and press PF6 in dialog fastpath
212 - Maintain Selection Panels and
213 - Maintain Application Profiles.
2. To update the CSD file, run skeleton SKCSDFIL for DBDCCICS and SKCSDFC2 for PRODCICS. After the update, install groups VSESPG and FCTSP on DBDCCICS, VSESPG and FCTC2 on PRODCICS, or recycle your CICS subsystem(s).
3. Add your existing users to the new groups using dialog Maintain User Profiles (fastpath 211) PF6=GROUPS.
4. To prepare the merge of the new security transactions into your existing security definitions (old concept), run procedure IPFTABLE

```
// EXEC REXX=IPFTABLE, PARM=' IJSYSRS.SYSLIB.DTSECTXS.A          *  
                          IJSYSRS.SYSLIB.DTRISEC.U'
```

(make sure a continuation sign is in column 72).
5. Use the MERGE function on panel TAS\$SECF - fastpath 285
- do N O T migrate in this step.
6. Only after you have merged, you may migrate to the new security concept using the dialog fastpath 285.
