

SF99434: 720 Db2 Web Query for i V2.2.1

PTF Group Level: 9

Last Updated: 6/22/20

How to Display: WRKPTFGRP SF99434

Description: IBM Db2 Web Query for i Group PTF V7R2.

This group delivers the WQX-v221-HF9-Jun.2020 (hotfix 9) level of fixes for Db2 Web Query for i.

Be sure to end Web Query with the ENDWEBQRY command before applying this group PTF.

This group level introduces a redesigned user interface for the Reporting Server. The interface for creating and editing metadata, adding adapter connections, and uploading data has been modernized. Please see the New Features document at <http://ibm.biz/wq-newfeatures> for details on the new interface and for other changes in behavior. After applying this group, user profiles that run a Web Query command must specify a valid LOCALE for their CCSID. For example, if QPGMR issues the STRWEBQRY command in the QSTRUP program, then the QPGMR profile must specify a LOCALE that is valid for its CCSID. If the profile specifies LOCALE(*SYSVAL), then the system value QLOCALE cannot be *NONE. For more information, see

https://www.ibm.com/support/knowledgecenter/en/ssw_ibm_i_73/rzahz/rzahznls.htm.

Users of the Web Query Developer Workbench feature will need to refresh the client on their PC. Download the three files which have been refreshed for this group level in

/qibm/proddata/qwebqry/DeveloperWorkbench in the IFS to the PC, and then run the .exe file.

Planned Update Schedule: Every 4 months
