

SF99115: 610 IBM HTTP Server for i

PTF Group Level: 46

Last Updated: 9/28/15

How to Display: WRKPTFGRP SF99115

Description: IBM HTTP Server for i 6.1 PTF Group. Includes:

- HTTP Server (powered by Apache)
- Net.Data
- Search
- IBM integrated Web application server
- IBM integrated Web services server
- IBM integrated Web services client for ILE
- IBM Navigator for i

Please note(new enhancement added in SF99115 level 18): For the IBM Web Administration GUI interface to function properly you must have the latest group PTF for SF99562, along with 5761JV1 option 11 (J2SE 6.0 32 bit) and 5761SS1 option 33 (Portable Application Solutions Environment) installed.

To utilize the following products in the IBM Web Administration GUI interface 5761JV1 option 11 (Java SE 6 32 bit) and 5761SS1 option 33 (Portable Application Solutions Environment) are required:

- WebSphere Application Server V7.0
- WebSphere Application Server V8.0

For Integrated Application Server to work properly, it is recommended that the NLS settings of the system conforms to the values indicated in this URL -

[http://www-01.ibm.com/support/knowledgecenter/ssw\\_ibm\\_i\\_61/rzahz/rzahznls.htm](http://www-01.ibm.com/support/knowledgecenter/ssw_ibm_i_61/rzahz/rzahznls.htm)

When this group PTF is applied, the IBM Systems Director Navigator for i running on IBM i 6.1 will be refreshed to the same functions and enhancements that are available on IBM i 7.1 (with the exception of specific IBM i 7.1 Operating System enhancements).

When this group PTF is applied, a new system user profile is created. The new system user profile is QWEBADMIN. This is a new IBM supplied user profile and is disabled by default. When this group PTF is applied, the ADMIN4 job running in the QHTTPSVR subsystem, which currently runs with user profile QLWISVR, is changed to run with the new QWEBADMIN user profile. If you have any software installed on your system that tracks all user profiles on the system, especially software that restricts access to system resources based on the user profile being used, you may need to update the software's configuration so that it correctly recognizes the newly created QWEBADMIN user profile.

When this group PTF is applied, a new feature is enabled, which provides the capability to grant users permission to use the IBM Web Administration for i. With this new feature, an Administrator can give users permission to create, manage, and start Web based servers using the IBM Web Administration for i GUI interface. This means users without \*ALLOBJ special authority can create and manage Web based servers if they have been granted permission. The Web based servers include HTTP servers, WebSphere Application Server, integrated Web application server, and Integrated Web services servers.

HTTP Product Information:

<http://www.ibm.com/servers/eserver/iserries/software/http/services/service.html>

The following Group PTF(s) will also be delivered when ordering this

Group PTF.

Related PTF Group(s): SF99562

Planned Update Schedule: Every two to three months

Related PTF Group(s): SF99562

PTF ordering information:
