SF99433:  730 Db2 Web Query for i V2.2.1
PTF Group Level:  13
Last Updated:  3/29/22
How to Display:  WRKPTFGRP SF99433
Description:  IBM Db2 Web Query for i Group PTF V7R3.
This group delivers the WQX-v221-HF13-Mar.2022 (hotfix 13) level of
fixes for Db2 Web Query for i.
Be sure to end Web Query with the ENDWEBQRY command before applying
this group PTF.
This group level introduces a redesigned user interface for the
Reporting Server.  The interface for creating and editing metadata,
adding adapter connections, and uploading data has been modernized.
Please see the New Features document at http://ibm.biz/wq-newfeatures
for details on the new interface and for other changes in behavior.
After applying this group, user profiles that run a Web Query command
must specify a valid LOCALE for their CCSID.  For example, if QPGMR
issues the STRWEBQRY command in the QSTRUP program, then the QPGMR
profile must specify a LOCALE that is valid for its CCSID.  If the
profile specifies LOCALE( *SYSVAL), then the system value QLOCALE
cannot be *NONE.   For more information, see
https://www.ibm.com/support/knowledgecenter/en/ssw_ibm_i_73/rzahz/rzahznls.htm.

Users of the Web Query Developer Workbench feature will need to
refresh the client on their PC.   Download the three files which have
been refreshed for this group level in
/qibm/proddata/qwebqry/DeveloperWorkbench in the IFS to the PC, and
then run the .exe file.
Planned Update Schedule:  Every 4 months
