\*\*\*\*\*ADMIN SERVER INFORMATION\*\*\*\*\*

With the latest updates to the HTTP PTF Group, the ADMIN2 server will no longer be started or enabled by default. This means that the Heritage Navigator will no longer be accessible without the user manually enabling and starting the ADMIN2 server. See the following page for details: <https://www.ibm.com/support/pages/node/6556828>  
The default URL <http://hostname:2001> or <https://hostname:2010> now opens the new IBM Navigator for i. NOTE: The new IBM Navigator for i, leverage new function usage IDs. The old function usage IDs used in the past to restrict users still apply to Heritage Navigator and Access Client Solutions. Because of the number of old function usage IDs there was no practical way to map to the new interface. If you wish to restrict users additionally beyond their user profile authorizations the new function usage IDs need to be applied. Details can be found at: <https://www.ibm.com/support/pages/node/6485853>  
The WAS Liberty Runtime used by the ADMIN Server and other Integrated Application Servers (IAS/IWS) is version 23.0.0.3 in this group. This version of the Liberty server requires a minimum JRE version of 1.8 (Java 8).
