

## Student Scenario Prerequisites

In order to demonstrate the functionality for the next Scenario, the following setup tasks will need to be completed if you have not already done so

1. Enroll an Instructor in one scheduled ILT course (not his own), and one WBT course
2. Manually Enroll that Instructor in a Certificate and Curriculum
3. Add a Course offering that designates this instructor as the approver.
4. Modify the results for the WBT course so that it is completed for the instructor
5. Pre-assign User and Automatic Enrollment profiles to this Instructor
6. **Challenge:** Create two Announcements
  - a. One specific to the Instructor
    - i. Use Attribute as the type and use the Matching string example: "LdapId=msmith" where msmith=User ID.
  - b. One for all users
    - i. Use Attribute as the type and Matching string: "LdapId=\*"
7. **Challenge:** Have an outstanding approval
