TopPage NetObjects

Create Dazzling Web pages in Minutes

for Linux

With TopPage, creating dynamic, professional-quality Web pages is as easy as using a word processing program! Now users don't have to master Web programming to create Web pages. Everything needed to design, personalize and share Websites is available in one easy-to-use software package.

Easy

- Features over 40 built-in templates, or the option to start from scratch!
- Interactive audio tutorial makes understanding each step effortless.
- Type in text, drag-and-drop graphics, build frames, identify links and more!
- Over 2,000 graphics, images and sounds available in the huge built-in library.
- Cut-and-paste documents, spreadsheets, tables and text into page designs.

Instant

- Create life-like animation from still pictures and graphics.
- Customize logos and hot link buttons with a medley of design effects.
- Pictures from digital cameras, scanners, or images in .bmp or .tiff format help personalize the site.
- The latest Web technology can electrify each page: Cascading Style Sheets, Java applets and Dynamic HTML.
- Exciting special effects and multimedia features enhance each page.

Advanced

- Preview each page on the Web – while building the site.
- Automatically check for spelling errors and broken links.
- Upload personalized Web pages to the Internet with easy, interactive file transfers.
- Keep in touch with viewers using on-line forms and questionnaires.
- Make unlimited updates to the site and add new pages.
