## A New Era of Smart

5th May 2014 | Armani Hotel Dubai

# IBM BusinessConnect 2014

A New Era of Smart

## A Smarter Workforce for Business Success

Reg Singh  
IBM Smarter Workforce  
Regional BDE  
Middle East & Turkey

**IBM's DNA**  
We've always done big things for Organizations

**Market Opportunity**  
**71%** CEOs

**Our Impact**  
Help Reinvent Work

# WHY is IBM in HR?

Replacing Guesswork with **Science, Data and Process**

## Smarter Workforce

# The problems with work today

## *Employee challenges*

- Can't find the perfect job or in some cases, any job
- Don't understand the skills they have or need
- Take jobs they aren't ideally suited for
- Plateau at their jobs when they have more to give
- Are not engaged enough to bring out their full potential

## *Employer challenges*

- Can't often fill specific positions
- Don't often create the best working environments
- Struggle to provide mechanisms for effective performance
- Struggle to retain talent especially their best talent
- Don't know how to get the best from their people

# So what's driving this change in Work?

**1** The rise of social in the workplace

**2** The rise of big data and analytics

**3** The rise of cloud & mobile technology

**4** The rise of the independent worker

# 1. The rise of social in the workplace

We are connecting with each other more quickly than ever before, and we're doing it in new ways.

25% | Productivity increase

Source: McKinsey Global Institute, July 2012 - "The Social Economy: Unlocking Value and Productivity Through Social Technologies."

## 2. The rise of big data and analytics

Decisions once made based on limited information and gut feelings are now being made based on insights extracted from the exabytes of information that people and employers publish every day.

63% | See it as a competitive advantage

Source: IBM Institute for Business Value, October 2012 - "Analytics: The real-world use of big data, How innovative enterprises extract value from uncertain data"

## 3. The rise of mobile technology

Now, with almost 75% of the world's population with a mobile device<sup>4</sup>, that information is not only accessible, but available at your fingertips.

75% | Have a mobile device today

Source: Mashable study, July 2012 – “75% of World Has Access to Mobile Phones”

# 4. The rise of the independent worker

More people are striking out on their own and as human capital becomes the leading source of sustained economic value, employers are looking for better ways to partner with independent and non-traditional workers.

30% | Consider themselves not, white or blue collar but no collar employees

Source: Deloitte, 2012 – “Brawn from Brains: Talent, Policy and the Future of American Competitiveness”

Therefore, if we could ***harness the power*** of ***big data and analytics*** with ***human insight, human behavior*** and ***workforce solutions***, along with ***social*** and ***mobile*** technologies, we could bring people and employers together to do more meaningful and valuable work to drive business.

**We call it Smarter Workforce**

# How we differentiate

IBM and Kenexa jointly set us apart in the industry – the only team with social, analytics, behavioral science and services to impact business processes.

# What you care about

How can I **attract and hire** more people just like my top performers?

How can I **bring people into the organization** so they're productive from Day 1?

How can I predict what different segments of my employees need and what **actions to take to optimize business outcomes**?

How do I **develop the next generation of leaders** for a more global, flexible, and diverse workforce?

How do I find real-time, hidden, **game-changing insights from data** available inside and outside my organization?

How do I **gain continuous insight into what my employees think** of the organization?

How do I know **salary planning is aligned with our business strategy**?

How can I rapidly develop, deploy and **optimize skills and capabilities** to match emerging opportunities?

How do I know if I'm **recognizing and rewarding** my employees optimally?

How do I **foster knowledge sharing and collaboration** to drive more innovation?

# Smarter Workforce

REPLACING GUESSWORK WITH PRECISION

## Attract the very best talent get them productive

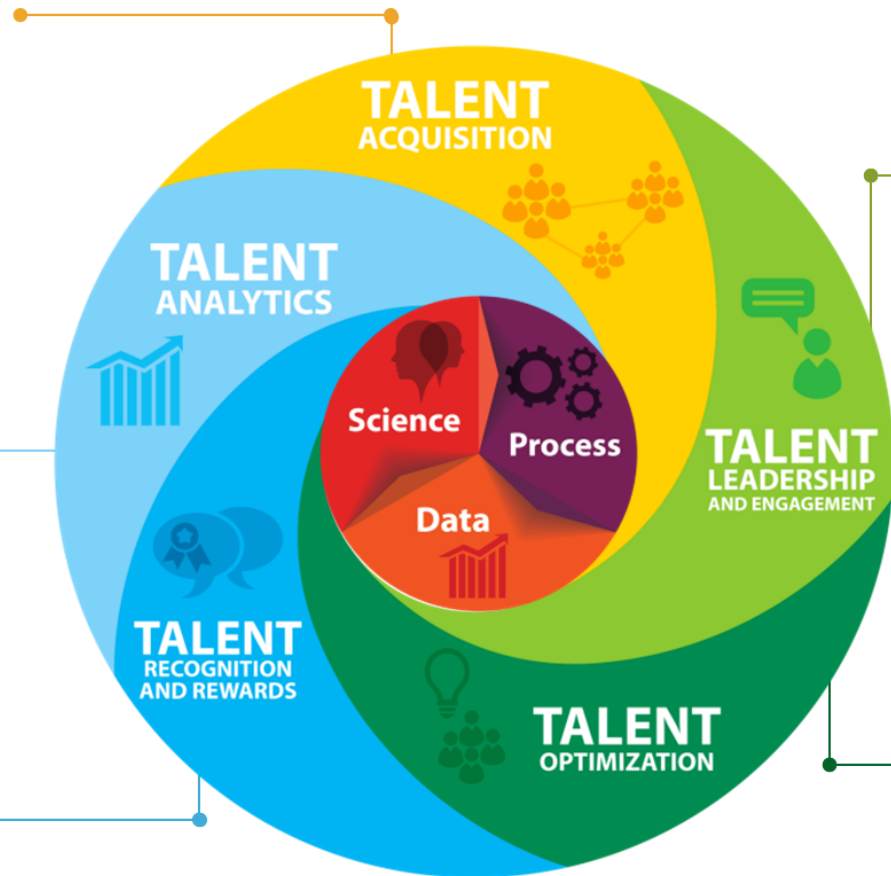

- Employment Branding
- Recruitment Technology
