

Notes / Domino 8

Graeme Povall

Lotus Leader

Middle East , Egypt and Pakistan

Notes / Domino roadmap

Q3 2006

Lotus Notes 7.0.2

- Lotus Notes on a stick
- RSS feed reader
- iCal import and export
- Blog template
- Notes Access for SAP Solutions
- Macintosh support
- Linux support (7.0.1)

Lotus Notes 8.0

- Mail, calendar, contacts step function improvement
- Continuity for Notes users
- Activity centric computing
- Contextual collaboration
- Composite applications
- Windows, Vista and Linux

Q2 2007

Lotus Domino 8.0

- Mail recall
- Optional DB2 support
- Extended Web Services

Lotus Notes 8.0.1

- iCal subscription
- Mac support

2007 / 2008

Lotus Domino 8.0.1

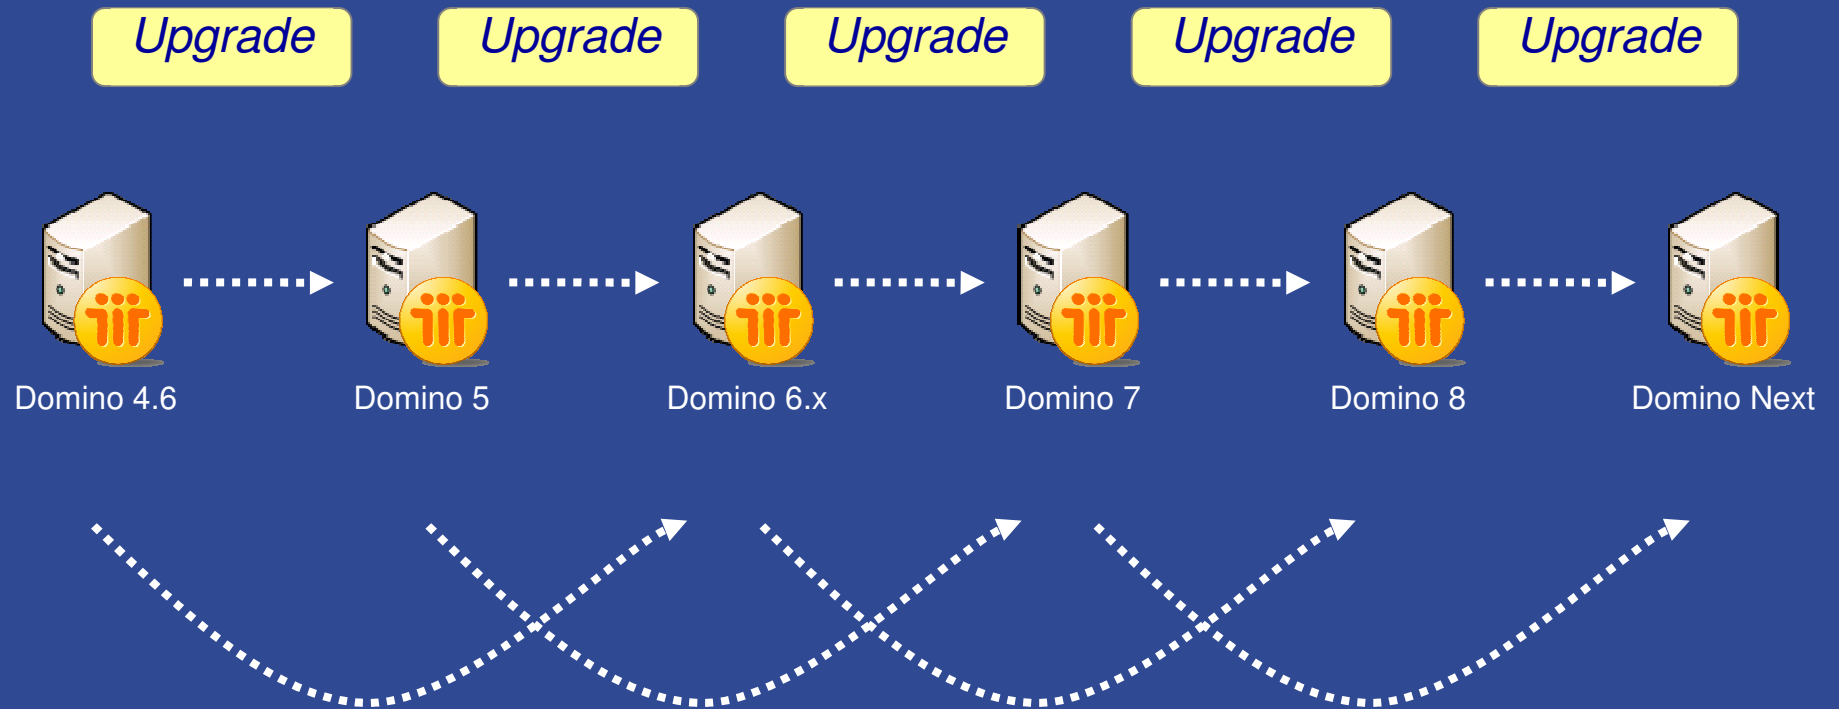

- 64-bit platform exploitation for Windows, AIX and Linux
- FIPS-140 for Notes Mail

Lotus Notes Next Lotus Domino Next

2008 / 2009

Domino upgrade cycle

You can jump versions

Co-existence between versions

Domino 8

- Domino server release to accompany Notes 8
- Messaging enhancements
 - ▶ SPAM Guru
 - ▶ Message recall
 - ▶ Immediate 'Out of Office' reply
- Continued focus on reducing the cost of ownership
 - ▶ Lots of new and improved admin capabilities
- Further performance and scalability improvements
- Native 64-bit versions
 - ▶ But we're keeping the 32-bit versions too
 - ▶ Availability planned for 8.0.1 (Windows) ... Linux may be 8.0.2
 - ▶ Customer choice as to when to make the move
- Further focus on web services and Services Orientated Architecture
- Updated Domino Web Access
- DB2 integration made generally available

Domino Web Access 8

- Updated 'Notes 8' user interface
- More performance enhancements
 - ▶ Further to huge leaps made in version 7
- Single, merged mail template
 - ▶ Domino Web Access and Notes users served from the same template (Mail8.ntf)
- Preview pane
- Portal integration improvements
- Integrated sametime 7.5
- Feed enabled mail files (RSS / ATOM)
- Enhanced spell check engine and dictionary integration
- Customisation – logos, colours, branding

Mail - Microsoft Internet Explorer

 Trash

Hang on, there's more...

- Improved contact management for Domino Web Access and Notes users
- Notes / internet password management improvements
- Calendar filtering
- Default location for resources
- Improved calendar delegation
- Improved out-of-office
- Support for dynamic view column updates
- LTPA2 token support

Lotus Notes 8

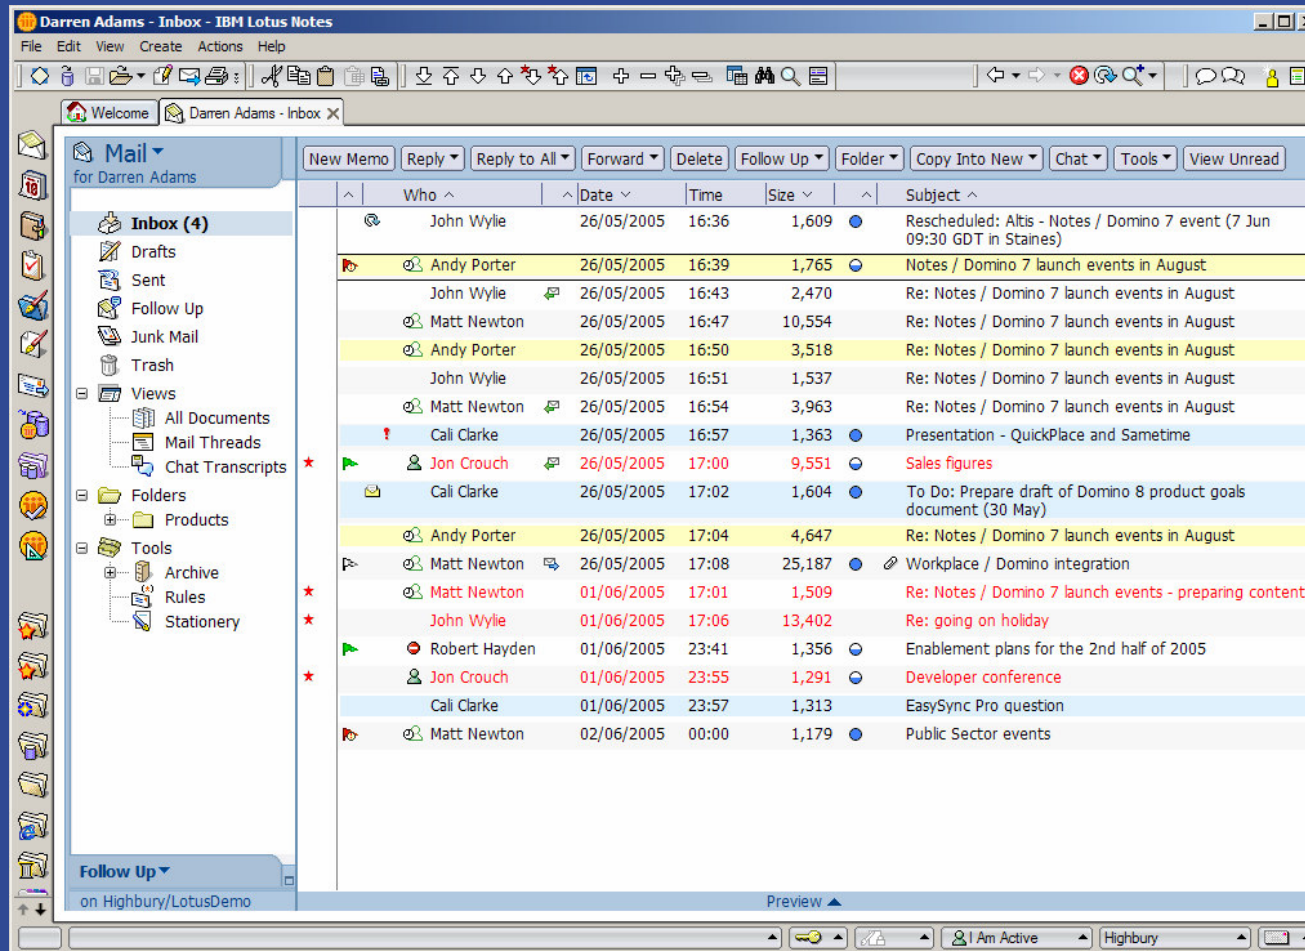

The world's most boring quote...

“All our users like Outlook, they use it at home”

- My response...
- “I don’t believe you... show me the survey results”
- “What survey results?”
- “Well, if you’re convinced that your 5,000 users all like Outlook and all use it at home, you must have some proof, right?”
- “Errrr... no”

However, this perception tells us something important...

...we need to improve the Notes user interface

How have we gone about improving Notes?

- More usability testing than ever before
 - ▶ User feedback labs at Lotusphere 2006 and 2007
- Elected customer design partners to provide input throughout design and development cycles
- Hired some professional design consultants and artists
- Head user interface developer (Mary Beth Raven) has publicly blogged on issues and ideas and requested feedback
- Taken advantage of the Eclipse framework
 - ▶ Advanced tools for building user interface elements
 - ▶ Offers better integration with operating system
 - Windows, Linux, Mac

What else has driven the Notes 8 development?

- Greater demand for converging technologies
 - ▶ Instant messaging, presence awareness, Voice over IP, telephony integration
 - ▶ Unified user experience
 - ▶ Composite applications
 - ▶ Role-based dynamic workplaces
 - ▶ Server-managed clients with minimal desktop touch
- Embracing innovations and open standards [Web 2.0]
 - ▶ Contextual collaboration
 - ▶ New ways of working ... activity-centric computing
 - ▶ Extensibility ... mash-ups
- Lowering cost of ownership while allowing people to be more productive
- Providing choice and flexibility

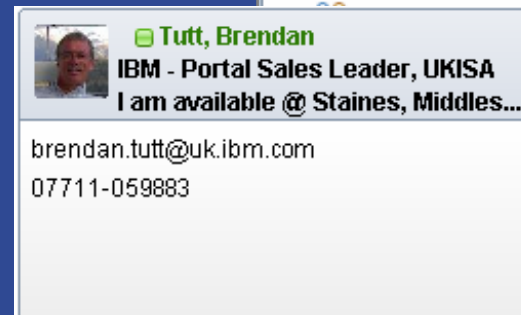

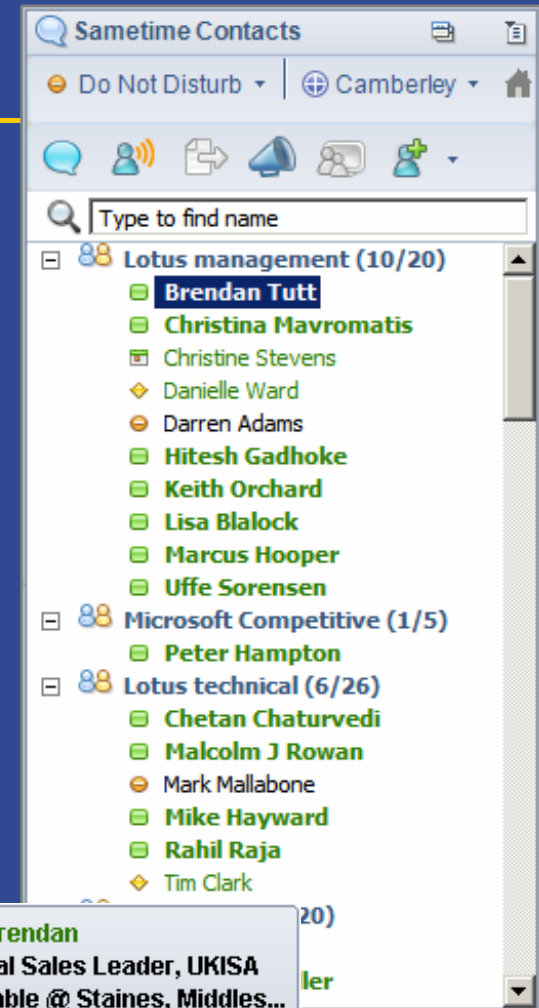

Notes 8 client – reasons to be excited

- It looks great
- Improvements across the board for e-mail, calendar, contacts
- It looks great
- Integrated Sametime 7.5
 - ▶ Single-client experience
- It looks great
- Integrated productivity editors
 - ▶ Spreadsheet, word processor, presentations
- New models for accessing and building applications
 - ▶ Maintain investment in existing Notes applications
 - ▶ Extend, improve, integrate
- Oh, and did I mention it looks great?

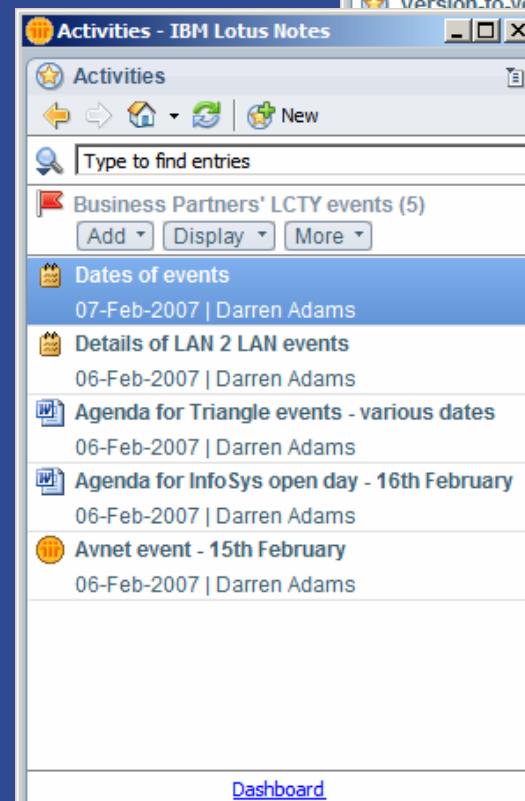

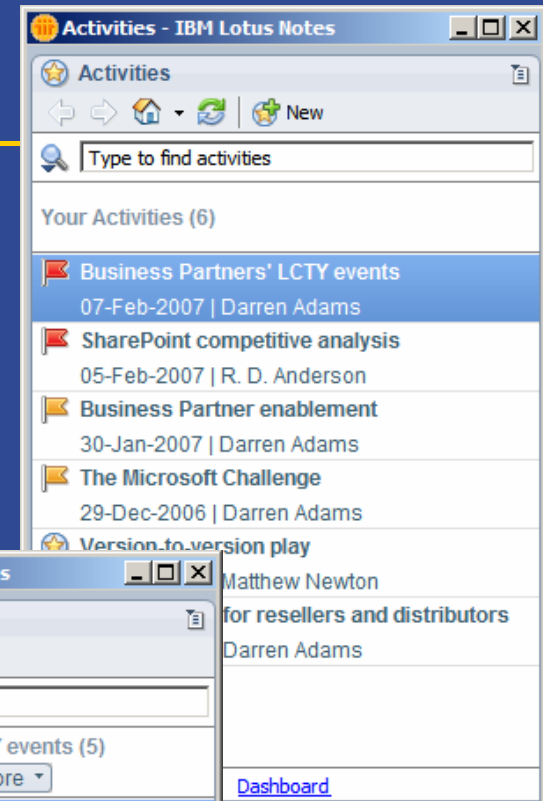

Some key points - Sametime

- Integrated Sametime
 - ▶ Now a single-client experience
 - ▶ Sametime is embedded into the sidebar, drives presence-awareness and instant messaging for the Notes client
 - ▶ It's essentially the Sametime 7.5 code base

Some key points - Activities

- Integration with 'Activities'
 - ▶ Activities are part of Lotus Connections (due Q2 2007)
 - ▶ Activities plug-in provides integration with Notes 8
 - Drag and drop of Notes content and file attachments
 - ▶ Activities [Connections] server is NOT Domino-based

Composite applications

- What are composite applications?
 - ▶ Collection of user-facing components brought together for a specific business purpose
- Programming model supported in Portal and Notes
 - ▶ Surface content from multiple systems
 - ▶ Aggregate and integrate different component types
- Support business flexibility
 - ▶ Mix-n-match and loose coupling
 - ▶ User effectiveness
 - ▶ Remove silos of information

Example

The screenshot displays the IBM Lotus Notes application window. The title bar reads "Notes/Domino 6 and 7 Forum - 2. Author\Threaded - IBM Lotus Notes". The menu bar includes "File", "Edit", "View", "Create", "Actions", "Tools", "Window", and "Help". The toolbar contains various icons for file operations and search. The interface is divided into several panes:

- Left Pane:** "on Local" section with "My Contacts" (Recent Contacts, Groups, By Category, By Company, Trash) and "Other Contacts" (Advanced).
- Address Book:** A list of contacts with "Glenn Cloud" selected. The list includes names from Betty Zechman to Misha Tompkin.
- Contact Card:** A detailed view for Glenn Cloud, including a photo, name, title "IT Renovations - Customer Service Representative", email "gcloud@prenovations.com", phone number "647-555-8901", and other information like "Messaging ID" and "Location".
- Interests:** A list of interests for Glenn Cloud: "Domino Administrator", "Domino Designer", "Domino Server General", and "Notes Client".
- Bottom Pane:** "Customer Forum:" showing a list of forum threads. The selected thread is by Glenn Cloud, titled "Domino Administrator", with a subject "Mail Routing not showing on Server Console (but mail is still moving)".

The bottom status bar shows "Online" and a small "anere 2007" logo in the bottom right corner.

Lotus software
COLLABORATING WITH IBM LOTUS QUICKPLACE 7

QuickPlace value propositions

Instant creation of a collaborative team space

- QuickPlace allows users to instantly create their own team space, modify it for their purpose, and add their own team members... without waiting for action from the IT department.
- Templates (known as PlaceTypes) allow users to create new team spaces which fit their business requirements.

QuickPlace fits into YOUR infrastructure

- QuickPlace is accessed via a web browser, and tightly integrates with Microsoft Office... and not just the latest version (Office 2000, XP, and 2003 supported).
- QuickPlace integrates with any LDAP 3-compliant directory... Active Directory, Domino, Sun One Directory Server, and many others. Users don't have to remember yet another user name and password, and administrators won't have to manage another directory.
- QuickPlace can send and receive e-mail via SMTP, and therefore integrates with any e-mail solution.
- The QuickPlace team calendar integrates with both Lotus Notes and Microsoft Outlook.
- QuickPlace is available on a number of server

- Every item of QuickPlace content can be controlled for reader and editor access, thus providing the content to the right audience.
- A QuickPlace can contain 'rooms' - secure areas which require named access, thus protecting all of the content within.
- QuickPlaces can be used off-line, and the off-line data is fully encrypted.

Collaboration beyond the enterprise

- The pervasive nature of QuickPlace means that partners, suppliers and customers can join the collaborative process. A web browser, a connection to the QuickPlace server and membership in the QuickPlace is all that is required.
- External users can be added to a QuickPlace's membership, even if they are not included in the central integrated directory.
- Integrated presence-awareness and instant messaging allows real-time collaboration to occur beyond the normal boundaries of the enterprise and in the context of the collaborative process.

Julian,

Good to meet you too. It must rank as one of the busiest spheres I've ever been to though!

ILUG is going to be pretty fantastic, I'd get there if you can at all. I agree that we need to move on the UK user group, and I know Darren wants to get moving on it. I think getting together (either electronically, or phone, or in real life) is a very good idea.

Darren - have you any plans for this yet? If there's anything we can do to help out (team room, ST meeting, conf call etc) - just let me know.

Yours,

Warren Elsmore - Technical Director

Lotus Sametime 7.5

To help in developing opportunities for Sametime, I'd recommend a look through the **IBM Business Partner Showcase for Lotus Sametime** which can be found here...

<http://www-306.ibm.com/software/lotus/partnershowcase/sametime/index.html>

This demonstrates the wealth of valuable third-party solutions developed to integrate with Sametime 7.5 and also shows the maturity and industry acceptance for our solution.

Many of the solutions provide audio / video integration, while some such as Zion's **Instant Help** and Instant Technologies' **Instant Queue Manager** (not listed on the showcase yet) provide business value for enterprises looking to improve their customer service and sales efficiency.

QuickPlace fits into YOUR infrastructure

- QuickPlace is accessed via a web browser, and tightly integrates with Microsoft Office... and not just the latest version (Office 2000, XP, and 2003 supported).
- QuickPlace integrates with any LDAP 3-compliant directory... Active Directory, Domino, Sun One Directory Server, and many others. Users don't have to remember yet another user name and password, and administrators won't have to manage another directory.
- QuickPlace can send and receive e-mail via SMTP, and therefore integrates with any e-mail solution.
- The QuickPlace team calendar integrates with both Lotus Notes and Microsoft Outlook.
- QuickPlace is available on a number of server platforms - Windows 2000 / 2003, IBM pSeries, IBM System i, and Sun Solaris.

QuickPlace is customisable

- QuickPlace owners do not have to be developers in order to customise their QuickPlaces. The

- Every item of QuickPlace content can be controlled for reader and editor access, thus providing the content to the right audience.
- A QuickPlace can contain 'rooms' - secure areas which require named access, thus protecting all of the content within.
- QuickPlaces can be used off-line, and the off-line data is fully encrypted.

Collaboration beyond the enterprise

- The pervasive nature of QuickPlace means that partners, suppliers and customers can join the collaborative process. A web browser, a connection to the QuickPlace server and membership in the QuickPlace is all that is required.
- External users can be added to a QuickPlace's membership, even if they are not included in the central integrated directory.
- Integrated presence-awareness and instant messaging allows real-time collaboration to occur beyond the normal boundaries of the enterprise and in the context of the collaborative process.

Notes 8 Top Ten

Your guide to the coolest bits

Top ten?

- Yes, but Notes 8 is so cool...
- “These go to 11”

#1 – message threads

- Improvement to Notes 7 functionality
- Message threads are displayed on the surface of the inbox and mail folders / views
- Works with drafts (I love this)
 - ▶ Create a draft response, it displays as a thread off the original e-mail

▼ 2 messages in this conversation: Knowledge forums

	Robert Gladh	<i>Knowledge forums</i>	Inbox	14/02/2007 12:49
	Darren Adams	<i>As soon as I have a moment I'll get the</i>		14/02/2007 13:44

▼ 2 messages in this conversation: Re: Great to meet you at Lotusphere

	warren.elsmore	<i>Re: Great to meet you at Lotusphere</i>	Inbox	08/02/2007 09:10
	 Darren Adams	<i>Hi all,</i>	Inbox	08/02/2007 23:37

#2 – type-ahead addressing

- Again, improved on Notes 7 functionality
- Uses technology employed in Sametime 7.5
- Live Sametime status
- Looks at most commonly-used contacts

#3 – mail views

- Some new options
- Preview on the right
 - ▶ Which in itself contains some new features such as 'column stacking'
- Conversations or individual messages
- Fully-expanded subject
 - ▶ Whatever the space available, the subject will be given as much room as possible

Hi K,

Online

#4 – security in e-mails

- FACT – spammers use remote image loading to check on live e-mail accounts
- So, Notes 8 allows you to block / allow remote image loading
- Other mail clients like Mozilla Thunderbird do this
- Die spammers die

Grand Opening: Apple Store, Bentall Centre
9:00 a.m., Saturday, 17 February

We created the Apple Store in the same way we create our products: with you in mind. This Saturday, help us celebrate the grand opening of our new store. Come in and talk to us, check out our products, and experience the services that make it easy to get the most out of your Mac

Online

#5 – integrated Sametime 7.5

- Single client experience
 - ▶ Sits in the sidebar or floats
- Drives presence awareness in inbox, calendar, etc
- Has a high level of free baseline functionality
 - ▶ Rich text, smileys, chat history, announcements
- Or you can 'upgrade' to Sametime 7.5
 - ▶ And then you get everything

Darren Adams Hi K, 08/02/2007 12:11:12

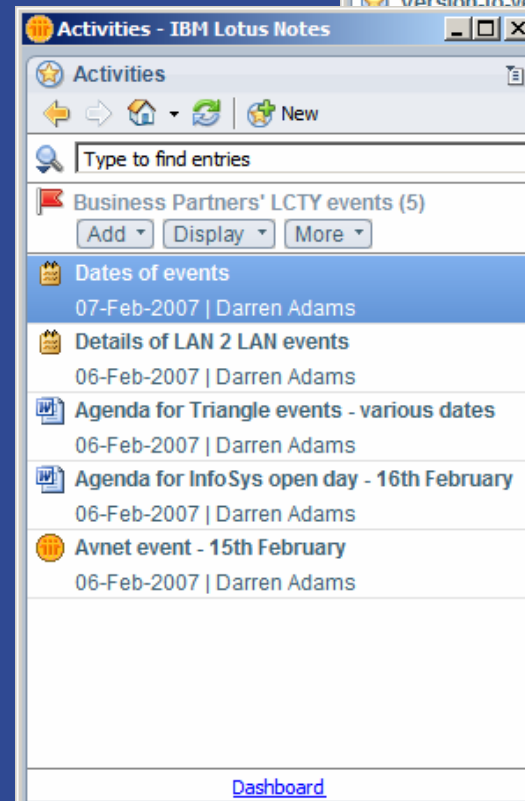

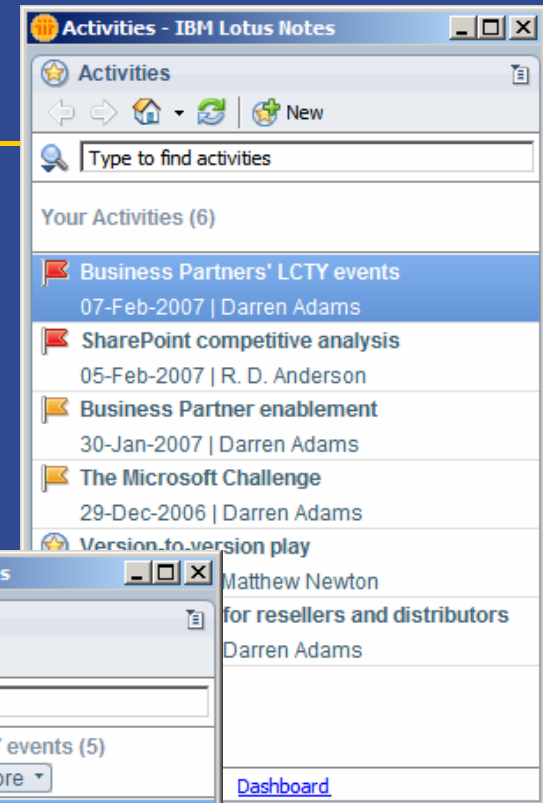

From: Darren Adams/UK/IBM
 To: Kieran O'Byrne/UK/IBM
 Cc: Matthew Newton/UK/IBM, Andy J Porter/UK/IBM
 Date: 08/02/2007 12:11
 Subject: Notes 8 lunch-time sessions at InfoSys

Hi K,

I was talking to Kevin Metcalfe about what he wanted for these sessions and we agreed the best approach was to do a 'best-of' top 10 features overview. Basically slide - demo - slide - demo and so

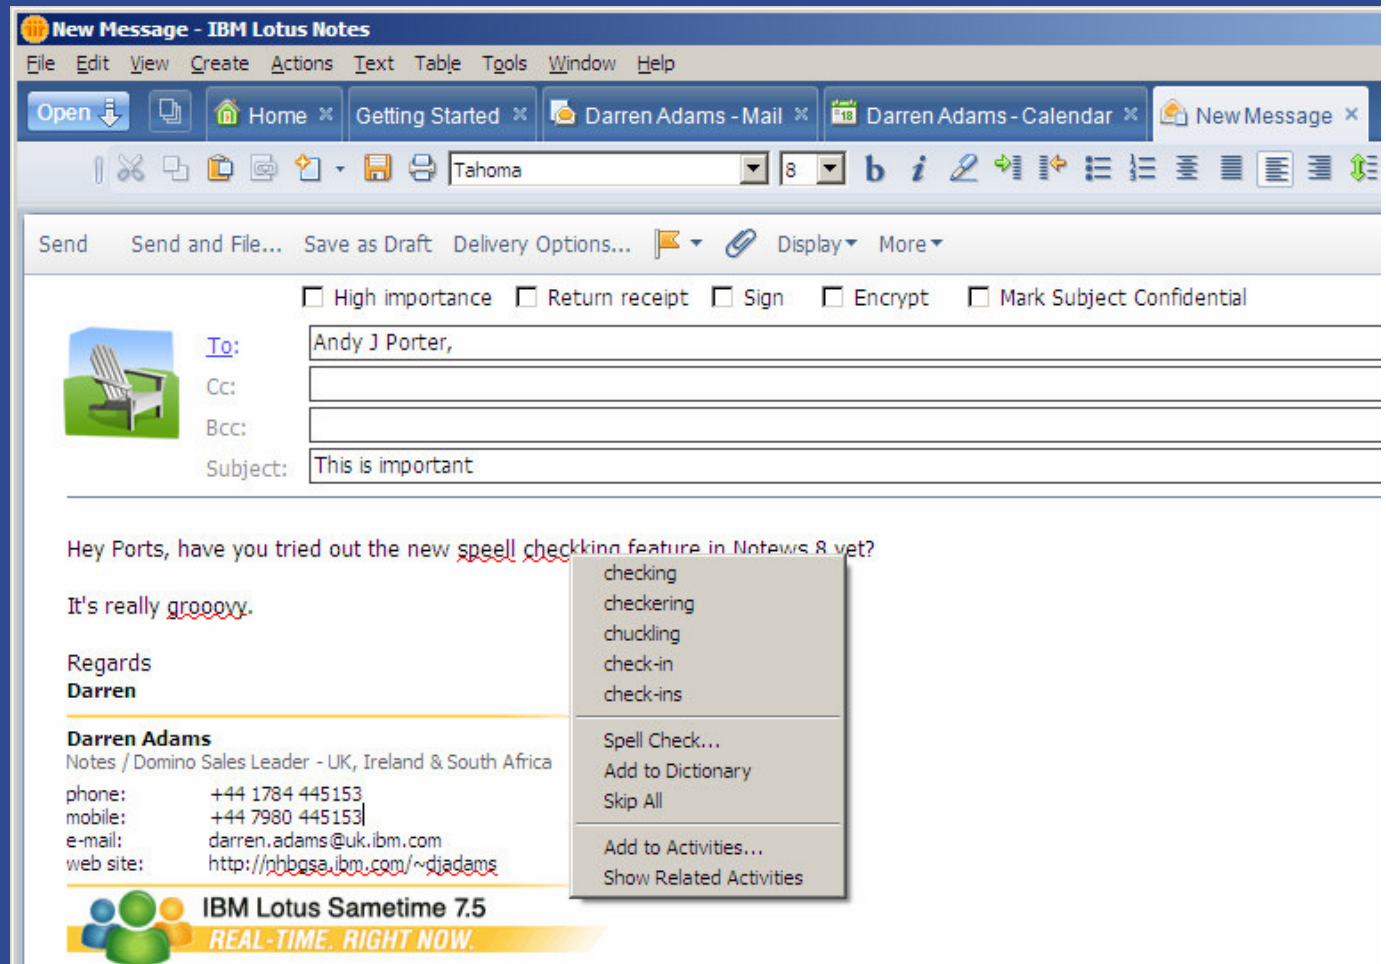

#6 – integration with Activities

- Activities are part of Lotus Connections, which aren't free
 - ▶ Sorry
- Manage your activities, tasks and e-mails from a single client
- Drag 'n' drop e-mails, documents, contacts, appointments and file attachments directly onto an activity to share with the team

#7 – spell checking as you type

- It checks the spelling... as you type
- Right-click to correct
- Awesome

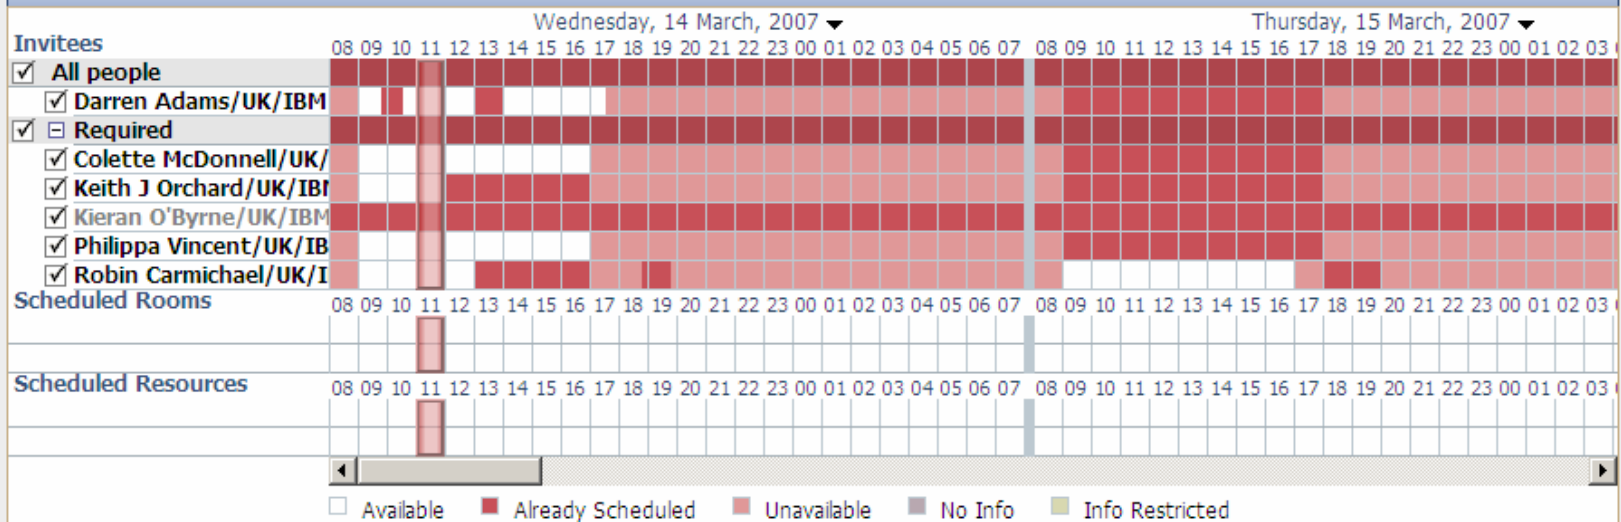

#8 – improved group scheduling

- Better laid-out forms
- Greater flexibility in scheduling options
- Tune-out people who are constantly unavailable

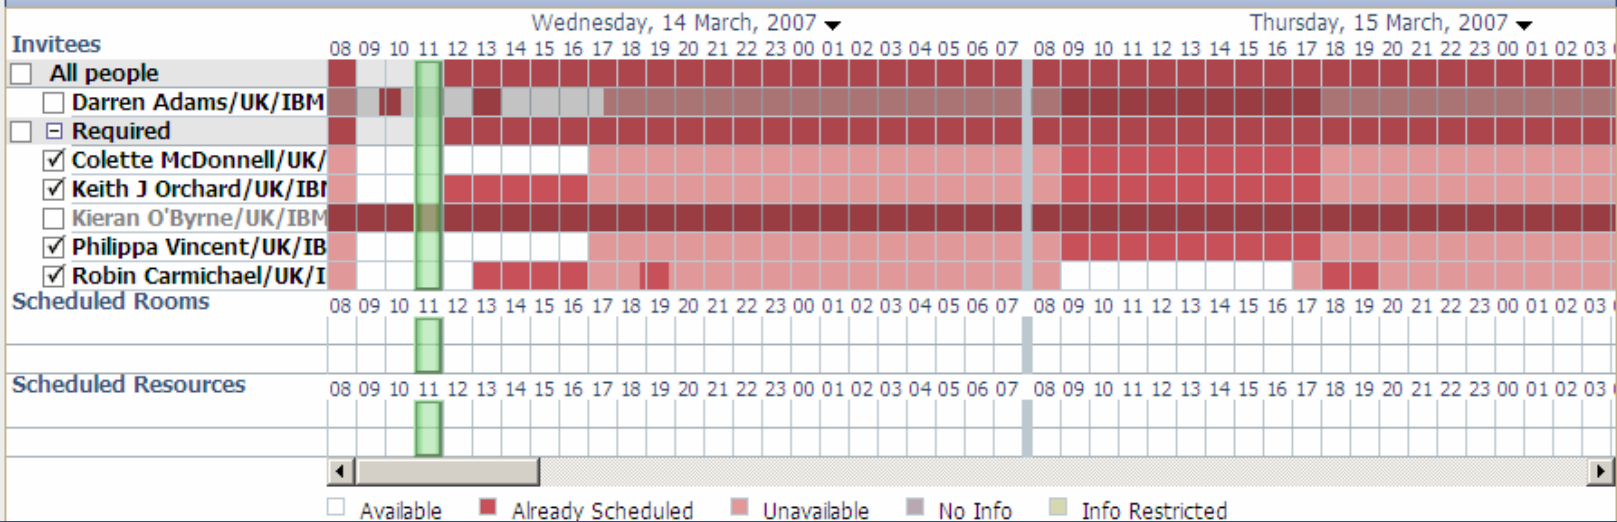

Select Invitees to find free time for just those individuals.

Summary Details

Select Invitees to find free time for just those individuals.

Summary Details

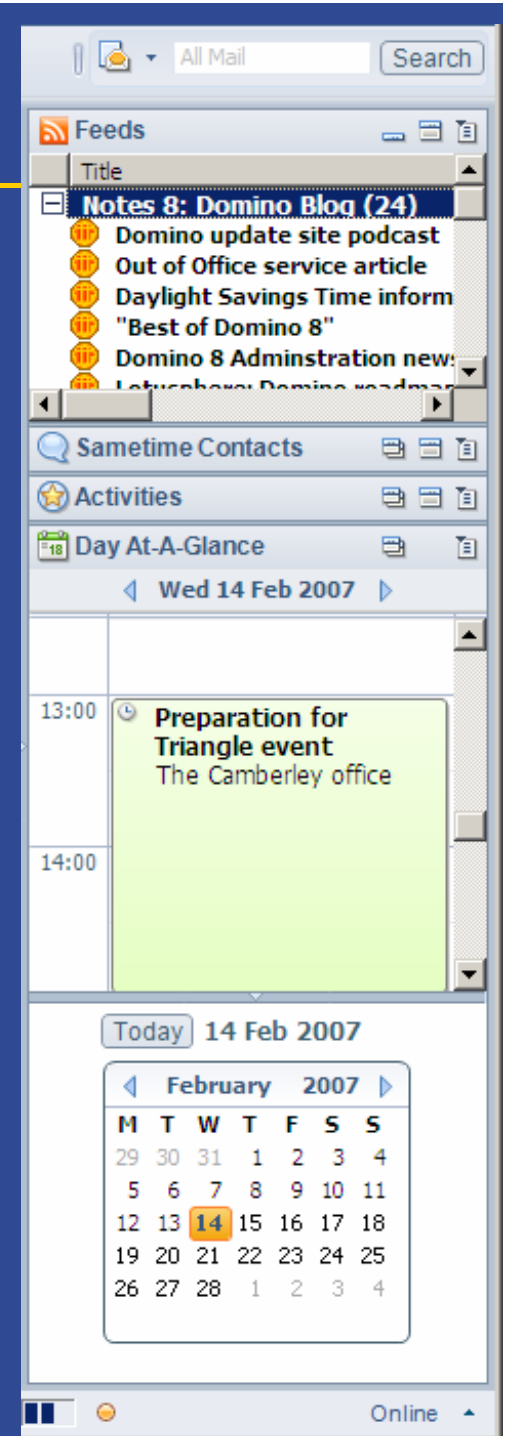

#9 – free productivity editors

- Free yourself from Microsoft tyranny
- Spreadsheet, presentation, document editor
- They're free
- Supported formats
 - ▶ Microsoft Office
 - ▶ Open Document Format
 - ▶ Lotus SmartSuite
- They're free
- Updated from the server
 - ▶ When a new version of an editor is made available, it's pushed down to the Notes client
 - ▶ Low-touch desktop reduces cost of ownership
- Export as PDF
- Did I mention they're free?

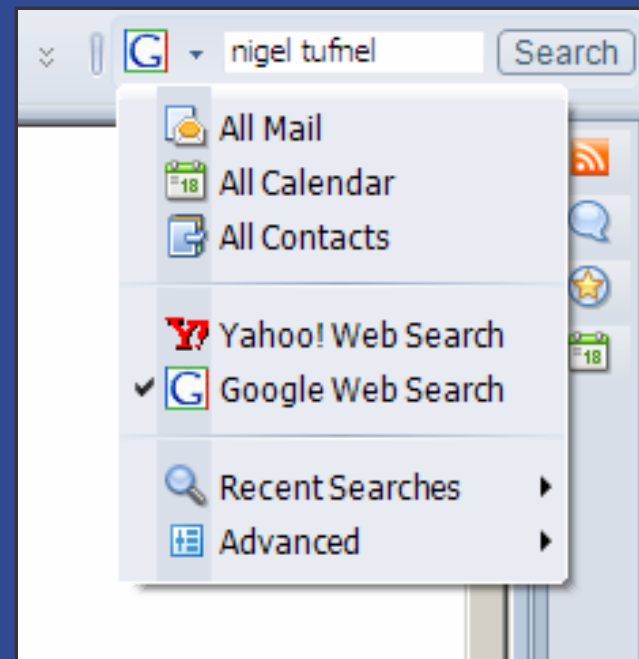

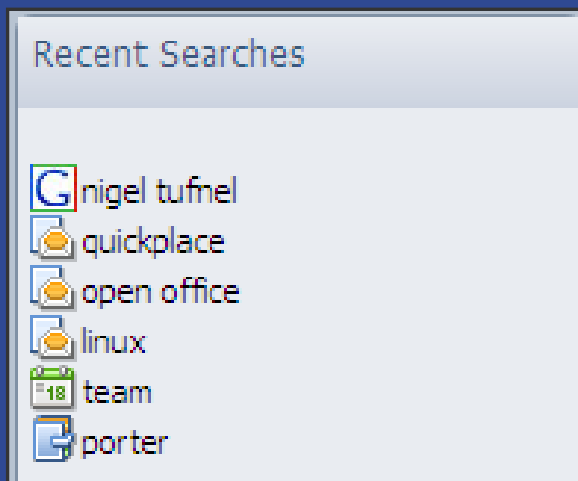

#10 – the sidebar

- By default contains
 - ▶ Sametime contact list
 - ▶ Day-at-a-glance
 - ▶ RSS feed reader
 - ▶ Activities (if you install it)
- Could contain more
 - ▶ For example, access to Quickr document libraries
 - ▶ Plug-ins you purchase or write internally

#11 – The search bar

- Search e-mail, calendar, contacts and the Internet directly from the search bar
- Browse through search history

Notes 8 FAQ

- When will Notes 8 ship?
 - ▶ 2H 2007 ... no firm date, but late in that quarter (subject to possible change)
- How much will Notes cost?
 - ▶ Pricing / packaging / licensing has not been announced
 - ▶ Unlikely to change from current model
- Are the productivity editors free?
 - ▶ Yes
- Is Sametime 7.5 included for free?
 - ▶ No, but there will be free integrated presence awareness and instant messaging as there is today
 - ▶ More functionality than in Notes 7, but less than Sametime 7.5
- Can you send me a beta version?
 - ▶ No ... beta 1 was a managed release to selected customers
 - ▶ However ... a public beta in Q1

Summary

- Notes 8 is 110% better than Notes 7
- Public beta Now available
 - ▶ Admit it, you all want it now
 - ▶ WWW.ibm.com/lotus/getnd8now
- Expected to ship 2H 2007

Thank you

Graeme Povall
