

# SHOWCASE® SUITE 8.0 INSTALLATION QUICK START

## SHOWCASE SERVER REQUIREMENTS

---

### Operating System and Installed LPPs

- IBM i5/OS V5R4M0 (or V6R1M0), with latest cumulative PTF package and group PTFs.
- 5722JV1 BASE: IBM Developer Kit for Java (V6R1 requires 5761JV1 BASE)
- 5722JV1 Option 7: Java Developer Kit 5.0 (V6R1 requires 5761JV1, option 7)
- 5722JC1 BASE: IBM Toolbox for Java (V6R1 requires 5761JC1 BASE)
- 5722SS1 Option 30: QShell (V6R1 requires 5761SS1, option 30)
- 5722SS1 Option 33: Portable App Solutions Environment (PASE). (V6R1 requires 5761SS1 Option 33.)  
To verify PASE is installed, type `GO LICPGM` and choose option 10. Install PASE using your iSeries SS1 CDs.
- Latest Java Group PTFs for JDK 5.0 (Apply after JDK 5.0 is installed)

## PASW COLLABORATION AND DEPLOYMENT SERVICES SERVER REQUIREMENTS

---

If you will use the PASW Deployment Portal or save files to the repository from Query or Report Writer, the following server components are required.

(The numbers may differ in V6R1)

- 5722SS1 Option 12: IBM Host Servers
- SF99291: Java Group PTFs:
- SF99504: Database Group PTFs
- 5733W61 BASE: WebSphere Application Server V6.1 for i5/OS (or option 1 below)
- 5733W61 Option 1: WebSphere Application Server V6.1 Express (or the base option above)
- WebSphere V6.1 Group PTF
- PASW Collaboration and Deployment Services (shipped on separate DVD)
- ShowCase Suite plugins for PASW Collaboration and Deployment Services

## PC REQUIREMENTS

---

- Microsoft Windows Vista (Business or Enterprise edition), Windows XP Professional, or Windows 2000 Professional.
- Intel® Pentium® processor, 1.8 GHz or higher
- Minimum 512 MB of RAM more than the minimum required by your operating system.
- MS Internet Explorer 6.0–7.0.x or Mozilla Firefox 1.5 (Netscape Navigator is not supported)

## TO INSTALL SERVER SOFTWARE

---

1. Save your current server information with the `SAVSRVRINF` command. For further instruction, see the *ShowCase Suite Administrator's Guide*.
2. Verify that the latest Java Group PTFs for JDK 1.5 are installed. See the *ShowCase Suite Installation Guide*.
3. Load the ShowCase Suite CD into the iSeries CD drive.
4. Log on with QSECOFR or equivalent authority.
5. Type `LODRUN *OPT` and press Enter.
6. When prompted for a path name, accept the default.
7. Follow the screen instructions and use Chapter 5 of the *ShowCase Suite Installation Guide* to finish installation.  
**Note:** If installation fails, check the job log for missing requirements. Type `DSPJOBLOG` at a command line and press F10. Page up or down to find the information.
8. If you will use PASW Collaboration and Deployment Services, use the `DPLSCPKG` command to install plugins. See Chapter 5 of the *ShowCase Suite Installation Guide*.

**Note:** If installing on Windows, see the PASW Collaboration and Deployment Services documentation for complete instructions and requirements. However, note that ShowCase Suite supports a subset of the environments supported by PASW Collaboration and Deployment Services:

- Windows 2003 Server (or 2003 R2)
- SQL Server 2005 database
- IBM WebSphere Application Server Express V6.1 or IBM WebSphere Application Server (full) V6.1  
-or-
- JBoss Application Server 4.2 or 5.0 (freeware)

## DOCUMENTATION OVERVIEW

---

For complete requirements and installation instructions, see the *ShowCase Suite Installation Guide* on the CD or on the Technical Support web site at <http://support.spss.com/>.

Additional ShowCase Suite documentation is available after installation. Choose Start > Programs > ShowCase Suite 8.0 > Documentation.

For late-breaking release notes, including known problems and restrictions, see the ReadMe (*screadme.htm*) at <http://support.spss.com/>.
