

# READ ME FIRST!

Here is your installation media, containing components of SPSS ShowCase® Suite. If you are upgrading from a previous version, note that Enterprise Reporting has been replaced with PASW Collaboration and Deployment Services™, which is distributed separately.

Before installation, be sure to read the **Installation Quick Start** sheet in this package.

**Important:** Licensing is very different in this new release. Read Chapter 4 and 5 of the **ShowCase Suite 8.0 Installation Guide** (available on the installation media and <http://support.spss.com>) before installing and licensing the product.

The Installation Quick Start sheet and the Installation Guide contain important information to consider prior to installation, such as server requirements, PC requirements, and instructions to help you install the software more quickly and easily.

You must also obtain a product authorization code. Instructions on how to do this are given below.

## **Product License/Authorization Codes**

To obtain product license/authorization codes, log in to the SPSS Technical Support Web site at <http://support.spss.com>. Click “My Corporate Info” and then “License/Authorization Codes.” Your system license/authorization codes are listed.

If you forget your user name and password, click “Login Options” and then “Forgot my password/userid.” Enter the required information and your login information will be e-mailed to you.

If you are new to Support, click “Request a Login” to request a login ID. After submitting your request, your login information will be e-mailed to you, allowing you to access the SPSS Technical Support Web site.

### Stay up to date

You can find the latest news about SPSS Inc. products and services in our FREE monthly e-mail newsletter, *SPSS Direct*. Subscribe online at <http://www.spss.com/corpinfo/newsletter.htm>.
