# Product Development Gone Wrong!

“Product development says it’s based on the latest technology.”

# Product Development Gone Wrong!

“Forget about softness. Tests show we could triple sales if we add pepper.”

# Our Approach ...

# The Virtuous Cycle of Analytics

Data & Workloads

- Web click data
- Call detail records

- Blogs and Feeds
- Social media analysis

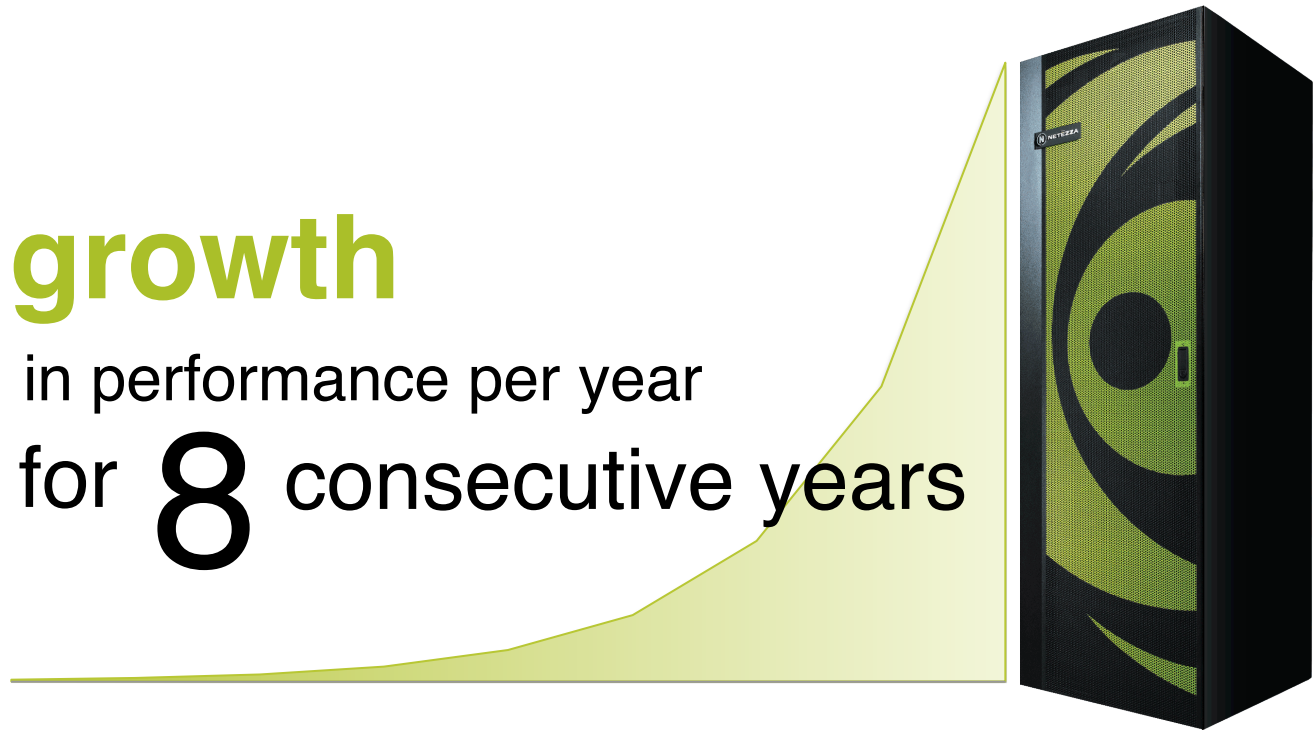

- Logs and transactions
- Fraud detection

# Software Roadmap: Netezza Performance

**2X** growth

in performance per year  
for **8** consecutive years

# Operational Analytics: Variety and Velocity

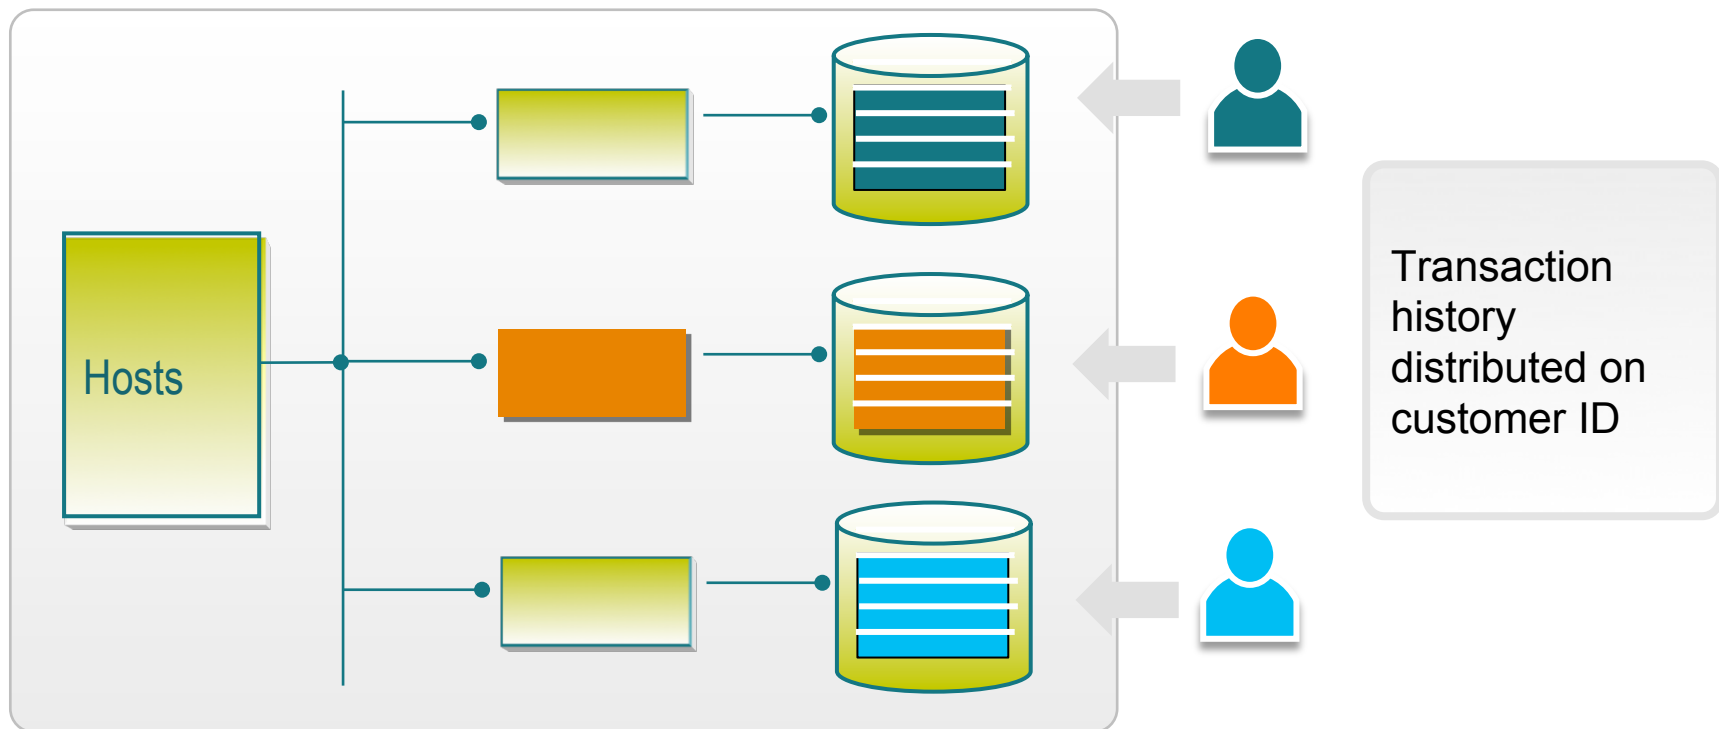

- Shift from batch-oriented to inline analytics
- Web and smartphone based behavioral targeting

- Web-based interactive applications
- Rich information and analytic portals

# Distribute Restrict Optimization

- Individualized offer based on customer's purchase history
- Query restricts on distribution key for fact table

# Granular Zone Maps

## Individual customer transactions

- Narrow data range

## Granular Zone Maps

- Work at page level
- Potential 24X reduction in reads

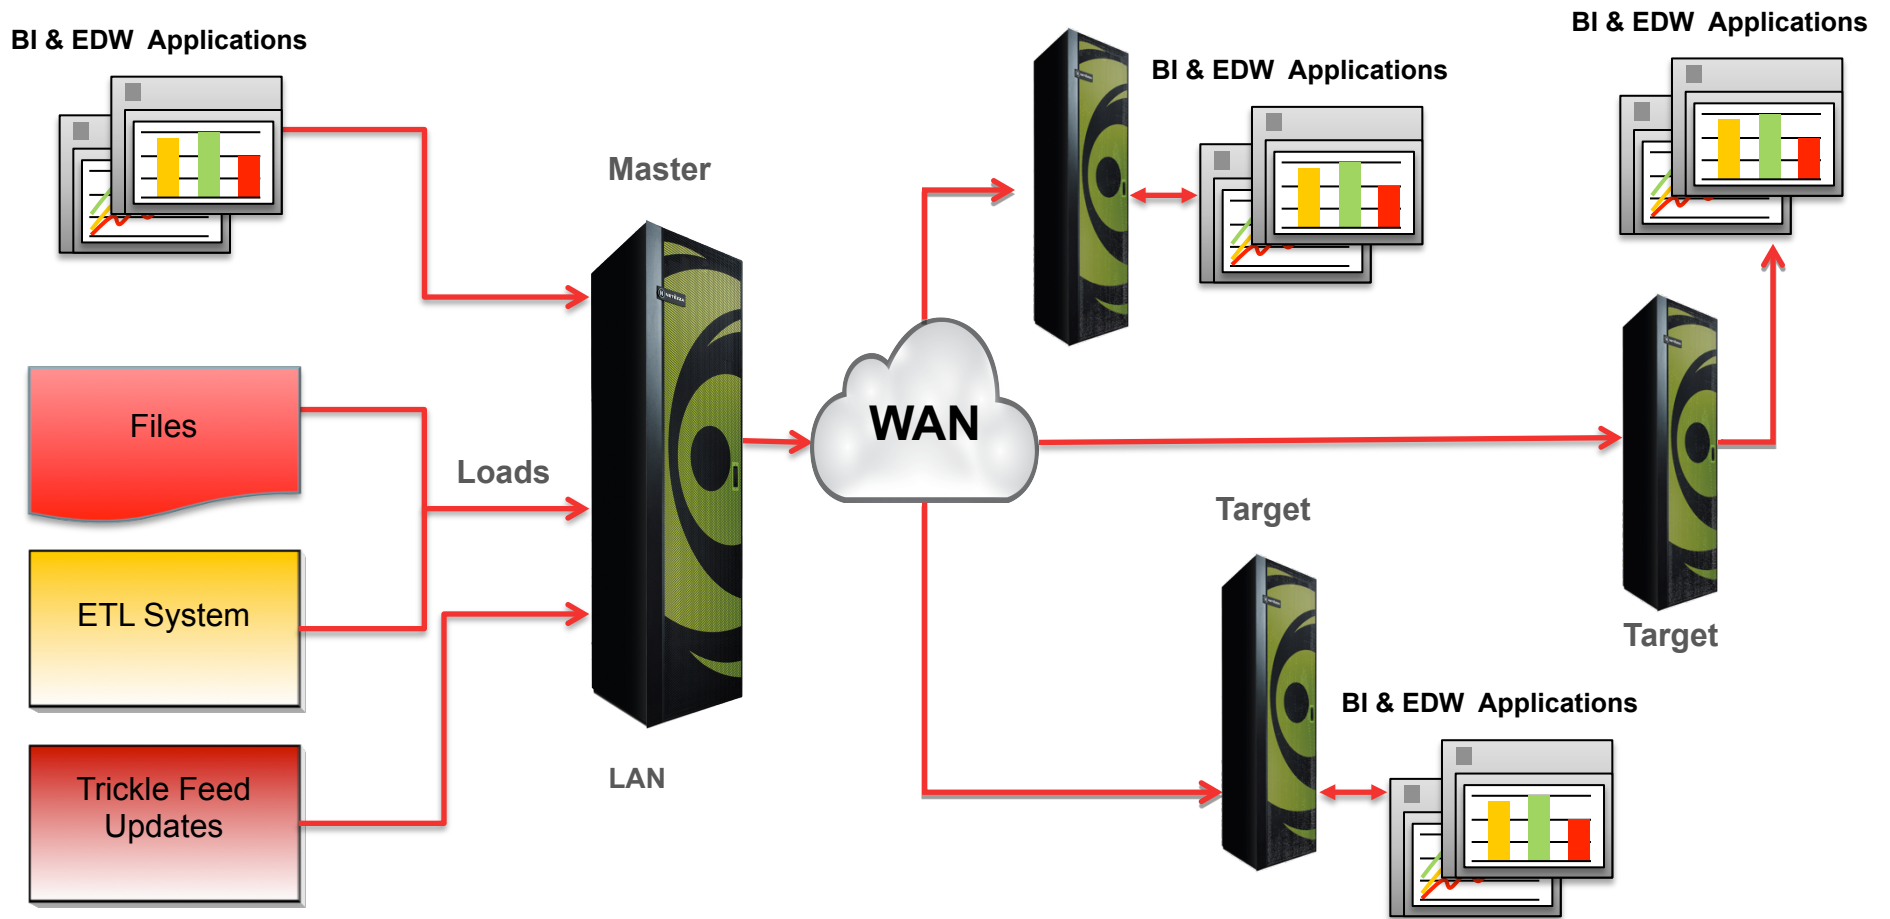

# Smart Caching

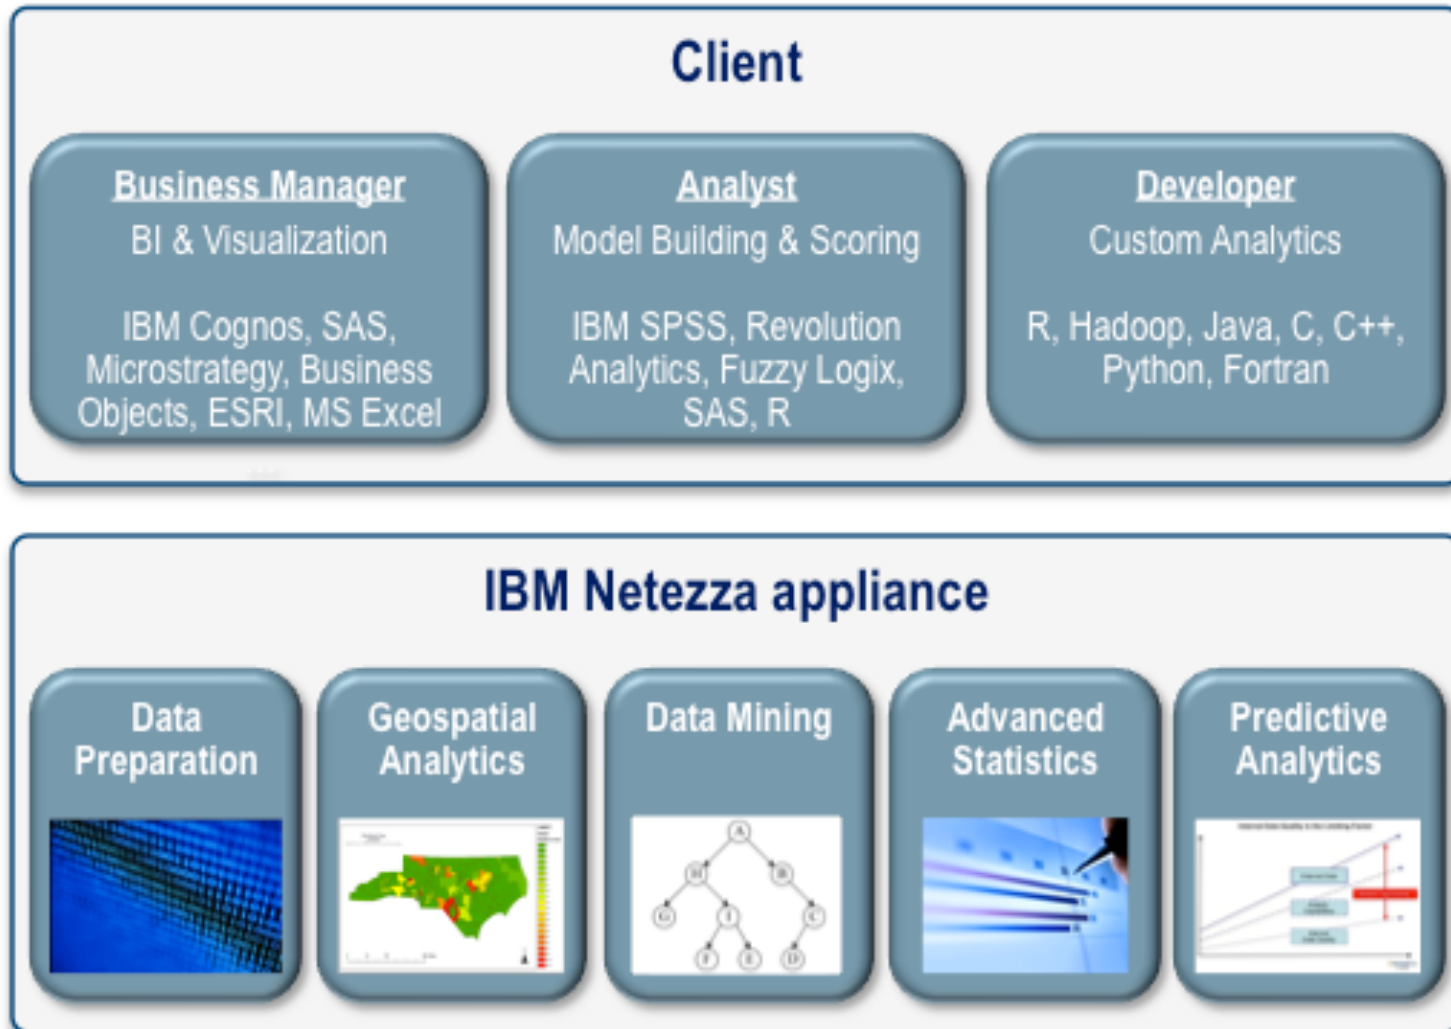

- Busy workload with common query patterns and reports
- Snippet results
- Pre-broadcast tables

# Phase I: Async Replication for DR and Concurrent Access

# IBM Netezza Analytics

# Analytics Roadmap Themes

Theme	Examples
Enable Analytic Organizations	<ul style="list-style-type: none"><li>• In-database, parallelized advanced analytics</li><li>• SAS acceleration</li><li>• PMML support</li></ul>
Differentiate with Performance	<ul style="list-style-type: none"><li>• UDX performance enhancements</li><li>• Hardware acceleration (e.g., GPU)</li><li>• Extreme performance – (e.g., matrix, MPI)</li></ul>
Enrich Our Analytics Partner Ecosystem	<ul style="list-style-type: none"><li>• IBM SPSS</li><li>• Fuzzy Logix</li><li>• Revolution Analytics</li><li>• SAS</li><li>• ESRI</li></ul>
Align with Emerging Technologies	<ul style="list-style-type: none"><li>• Open source support</li><li>• Hadoop</li><li>• R</li><li>• Real-time data processing</li><li>• GPU</li><li>• Flash</li></ul>

# Velocity: Operational Analytics

## Optimize routes for nationwide trucking fleet

- Minimize fuel, labor and equipment costs
- Maximize revenue and customer sat

## Optimize switching routes for global voice traffic

- Minimize cost; Deliver voice quality
