

IBM Systems and Technology Group University 2005

Infrastructure Simplification

Leverage AIX 5L to Beat HP and Sun

Session I13

Craig Johnson, Mike Martin

Doug Mack, Louise Hemond-Wilson

© 2005 IBM Corporation

Thanks for the Fast Start in 2004 !

- **Delivered incremental revenue**
- **Significant competitive wins**
- **Sales & Technical skills development**
- **Customer references**
- **Strong momentum for even more success in 2005!**

MICO Bosch

■ Background

- Motor Industries Company Ltd. (MICO), a subsidiary of Robert Bosch AG, Germany, is India's largest Auto-Component company

■ Objectives

- Deliver better performance for OS/400 applications running on 820s and 270
- Select server to support new SAP application

■ Solution

- Two eServer i5 570s
- i5/OS supporting ERP application: PRMS
- AIX 5L supporting new SAP and Oracle
- 2nd server for disaster recovery

By supporting both application environments, the eServer i5 is able to deliver a solution implementation that HPQ and Sun could not match

Flintshire County Council

■ Background

- Flintshire County Council supports schools, roads, taxes, Social Services, and leisure facilities

■ Objectives

- Increase capacity of 825 servers and consolidate 720
- Update end of life hardware supporting AIX 5L
- Consolidate 30 Novell file servers

■ Solution

- Two eServer i5 570s running 18 partitions
- i5/OS: finance, administration, and Domino
- AIX 5L: HR and payroll running Oracle
- Linux: file and print services
- 2nd server for high availability with Mimix and HACMP

“The Micro-Partitioning on the 570s will enable us to run the equivalent of 18 different servers on just two physical machines, and re-allocate capacity and resources between them in an incredibly flexible way.” John Thomas, Operational Services Manager

Fang Brothers Knitting

■ Background

- Global textile and apparel manufacturer with headquarters in Hong Kong
- Manufacturer for Gap, Ann Taylor, Tommy Hilfiger, and more

■ Objectives

- Provide more capacity to support company expansion
- Improve customer relationship management

■ Solution

- Two eServer i5 520s
 1. i5/OS with RPG-based Garment application to support Hong Kong users and migration from Exchange to Domino mail.
 2. One i5/OS partition with Garment application for China and AIX 5L partition to run CRM application from e-Jing -- built with WebSphere and Oracle

eServer i5 with its multiple operating system capabilities can support a broad spectrum of applications

Greif

■ Background

- World leader in industrial packaging products & services for various industries.
- 175 operating locations in more than 40 countries.

■ Objectives

- Consolidate regional applications and 100+ servers
- Move to a single ERP global instance
- Introduce high availability

■ Solution

- IBM eServer i5 570 8-way with 9 Logical Partitions (LPARs)
 - 2 i5/OS Processors ,6 AIX 5L Processors, + Linux
 - Migrated Baan+Oracle solution from HP/EMC to eServer i5 AIX partition
 - Consolidated regional applications into centralized i5/OS architecture (BPCS)
 - Migrated Domino environment from Windows to i5/OS
 - Moving some infrastructure applications to Linux
 - Windows applications on Integrated xSeries Server

“The eServer i5 570 system rapidly improves the rate at which Greif can integrate operations into its IT infrastructure which is critical to support the company's growth objectives.”

Ken Andre, Global Director, Business Information Services, Greif

IT Priorities

- 70% of IT managers say **Optimizing Utilization of IT resources** is a top priority

Source: IBM it Trends 1H 04

Infrastructure Simplification

- 45% of customers plan to simplify their environment in next two years

combining data from different sources into a single repository for central management/control

replacing several small servers with a fewer number of larger, more powerful servers

virtualizing the network and network access to enable central management and control

moving applications and/or data to a new platform to co-locate the application/data

reducing the number of physical locations

Response categories:

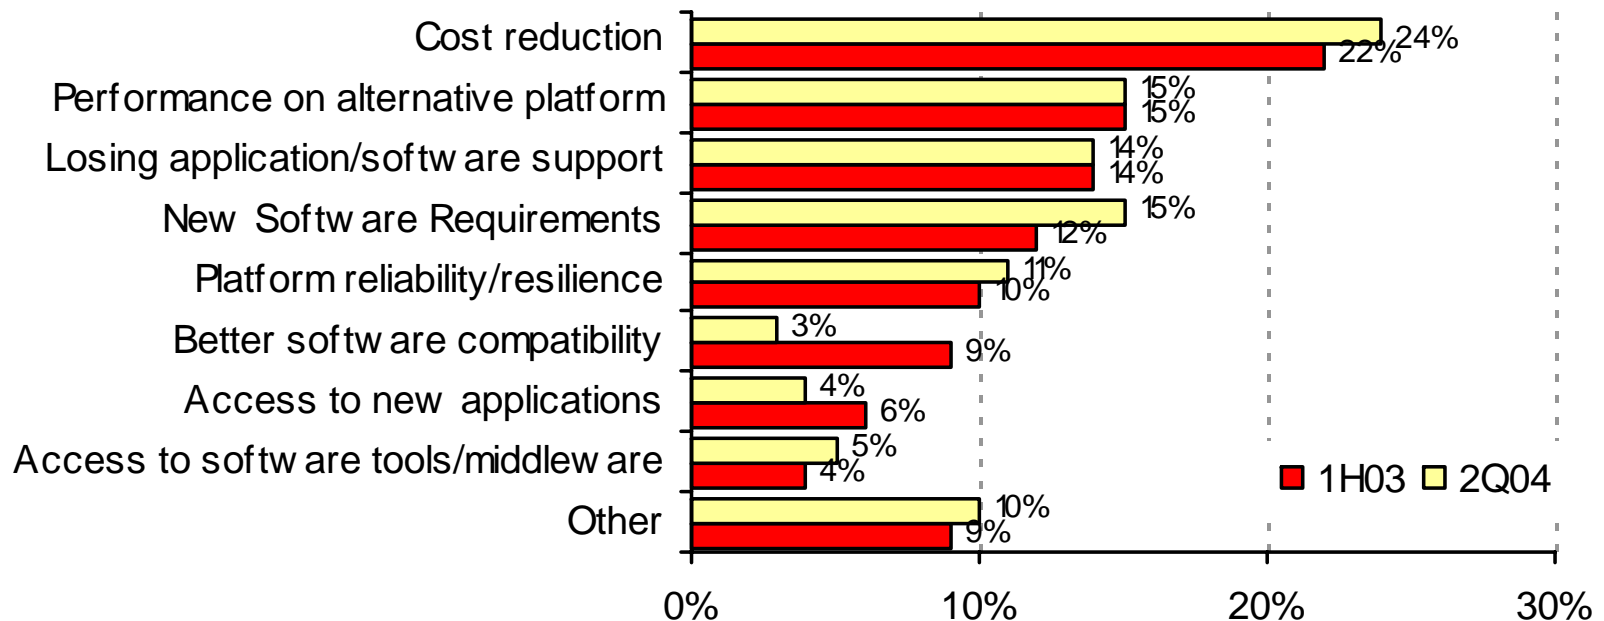

- Planned in 2004
- Planned within 18 months
- Planned within two years
- Being considered but no target date set
- No plans

Source: IBM it Trends 1H 04

Workload Migration

- 35% of customers plan to migrate significant workload to a new platform

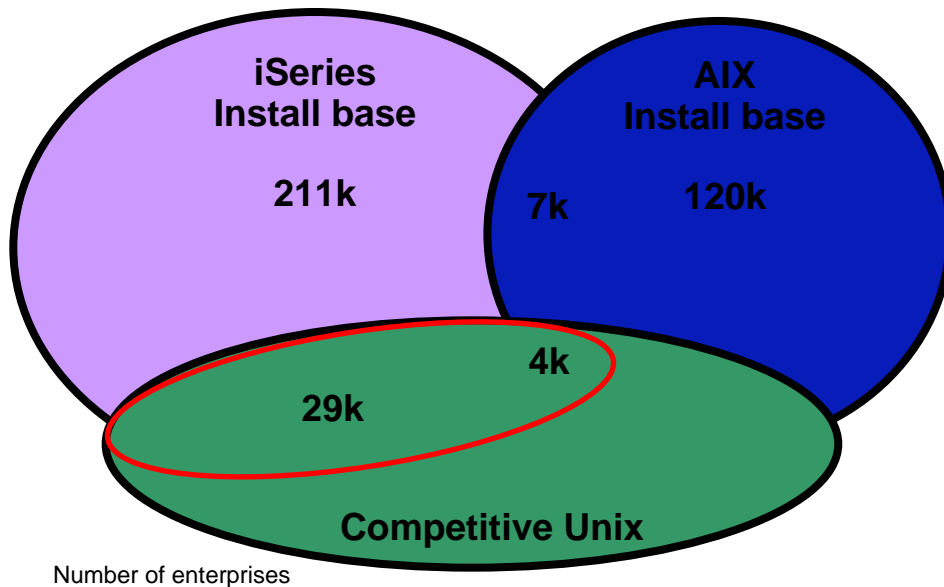

Primary reason to migrate significant workloads

Source: IBM it Trends 1H 04

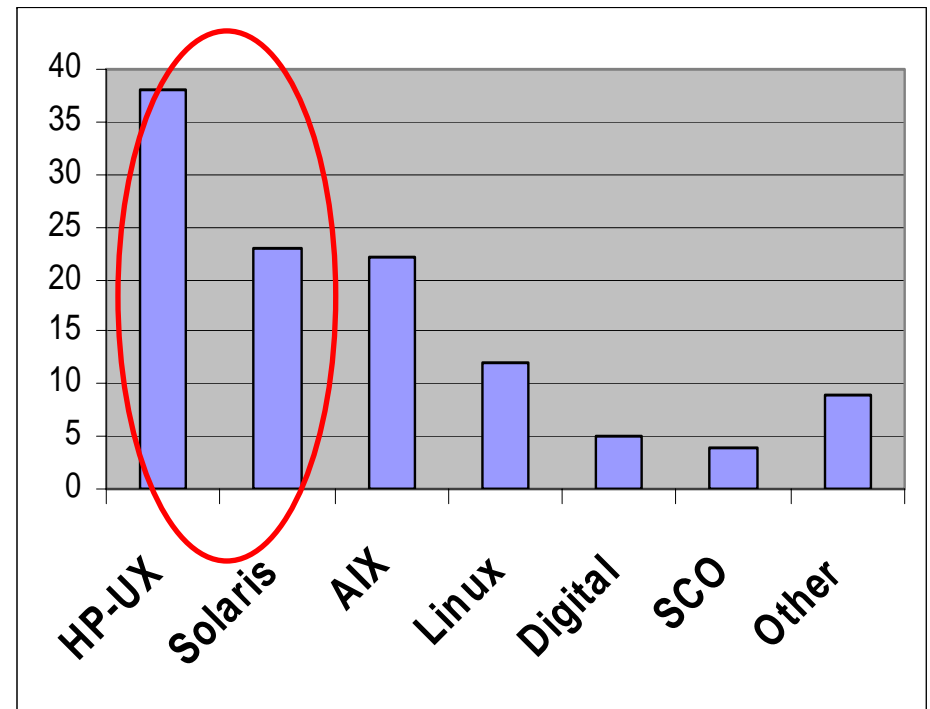

iSeries Customers with UNIX servers

WW Install Base

Number of enterprises

% iSeries Large Ent with Unix

Two Opportunities for AIX 5L on eServer i5

- **Common Characteristics**

- Existing iSeries customer
 - Or new customer with i5/OS application requirements
- Benefits from iSeries value proposition

- **The “Consolidator”**

- Company Acquisition
- UNIX servers coming off lease
- Looking to reduce # of vendor relationships
- Facing application pain points
- Vendor forcing migration
- Software licensing

- **The “Application Selector”**

- Looking to deploy a new business application
- Selected UNIX application
- Now making decision where to deploy application

Value Proposition for AIX 5L on eServer i5: **Simplify Your Infrastructure**

Simplify your Infrastructure

- **Reduce complexity and costs**
 - Pool your resources by managing multiple environments on a single server
- **Handle constant changes**
 - Automatically respond to changes in processor demand with logical partitioning
- **Save time and money**
 - Simplify management of IT resources with storage virtualization
- **Increase business agility**
 - Expand with broad application portfolio
- **Deliver business continuity**
 - Protect consolidation resources

eServer i5 is a UNIX Server

- **Runs same AIX 5L as eServer p5**
 - AIX 5L 5.3 and 5.2
- **For the same Price**
 - AIX 5L is priced Per Active Processor Running AIX 5L
- **At the same Performance**
 - AIX 5L performance on eServer i5 is equivalent to eServer p5 with the same configuration

	License	SWMA (Annual)* 5771-SWM	
	One Time Charge	Standard	24x7 Upgrade
520	\$430	\$650	\$166
550	\$430	\$650	\$166
570	\$1,225	\$725	\$183
595	\$2,495	\$1,785*	\$ 732*

Benchmarks	520 Results	550 Results
SPECfp2000	2138 (1 CPU)	2221 (1 CPU)
SPECfp_rate2000	43.0 (2 CPUs)	84.8 (4 CPUs)
SPECint2000	1248 (1 CPU)	1248 (1 CPU)
SPECint_rate2000	32.9 (2 CPUs)	65.5 (4 CPUs)

* 3 year prices for SMWA via 5773-SM3 US prices and terms Plus a \$50 Media charge

Source: <http://www.spec.org/cpu2000/results/res2004q3/> on 9/10/04

Differences between eServer i5 and eServer p5

- **Operating System Flexibility**

- eServer i5 offers flexibility in supporting i5/OS, AIX 5L, and Linux capacity
- eServer p5 servers support 1 i5/OS processor's worth of work on a p5-570 and two processors on p5-590 and p5-595

- **Processor Speed**

- eServer p5 currently offers high end servers with: 1.5 GHz, 1.65 GHz, and 1.9 GHz

- **Virtual I/O Server**

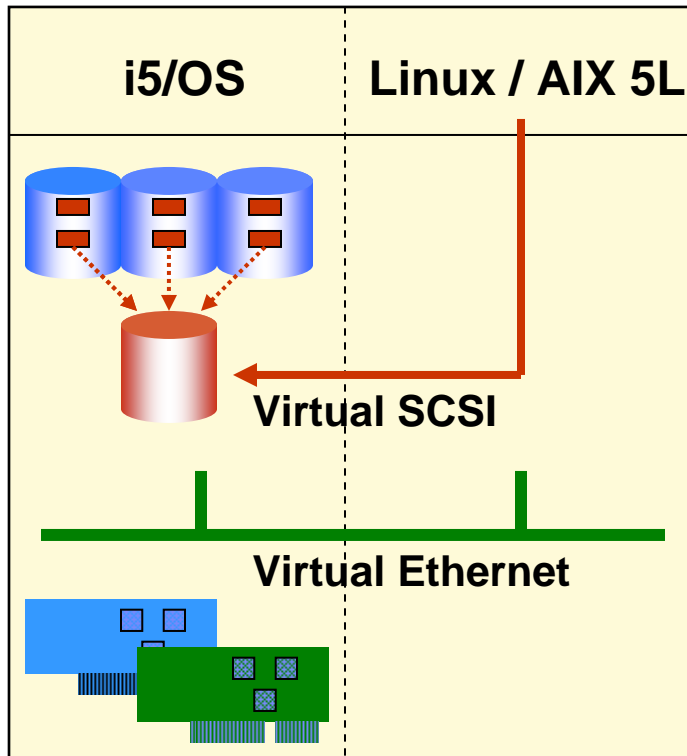

- Partition to serve I/O to AIX 5L and Linux partitions
- Based on AIX 5L, but is only used to serve I/O
- Currently available on eServer p5 servers

- **Machine Type**

- eServer i5 is a 9406 or 9405
- eServer p5 is a 9111, 9113, 9117, or 9119

Virtual I/O

eServer i5

- i5/OS Resources
- Disk, Ethernet, Tape, DVD/CD
- Any i5/OS partition
- Built into every eServer i5

eServer p5

- Resources supported by AIX 5L
- Disk, Ethernet
- Virtual I/O Server partitions
- Add on Partitioning Feature

eServer i5 Editions

- **Service Voucher**
 - 550 Enterprise and Solution Edition
 - 570/595 Enterprise Edition

- **AIX 5L Service includes:**
 - 2 day IBM service engagement
 - One license of AIX 5L
 - One year SWMA
 - Setup and configuration of AIX 5L
 - Skills transfer on use of HMC

- **Service Voucher requires web registration for redemption**
 - http://www-1.ibm.com/servers/eserver/iseriess/hardware/editions/registration_bridge.html

	Extra Processor for AIX 5L	Service Voucher	Education Voucher
520 Enterprise		Yes	
550 Standard	Yes		
550 Solution	Yes	Yes	
550 Enterprise	Yes	Yes	Yes
570 / 595 Enterprise	Yes	Yes	Yes

* Vouchers not applicable for AP

AIX 5L Solution Portfolio

- **AIX 5L 5.2 and 5.3 applications can run unchanged on eServer i5**
 - Experience with Oracle, Baan, SAP, I2, and PeopleSoft

- **Virtual and Direct I/O are implementation options that typically do not impact ISV applications**
 - 100s of engagements with Linux and AIX ISVs
 - There are numerous I/O subsystems used in the server market
 - SCSI, ESS, EMC, FastT, etc
 - Majority of applications are written to be indifferent to I/O

- **Virtual Loaner Program**
 - For ISVs that want to test their application on AIX 5L 5.3 on eServer i5
 - <http://www-1.ibm.com/servers/enable/site/vlp/>

- **SWG Strategy with AIX 5L is to support products on eServer p5 and eServer i5**
 - Numerous products are supported today
 - DB2 UDB, Informix Dynamic Server, Lotus Domino, Tivoli Clients; TEC, Monitor, CM, TSM, WebSphere Application Server, WebSphere MQ, WebSphere Portal

AIX 5L Sales Strategy

- **Infrastructure Simplification - Value Proposition**
- **Why is AIX 5L important to iSeries**
- **Approaching the customer**
- **Objection handling**
- **2005 Sales Strategies**
- **2005 BP requirements to sell**
- **Resources**

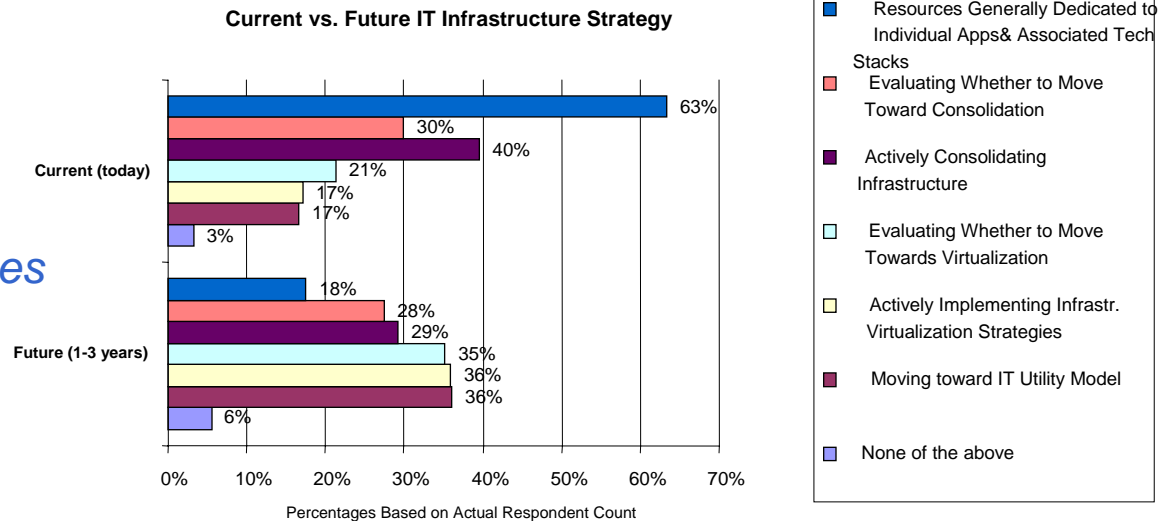

Infrastructure Simplification

*Infrastructure Simplification helps to reduce **complexity and costs**, improve **resource utilization**, and helps **simplify the management** of the IT resources to increase **business flexibility**, productivity and help enable **business growth**.*

It is about simplifying and optimizing end-to-end IT infrastructure

- Servers
- Databases
- Applications
- Networks
- Systems management processes
- Business Continuity

The goals of Infrastructure Simplification

- Reduction of costs and complexity
- Delivering a rational, stable IT foundation that enables growth

Why is AIX 5L important to iSeries

- **Capture customer Wallet Share**
 - ❑ OS400 CPW Capacity upgrades are not driving enough eServer i5 volume
 - ❑ iSeries customers are running UNIX solutions
 - ❑ Need to introduce additional workloads/solutions to drive POWER5 cycles

- **Significant Opportunity**
 - ❑ UNIX is a mature OS with significant solution set
 - ❑ SUN continues to struggle in the industry

- **Differentiating value proposition**
 - ❑ Focus on Server Consolidation, eServer, & On Demand messages vs speeds and feeds of UNIX
 - ❑ Approach customer with “Infrastructure Simplification Solution”

at iSeries* sites			
	1H02	1H03	1H04
Windows	89%	90%	↑95%▲
UNIX	49%	52%	↑58%▲
Linux	24%	32%▲	↑38%▲
Mainframe	26%	25%	29%

Sales Approach

- **AIX 5L on eServer i5 is an install base play**

- **Ideal customer has less than 5 UNIX servers to consolidate**

- **Understanding your customer IT/Server eco-system**
 - OS Strength
 - Lead with appropriate eServer Offering
 - Application flexibility
 - Leverage iSeries Strengths
 - Storage
 - Backups
 - Extend HA to UNIX solutions
 - Vision, Lakeview
 - iSeries Upgrade path
 - iSeries Migration Path

Customer	Messages
iSeries Guy	<ul style="list-style-type: none"> ▪ Extend OS400 benefits to other key applications (be the hero)
UNIX Guy	<ul style="list-style-type: none"> ▪ Power5 Sales Specialist ▪ Virtualization engine
Executive	<ul style="list-style-type: none"> ▪ On Demand business benefits ▪ Business Continuity ▪ iSeries Delivers easy to manage cost structure ▪ Investment protection

Success Plan for 2005

1. Assess your customers

- Open your eyes to the entire application ecosystem
- Open your ears to all the influencers in the customer
- Ask open ended questions
 - What UNIX applications are you using today?
 - What are your plans for deploying new Unix applications?
 - What are the applications that are critical to your business?
 - How do you backups?
 - What is your high availability strategy?

2. eServer i5 AIX 5L Focus Opportunities

- Competitive take-out (HP & SUN).
- Server consolidation (iSeries and pSeries workloads (secondary focus)
- NET NEW apps that are only supported in AIX 5L that can supplement an i5/OS solution

3. Get tactical

- Develop a targeted list of iSeries customers (potentially) leveraging UNIX today
 - Sell to CXX
 - Review eServer i5 AIX 5L capabilities and business benefits
- Define complimentary UNIX solutions for your eServer i5 customer

Sales Tools & Resources

AIX Migration Factory – Specializes in rehosting applications and databases from competitive platforms to IBM platforms. Migrates applications from Linux, HP Tru64, Sun Solaris, HP HP-UX, DG DG-UX, Sequent DYNIX/ptx, SGI IRIX, SCO, NCR, AT&T

Assessment

- Ho do I do this?
- What will it cost?
- How long will it take?
- What are the risks to my business?

CDAT (Customer Data Analysis Tool) – A network sniffer like tool that can gather customer's Intel and **Unix** server performance data:

- 4 day class
- Gain access and training to CDAT Tool
- Education & labs on how to analyze data and build iSeries SCON proposals

<http://www-306.ibm.com/services/learning> : course XTR80

Napkin Sale - Sell the concept of iSeries Infrastructure Simplification:

- Server consolidation
- Application Integration
- Simplified Backup & Recovery

Information is provided "AS IS" without warranty of any kind.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only. Contact your local IBM office or IBM authorized reseller for the full text of the specific Statement of Direction.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Photographs shown are of engineering prototypes. Changes may be incorporated in production models.
