You're invited

# CICS TS Integration Workshop

A Special Customer Event with presentations and hands-on labs
**Where: IBM - 325 McDonnell Blvd., Bldg. 300 Hazelwood, MO 63042**
**Date: September 15 – 17, 2009**
**Time: 8:30AM – 5:30PM**

CICS TS V4.1 provides new options to address today's integration needs. These integration options include Web Services, Web, Web 2.0, and RESTful interfaces, PHP, ATOM Feeds, the CICS Transaction Gateway, WSRR, Events, SCA, CICS's Business Event processing, and the smart new face of CICS, the CICS Explorer.

These integration options can provide your company with a business advantage by allowing you to leverage your existing CICS-based business functions and data, plus your company's CICS programming skills, to make your data and business logic available via modern interfaces. Tools, both for development and administration, enhance productivity.

This 3-day workshop will use a combination of lectures and labs to survey various CICS integration options, with an emphasis on those options available in CICS TS 4.1. This workshop you will help you better understand CICS integration options and their technical implications relative to configuration, transactionality and security. Upon completion of this workshop, you should have a better understanding of how these integration technologies can fit into your current environment, and the education needed to help you become productive.

This Workshop complements IBM's WebSphere Education's offerings. For list of education on CICS's Web service support or other CICS-related topics, consult the IBM WebSphere Education Web site at
http://www-01.ibm.com/software/websphere/education/curriculum/cics/index.html

**Cost:** This workshop is offered free of charge. Customers are responsible for their own travel and lodging. Lunch will be provided.
